Congressional Record

PROCEEDINGS AND DEBATES OF THE 101st CONGRESS, SECOND SESSION

SENATE—*Friday, March 30, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the Acting President pro tempore [Mr. KOHL].

The ACTING PRESIDENT pro tempore. Today's prayer will be offered by the Reverend John E. Stait who is the assistant to the Chaplain here at the U.S. Senate.

PRAYER

The Reverend John E. Stait, Assistant to the Chaplain, U.S. Senate, offered the following prayer:

Let us pray:

For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who hold the truth in unrighteousness.—Romans 1:18.

Righteous and forgiving God, help us today in the Nation's Capitol to not suppress truth and therefore not be in right relationship with one another. Help us to admit to ourselves when we have thought wrong or done wrong acts. Help us to admit to others also our shortcomings and repent and ask their forgiveness.

We so easily want to save our own lives and therefore we lost them. It is so natural to want to protect ourselves from the pain of guilt.

Help us to heed to scripture when it says, "Confess your faults one to another, and pray one for another, that ye may be healed."—James 5:16.

Amen.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Chair recognizes the majority leader.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, this morning following the time for the two leaders, there will be a period for morning business not to extend beyond 11 a.m. with Senators permitted to speak therein for up to 5 minutes each. At 11 this morning the Senate will resume consideration of the clean air bill, S. 1630.

Right now, Senators BAUCUS and CHAFEE are meeting in my office with Senators interested in the allowance provisions of the clean air bill. Depending upon the results of that meeting and the time at which it concludes, I will shortly have an announcement for Senators on the schedule for the remainder of the day.

It is the managers' desire, which I support, to complete action on all allowance amendments today. We do not yet know and will not know until that meeting is completed whether any votes will be required in that regard. So Senators should be aware that there may be votes today, depending upon results of the meeting now underway. I will have an announcement as soon as possible.

The Senate will be in session on Monday to consider any amendments which Senators wish to offer at that time. Senators are all now aware we are going to complete action on this bill on Tuesday, so we do not want any Senator to be backed up against the deadline and feel that he or she has not had the opportunity to present his or her amendment with opportunity of a full debate. There will be ample time if Senators wish to offer amendments today or Monday or Tuesday, prior to the deadline.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time, and I reserve all the leader time of the distinguished Republican leader.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for morning business not to extend beyond the hour of 11 a.m. with Senators permitted to speak therein for not to exceed 5 minutes each.

The Chair recognizes the Senator from Montana [Mr. BURNS].

Mr. BURNS. I thank the Chair.

(The remarks of Mr. BURNS pertaining to the introduction of S. 2372 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

WOLVES

Mr. BURNS. Mr. President, I would like to bring to the attention of other Senators an article by Carl Rieckmann, written in the March 2, 1990, issue of Agri News, which is an agricultural paper, which covers Montana, Wyoming, part of the Dakotas, and part of Idaho. The article is titled "Minnesota Wolves Roam Out of Their Boundaries."

Mr. President, wolves are returning to many of our northern tier States, and with their return are increasing numbers of livestock killings that are directly attributable to the wolf. As an endangered species, these wolves are completely immune from traditional methods of control. But as livestock losses climb, stockmen are starting to look for protection from depredation or for compensation of livestock losses. Such is the case in Montana, where livestock losses continue and are up a little bit this year.

Mr. President, many of my colleagues have no idea of the impact Federal law has when it comes to protecting or putting an animal on the endangered species list, such as an animal like the wolf. I recommend to them the article, and I ask unanimous consent that the article be printed in the RECORD.

● This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MINNESOTA WOLVES ROAM OUT OF THEIR BOUNDARIES

(By Carl Rieckmann)

The wolves of Minnesota just don't pay attention to those habitat boundary lines that the federal bureaucrats draw on maps and publish in official notices for them.

Evidence is mounting that an increasing population of wolves is expanding into areas never intended as habitat as Minnesota's wolf recovery program comes off one of its worse years for depredations on domestic animals.

Against that backdrop, federal managers—with public input—are readying to redefine how the Eastern Timber Wolf Recovery Plan should proceed.

First adopted in 1978, this wolf protection/management program is undergoing a proposed update, published recently in the Federal Register, with public comment open for 60 days until March 31 and a final plan not likely until sometime during next summer.

(Interested persons may contact the U.S. Fish and Wildlife Service's regional office, which is taking comments, as follows:

Asst. Regional Director Larry Hood, USFWS, Box 45, Federal Bldg., Fort Snelling, Twin Cities, MN 55111.)

How the plan is reformulated may make a difference to farmers in northern Minnesota who face the prospect of more problems from roving wolves.

Jim Till, a wildlife biologist for U.S. Agriculture Department's Animal Damage Control (ADC) office overseeing the northern Minnesota wolf habitat, says population-growth pressures in the areas originally intended as wolf habitat appear to be encouraging migrations outside of traditional boundaries.

In Minnesota's extreme northeastern corner, there's a relatively small zone—tied in with the Boundary Waters Canoe Area Wilderness—where wolves are given absolute protection and where attacks on dogs have increased.

Then other habitat management zones in Minnesota's northeastern and northcentral areas accord various degrees of ADC management and control.

The remaining stretch of Minnesota west to North Dakota and the other two-thirds of the state lying south are in what management call Zone 5, non-wolf habitat in the plan.

But because the northeastern and northcentral zones "seem to be primarily saturated" by wolves, notes Till, the only directions the predators can travel are south and west into Zone 5.

"We do a lot of depredation control work in this area, more than we used to," observes Till, who also points out, "It's kind of the wolf nature to move around a lot."

The biologist says Minnesota's Department of Natural Resources is expected to announce a new estimated population "any day now." Its last count, about a decade old, envisioned about 1,200 wolves.

"I think there's no doubt that there's more wolves now," figures Till.

He notes ADC faces constraints in managing wolves in the non-habitat area because they usually are denning in wildlife refuges and state forests.

Through channels, the local office is seeking support to give ADC more flexibility to do some "preventive work" in Zone 5 where chronic problem areas are known to exist.

"We're not going to trap wolves just because they're there," explains Till.

"Originally, they recommended no wolves in this area, now that they're there, it might be a little easier to relax restrictions there."

Otherwise, he observes, "you're handcuffed in some areas" to help farmers.

And the reality of Zone 5 is that the percentage of farm acres increases as wolves roam further west or south from the intended wooded habitats, he notes.

The biologist says wolves are very adaptable to new turf, so long as they have deer or other food and at least small wooded areas with some adjacent brush cover to move about undetected.

With those few elements, he explains, "they can live almost anywhere."

In 1989, the Minnesota Department of Agriculture paid out its highest annual amount of compensation since 1977, when the program started, to farmers for 76 verified livestock/poultry loss claims—$43,664.

Although complaint distributions tended to be similar as in previous years, William J. Paul, ADC's district supervisor, reports 49 percent of the 1989 compensation went to five turkey operators in a northwestern Minnesota county in Zone 5.

He agrees that wolf numbers appear to be increasing in livestock production areas in Minnesota.

"Some indications of wolf depredations on livestock and poultry in 1989 were the highest recorded in the 15-year history of the FWS/USDA wolf control program in Minnesota," he says.

"In 1989, 49 complaints of wolf depredations on livestock/poultry were verified at 41 farms, and 85 wolves were captured, 75 killed in response to the depredations. Previous record indices occurred back in 1981, when there were 60 verified complaints of wolf depredation at 38 farms, and 42 wolves were captured (30 killed)."

The 1988 report looked like this: 45 wolf complaints verified at 35 farms, with 57 wolves captured and killed.

Verified 1989 cattle losses—40 animals—also were highest in the 15-year program.

Verified sheep losses were lower in 1989 than in some other years—primarily in the first half of the 1980s—but ADC reports the estimated total sheep in so-called Minnesota wolf range had declined from 91,000 head in 1979 to 16,000 in 1986.

Mr. BURNS. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE FISCAL YEAR 1991 DEFENSE BUDGET

Mr. THURMOND. Mr. President, this will be a pivotal year for our Nation's defense budget. The decisions this distinguished body will make on this year's budget will impact not only on our Armed Forces and the Nation but the entire globe.

Chairman NUNN, Senator WARNER—the ranking member of the Armed Services Committee—and other committee members have begun a series of floor statements on the defense budget, which is currently under consideration in the Congress. With the exception of Senator WARNER, the crux of the speaker's comments is that the President's defense budget is not visionary enough and does not consider the events that have transpired in Eastern Europe and the rest of the world.

Mr. President, the dramatic decline of communism certainly warrants another look at what the role of our military should be as we enter the last decade of this century. Secretary Cheney was committed to us that he is, in fact, conducting this review and will provide us his assessment and recommendation in the next 4 months. Unfortunately, many of my colleagues are more interested in developing a defense budget which is not based on the threat—I repeat, the threat—but on their desire for a peace dividend.

Over the past 3 months, the Armed Services Committee has received testimony which has convinced me that the conventional threat posed by the Soviet Union is diminishing. The evidence has also convinced me that the potential for a nuclear war—and, I repeat "Nuclear War"—has declined. However, nothing presented at our numerous hearings has convinced me that the Soviet Union does not still have the capability to wage a conventional or nuclear war at some future date.

Over the past 40 years, our citizens have paid dearly in both lives and dollars to get us to this profound point in history. We have won the cold war. Yet, at this critical moment, when we should be taking a breath, analyzing where we are and where we should be going, there are some who are calling for such draconian reductions in the defense budget that we may be unable to continue to enjoy the fruits of our victory.

Mr. President, I believe we can reduce our defense budget, but we must do it wisely and cautiously. We cannot do it solely for deficit reduction at the whim of budget cutters; we cannot do it solely in the Armed Services Committee; we must do it in consonance with the administration and, particularly, the Defense Department. Secretary Cheney and the military leadership must provide a realistic roadmap to what they expect our military forces should be in the midnineties. I urge the Secretary to provide us that roadmap as soon as possible, or the train will leave the station without the engineer.

Mr. President, these are challenging times for the Congress and the administration. These are times of uncer-

tainty for our men and women in the armed services and our constituents who work in the defense industry.

The current debate on the future of our defense posture reminds me of a comment made by Winston Churchill on May 7, 1945, the day the victory in Europe was announced. His comment was, "The eagle has ceased to scream, but the parrots now will begin to chatter. The war of the giants is over and the pygmies will now start to squabble."

Mr. President, I hope the debate on our Nation's future military posture will be in keeping with the giant Nation that we are.

Mr. President, I yield the floor.

EXTENSION OF MORNING BUSINESS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the time for morning business be extended until 11:15 a.m., under the same conditions as previously ordered.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. PRYOR addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Arkansas, Senator PRYOR.

Mr. PRYOR. Mr. President, I believe that we are at this time still in morning business, that morning business has in fact been extended?

The ACTING PRESIDENT pro tempore. The Senator is correct. The time for morning business has been extended until 11:15.

Mr. PRYOR. Mr. President, I thank the Chair very much.

THE AMERICAN FARMER AND AMERICA'S DWINDLING WETLANDS

Mr. PRYOR. Mr. President, I rise today to express to my colleagues in the U.S. Senate the grave concerns I have for two of America's greatest resources: the American farmer and our Nation's dwindling wetlands.

We are witness today in this country to a tragedy of potentially epic proportions that threatens the economic viability of our Nation's breadbasket, while, at the same time, undermining our valiant efforts to protect and preserve our wetland resources. The multiplicity of Federal laws and regulations, being administered by three separate departments and one independent agency of our Government, has created a bureaucratic nightmare never envisioned by the Congress.

Just when we thought we were on a path toward developing a commonality of purpose among the Federal agencies with regulatory authority over wetlands, with the publication in January 1989 of the interagency "Federal Manual for Identifying and Delineating Jurisdictional Wetlands," with the signing of a joint memorandum of understanding between the Army Corps of Engineers, and the Environmental Protection Agency defining mitigation in connection with section 404 of the Clean Water Act, and with President Bush's declaration of a no net loss policy on wetlands, it seems that our good intentions have gone awry.

When European settlers first arrived in this country it has been estimated that 200 million acres of wetlands existed in the 48 mainland States. By the mid-1970's that figure was estimated to be 99 million acres. During a 20-year stretch between 1954 and 1974 a survey by the U.S. Fish and Wildlife Service indicated a net loss of over 9 million acres, or nearly 500,000 acres per year lost in wetlands. We can assume that a similar net loss per year has continued through the decade of the 1980's.

Agricultural development was responsible for 87 percent of these losses, with urban and other development accounting for the rest. According to the survey these losses were concentrated in the lower Mississippi River Valley, the upper Midwest and the Southeast. These losses of wetlands have created numerous problems, including increased flooding and associated costs to the Federal Government to try and reduce that flooding, reductions in habitat for numerous species important to huge sections of our recreation seeking populations, and degradation of water quality in our streams as a result of the introduction of pesticides from agricultural production.

Mr. President, I think it is extremely important that we do everything we possibly can to retain, protect and preserve the existing wetlands that lie in a natural state in our Nation today. These wetlands come in a variety of forms and conditions, and some are obviously more important than others. We desperately need a national inventory of these resources to aid us in this preservation effort.

I serve on the Migratory Bird Conservation Commission, and I have attempted to use that Commission and that post as a means of protecting these lands throughout our Nation. I have supported the Endangered Species Act and the Fish and Wildlife Coordination Act in the Congress as important tools in this effort. I have voted for increases in the Land and Water Conservation Fund and the Wetlands Loan Act to try and provide the necessary funds to allow the Federal Government to purchase valuable tracts of wetlands for preservation in perpetuity.

As a member of the Agriculture Committee I have supported the Water Bank Program and the Conservation Reserve Program to try and give incentive to landowners to set aside some of their lands for these purposes. The Swampbuster provisions of the 1985 farm bill, unpopular in some quarters, was designed to give farmers disincentives for cultivating lands that should remain in the natural wetlands State.

But, Mr. President, in my judgment the inability of our Federal regulatory agencies to coordinate a workable, reasonable approach toward managing, regulating and acquiring these valuable wetlands is circumventing the intent of Congress and creating a climate for revolution in this country. It is undermining necessary popular support that is absolutely essential if these programs are going to succeed.

There is no way the Federal Government is going to acquire, police and manage all of the wetlands that need to be preserved in this country. We will never have enough money to do that, and it would be unwise public policy to do it if we could. We simply have too many other priorities that would suffer in such a scenario.

We must rely on the support of landowners to implement the bulk of these programs.

We must gain this support by developing incentives that work and that are realistic and that are practical. We must help these landowners by clearly defining the lands that are worthy of saving by placing realistic values on their importance to habitat.

The PRESIDING OFFICER (Mr. ROBB). The Senator's 5 minutes has expired.

Mr. PRYOR. Mr. President, I ask unanimous consent that I may proceed for 4 more minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. PRYOR. Mr. President, we must not undermine their support by overregulation, by unnecessary regulation. We must not redefine our Nation's basic principles of ownership by insidious regulations that amount, in a real sense, to a taking of private land. We must not place an economic burden on landowners that amounts to an after-the-fact taking of land or an after-the-fact regulation.

Yes, there are lands that are being farmed today that should have never been cleared and farmed. We know that. Swampbuster is trying to address that concern. While it may not be perfect, I think all of us are willing to look closer and make necessary changes.

Mr. President, the events that began to occur in January 1989 with the publication of the Interagency Cooperative Manual I discussed earlier, have resulted in dramatic, and I must say, tragic changes, in wetlands regulation in the State of Arkansas. For example, the amount of land now defined as wetlands for the purpose of regulation

under section 404 of the Clean Water Act has increased exponentially. In the Vicksburg and Memphis districts of the Army Corps of Engineers, which covers most of the delta in Arkansas, an additional 6 million acres of lands will now be regulated.

In eastern Arkansas alone, Mr. President, wetlands have increased from 16 percent to 84 percent on the basis of this definition alone. Most of this land is now in row crop production. The wetlands issue is to farmers what section 89 was to small business.

Throughout the Lower Mississippi Valley Division of the Army Corps of Engineers, which covers Missouri, Tennessee, Arkansas, and Louisiana, an additional 19 million acres of land will now be regulated under section 404. All of this is expected to be accomplished without the Army, or the EPA, or the Fish and Wildlife Service, adding one additional employee to service this problem.

Mr. President, this is unworkable and unrealistic. Lands that have already been cleared and placed into production must be exempted from this burdensome bureaucratic regulation. We must identify those lands that are marginal farmlands and do everything that we can to provide the incentives to landowners to allow them to revert to wetlands. But if we arbitrarily come to a farmer, and if we demand of that farmer that he or she acquire a section 404 permit to perform normal farm operations, we are at that time undermining the very foundation upon which we have built so much public acceptance of our wetlands preservation program.

Mr. President, we have no ability at present to expeditiously and fairly help that farmer with his 404 permit application. We have no reasonable and consistent mitigation formulas existing. We have no way to guarantee that farmer that he will have timely and expeditious handling of his permit application. Farmers have to depend upon being able to obtain financing, plant, harvest, and perform other normal farm operations on a very tight schedule.

Under current regulations, the Corps of Engineers attempts to complete action on section 404 permit applications within 90 days. This is entirely unacceptable, Mr. President, to that farmer in Arkansas, that farmer in Missouri, in Virginia or wherever he might be. It will drive that farmer to economic ruin. The delays will amount to frustration and will amount to defeat. The impact of this, in some cases, will amount to the public confiscation of private land.

Mr. President, I ask unanimous consent to proceed for 1 more minute.

The PRESIDING OFFICER. Without objection, the Senator is recognized for 1 additional minute.

Mr. PRYOR. I am announcing today, that I am forming a Senate Wetlands Caucus. There is much conflict and information about wetlands, so much jurisdictional confusion within the committees of Congress, that I am today persuaded that this is an appropriate tool we need to better understand and address the major concern of States and farmers so affected.

I am hopeful that the Members representing the Mississippi River Valley, the prairie pothole regions of the Midwest, and all of the other regions were regulation threatens the economic lifeblood of our citizens, will join me in this effort to negotiate some sensible solution to this quagmire which has been created. I intend to use this floor, Mr. President, to bring together the divergent interests and regulatory officials to determine where we can make some sense of this issue and hopefully form a new consensus on how to proceed.

I urge my colleagues, Mr. President, who are concerned about our wetlands and about our farmers, to join with me in this cause.

Mr. President, I yield the floor.

Mr. LIEBERMAN addressed the Chair.

EXTENSION OF MORNING BUSINESS

The PRESIDING OFFICER. The Chair recognizes the Senator from Connecticut [Mr. LIEBERMAN].

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the time for morning business be extended to not later than 11:30 under the same conditions as previously ordered.

The PRESIDING OFFICER. Is there objection? Without objection, the time for morning business is now extended to 11:30 a.m. The Senator from Connecticut is recognized.

NUCLEAR AND MISSILE PROLIFERATION

Mr. LIEBERMAN. Mr. President, following events in the world in just the last week, I have been reminded of that promotional for the very popular Jaws II movie, which said, "Just when you thought it was safe to go back into the water." Because just when we were beginning to feel optimistic about peaceful developments in the world, as a result, particularly, of our warming relations with the Soviet Union, there has been an extremely unsettling series of events which gives us pause, about how peaceful our world really is becoming.

First, of course, is the very aggressive behavior of the Soviet Union toward the valiant efforts toward the people of Lithuania to achieve independence. Beyond that are a series of stories coming from the Third World about increasing arms and increasingly oppressive behavior from Iraq.

Just 2 days ago, American and British agents arrested a series of individuals for having attempted to smuggle electronic devices into Iraq, which are capable of igniting nuclear weapons and have other military applications as well. There are news reports today that the Iraqis, for the first time, have successfully completed the installation of missile launchers which gives them the capacity to strike at targets further than they ever had the capacity to strike at before in that direction.

From China we receive intelligence reports that the Chinese are apparently shipping missiles to the Middle East, presumably to Iran, being purchased by Iran.

From Libya, headed by perhaps the most unstable leader of any country in the world today, Muammar Qadhafi, we received the unsettling news that the Libyans have achieved the capacity for in-flight refueling of their fighter bombers, which gives them the ability to deliver a much heavier, more destructive payload to targets that are further away from their home territory.

Mr. President, all of these events suggest that the world is not as safe a place today as we would like it to be. What I want to focus on particularly for a few moments this morning is the fact that even as our relations grow better with the Soviet Union, and I hope that events in Lithuania resolve themselves peacefully so there will be no interruption in our efforts to achieve greater arms control with the Soviets, we will still have some major threats to our security in world peace that will come from the Third World, from unstable countries within the Third World. I want to stress here particularly the fact that that increasing military capacity and instability in the Third World is not indigenous. It is coming from sophisticated developed industrial countries who are selling weapons and a capacity to deliver them to those Third World countries, and in the particular case of Iraq we have every reason to believe that those components were going to be used to build atomic business.

I think the United States must send a very clear message here by vigorously prosecuting the individuals involved and by going beyond that and considering the suspension of Iraq's Import-Export Bank credits for a period of time to show that continued attempt to import nuclear technology into the Third World will not be cost free. I hope that our European allies will join us in this.

I think there is some particular irony from the intelligence reports that suggested it was a British company that had assisted the Iraqis in completing installation of the missile

launchers, particularly since the British so appropriately have been outraged at the Iraqi murder of the British journalist. The Soviets and the French are Iraq's principal suppliers of weapons. We should call on them, our Western allies, and our new Eastern, European allies, to suspend arms shipments at least temporarily to the Iraqis as a sign of disapproval.

Controlling the proliferation of nuclear bombs, ballistic missiles, and chemical weapons must become a focus of our defense policy in the years ahead as hopefully our relations must continue to improve with the Soviet Union. The United States must adopt tougher laws to punish companies that export dangerous components or send technicians to help countries to develop their own indigenous programs. If these companies know they may be shut out of the U.S. market for sales of products that are either military or nonmilitary they may well think twice before contributing to the spread of nuclear capacity in the Third World.

Industrial democracies must strengthen legislation forbidding their citizens from participating in the manufacture of nuclear, chemical, or ballistic missile programs. In short, a developed world, West and East, must control the indifference and greed that have allowed individuals and entrepreneurs to contribute to the proliferation of these dangerous programs of destruction.

The United States I think can play a lead in that in working to strengthen the missile technology control regime known as MTCR. This is a set of guidelines established by the United States and six of our allies to limit missile proliferation in the Third World. These guidelines restrict the export of missiles with ranges of more than 186 miles and payload weights of more than 1,100 pounds. Clearly the MTCR should also prohibit the export of shorter range missiles such as those apparently sold by China to Iran.

Once it will happen that our allies agree on these new limits we can speak with more authority to the Chinese about the need of imposing similar restrictions on themselves.

Mr. President, the point is this: As we hopefully continue to reduce the threat of nuclear war between ourselves and the Soviet Union and achieve more arms control with that other great power, we cannot neglect the dangers inherent in the Third World's attempt to acquire these weapons of mass destruction, because to ignore this peril is to become an accomplice in this danger. The struggle against nuclear and chemical weapons and ballistic missiles is the struggle for the security of our country and the peace of the world in the years ahead.

Mr. President, we are gratefully achieving better relations with the Soviet Union which has been the major source of threat to us in the postwar period, but we have unfortunately not yet achieved, as the events show, the perfection of the human species. I think these are important points to consider as we review our defense needs in this session.

Mr. President, I thank you, and I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wyoming [Mr. WALLOP].

THE ADMINISTRATION'S POSITION ON LITHUANIA

Mr. WALLOP. Mr. President, according to news accounts on Thursday, March 29, President Bush has revealed to some of our House colleagues his willingness to sacrifice Lithianian independence if it means keeping Soviet President Gorbachev in power. Meeting with four Congressmen who visited Lithuania last month, he was to have indicated to them that he was more committed to the cause of keeping Mikhail Gorbachev in office than to the cause of Lithuanian freedom. An aide to one Congressman reported this message from the meeting: "It is the policy of the United States to keep Gorbachev in power * * *."

When the Members complained—as many of my colleagues in the Senate have done—about the administration's lack of forceful support for the Lithuanians, the President challenged the Congressmen to either come up with an alternative policy, or else to fall in line with the administration. In effect, he told them "to put up or shut up."

On its face, this is a fair challenge. There is no question that the executive branch has the primary responsibility for the conduct of foreign policy, and the Congress no doubt has intruded at times on the President's prerogatives. Managing the complex, farflung military establishment and diplomatic enterprises of a superpower is an immense responsibility, and the President and his administration need our cooperation at least as often as they deserve our criticism.

The Congress is quick to carp, criticize, complain, and condemn without offering the executive branch any constructive alternatives. Indeed, from my particular vantage point on the Armed Services Committee, I would say that constant criticism—without alternatives—is a daily occurrence. Nor are our criticisms confined to this Chamber, but typically find their way—unaccompanied by alternatives or solutions—into the editorial pages and onto the air waves.

Issuing a challenge is an effective way to silence your critics, especially when you suspect they have no better solutions. But in this case, I believe the President is using what is essentially a debater's trick to avoid facing a number of legitimate questions raised in the Congress respecting the position of the United States on Lithuania. These are valid questions, and the President cannot dismiss them as the sort of frivolous posturing that some of us regrettably engage in from time to time.

In challenging our House colleagues to come up with an alternative to his policy on Gorbachev, the President has by implication challenged the entire Congress, and I propose that we take him up on it. Certainly the Senate has a role to play, as spelled out in the U.S. Constitution, in the formulating of foreign policy. I believe we should conduct a thoughtful, responsible search for constructive alternatives that we can offer to the President—offer in a spirit of cooperation, not as adversaries, but as partners.

But in order to develop constructive alternatives, we have to put some questions to the administration. We have to know what the parameters of the President's policy are. And we have to know the full extent of U.S. support for Gorbachev.

For example, the United States appears prepared to sacrifice Lithuania. What other peoples are we willing to sacrifice to keep him in power? All the Baltic States? The Ukraine? Moldavia? Soviet Georgia? If Lithuania and Estonia persist in seeking their rightful place as free nations, are we ready to stand by again idly and witness a Russian version of Tiananmen Square?

What about the former inmates of the Soviet empire—East Germany, Poland, Hungary, and Czechoslovakia? If Gorbachev decides their freedom or German unification are too upsetting to the hardliners, will we have to give our tacit support to Soviet intimidation of Eastern Europe?

As events have unfolded in Lithuania, a pattern of Soviet violations of the INF Treaty has begun to emerge in recent days—large numbers of specific violations—and evidence that the U.S.S.R. entered the INF regime with covert missile deployments, an unequivocal act of bad faith. Yet to date the United States response has been weak. Is our silence on treaty violations that undermine America's security part of the price we have to pay to keep Gorbachev in power? And to be sure, it is not a question only of silence—we also fail to act in the face of treaty violations. This is true of the INF Treaty and the ABM Treaty, breaches of which are potentially more threatening to U.S. security. Is our acquiescence—our misprision of Soviet cheating—part of the price demanded to keep Gorbachev in power?

While professing peace, the Soviets continue to modernize and expand their most threatening arsenal, their nuclear ICBM's, and to pursue their military efforts in space. They contin-

ue to supply arms and support to the totalitarian regimes in Afghanistan, in Angola, in Cuba. Must we turn a blind eye to these unrelenting threats to our interests in order to protect Gorbachev, or is his survival our only national interest?

To secure Gorbachev's position, are we going to allow the U.S.S.R. admission into the IMF, into GATT? Are we going to shore up Gorbachev's regime with massive transfusions of U.S. capital and trade credits? Are we going to save Mikhail from the hardliners by decontrolling and sending him our most advanced technology, even that which has direct military applications, and winds up in the hands of the Soviet military?

Well, these are just a few modest questions to which I would like answers. I could ask many more, but let me summarize them all in one question: "Mr. President, just what price are we willing to pay to keep Gorbachev in power?"

In all fairness, the President, General Scowcroft, and Secretary Baker are not totally unjustified in preferring Gorbachev to some unrepentant Stalinist who might be lurking in the wings. But I am afraid the administration is beguiled by a new variation on an old theme, one orchestrated assiduously in the West over the years by the KGB and other Soviet organs of disinformation. I'm speaking, of course, of the so-called Kremlin hawks versus Kremlin doves theme. For decades arms-control devotees and diplomats told us that we had better give the Kremlin doves what they demanded, and at the same time overlook dangerous Soviet behavior, or the far more dangerous hawks would assume power.

My point is simply this. If maintaining Gorbachev in power takes precedence over all other considerations of principle or prudence, then we have forfeited our freedom to act and given total leverage to the Soviet leader. And if the price we must pay to keep him, Gorbachev, in office is open-ended, if our Gorbachev-at-any-price policy results in the continued suppression of "people yearning to breathe free," if it means we blind ourselves to treaty violations and to continued subversion and aggression in the Third World—then we might as well have the hardliners back. At least under the hardliners we were less prone to self-delusion.

For years the inherent aggression and expansionism of the Soviet Empire was fueled by the Communist claim to embody an historical imperative. The triumph of Marxist-Leninism was supposed to be inevitable. But when the Soviet ruling classes finally saw that communism's historical and scientific claims were bogus, they lost that faith in the inevitability of triumph. And with that loss of faith their empire began to unravel.

As we seek to help the administration find alternatives and ways of dealing with the crisis of a military empire in collapse, let us not lose sight of the fact that Gorbachev and communism, even a temporarily revived communism, are not on the side of history. The inevitable tide of history is running against the failed Soviet imperium, and even the use of force can only stay the inevitable for a moment, not stop it altogether.

No one in this Chamber wants to precipitate a bloody crackdown on the brave Lithuanians, just as the President and his administration want to avoid it. But we have to make it clear that we are on the side of liberty, not Gorbachev's; and on the side of the hundreds of millions of restive Soviet citizens remaining incarcerated in the vast gulag. It is not in our interest, nor in keeping with our deepest national principles and our heritage, to give our moral support to their jailor, even if he does happen to be more humane than his predecessors. Our constant message to Gorbachev and to the world must be, "Let the people go."

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,840th day that Terry Anderson has been held in captivity in Beirut.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Under the previous unanimous-consent order, the time for morning business is closed.

Mr. GORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLEAN AIR ACT AMENDMENTS OF 1989

The PRESIDING OFFICER. The Senate will now return to S. 1630, the clean air bill, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

(1) Mitchell amendment No. 1293, in the nature of a substitute.

(2) Baucus amendment No. 1307 (to amendment No. 1293), to grant Administrator authority to authorize limited production of halons after the year 2000 if necessary for aviation safety purposes.

AMENDMENT NO. 1425 TO AMENDMENT NO. 1293

(Purpose: Mitigation measures)

Mr. GORE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is laid aside.

The clerk will report the amendment sent to the desk by the Senator from Tennessee.

The legislative clerk read as follows:

The Senator from Tennessee [Mr. GORE], for himself, Mr. LAUTENBERG, Mr. BREAUX, Mr. WIRTH, Mr. PELL, Mr. KERRY, Mr. BRYAN, Mr. ADAMS, Mr. CRANSTON, Mr. LEAHY, and Mr. LIEBERMAN, proposes an amendment numbered 1425 to amendment No. 1293.

Mr. GORE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 269 beginning at line 4 strike all through line 18 (paragraph (5)) and redesignate the succeeding paragraphs accordingly.

On page 273, line 22, strike "To" and on page 273 beginning at line 23 strike all through line 9 on page 274.

Mr. GORE. Mr. President, I offer this amendment on behalf of myself, Senator LAUTENBERG, Senator BREAUX, Senator WIRTH, Senator PELL, Senator KERRY, Senator BRYAN, Senator ADAMS, Senator CRANSTON, Senator LEAHY, and Senator LIEBERMAN.

Mr. President, we live in a time of great turmoil, great change and great opportunity. Every day brings news of freedom won by peoples who have suffered political bondage for decades, and some for centuries. But, while the people of Eastern Europe finally breathe the air of political freedom, the Washington Post this week reports that they are "suffocating in . . . toxic breezes." Steeped in a hazardous chemical soup, entire villages have been condemned, and soil and water are biologically dead. The people of Eastern Europe, who have fought so valiantly for political freedom, are still the victims of environmental repression.

And, Mr. President, we are failing to heed the lesson that is so painfully being learned in Eastern Europe. The U.S. Senate is prepared to pass into law a provision that absolves industry of its responsibility to control life-threatening emissions. At a time when we should be providing leadership, when we should be setting an example in the world community, we are retreating.

Since 1970, the Clean Air Act has required sources that create unsafe exposures to control their emissions. Today—for the first time—we are saying that public health and safety are at best secondary considerations, and that people and communities can be sacrificed to excessive pollution.

In the clean air bill that is before us, companies that release cancer-causing pollutants are permitted to buy out communities and create "dead zones"—areas that, due to high concentrations of toxic air pollutants—are hostile to life and uninhabitable by human beings. In plain and simple terms, this legislation condones the creation of toxic wastelands and gives corporations license to destroy communities and scatter neighbors and friends.

Now, Mr. President, we need not read science fiction to envision what a dead zone would look like. Unfortunately, examples of industrial excess abound: In Poland, Hungary, Czechoslovakia, and East Germany irresponsible government policies have encouraged corporations to disregard public health and safety in pursuing their economic ends. The result: rivers, lands, and forests—natural resources that once were teeming with life—are now barren. And communities that were once vibrant and bustling are now vacant ghost-towns.

Just 2 months ago, I traveled to the Soviet Union and joined 1,000 delegates from 83 countries at a global forum designed to bring scientists, political and religious leaders together to discuss ways to combat the growing threats to our environment. While there, I received firsthand accounts of a truly tragic environmental and public health disaster. Choked by toxic pesticides, the Aral Sea, once larger in area than any of the Great Lakes save Superior, is vanishing from the face of the Earth. In its wake, the Aral leaves behind a desert expanse, a wasteland encrusted with toxic salts and pesticide residues. Picked up by high winds, toxins are heavy in the air and the people die of throat cancer and give birth to children plagued by a myriad of pollution-induced illnesses.

And we need not look overseas for examples of dead zones. At one time, Love Canal and Times Beach were thriving communities, places where neighbors were close, where ties to religious groups were strong, and where children grew up together, playing in neighborhood yards and attending the local schools. Now, these communities are shattered. Homes are empty and decaying. Church bells hang still. And school yards are silent.

And even as I speak, the buyout tragedy is being played out. Faced with reports of dangerously high levels of vinyl chloride in the blood of children living near its Revilletown plant, the Georgia Gulf Corp. in 1988 dismantled a Louisiana community that had been in existence for over a century. With those most at risk cleared out, Georgia Gulf now plans to increase its emissions—persumably to levels that will expose yet another community to increased risks of cancer, liver and kidney damage.

Mr. President, let us make no mistake—"Mitigation" and "Greenbelt" euphamisms aside—the bill before us today puts the Federal seal of approval on just this type of community carnage.

Mr. President, the buyout provision subverts the very purpose of clean air legislation: Unacceptable levels of toxic emissions will be tolerated; people—but not pollution—will be removed.

In fact, Mr. President, this provision sanctions a practice that EPA has determined to be illegal under the Clean Air Act. In 1984, EPA rejected the buyout approach for the control of radioactive air pollutants precisely because buyouts do not result in a reduction of emissions. EPA said:

> EPA believes that for * * * standards—that "control land"—to be valid [under section 112 of the current clean air act], they must also have an emission limiting effect.

EPA's reasoning in 1984 was sound. In public health terms, the contrast between a buyout and controlling pollution is sharp, indeed. When a source controls its emissions, cancer risks are reduced not only for persons in hot pockets of excessive risk, but also for everyone around the facility. Not only is the most exposed person protected, but lives are saved in the entire surrounding population.

But under the buyout scenario, no one outside the dead zone would benefit at all. At best, everyone else would continue to breathe the same level of cancer-causing pollution and, as the offensive plant expands, these people will become subject to still higher levels of life-threatening emissions. People all around the facility would continue to contract cancer and die.

If we examine the buyout option a little closer, still more unsavory problems emerge:

Consider for example what happens to property values. How much are affected people going to get for their homes? Once word gets out that these homes are receiving the area's heaviest concentration of cancer-causing pollution, what will they be worth on the open market? Not much. And if the only buyer is the source itself, you can bet the owners will not get top dollar.

And where will they go? Neighborhoods will be destroyed and neighbors scattered. Lives are bound up in places people live, in the friendships they form with neighbors, and in the local schools, churches, synagogues, and social clubs where neighbors congregate. What right does a company have to disperse all that? To authorize industries to destroy the facric of local communities tears at the values we extol in this Congress.

Consider also what just a slight miscalculation in risk assessment could do. Suppose the source owner uses the most up-to-date emissions dispersion model and the best available data. Suppose the modeling tells it that most exposed persons are located a quarter mile due north of the plant. But what if the true wind direction is a few degrees different from that assumed in the modeling, so that the zone that is really the most exposed is located a quarter mile northeast of the plant.

If the source reduces its pollution, this slight error in the modeling will make no difference. The most exposed persons, although misidentified, will still be protected. But, if the source used the mitigation option, it would have bought out the wrong people. Those most at risk will have no protection at all.

Consider also that—with the mitigation option—a source could actually increase its cancer-causing emissions. All it would have to do is buy out a slightly larger pocket of homes and remove the next heavily exposed people. For example, if the source removed all people with estimated cancer risks greater that 1-in-20,000—half of the 1-in-10,000 level—it could double its cancer-causing emissions, and double the cancer risk of everyone else around it.

None of these perverse possibilities could occur as long as we ensure that it remains industry's obligation—as under current law—to control its pollution. If we decide to do otherwise, then each of us must be prepared to say to communities in our own home States that they are but grist for the industrial mill. It is not likely that our constituents will be consoled by our explanation that their homes have been sacrificed in order that a deal might survive.

And let us not kid ourselves. The possibility is real that the force of the buyout option will be felt nationwide. According to a study released only yesterday by the Natural Resources Defense Council, at least 78 plants in 25 States would be authorized to invoke the buyout option. The study is only a prelminary one, but if there is error, it is likely that it is on the side of underestimating the number of plants that would buy out surrounding populations: NRDC assumed that the installation of maximum achievable control technology [MACT] would achieve a 90-percent reduction in toxic emissions. Still, countless thousands would be exposed to unacceptably high risks—some as high as 1 in 100.

Mr. President, I am not prepared to tell my constituents in Tennessee that

their homes are a proper sacrifice to industrial expansion. My distinguished friends that join me in introducing this amendment feel similarly about towns in their home States. I urge my other distinguished colleagues to join us in striking this appalling provision from the bill.

Mr. President, I had been prepared to speak at length on this. I have discussed it with the committee leadership on both sides. This is the dead zone amendment. I have spoken on it previously. I see no need to belabor the point now. I ask my colleagues on both sides to support the amendment.

I yield the floor.

Mr. LAUTENBERG. Mr. President, I am pleased to join the Senator from Tennessee in offering this amendment. Senator GORE is a leader on environmental issues and I appreciate his work on this important issue.

Mr. President, our amendment would eliminate the so-called buyout provision in the substitute. This provision allows a facility to avoid reducing emissions of toxic, poisonous substances to levels which will protect people.

Under all of the versions of the air toxics legislation, facilities would be required to install maximum achievable control technology. MACT will significantly reduce but not eliminate risks posed by emissions of toxics. All versions of the bill also require EPA to determine the risk remaining after installation of MACT. And all establish some standard for requiring additional reductions in emissions to reduce the remaining risk.

But under the substitute, facilities could instead buy out people who live near the facility. They could continue to emit toxic pollutants at levels they otherwise would not be allowed to emit. Polluters would be allowed to move the victim of pollution, rather than curb the pollution. And uninhabitable dead zones would be created.

Surrendering to, rather than combatting air pollution, is a clear step backward. It in essence ratifies the old, discredited argument that the "solution to pollution is dilution."

The buy-out provision says that it is all right to emit toxics as long as they are diluted enough before people are exposed to them. This approach is foreign to the Clean Air Act and to all environmental law.

And it should remain foreign to the legislation we pass now. The amendments we are considering are designed to strengthen the existing law which is not working adequately.

Mr. President, the buyout provision is a precedent buster.

When the original Clean Air Act was passed in 1970, some companies responded by building tall stacks rather than cleaning up emissions. These tall stacks removed pollution from the area around the facility. But by depositing that pollution farther away, they exposed different people and areas to the pollution. We should have learned that the only answer to pollution is to prevent it, not spread it around and dilute it.

Mr. President, the buyout provision is nothing more than a horizontal tall stack.

It says to industry go ahead and pollute ground water, go ahead and contaminate surface water, go ahead and defile the land. Just make sure that you dilute the pollution. Mr. President, is this the message we really want to send to the American people?

Now there have been arguments that buyouts would result in so-called greenbelts. Industry would move people away from exposure, thus lowering everyone's cancer risk. But this argument does not hold up.

We will not have greenbelts. We would have no man's lands.

The provision in the substitute only requires polluters to buy out specific pockets of homes. Rather than achieve overall environmental protection for the affected community, the provision simply allows companies to move those most at risk. But the surrounding population, however, continues to breathe the same level of cancer—causing air.

And the buyouts are no panacea for those who relocate. In the substitute's rush to give polluting industries a break, it fails to answer a number of other questions.

What prices can these heavily exposed residents expect to receive for their homes?

Where will these people go and what will happen to this community?

What will happen to the property values of the neighboring but less exposes area?

These questions underscore the absurdity of allowing polluters to opt for buyouts.

In a few weeks we will celebrate the 20th anniversary of Earth Day. It is a day to think about how important our environment is to us and to future generations. It is a day to contemplate what we can do to improve the environmental ethic both in this country and worldwide. And it is a day to reinvigorate our efforts to preserve and enhance that ethic.

Mr. President, the buyout provision is inconsistent with the environmental ethic we will be celebrating in a few weeks. Perhaps we should call this the copout rather than the buyout provisions. It allows industries to copout of cleaning up their toxic emissions. I urge my colleagues to think about the meaning of Earth Day and avoid this copout by deleting the buyout provision and voting for the Gore-Lautenberg amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I rise to thank the Senator from Tennessee for his amendment and to indicate for the record that the so-called dead zone amendment is necessary because of some, perhaps, I might characterize it as confusion at the time we were negotiating changes in the air toxics provisions of this bill and the substitute that is before us.

As a person who was responsible for the underlying legislation on air toxics and the person who at least accepted some of the responsibility, along with my colleague from Montana and the Senator from New Jersey [Mr. LAUTENBERG] for some of the changes that are now being called a compromise, I rise to support the amendment offered by our colleague from Tennessee. I think it is a very, very good amendment.

I recommend its adoption.

Mr. BAUCUS. Mr. President, I appreciate the amendment the Senator from Tennessee is offering. We are prepared to accept the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to amendment No. 1425 offered by the Senator from Tennessee.

The amendment (No. 1425) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORE. Mr. President, I thank the committee leadership on both sides, and the Republican leader and the majority leader for the way in which I have been able to work with them in explaining thoroughly and discussing this amendment. I first served notice of introducing it before the last recess and asked for an extended conversation and dialog. I am grateful that we had such a conversation and dialog. I appreciate the amendment being accepted.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KERREY). Without objection, it is so ordered.

Mr. REID. I ask unanimous consent, Mr. President, that I be allowed to speak as if in morning business for up to 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I thank the Chair.

(The remarks of Mr. REID pertaining to the introduction of S. 2373 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, for the information of Senators, Senator BAUCUS and Senator CHAFEE have been meeting for about 3 hours with other interested Senators on the question of the allowance provisions in the bill. It is an important area to many Senators, and it is controversial.

It now appears unlikely that they will be able to resolve that matter today in sufficient time to present it to the full Senate for consideration and vote. Accordingly, there will be no rollcall votes today.

Senators should be aware that on Monday the Senate will be in session, and the clean air bill will be before the Senate. So that any Senator who has an amendment that he or she wishes to offer should be present on Monday to offer that amendment. We will be here for the specific purpose of receiving and considering amendments, so that Senators are not backed up against the deadline on Tuesday and have a full opportunity to debate and discuss their amendments for the full hour allotted under the unanimous-consent agreement.

There will be no votes on Monday, and we will stack votes on Tuesday on any amendments which are presented on Monday which require votes. Again, I advise and encourage Senators to come to the Senate floor on Monday, if any Senator has an amendment he or she wishes to offer, and not be backed up against the deadline on Tuesday.

Just so it is clear in advance, no request for extending the deadline on Tuesday will be considered. I hope, if any Senator is not listening, his staff will advise him or her, that no Senator should think about not bothering to offer his or her amendment on Monday or during the day Tuesday, and come Tuesday evening asking for an extension of time so that amendment can be considered. There has been more than enough time for every Senator who wishes to offer an amendment, to have it debated, to do so, and the deadline will be met. It is my hope that we can vote earlier than the deadline on Tuesday if we have completed action. But in any event, there will be no extension of the deadline, and no request for extension of the deadline will be considered.

The allowance matter will be presented to the full Senate as the first order of business Tuesday morning. The managers will have a package ready to present to the Senate at that time. So those Senators who have an interest in allowance provisions should be in touch with Senators BAUCUS and CHAFEE and should be aware that on Tuesday morning the Senate will deliberate and dispose of all amendments relating to allowances.

We will take other amendments on Monday. If any require votes, the votes will be held on Tuesday, and we will deal with the allowance provisions on Tuesday morning, for however long it takes, to deal with however many amendments are offered, and then we will devote the remainder of Tuesday, as is necessary, to deal with remaining amendments.

I hope all Senators now have a clear picture of the schedule for the next 3 days until final disposition of this legislation.

Mr. President, I again want to thank the managers, Senators BAUCUS and CHAFEE, who have devoted an extraordinary amount of time and effort to managing this bill and have spent, as I indicated, 3 hours this morning attempting to resolve this important and difficult issue of allowances. They will be able to do so and have it ready to go on Tuesday morning. I thank my colleagues very much, and I thank other Senators for their patience in considering this measure.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I am advised by the managers that no other amendments are before the Senate at this time, no other Senator is here to present an amendment on the bill. If any Senator wishes to come over, the managers will be here.

In the interim, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFSHORE AIR POLLUTION

Mr. WILSON. Mr. President, in the course of the long deliberations on the Clean Air Act reauthorization, one subject that has been of interest to a few coastal States, and most specifically my home State of California, has been a problem that has existed for several years because of an anomaly in the law. That anomaly exists between two different agencies administering two different standards with respect to air quality have been involved in administering the air sheds in adjacent areas.

Specifically the Environmental Protection Agency, as the lead agency under the Clean Air Act, has been responsible for air quality ashore. By contrast, in what seems to me to be and anomalous situation, the Department of the Interior has had responsibility for air quality over offshore drilling rigs. That is distinctly anomalous when one considers that, within a matter of a few hours, the ambient air over the rigs, because of the prevailing winds that blow it ashore, becomes the ambient air ashore or mixed with that air.

The result is that if there is a less stringent standard, as is in fact, the case administered by the Department of the Interior with regard to rigs from offshore drilling platforms, that tends to degrade the ambient air ashore which, of course, must meet the more stringent standards of the Clean Air Act as administered by EPA and State and local air pollution control districts.

Now, that just does not make sense. Here we put to heroic tests those stationary sources ashore only to find that the progress that is made by those efforts is frustrated because a less stringent standard permits dirtier air to blow ashore from offshore rigs.

About 3 years ago, in 1987, in the 100th Congress, I introduced legislation that was cosponsored by my colleague from California [Mr. CRANSTON], in which we sought to remove this anomaly from the law. We sought to have a single agency and the proper agency, the Environmental Protection Agency, be given jurisdiction for air quality over the rigs, as well as air quality ashore.

We sought a single standard that required the Clean Air Act be administered by that agency and not the different and less stringent standard

presently administered by the Department of the Interior.

I was pleased that the now majority leader, the distinguished junior Senator from Maine [Mr. MITCHELL], at that time the subcommittee chariman having jurisdiction over clean air matters, incorporated into his version, his subcommittee version of the Clean Air Act reauthorization in the 100th Congress, those provisions that I had introduced with Senator CRANSTON.

Regrettably, S. 1630, which did contain very similar provisions, is not going to be the law. Instead, we have the so-called administration, bipartisan, Senate substitute which does not contain those protections for air quality ashore in those coastal States which, like California, suffer a degradation of their onshore ambient air because of pollution blown ashore from offshore rigs.

But in fairness, we have received provisions in the committee substitute that are a substantial improvement, although not in my judgment good enough, not nearly as good as would be achieved were we to, in fact, simply transfer jurisdiction, consolidate responsibility in a single agency, and have the administration of a single and more relevant and more stringent standard.

What we have instead, under the committee substitute, is the proposed language contained in section 327, which would retain jurisdiction and responsibility for the administration of Clean Air Act standards in the Department of the Interior, but it would provide for a sharing of that responsibility with EPA.

In fact, it would call upon EPA to draft regulations which would then undergo revision by the Department of the Interior, and then the revised draft would again be returned to the administrator of EPA for his approval.

There is specific language in this new law that says:

> The regulation shall be as stringent, in terms of the level of pollution control technologies and the emission offset requirements, as those regulations applied onshore for onshore sources of air pollution in California air districts adjacent to the portion of the OCS in which the activities are occurring.

The OCS, of course, is the Outer Continental Shelf.

If, in fact, that is what we achieve, then even though this is a clumsy arrangement from the standpoint of the administration, nonetheless the result will be exactly what we had intended.

The language of proposed section 327 goes further and states:

> Such regulations may incorporate by reference as appropriate the rules of the adjacent onshore air districts.

Mr. President, it is appropriate that the regulations of the onshore adjacent air district be incorporated. It is not just appropriate; I think it should be mandatory rather than permissive, as it is in this law.

Unhappily, the reality is that were I to offer an amendment to sweep aside these changes and substitute a simpler, better provision, that amendment would be defeated. There is no doubt of that. That has been made quite clear to me and to my colleague from California.

I hope in the House a better provision will in fact be inserted in the House version of the Clear Air Act reauthorization. It is going to be my purpose, I tell the managers very candidly, to lobby House Members to support that simpler and better provision. But in fairness, this does achieve certainly the spirit of what we were seeking by my earlier bill and the amendment that was contained in the 100th Congress version of the Clean Air Act reauthorization.

So I will be fair and give credit where it is due, and at the same time, be fair and give clear notice of my intentions to work with those in the House who seek to put my original language into the House version.

I wish them success, and in fact intend to work with them to achieve success. But I will not, for very practical reasons—specifically, not having the votes to prevail—offer that language to the substitute itself.

I can only say in conclusion, Mr. President, if we are successful on the House side, we will have a better provision and a better bill. We will have achieved the desired result, which is to see to it that the air that blows ashore from such rigs as are permitted off the shore of California does not contribute to a degradation of what is already in the south coast air basin, the only air in the country designated as extremely out of attainment with the Clean Air Act standards.

And if in fact we do not prevail in an effort to amend the bill in the House, then I can only say if we are continually troubled with the degradation onshore resulting from offshore pollutant sources, that is not an acceptable situation and we will simply be compelled to revisit that issue.

It has to do with whether or not there is a superior right somehow of offshore oil drilling platforms to pollute. I say that there is not. We will see whether or not better sense prevails in the House. I hope it does.

In any case, Mr. President, we will not be offering that amendment here, but it is my intention to do everything possible to see that it is placed in the House version.

Absent success there, I will only give notice now, we will undoubtedly be compelled to revisit this issue in the future, because it is simply not fair to ask small businessmen ashore to make the kind of Herculean efforts that will be required in an extreme nonattainment area and exempt oil companies, which have a far greater ability to meet more stringent standards because of their ability to distribute it more equitably in terms of the costs, broadly based, to consumers of their products, as well as much greater technological ability to meet more stringent standards.

The PRESIDING OFFICER (Mr. REID). The Senator from Ohio is recognized.

Mr. GLENN. I thank the Chair.

(The remarks of Mr. GLENN pertaining to the submission of Senate Concurrent Resolution 113 are located in today's RECORD under "Submission of Concurrent and Senate Resolutions.")

SOLIDARITY SUNDAY

Mr. MOYNIHAN. Mr. President, on Sunday, April 1, the Coalition To Free Soviet Jews will be holding its annual Solidarity Sunday rally in New York City to reaffirm support for the rights of Soviet Jews. As I would like to share with my colleagues the remarks I have sent to the organizers of the event, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, March 29, 1990.

Rabbi HASKEL LOOKSTEIN,
Coalition to Free Soviet Jews, New York, NY.

DEAR RABBI LOOKSTEIN: I regret that a long-standing prior commitment forces me to miss Solidarity Sunday for the first time in 15 years.

I first attended this important rally for human rights in 1976 with my friends Senators Hubert Humphrey and Scoop Jackson and I returned every subsequent year.

I came back because I felt obligated to bear witness on how strongly the American people longed for a change in the Soviet Union's repressive policies towards Jews and other religious minorities. I know you shared this same sense of obligation. Every spring we gathered together in this vast Plaza and called on the Soviet Union to repudiate the lingering Stalinist legacy of state-sponsored antisemitism and to allow its beleaguered Jewish community to, in Senator Humphrey's unforgettable phrase, "live as Jews or leave as Jews."

Year after year we demanded a change in policies and year after year Soviet leaders continued in their stubborn adherence to policies that only sorely tested Soviet Jews but which placed a deep pall over every aspect to American-Soviet relations.

But this year is different! The Soviet Union of Mikhail Gorbachev has changed—and is changing—at a heady pace that can only delight all Americans who cherish religious freedom and human dignity.

And so today you are gathered not to demand a change in the discredited policies of the past but to applaud many of the changes that are taking place and to declare our conviction that these changes must continue in a fashion that enhances the freedom of all Soviet citizens and enables Soviet Jews to enjoy the basic human rights that they have sought for so long.

Those forces within the Soviet society that long for a return to the sorry policies of the past must be shown that the American people stand in solidarity with those who worked so long, and paid such a terrible price, to keep the dreams of democracy alive during the darkest hours of the Soviet nightmare. How we miss Andrew Sakharov and how proud he would be of you today!

The Soviet Union must be assured that the American people acknowledge and appreciate the positive changes that are taking place in that country and desire to see these changes continue at a pace that ensures the continued improvement of bilateral American-Soviet relations.

The world must be told that full religious rights for Jews within Russia and the swift and unimpeded free passage of those desiring to emigrate are fundamental human rights that must not be held hostage at any other domestic or foreign policy agenda.

We can do no less.

With my best wishes for a happy and meaningful Passover.

Sincerely,

D. P. MOYNIHAN.

THE DEATH OF EUGENE REVILLE

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues of the death of an exceptional man, Eugene Reville. Liz and I are deeply saddened by the loss of our friend, Gene. His time came much too soon.

Gene became superintendent of the Buffalo public schools shortly before I came to the Senate in 1976. Almost immediately he was faced with the challenge of leading his school system in the effort to carry out a court-ordered desegregation plan. That this effort was most successful and that Buffalo was spared the agony and strife that came to many other large city school districts facing similar challenges is a tribute to Gene—to his abilities as an administrator, to his talents as a leader, and most of all to his total commitment to the children of his city. This is his enduring legacy.

Under Gene's leadership, the Buffalo public school system not only became desegregated, but it also experienced a remarkable increase in the quality of the education it provides. The Buffalo Magnet School Program has become a model for the Nation, and more Buffalo schools have been singled out for national recognition and honors than in any other district in our country.

Gene Reville's accomplishments during his 36 years of service to Buffalo and its children as a teacher, principal, and chief school administrator will long be remembered. The people of Buffalo will not forget him or his work to improve the education and the very lives of the children of Buffalo. He enriched all who knew him, and for that we shall be ever mindful and grateful.

GREEK INDEPENDENCE DAY

Mr. KENNEDY. Mr. President, I am honored to be a cosponsor of the resolution designating March 25, 1990, as Greek Independence Day.

The Greek nation was born 169 years ago after 6 hard fought years of stuggle for independence. Greek Independnce Day is a monument to the Nation and people of Greece whose influence on their own region and on America have been extensive and enduring.

Our society has benefited not only from the many invaluable contributions of 3 million Greek-Americans, but also from Greece's fundamental influence on our culture and its historic tradition of free and democratic government.

A firm and proven ally of the United States, Greece has worked with us in World War II, the Korean war, and in NATO to promote the ideals of democracy and self-determination that form the cornerstones of our respective systems of government.

On this occasion, we are also mindful of the continuing tragedy in Cyprus, and the importance of achieving a lasting peace based on the legitimate rights of both the Greek and Turkish communities. Americans care deeply about Cyprus, and we are especially concerned about the recent breakdown of talks at the United Nations. The issue of Cyprus deserves a higher place on the United States foreign policy agenda, so that we can do more to bring an end to this festering crisis.

HEALTH CARE FOR ALL AMERICANS BICOMMITTEE BIPARTISAN SENATE WORKING GROUP ON UNIVERSAL ACCESS

Mr. RIEGLE. Mr. President, since July 1989, a bipartisan group comprised of Finance Committee and Labor and Human Resources Committee members have been working in the Senate to develop a program to assure access to high quality, affordable health care for all Americans. It is a national tragedy that 37 million Americans lack any health insurance at all, public or private. Members of the working group are committed to finding a solution to assure access to affordable health care for every American as well as actions to bring the exploding cost of health care under control. The 15 members of the bicommittee, bipartisan Senate working group on universal access are leading health care policymakers, including Senators CHAFEE, KENNEDY, HATCH, MITCHELL, DURENBERGER, METZENBAUM, JEFFORDS, ROCKEFELLER, SIMON, DASCHLE, ADAMS, DANFORTH, and others.

We have compiled a document of options that this group has been considering, including recommendations of the Pepper Commission. In developing our proposal, we intend to draw on the data and recommendations of individuals and organizations having an interest in health care issues. To help us reach a consensus on a particular speech, we encourage the health care community to assess the options outlined in our document to determine which options they could endorse.

In an effort to secure the widest distribution of our options, we are placing our working group work product in the RECORD today. We would like comments on the "Details of Proposal Options," if at all possible, before the conclusion of the Senate's April recess, scheduled between April 9 and April 17. Comments could be addressed to any or all of the members of the bipartisan working group.

Mr. President, the United States spends more per capita on health care than any other nation. We currently spend over $2,000 for each person in this country on health care. That adds up to more than $660 billion annually, or nearly 12 percent of our GNP. High costs have forced families to absorb higher out-of-pocket costs and has led many to question whether we are getting appropriate value for our investment.

At the same time, there are ever growing and pressing needs. Many who have no health insurance do not even seek needed care because they know that they cannot afford it. In addition, the cost of uncompensated care, over $8 billion each year, drives up costs for everyone and is disruptive to our health care system. Clearly, our current system of private and public programs leaves huge gaps in coverage that indicates a serious maldistribution of resources.

In addition to the moral imperative, we also have an economic imperative to close the gaps. The inadequacies of our health care system affect our ability to compete internationally. For example, the Chrysler Corp.'s health care cost is $700 per vehicle which is far above our international competitors' costs. For America to compete in the world market place, all Americans have to be full partners in the economic team. In order for people to be productive, they have to be educated and healthy.

Mr. President, as chairman of the Finance Subcommittee on Health for Families and the Uninsured, one of my top priorities is to see that all Americans have access to high quality, affordable health care. The political dynamics around this issue have changed. No longer are we questioning the merits of solving the problem. The question before us today is how to accomplish the goal of universal coverage in this country. With the key experts on health policy in the Senate together with the help of individuals and organizations with an interest in

health issues, I believe that we can accomplish the goal of providing access to health care for all Americans. No one in this country should be denied medical care when they or a member of their family needs professional attention.

Mr. President, I ask unanimous consent that the text of the Senate working group document be printed in the RECORD.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

BICOMMITTEE BIPARTISAN SENATE WORKING GROUP ON UNIVERSAL ACCESS

HEALTH CARE FOR ALL AMERICANS

Overview

Goal: Ensure Health Care Coverage for all Uninsured People.

Approach: Maximize private health care coverage: cover remaining uninsured through expanded public coverage.

A. Private Coverage

Pepper Commission and Working Group:

Part 1. Initiatives to expand private coverage.

Part 2. Specific initiatives for small business.

B. Public Coverage

Pepper Commission:

Public plan is created for those not covered directly through employers, and nonworking people. Plan would replace Medicaid and be financed and administered by the Federal Government.

Working Group:

Part 1. Expand Medicaid to cover all people under 100% of the Federal poverty level.

Part 2. Other public program or build on Medicaid for those at or above 100% of the poverty level. Subsidy based on ability to pay.

C. Cost Containment

Pepper Commission and Working Group:

Measures to: ensure that universal health care does not create a new round of health care cost inflation; reduce costs to businesses currently insuring workers; and bring down the long-term health care cost inflation; and address structural problems in health care system.

PRIVATE COVERAGE

Part 1: Initiatives to expand private coverage.

Part 2: Special provisions for small business.

DETAILS OF PROPOSAL OPTIONS

Part 1: Initiatives to Expand Private Coverage

Issue: Mechanism.

Pepper Commission:

Five year plan. Initially, private and public insurance reforms, regulatory reforms, and subsidies enacted to stabilize private market and encourage voluntary coverage. After 2 years, all businesses with more than 100 employees are required to provide health insurance to all employees and nonworking dependents or contribute to a public plan for them. Requirements extended to smaller employers in later years only if targets for expanding access are not met.

Working Group:

Option 1: Require all employers to provide health insurance coverage meeting Federal standards to employers and dependents.

Option 2: Combined program of incentives and disincentives to provide coverage:

Offer employers the option of providing coverage or paying a fee set as a per cent of payroll. Fee would be used to cover part of the cost of public coverage for employer's workers and dependents.

Incentives could include items in Option 3 below.

Option 3: Provide employers only incentives to offer coverage, which could include: pre-emption of state mandates; subsidies to small business offering coverage for the first time; grants to states offering programs to include coverage; establishment of high risk pools for individuals unable to purchase insurance in current market because of ill health; improvements in small employer insurance market; improvement of deductibility of premiums paid by self-employed, credit to businesses with no taxable income offering coverage; allowing employers to pay a part of the premium for coverage under a state's Medicaid plan or other public coverage.

Option 4: Establish a refundable tax credit to uninsured individuals to purchase coverage; encourage individual rather than employer selection of plan.

Option 5: Incentives/Mandates to individuals for purchase of employer provided health insurance.

Require employee to purchase for self and dependent.

Offer employee option of purchasing health insurance or payment of fee to be used in public program.

Issue: Benefit package (including premium responsibility).

Pepper Commission:

Package would be specified and employers would contribute a specified amount. The minimum benefit package includes primary and preventive care, physician and hospital care and other services. Services are subject to cost sharing, with subsidies for low-income people and limits on out of pocket spending.

Working Group:

Option 1: No package specified; employers contribute specified amount.

Option 2: Package specified, employers contribute specified amount. Benefit package could include:

(a) Catastrophic only;

(b) Basic package only with emphasis on primary and preventive care; or

(c) Basic and catastrophic package.

Option 3: Package specified as in (a), (b), or (c) above, but no employer contribution required.

Issue: Individual responsibility.

Pepper Commission:

Require individuals to accept coverage and provides subsidies for low-income people.

Working Group:

Issue: Individual participation in program.

Option 1: Uninsured individuals should be required to accept employer coverage.

Option 2: Uninsured individuals should not be required to accept coverage.

Issue: Public subsidy for low-income people.

Option 1: Provide public subsidies for cost-sharing for low-income people.

Option 2: Do not provide public subsidies for cost-sharing for low-income people.

Part 2: Special Provisions for Small Business

Pepper Commission and Working Group:

Provide improved tax treatment for self-employed, greater opportunities for pooling, reform of small business insurance market, special treatment for new, small businesses, small business subsidies under certain circumstances.

Pepper Commission:

No employer with fewer than 100 workers would be required to purchase coverage or contribute to public plan if coverage goals are voluntarily met—80 per cent of uninsured employees of all firms.

Working group has not yet defined what would be considered a small business.

Issue: Mandatory v. voluntary insurance market reform.

Pepper Commission:

Insurance reforms including requiring insurance companies to meet standards for participation in small business market. Standards include no medical underwriting, acceptance of all applicants, setting rates on same terms for all groups in a community, private reinsurance or catastrophic expenses, availability of managed care.

Working Group:

Option 1: Voluntary insurance market reform, including: allowing groups of small businesses to offer stripped-down basic plan to members of groups by exempting them from state mandates; amending current ERISA rules prohibiting the formation of multi-employer trusts (METs) in certain circumstances; allowing small business to buy-in to Medicaid or other public programs; providing seed money to states to establish small business pools; require states to establish subsidized high risk pools for uninsurable individuals and groups.

Option 2: Require insurance companies to meet Federal or State standards to participate in small business market, including: no medical underwriting; community-rated coverage, acceptance of all applicants; availability of managed care.

Option 3: Require states to establish a new, state-sponsored insurance mechanism for small businesses which would either: insure all small businesses (could be through Medicaid program), or assure, through subsidies, that businesses participating in state pool pay no more than average private market costs.

PUBLIC COVERAGE

Part 1. For people under 100 percent of the Federal poverty leve, expand medicaid.

Part 2. For those at or above 100 percent of the Federal poverty level and not covered through private coverage, expand public coverage.

Pepper Commission:

Public plan is created for those not covered directly through employers, and nonworking people. Plan would replace Medicaid and would be operated according to Federal standards.

As under Medicare, insurers may administer claims and may, under contract, offer options. States may also administer claims.

The public plan pays providers for the specified services with rates set according to the rules of the Medicare program.

The public plans subsumes Medicaid for the specified benefits. Medicaid remains intact for all services not covered by the package.

Participation in the public plan is financed through: employer contribution; individual contributions; federal revenues; state contributions equal to Medicaid expenditures for covered services adjusted for general inflation.

State Role:

State governments no longer have the responsibility for providing the specified benefit package for their low-income residents. The new public plan replaces Medicaid for

those services. Medicaid is retained for services not included in the package.

States contribute to the public program as specified above.

The state, at its option and subject to Federal rules, can administer the public plan. All aspects of the administration must be conducted through a new agency which is unconnected to the welfare or Medicaid departments.

Working Group:

Part 1: Individuals with incomes under 100 percent of the Federal poverty level.

Expand Medicaid to cover all individuals under the federal poverty level regardless of their family composition (i.e., eliminate all categorical eligibility requirements)

Issue: Program Structure.

Option 1: Keep current Medicaid system.

Option 2: Modify current Medicaid system, for example:

Change benefit package to include preventive primary care or catastrophic benefits;

Allow state maximum flexibility to design innovative delivery systems;

Redesign reimbursement, paperwork, and claims procedures;

Federalize benefits, including scope and duration;

Require enrollment in (or option to enroll in) managed care programs.

Part 2: Individuals at or above 100 percent of the Federal poverty level who are not covered through private coverage.

Create new public coverage either through existing Medicaid program or new public program.

Require individuals covered by this program to contribute toward the cost of coverage based on their ability to pay.

Issue: Program structure.

Option 1: State flexibility to establish program within Federal standards.

Option 2: Federal requirement for state to provide coverage.

Option 3: Federal program structured similar to Medicare.

Options 1, 2, or 3 could include the following: health insurance pools; extending Medicaid, e.g., Medicaid buy-in; providing flexibility within delivery of services, e.g., allow incentives for creative delivery systems such as community health centers; requiring certain delivery systems; or high risk pools for uninsurable individuals.

Issue: Sources of funding.

Option 1: Federal.

Option 2: State.

Option 3: Federal/State combination.

Option 4: Employer/ employee contribution with option 1, 2 or 3.

Issue: Benefits.

Option 1: Benefits same as those established in Medicaid, including scope and duration.

Option 2: Provided enhanced benefit structure.

Option 3: Federalize (make uniform) benefits.

Issue: Individual participation in program.

Option 1: Uninsured individuals should be required to accept employer coverage.

Option 2: Uninsured individuals should not be required to accept employer coverage.

COST CONTAINMENT

Pepper Commission:

Immediate actions to control costs: require cost sharing by individuals for medical (other than preventive) services, pre-empt state minimum insurance benefit laws, promote managed care, national commissions to review cost and utilization controls in public plan and in private sector, insurance market reforms to promote efficient delivery of services. Long-term strategies: study and demonstration projects on medical malpractice system reforms, continued support for practice guidelines and outcomes research, reduced cost shifting from uninsured and underinsured (for example, Medicaid) to insured population.

Working Group:

Option 1: Federal Government regulatory cost controls, for example: rate-setting; health planning and PRO oversight of private patients; expenditure targets.

Option 2: Alternative national initiatives.

2A: Immediate actions to control costs, develop long-term strategies.

Use of Federal leverage to implement recently enacted outcomes research/standards development legislation as payment device.

Implementation of the Agency for Health Care Policy and Research treatment practice guidelines, which could be used to establish reimbursement differentials. Would result in some initial savings and reasonable assurance to the public and payors that physicians are providing quality and appropriate care for each dollar spent. (Rand Corporation research shows that 10-30 percent of major surgical procedures being done presently are inappropriate.)

Use of public program leverage to implement cost-effective systems of care. Encourage managed care options, for example, reimbursement differentials and revised HMO Act. Require beneficiaries to enroll in managed care programs.

Direct chronically and catastrophically ill individuals to "centers of excellence," so designated because of their high quality care and their economies of scale in treating many individuals of a similar condition. This would consolidate hospital capacity.

Encourage cooperative agreements between hospitals and community health centers or other ambulatory care providers to reduce emergency room treatment for non-emergency care.

Establish grant program to states, providers, and private payers to develop and implement innovative cost control methods.

Require providers to disclose standardized cost and quality data to assist in health care purchase decisions.

Establish a National Health Cost Inflation Review Commission to set annual voluntary targets, monitor cost increases, make recommendations.

Develop measures to make recipients of care more sensitive to the costs of care, e.g., standardizing an insurance package and capping the tax deduction at the cost of the basic package or structuring co-insurance payments to increase awareness of costs.

Option 2B: Insurance market reforms.

Shift insurance industry focus from risk selection to cost-effective delivery, managed care, provider negotiations.

Anti-trust reforms to allow provider self-regulation and cooperative agreements between insurance companies and managed care providers.

Create national coordination of benefits registry to prevent duplication of benefits and thus assure appropriate insurance premium rates.

Preempt state regulation of the content of health insurance.

Option 3: Private market reforms.

Modify current tax preferences to shift coverage to insurable events, create greater consumer awareness of cost of care and benefits.

Vouchers for individual rather than group purchase of coverage.

Entoven approach: employer mandate to pay flat contribution toward health insurance coverage; employee encouraged to choose less expensive plans.

Require insurance companies to cover catastrophic illnesses, and certain preventive medical procedures and as mammograms and immunizations. This would leave individuals responsible for paying for regular doctor visists, e.g., a visit for a cold.

Option 4: Medical liability reform.

Leave acknowledged problems to states for reform.

Federal government preempts the field in terms of certain traditional malpractice reforms. For example, the Federal government could initiate a uniform cap on non-economic damages, a Federal collateral source rule or a more uniform statute of limitations rule, and allow the use of health care practice guidelines as a defense.

Federal government gives states incentives to enact certain alternative dispute resolution procedures for medical malpractice claims. These alternatives may include a voluntary, parallel arbitration procedure or a mandated administrative alternative which removes malpractice claims from the judicial system.

Federal government enacts its own alternative dispute resolution procedure for medical malpractice claims. Could include a special fund, damage determination only, improved discipline process and enforcement for physician license boards.

Explore no-fault alternatives using accelerated compensable events or other methods which are analogous to the workers compensation system.

Patient protection reforms, explore alternative, more successful methods for deterring negligence by doctors and for preventing adverse events to patients. Anti-trust changes would be necessary to allow sanctions by review organizations and licensing boards.

Explore methods of reducing insurance rates for physicians, particularly OB/GYNs.

FINANCING

Option 1: Utilizing the existing funds currently available in health care system today more effectively by private and public sector reforms.

Option 2: Specific suggestions on new sources of funding for expanding access to care, e.g., new fees or revenues.

General considerations: Aspects of the plan.

Phase-in of overall plan.

Established Commission to oversee implementation of plan.

Universal coverage would: reduce costs for businesses currently providing coverage; ensure fairer apportionment of payment responsibilities; reduce costs for small businesses through insurance market reform; and maintain control over payment rates for public program participants.

Mr. CHAFEE. Mr. President, the problem of access to health care for the uninsured is an issue which has received much attention in recent months. I believe that this will be the most important domestic issue facing our Nation in the 1990's.

We all know the grim statistics. Frustration about the cost of our system is voiced by governments, corporations, employees, and health care providers. We are spending $660 billion per year, or almost $2 billion

every day—for a system that serves far too many of us poorly or not at all. Thirty-some million Americans, 75 percent of whom are in working poor families, have no health insurance, and thus extremely limited access to any health care. We spend a greater percentage of our gross national product on health care than any other nation in the world. Yet the United States lags behind most of these countries on key measurements such as infant mortality and life expectancy.

As a society, we are living a hand-to-mouth existence with regard to health care. We don't know where the next meal is coming from, and we don't have a plan for the future. We drift from one crisis to the next, scraping together just enough of what is needed at the time—whether it be money or political will—to get us past the problem immediately at hand. And until we address this fundamental flaw, we will continue to see the signs of backlash at a health care system that does too little at too great a cost.

We must develop a national strategy for addressing the health care needs of Americans. The question is how. I believe we need to take a two-track approach. First, we must enact a structural reform of our entire health care system. Second, because this reform will take some time, we must continue to make incremental improvements in our existing programs.

As this debate progresses, we must examine a number of difficult issues—issues such as whether or not we should build on our current system or adopt a complete reform. We must examine such options as insurance market reform, malpractice relief, employer mandates, managed care, beneficiary cost-sharing, and financing. Since July of last year, I have been working with a group of my colleagues to find a solution to the problem of the uninsured. This group is bipartisan and made up of both members of the Finance Committee and the Labor and Human Resources Committee. Today, we are releasing an option paper, and ask interested groups to comment.

I have to believe that with a plan, we could make $660 billion go much further. I have to believe that by setting some priorities, grappling with the really tough questions, and yes, making some tough choices, we could deliver appropriate care to every citizen for close to what we are spending now.

We can restructure our health care system, reorder our priorities, and devise a way to deliver appropriate health care to every American. We ought to be able to do that for $660 billion per year. But to do it will take commodities that are even more scarce than money these days: creativity, sacrifice, and a great deal of political will. It will also require the cooperation and assistance of health care providers and the business community.

I look forward to receiving comments on our option paper. I thank my colleagues who have taken part in this working group and I hope that we can continue to work together toward an agreement which will solve this crisis in our health care system.

Mr. KENNEDY. Mr. President, America is facing a crisis in health care that threatens the well-being of every family and jeopardizes the viability of our entire health care system. There are too many uninsured and underinsured Americans—and the number is growing every year. Health care costs are out of control and threaten America's economic growth and ability to compete in world markets. In every city in America, essential health care institutions are threatened with collapse because they can no longer afford to care for the tidal wave of the uninsured.

The members of the bipartisan Labor-Finance Senate Working Group on the Uninsured are committed to developing and enacting legislation to assure access to affordable health care for every American and to bring the cost of health care under control.

As a step toward this goal, the group has produced the list of proposed options reprinted below. These options include the recommendations of the Pepper Commission, which provide an immensely helpful basis for moving forward.

The members of the Commission welcome comments from outside groups and health care experts, as well as Members of Congress on these options.

Mr. DURENBERGER. Mr. President, I rise to join my colleagues on the informal working group on the uninsured, in submitting for public attention a document outlining the difficult decisions we must make to assure that all Americans have access to needed health care services. Our working group was formed last session to foster bipartisan cooperation between the Senate Finance and Labor and Human Resources Committees. Several of us also served on the Pepper Commission, which will soon be issuing a report on its deliberations on the access issue and on financing of long-term care services.

This marks another important step forward in increasing the visibility of the debate on health care policy in this country. Without widespread public attention and involvement, our system will continue to experience escalating costs and widespread inequities in affordability and availability of services. While much of our concern is focused rightly on the 30-plus million Americans who lack adequate health insurance protection, the reality is that our health care system is broken for all 240 million of us who depend upon it.

To begin the task of "fixing" that system, I've been suggesting that we start by agreeing on goals for health care in this country. And, to get that debate going, I've suggested five such goals:

First, that it is Government's responsibility to find the resources to make sure that all Americans receive basic and adequate health coverage. Universal access to health care for all Americans must become a national goal, not just for one commission for the Congress, but for the White House, the Governors and the American people.

Second, the rapidly escalating cost of health care is a burden the system cannot carry for long. Health care reform begins with cost containment. It is an economic fact of life that people pay not attention to costs they don't see. As long as everybody is shifting—and nobody is paying—the cost of health care will continue to be out of control.

Third, our tax system is unfair and sends the wrong signals when it comes to health care. While millions of our wealthiest citizens receive thousands of dollars of tax free health benefits, many of our poorest and self-employed citizens cannot buy health insurance at any price.

Fourth, private insurance in this country must be reformed to some degree. The Government heavily subsidizes private insurance with tax deductions, and that gives the American people the right to say something about the kind of products and policies they offer.

And, finally, the American people need to understand the cost of Government action in this area before we start down the road. Only then can we determine what is feasible and sustainable in a political sense. None of us want to repeat the experience we had approving—and then repealing—catastrophic coverage under Medicare.

Overall, a problem of this size will not be solved by a finger in the dike solution. Each actor in the system—consumers, providers, insurers, employers, and Government—needs to be more accountable and responsible for its actions.

Mr. JEFFORDS. Mr. President, health care is a fundamental need of all American citizens. Our present health care delivery system has many inadequacies which we must rectify. On the Federal level, we are just beginning to seriously grapple with this important issue. Recently, we legislated significant changes in our Medicare payment system that will go a long way toward containing health care costs. Much still needs to be done, specifically, we must increase access to the health care system.

I commend Senator RIEGLE and Senator KENNEDY for taking the initiative to form the Bicommittee, Bipartisan Senate Working Group on Universal Access to Health Care. The time has come to thoughtfully and thoroughly review our health care policy. I will give careful consideration to all responses to the working group options and look forward to working with my colleagues on this critically important issue.

Mr. HATCH. Mr. President, I would like to join with my colleagues from the Labor and Human Resources Committee and the Finance Committee's Subcommittee on Health for Families and the Uninsured in soliciting comments on the options for improving access to health care included in today's RECORD. These options are designed to include many ways of ensuring access to health care in America.

Over a year ago, I convened a group of health care experts to advise me on solutions to the problem of the 30 million uninsured citizens in this Nation. Subsequently, I introduced S. 1274, the Comprehensive and Uniform Remedy for the Health Care System Act of 1989, the first of a series of bills to address the issue of access to health care. Later, the bipartisan working group was formed to look at areas where there could be agreement on various access issues that have been identified.

The option paper that is published in today's RECORD is a snap shot of the discussions we have had. The broad conceptual options range from mandating employers provide health insurance to reducing health care costs so that health care is more affordable. While the options represent varying perspectives on how the problem may be best addressed, the working group is in agreement that it is important to seek input from the public on these options before there are futher discussions.

I would like to encourage comments either directly to me or to other members of the working group. It is important that we know how individuals and organizations feel about these options. And, equally important, we need to know if there are other options that we have not considered,

Mr. President, I would also like to acknowledge the efforts of my colleagues on this working group. They have already contributed an enormous amount of their own time to this effort. I know that they too are committed, as I am, to finding a solution to the problem of access to health care.

Mr. SIMON. Mr. President, I am pleased to rise today, along with my distinguished colleagues on both sides of the aisle and with members of the Finance Committee, in submitting for the RECORD this document entitled, "Health Care for All Americans: Details of Proposal Options." This bicommittee and bipartisan document developed by the working group on universal access represents one step in the national debate on how to best provide health insurance to the uninsured.

There are no simple answers and, at present, there is no consensus on how to solve this grave problem which is threatening the existence of the health care system in our country. This proposal does not set out to make specific recommendations but rather provides a range of options identified by members of the working group as possible solutions to this pressing problem. This document, along with the Pepper Commission, will provide us with a solid foundation upon which legislation can be crafted to provide health insurance to the uninsured in our society.

The crisis of the uninsured is one that we are reminded of everyday. As I attend town meetings and read the mail from my constituents, I am told of frightening stories experienced by citizens without health insurance. We are all quite familiar with the statistics quoted each day in the media; 31 to 37 million Americans without health insurance, of those, 12 million are children, 8 million are between the age of 18 and 24, and two-thirds of all uninsured come from the ranks of workers and their dependents.

We can no longer sit by and watch as our Nation fails to provide for its citizens. It is an amazing contradiction that a nation with the highest standard of living ranks 22d in infant mortality. How can a nation with such wealth find itself talking about rationing health care to individuals without health insurance? How can a nation with the greatest technology find each day a new hospital closing because of inadequate support? We can no longer live with the horror stories of children being denied admittance to a hospital because their parents fail to have any health insurance.

There is no need for additional reports and commissions. The problem has been clearly defined but what we have failed to do is address how such a program will be funded. I hope my colleagues and all those involved in health care, citizens and health professionals, will examine the various alternatives outlined in this proposal. With these comments we can move forward, and solve this problem which is tearing our country apart.

Mr. DANFORTH. Mr. President, a bipartisan group of my colleagues have prepared the option paper which is being included in the RECORD today. I have only recently began participating in this group and have had only a limited role in formulating the options contained in the document. But, as I understand it, the option paper contains a full range of ideas to provide more protection for those who are without health insurance.

There are proposals in this document that I cannot now support. For example, I am skeptical of attempts to solve the access problem by mandating that employers provide coverage to those without insurance. Not only would this solution hurt the flexibility and competitiveness of American businesses, it is also bad health policy. This solution would simply layer another tier of costs on a flawed system. It is like recognizing that the structural flaws in your house have left half of your family without shelter and then attempting to solve the problem by building a brand new top floor on the house, with a new bank loan.

This Nation can ill-afford to spend much more than is already spent on its health care. In doing so, we put at risk other top priorities like the proper education of our children and the shoring up of a weakening infrastructure. The amount we spend on health care in this country is enormous. Presently, we spend over 11 percent of our GNP on health care. If growth continues at the same rate for the next decade, we will end up spending 15 percent of our GNP on health care. Last year, the provision of health care absorbed more than half a trillion dollars of our resources, and the costs of the system continue to rise at a frightening pace.

I am participating in this group because I believe that solving the access problem must be a top priority. It is a tragedy that 31 to 37 million people have no health insurance. Yet, I want to encourage the members of the group to stress comprehensive reform of our present system in order to free up resources for the cause of expanding medical protection for the most vulnerable in our society. For example, the inefficient and adversarial nature for resolving malpractice claims in this country result in billions of dollars being spent on defensive medicine every year. Meaningful reform in this area will free up badly needed resources. As other members of the bipartisan group stated in the one meeting that I attended, we should not need to increase the amounts already spent on health care in this country in order to provide some decent level of insurance coverage for everyone.

I join in introducing this document to the rest of my colleagues, and I look forward to working with this group and the rest of the Senate on this important issue.

APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to Public Law 93-

29, as amended by Public Law 98-459, appoints Dr. Virginia Zachert, of Georgia, to the Federal Council on the Aging.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas is recognized.

Mr. BUMPERS. I thank the Chair.

(The remarks of Mr. BUMPERS pertaining to the introduction of S. 2381 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

REDUCING NUCLEAR WARHEADS

Mr. BUMPERS. Mr. President, I was in Germany with three of my colleagues a couple of weeks ago, but before that, we, as members of the Arms Control Observer Group of the Senate, went to Geneva. We went to talk to our negotiators and Soviet negotiators at the START talks, chemical weapons talks.

We did not talk to the Ambassadors to the Conventional Forces in Europe talks, but we did visit on the Defense and Space talks and the Threshold Test Ban talks.

I do not know whether any of those treaties are going to be ready for signature in June for the tentatively scheduled visit by President Gorbachev in this country. What I am about to say does not deal, really, with any of the talks that I had with our Ambassadors there. It deals with something that was troubling to me before I went, and is still troubling to me.

About 1½ years ago, when the START talks first started, both parties agreed that they would cut the number of warheads on each side in half. You remember the SALT Treaty was negotiated under President Carter, and was torpedoed, probably never had much of a chance. But after the Russians invaded Afghanistan, it was shelved here because it had no chance.

But the SALT Treaty, I agree, had one very bad flaw in it. It limited the number of missiles and launchers each side could have. Everybody ultimately agreed that that was not a very good idea because it did not control the growing number of warheads in the world. Both sides just started building bigger missiles within the 2,250 limit and put more warheads on them.

And so when the START treaty talks started everybody agreed if you really want to cut the number of nuclear warheads that we and the Soviet Union have aimed at each other, you have to deal with warheads, not launchers. And so they said, "Let us cut the number of warheads on both sides to 6,000 each."

Both sides have between 12,000 and 13,000. And that was generally approved, because it was essentially a 50-percent reduction in the number of warheads on both sides. Then, within the 6,000 warheads that each side would have, they said:

> Let us make 4,900 of those deployable on ballistic missiles and the other 1,100 can be cruise missiles launched from under the wings of a B-1 or a B-52, or the bombers themselves. But only 4,900 could be on our submarines, or on our land-based ballistic missiles.

And I applauded because I thought that was a very good approach to this problem.

But let me tell you what happened since then. Since then, we have negotiated to the point where, if the treaty were signed today, we would have about 1,700 warheads and the Soviets would have about 7,700. I am quoting from an article in the Washington Post, not from anything that is classified.

And why did that happen and how did that happen? Well, it is said that, for example, we can put 20 cruise missiles on one bomber, but that that bomber will only count as 10 warheads. So we get 10 freebies.

So if you have 100 planes with 20 cruise missiles on them, under the counting rules, they would only count as 10, but they would actually be carrying 20. And so that means there are 2,000 extra warheads above the 6,000.

What else? Gravity bombs. I do not know how many bombs, gravity bombs, just old-fashioned bombs—only they are nuclear, and there is nothing old-fashioned about that—I do not know how many of those a plane can carry.

I assume certainly more than one. But the estimates are now that we are going to have well over 11,000 warheads. And because the Soviets do not have many intercontinental bombers carrying cruise missiles that can reach the United States, because of those counting rules, we are going to wind up not with 6,000 accountable warheads on each side, but we will have over 11,000 and the Soviets will have over 7,000 actual warheads.

I have said on this floor many times, Mr. President, I do not sleep any better for knowing that we maybe have a couple of thousand more warheads than the Soviet Union. One hundred warheads is enough to ruin your whole afternoon. And we have piled warhead on top of warhead to the point that it has long since lost any rational meaning.

So, where does that leave us? Well, I assume the treaty is going to be agreed to essentially as I have stated it, so it leaves us that, unless we start negotiating START II, we are almost where we were when we started.

Everybody has been rhapsodic about the START Treaty because they thought it was going to cut the number of warheads in half. And, lo and behold, the final product looks like it is just going to be a minimal cut in warheads from where we were when we started. I think this administration does not want to immediately start negotiating another treaty, at least according to a press account yesterday. They do not want to start negotiating another treaty, but the Soviets do.

Let me describe that press account for my colleagues. It deals with whether or not we ought to try to negotiate the elimination of MIRV'd land-based missiles, especially mobile MIRV'd land-based missiles.

The Soviets say it is too late to submit a proposition under which we would not go with the rail mobile MX in exchange for their destroying their SS-24. General Akhromeyev, when he was in this country about 1 year ago, said, "That might be a doable deal. Why do you not offer it? I promise you the offer will be taken seriously."

Incidentally, I think General Akhromeyev is going to be in this country again. It is said he is the one military man who has Gorbachev's ear. It would be a good thing to explore with him whether that is possible or not.

But Ambassador Nitze says, all the former chairmen of the Joint Chiefs of Staff, Brent Scowcroft, everybody says—except Dick Cheney and George Bush—that we ought not to go forward with these land-based mobile MIRV'd missiles.

What I am talking about has nothing to do with stability. When we consider the fact that we have a bunch of 10-warhead missiles out there that can be destroyed with two warheads from the other side, what is the natural inclination? As the Secretary of State said, "Senator NUNN, you use them or lose them." There is an instability attached to these missiles.

So, Mr. President, I am hoping, if the Soviets are correct, if it is too late to start negotiating the elimination of these MIRV'd mobile missiles, I strongly recommend to the Secretary of State, the Secretary of Defense, and the President that we immediately go into talks on START II and see if we cannot have a real reduction in warheads and, above all, to get rid of those MIRV'd—not just mobile—but MIRV'd land-based missiles which are so destabilizing.

Mr. NUNN. Will the Senator yield?

Mr. BUMPERS. I will be happy to yield to the Senator.

Mr. NUNN. I did not hear all the Senator's presentation, but I think he is talking about a very important subject and one I have been concerned

about for a long time. The way I see it, the step of asking the Soviets to consider getting rid of their SS-24 in exchange for us not going forward with the MX rail mobile would be an important interim step toward a long-term goal of deMIRVing all missiles on land on both sides. Then we would be talking about something that really would be stable.

But I have not heard the Soviets say it is too late to move forward with that proposal. The quote I heard from the Soviets was they would still be receptive. Has the Senator any kind of quote from Soviet leaders saying it is too late for that kind of proposal?

Mr. BUMPERS. Mr. President, it was in yesterday's Washington Post where the reporter was quoting somebody at the arms talks. Obviously this is second- and third-hand stuff. The Soviets say that it is too late to make that proposal.

I am inclined to agree with the thrust of the question and that is it is never too late.

Mr. NUNN. I would rather have the START agreement 2 months later, or 3 months later, than not take advantage of what may be the best opportunity we have had in 40 years to try to bring about a stable regime.

Mr. BUMPERS. The Senator took the words right out of my mouth.

In my opinion the world would be so much more secure, and nobody would lose any political advantage if we did not get that treaty even this year or early next year, if they can negotiate what the Senator has correctly said ought to be at least a transition toward the abolition of MIRV'd land-based missiles by going first with the mobiles.

Mr. NUNN. I could not agree more. The problem with waiting for START II is we know how long it takes to negotiate a treaty. We are going to be called on this year to put up a couple of billion dollars for the rail mobile MX—billion, not million—next year a couple of billion. We are going to spend $6 billion over the next 3 years on that system.

I have never seen the military very willing to give up things that have just been built. So, even if we try to put forward that kind of proposal in START II, in my opinion it is going to be awfully late in the game. I think, if it does not come in START I, it is going to be at least 10 times more difficult to ever dream of accomplishing it.

Once we start down the mobile MIRV'd direction, then the next step is for both sides to try to be able to locate those mobile MIRV'ds, to be able to go after them and we keep this arms race continuing and continuing—offense, defense, offense, defense, and here you go.

So I really am one of those who has urged very strongly the administration not to be bound by any kind of arbitrary deadline of having to sign a START agreement by June 1, or any other arbitrary date, when the substance of the agreement is what the American people and the world are really looking for; not the date of signature, but the substance.

Is it really going to make the world safer? That is what we ought to be asking.

If the answer to that is only marginally, when we can make it much safer, I would much prefer to have a little delay.

Mr. BUMPERS. Mr. President, I cannot tell you how pleased I am that the Senator just happened to walk on the floor and make those remarks.

I have read the Senator's comments on the first two speeches the Senator made on the floor dealing with this as well as the whole defense posture and the constraints we are under budgetwise. But I want to say, less than 1 year ago I raised this issue in Geneva at the arms control observer talks. I said, "Why not just submit to the Soviets this proposition that we will not go forward with the MX rail mobile if they will stop now and dismantle their SS-24's, which is their ccunterpart to this system."

I must say that suggestion was almost ridiculed, and they said, "You do not understand. It is naive to think that the Soviets are going to give something in exchange for something we have not built."

I said, "Well, I learned as a small boy you never know the answer to any question until you ask."

So why does the Senator not at least submit this and just see what kind of a response he gets? Subsequent to that time, my colleague may recall that General Akhromeyev was in this country, and he was quoted in the press as saying that proposition ought to be submitted, but it never has been. This idea of going forward, as the Senator correctly points out, with a $2 billion research and development of this system, when we all know that it is a very desirable goal to do away with these kinds of systems, why do we have to spend $2 billion before we at least try the Soviets out as to whether they are willing to cut this deal?

(Mr. REID assumed the chair.)

Mr. NUNN. Mr. President, I think the Senator's point is very well made. I agree with him. It is not just Akhromeyev, as important as he is. He is very important. I have talked to several other officials who feel the goal of both sides ought to be to move away from MIRV land-based missiles and have single warhead missiles. That would avoid in the future perhaps billions and tens of billions of dollars in expenditure, because as long as we have the MIRV systems on land, they are such an offensive threat that both sides are going to feel compelled to be able to destroy them at the earliest stages of any conflict.

So it is not simply how much you spend on the MX, or the SS-24, on the Soviet side, or the Midgetman or the SS-25 on our side. It is what train of expenditures and efforts those initial deployments will put into play over the next 20 years. I see that train as being much larger in terms of dollars spent to hunt missiles, find missiles and be able to destroy them at early stages because they are so threatening, because they can be made vulnerable and because, as the Senator pointed out—to take the arithmetic of it—you find a train with missiles on it and you use a very few warheads to destroy a great number of warheads.

So, there are all sorts of reasons for military advisers in a crisis to say, "Mr. President, as much as we hate to advise you of this, we think they are about to attack. If we attack first, it will be a tremendous advantage," because the arithmetic is in our favor. We do not want any general to ever have that in his mind on our side or the Soviet side. That is what stability is all about, and that is what we have been striving for for years.

We have the chance now that we have not had. No other American President has had this opportunity, in my view, to move toward a regime of stability that would, most important, make the chances of nuclear war go way down. To me that is what arms control should be all about. I thank the Senator for raising this. I think he is on to something that is enormously important. I am pleased I was able to hear part of it.

Mr. BUMPERS. Mr. President, I am so pleased the Senator is here. My purpose for being here on a lonely Friday afternoon is to speak on this subject because I have had for some time this nagging visceral feeling that the opportunity may be further away.

As my colleague correctly points out, on MX, for example, it is not just the $2 billion. It makes no sense militarily because, as he points out, for example, if we deploy one of those systems, we have four trains, with two missiles per train, that is eight missiles. And with 10 warheads per missile, that is 80 warheads, at one location.

I do not know whether Ambassador Nitze is right or not. He still believes the bolt out of the blue theory. Some people say that is not possible any more. If you read his remarks he gave at the Institute for Foreign Policy Analysis Breakfast Club—and I do not always agree with him on his approach to these things—he was making the point the other morning that this makes no sense and it makes no sense if you consider a bolt out of the blue is possible; that the Soviet Union could conceivably get 80 of our warheads for only 2 of theirs. What

kind of military sense does that make, and what kind of budgetary sense does that make when there are so many other things we can do that are much more viable for us?

Mr. NUNN. Mr. President, I say to the Senator, the best case last year for funding the rail MX mobile was based on a hope that has not been met, but I have not given up. It was the hope that we would be able to trade that for the SS-24 and the hope that mankind could then move toward saving an awful lot of money, yes, but also, much more important, toward really reducing the chances that any general in the Soviet Union or the United States would ever walk into the President or to the leader of the Soviet Union and say, "We have to hit first; we have to preempt; we have to start a nuclear war, otherwise we are too vulnerable." That is the bottom line.

As much as the odds are against it—I do not know what the odds are. Maybe they are 10,000 to 1 it will happen. If they are 10,000 to 1 now, we want to make them 100,000 to 1. If they are 100,000 to 1 now, we want to make it 1 million to 1 now. Whatever the stakes are, I want to have a quantum leap in those odds against nuclear war.

Mr. BUMPERS. Mr. President, as the Senator knows, he commands more respect in this body than any other single Senator on these issues. Not only am I pleased to hear him make these comments with regard to what I was talking about, but I want him to know that when we get down to the bill that the committee will submit to us, I, certainly on this issue, will be a staunch ally. I just think it is foolish. I must confess, I have always preferred the Midgetman. I know it is more expensive but it is so much less destabilizing. I think the rail MX makes no military or economic sense.

Mr. NUNN. Let me make one other observation. The Midgetman is more expensive because it is a new missile and his not been developed. We have to spend money on it. We do not necessarily have to deploy that in a mobile context. What we have to do is spend enough money on it so we have the ability to make the Midgetman mobile, if necessary.

But, if both sides start diminishing, and if we have in view 10 years from now the Soviets will have no SS-18's and no MIRV missiles on land, we may very well be able to put Midgetman, single-warhead missiles in silos and not put them in a mobile capacity which will save us enormous amounts of money and use those in silos, of course, as an interim step in case we ever have to go mobile, if our Trident submarines became vulnerable.

After all, that is the hedge there. We have a triad, and because that is one leg, we are not then vulnerable overall.

I hope the President will seriously consider the fact we do not have to necessarily commit now to make those Midgetman missiles mobile, although we do have to put enough money into research and development so we could make them mobile if we needed to in the future. I can see a regime on both sides where we have single warhead missiles in silos on both sides spaced out enough so that neither side—it is a one-on-one ratio and you do not get an advantage. You give up one missile, warhead, to get one. There is no reason to go first under that situation, even if you can hit the other side, if you have an arms control regime that has equal ceilings on both sides.

That, combined with single warhead missiles on both sides in silos, can save enormous amounts of money on both sides and also, more important, again, greatly reduce the chances any military adviser would ever say to any leader in the Soviet Union or the United States that we have to hit now or we are going to lose our offensive power.

Mr. BUMPERS. I will say to the Senator, I have one little vignette that will be interesting to him, and he might have been present. Back in the early 1980's, there was a group who met every 2 or 3 weeks with somebody who is presumed to be an expert on arms control. I remember Brent Scowcroft, who is now our National Security Adviser at the White House, was our guest one time, and he made an indelible impression on me because he in discussing this whole issue in a sort of macro way casually, said probably where we ought to ultimately wind up in arms control is with each side having 500 single warhead missiles in silos well spaced.

I heard the Senator make that point when he came to Arkansas last year and went out to the Little Rock Air Force Base with Senator PRYOR and myself. He made that very point at a press conference. The Senator was making it in connection with the MX, but it applies here. The whole theory being that it does not make any difference if you launch first or not. If you launch all 500 of yours on the assumption it is going to take 2 warheads to get 1 of the other side's missiles, then you are only going to knock out 250 of his 500, and he is going to have just as much left to destroy you. It is a very stabilizing thought.

But I remember it was none other than Brent Scowcroft who made that suggestion.

Mr. NUNN. That is correct. The dilemma we are in now, supreme paradox, is that the Soviets had read that Scowcroft report very carefully. That was done under Reagan and was bought on by supposedly everybody. The Soviets seemed to take the Scowcroft advice, and we have yet to take that advice, even though he made that report to President Reagan and is now the security adviser to President Bush. He is a wise man, with a lot of influence. I think President Bush is looking very carefully at these issues, and I have some hope that the Brent Scowcroft view is going to prevail.

Mr. BUMPERS. I thank the Senator very much for his comments. This has been an interesting colloquy this afternoon.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FLAG BURNING ON THE FAST TRACK

Mr. DOLE. Mr. President, it was announced today by the Supreme Court that they intend to put the issue of flag burning on the fast track. I think that is certainly good news. It is good news for the flag, for the American people and those of us in Congress who want Old Glory to have the protection it deserves.

The lower courts have already confirmed what I predicted last year, the flag statute flunks the constitutionality test, and that is why the flag burners have been having a field day at Old Glory's expense. Now the Court has the opportunity to settle this issue in a timely manner, whether this statute is the airtight law that its authors claim, or if Congress will be forced this summer to reconsider the 27th amendment to the Constitution to preserve our Nation's most cherished symbol.

It is my understanding that the decision by the Court will be rendered sometime in July, and that would still give us plenty of time to act before we adjourn some time later this year to act on a constitutional amendment to prohibit burning the flag of the United States, which I think is important. I think most Americans believe it is important. If the statute does not work, something that will work will be a constitutional amendment.

NOMINATION OF TIMOTHY RYAN, JR.

Mr. DOLE. Mr. President, earlier today, the Senate Banking Committee showed some courage and good sense when it voted to endorse Tim Ryan, President Bush's outstanding nominee to head up the Office of Thrift Supervision.

The vote was a razor thin 11 to 10, and I commend the two Democratic members of the committee who voted

to allow the Ryan nomination to reach the Senate floor.

THE NEED TO MOVE QUICKLY

I do not need to tell anyone about the importance of acting—and acting quickly—to stanch the bloodletting in the thrift industry.

In 1989, the thrift industry had its worse year ever, with losses soaring to $19.2 billion. Last year, thrifts in my own home State of Kansas lost $606 million. And for each day of delay—for each day that the RTC fails to move thrifts out of the Conservatorship Program—the taxpayers of this country are being hit up to the tune of $20 million.

And now, as a result of the Olympic Federal Decision, the actions of the Acting Director of OTS are in a cloud of legal doubt.

President Bush recognized the urgency of getting a qualified person to fill the OTS post, and he chose the most qualified person available—Tim Ryan. Secretary Brady asked for an expedited hearing on the Ryan nomination, and he got it.

I commend the chairman of the Banking Committee, Senator RIEGLE, for scheduling this hearing on such short notice.

DIRECTOR OF THE OTS—A THANKLESS JOB

Not too many Americans are willing to turn their lives inside out—particularly to take a thankless job like the directorship of the OTS.

But when Tim Ryan was tapped by the President, he stepped forward, and he put his personal and professional reputations on the line.

CONCLUSION

Mr. President, Tim Ryan is the right man for the OTS job, and he deserves to be confirmed. He also deserves to have the Members of the Senate take a close look at his record—a record of accomplishment at the National Labor Relations Board, as Solicitor General to the Labor Department, and as a lawyer in private practice.

I would also ask my colleagues during the next few days to take the time to personally meet Tim Ryan. I am certain they will find him to be as qualified on a personal basis as his outstanding record suggests.

Mr. President, I ask unanimous consent that a biographical sketch of Timothy Ryan be printed in the RECORD.

There being no objection, the biographical sketch was ordered to be printed in the RECORD, as follows:

BIOGRAPHICAL SKETCH—T. TIMOTHY RYAN, JR.

T. Timothy Ryan, Jr., a resident of McLean, Virginia, is a partner in the Washington, D.C. law firm of Reed Smith Shaw & McClay. Mr. Ryan was Solicitor of Labor, U.S. Department of Labor from 1981 to 1983. He was appointed to this position by President Reagan and on March 12, 1981 his appointment was confirmed by the Senate.

Mr. Ryan is a graduate of Villanova University (A.B., 1967) and American University Law School (J.D., 1973). He is married to Judith Rush Ryan and has a daughter, Kathryn, and a son, Michael.

Mr. Ryan was formerly an attorney-advisor to Board Member Ralph Kennedy of the National Labor Relations Board. Thereafter, he was associated with the Baltimore, Maryland law firm of Venable, Baetjer & Howard. In 1976 he served as Deputy General Counsel of the President Ford Committee, and in 1980 he was Legal Counsel for the Reagan/Bush Transition. Mr. Ryan served as Special Counsel to the George Bush for President Committee in 1988. Mr. Ryan is a member of the Administrative Conference of the United States and a Board Member and former President of The American Council of Young Political Leaders. He also served as a member of the ERISA Advisory Council established by Secretary of Labor William Brock, the Overseas Private Investment Corporation and the Program for the Advancement of Commercial Technology in India.

Mr. Ryan is admitted to practice law before the United States Supreme Court, the District of Columbia Court of Appeals, the United States District Court for the District of Columbia, the United States Court of Appeals for the District of Columbia and the Seventh Circuit Court of Appeals. He is a member of the Labor Law Section of the American Bar Association and the Federal Bar Association, as well as the Bar Association of the District of Columbia. Mr. Ryan has been named to Who's Who in America and to Who's Who in American Law.

RETIREMENT OF JAMES ATHERTON, PRESS PHOTOGRAPHER

Mr. MITCHELL. Mr. President, later today his colleagues in the Press Photographers' Gallery will be wishing Jim Atherton of the Washington Post a happy retirement.

In an era where the men and women working for our daily newspapers and manning our television stations are all too often lumped together and referred to as an undifferentiated group called "the media," professionals like Jim Atherton serve to remind us all that there is art as well as journalism in the work of bringing our daily world to the breakfast tables of American citizens.

Newspapers without photographs would be shorn of half their impact. The work of news photographers helps make concrete to the eye of the reader the events that are making history. It defines and illustrates the essence of a story; it catches history itself, sometimes, mid-stride, its guard down.

I know Jim Atherton has had a fulfilling and satisfying career. I know his colleagues in the Press Photographers' Gallery will miss him. He has earned an enjoyable retirement and I hope he enjoys it.

But I cannot help wondering if he will sometimes feel a slight twinge of regret for the history that his camera is no longer chronicling. I know that all Members of the Senate join me in wishing Jim Atherton a very happy and healthy retirement.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ENROLLED BILL SIGNED

The ACTING PRESIDENT pro tempore (Mr. KOHL) announced that on today, March 30, 1990, he had signed the following enrolled bill, which had previously been signed by the Speaker of the House:

H.R. 4099. An act to suspend section 332 of the Agricultural Adjustment Act of 1938 for the 1991 crop of wheat.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate together with accompanying papers, reports and documents which were referred as indicated:

EC-2677. A communication from the Secretary of Veterans Affairs, transmitting, pursuant to law, notice that the Department of Veterans Affairs does not intend to request supplemental appropriations for the remainder of fiscal year 1990; to the Committee on Appropriations.

EC-2678. A communication from the Principal Deputy Assistant Secretary of Defense (Production and Logistics), transmitting, pursuant to law, the annual report on independent research and development and bid and proposal costs for fiscal year 1989; to the Committee on Armed Services.

EC-2679. A communication from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend title 10, United States Code, to modify the physical examination requirement for members of the Ready Reserve of the armed forces; to the Committee on Armed Services.

EC-2680. A communication from the Assistant Secretary of the Army (Research, Development and Acquisition), transmitting a draft of proposed legislation to authorize the use of annual Department of Defense appropriations for payments under equipment operation and equipment maintenance contracts that cross fiscal years; to the Committee on Armed Services.

EC-2681. A communication from the Chairman of the Federal Trade Commission, transmitting, pursuant to law, the

twelfth annual report on the administration and enforcement of the Fair Debt Collection Practices Act; to the Committee on Banking, Housing, and Urban Affairs.

EC-2682. A communication from the Comptroller of the Currency transmitting, pursuant to law, the annual report on the consumer complaint process of the Office of the Comptroller of the Currency; to the Committee on Commerce, Science, and Transportation.

EC-2683. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, notice of the extension of time for a decision in Finance Docket No. 31494, Intermountain Western Railroad Company—Purchase—Union Pacific Railroad Company; to the Committee on Commerce, Science, and Transportation.

EC-2684. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on the use of flight corridors in support of drug interdiction; to the Committee on Commerce, Science, and Transportation.

EC-2685. A communication from the Assistant Secretary of the Army (Civil Works), transmitting, a draft of proposed legislation to provide for the conservation and development of water and related resources, to authorize the U.S. Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States, and for other purposes; to the Committee on Finance.

EC-2686. A communication from the Chairperson of the Retirement Trust, Navy Resale and Services Support Office, Department of the Navy, transmitting, pursuant to law, the annual audit report on the Trust retirement plan for the 1988 Plan Year; to the Committee on Governmental Affairs.

EC-2687. A communication from the Secretary to the Railroad Retirement Board, transmitting, pursuant to law, the annual report of the Board under the Government in the Sunshine Act for calendar year 1989; to the Committee on Governmental Affairs.

EC-2688. A communication from the Executive Director of the State Justice Institute, transmitting, pursuant to law, the first annual report of the Institute for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2689. A communication from the Assistant Secretary of Transportation (Budget and Programs), transmitting, pursuant to law, the annual report of the Department of Transportation on actions taken under the Program Fraud Civil Remedies Act for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2690. A communication from the Assistant Secretary of the Interior (Indian Affairs), transmitting, pursuant to law, a proposed plan for the use and distribution of Walker River Paiute Tribe judgment funds; to the Select Committee on Indian Affairs.

EC-2691. A communication from the Chairman of the Securities and Exchange Commission, transmitting, pursuant to law, the annual report of the Commission under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2692. A communication from the Chairman of the National Labor Relations Board, transmitting, pursuant to law, the annual report of the Board under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2693. A communication from the Chairman of the National Endowment for the Arts, transmitting, pursuant to law, the annual report of the Federal Council on the Arts and Humanities on the Arts and Artifacts Indemnity Program for fiscal year 1989; to the Committee on Labor and Human Resources.

EC-2694. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, recommendations for legislative action; to the Committee on Rules and Administration.

EC-2695. A communication from the Secretary of Veterans Affairs, transmitting, a draft of proposed legislation to amend title 38, United States Code, to expand the Secretary's authority to make temporary appointments of certain health care personnel employed in the Veterans Health Services and Research Administration; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

H.R. 987. A bill to amend the Alaska National Interest Lands Conservation Act, to designate certain lands in the Tongass National Forest as wilderness, and for other purposes (Rept. No. 101-261).

By Mr. GLENN, from the Committee on Governmental Affairs, without amendment:

S. 1424. A bill to amend chapter 57 of title 5, United States Code, to provide that reimbursement for certain travel expenses related to relocation of Federal employees shall apply to all stations within the United States.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary:

Robert W. Sweet, Jr., of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention (Exec. Rept. No. 101-19).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BURNS:

S. 2372. A bill to extend and revise agricultural price support and related programs, to provide for resource conservation and agricultural research, and to provide consumers a reliable supply of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. REID:

S. 2373. A bill to promote and enhance the science and mathematics literacy of elementary and secondary school students by providing grants to local educational agencies desiring to participate in curriculum choice programs, and by providing scholarships to individuals who agree to teach mathematics and science in elementary and secondary schools; to the Committee on Labor and Human Resources.

By Mr. CHAFEE:

S. 2374. A bill to temporarily suspend the duty on chlor amino base; to the Committee on Finance.

S. 2375. A bill to temporarily suspend the duty on 3-nitrophenyl-4-beta-hydroxyethyl sulfone; to the Committee on Finance.

S. 2376. A bill to temporarily suspend the duty on 4-chloro-2-nitro aniline; to the Committee on Finance.

S. 2377. A bill to temporarily suspend the duty on amino sulfon br; to the Committee on Finance.

S. 2378. A bill to temporarily suspend the duty on acet quinone base; to the Committee on Finance.

S. 2379. A bill to temporarily suspend the duty on diamino phenetole sulfate; to the Committee on Finance.

S. 2380. A bill to suspend temporarily the duty on lasamid; to the Committee on Finance.

By Mr. BUMPERS:

S. 2381. A bill to prohibit the obligation of funds in connection with the Follow-on to Lance missile program; to the Committee on Appropriations.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. BOREN, Mr. DASCHLE, Mr. KERREY, Mr. PRYOR, Mr. HARKIN, Mr. BAUCUS, Mr. BOND, Mr. COCHRAN, and Mr. BOSCHWITZ):

S. 2382. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 and the Agricultural Trade Act of 1978, to promote and encourage the export of agricultural commodities and the products thereof, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PRESSLER:

S. 2383. A bill to exchange of lands in South Dakota and Colorado; to the Committee on Energy and Natural Resources.

By Mr. BOREN (for himself and Mr. HEINZ):

S. 2384. A bill to amend the Internal Revenue Code of 1986 with respect to the treatment of certain real estate activities under the limitations on losses from passive activities; to the Committee on Finance.

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2385. A bill to establish the National Forest Foundation; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DASCHLE (for himself, Mr. LEAHY, and Mr. KERREY):

S. 2386. A bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to improve agricultural research and related programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN:

S. Con. Res. 112. A concurrent resolution expressing the sense of the Congress that the United States should seek to obtain an Advisory Opinion for the International Court of Justice concerning the right of self-determination of the people of Lithuania; to the Committee on Foreign Relations.

By Mr. GLENN (for himself and Mr. BOSCHWITZ):

S. Con. Res. 113. A concurrent resolution expressing the sense of the Congress on

international nuclear sales to South Asia; to the Committee on Foreign Relations.

By Mr. DASCHLE (for himself, Mr. LEAHY, Mr. BENTSEN, Mr. BOREN, Mr. BURDICK, Mr. BURNS, Mr. GRASSLEY, Mr. HARKIN, Mr. KERREY, and Mr. SIMON):

S. Con. Res. 114. A concurrent resolution expressing the sense of Congress regarding action by the Secretary of Agriculture and the Federal Crop Insurance Corporation to restore confidence in the Federal Crop Insurance Program pending consideration of legislation on the Crop Insurance Program; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BURNS:

S. 2372. A bill to extend and revise agricultural price support and related programs, to provide for resource conservation and agricultural research, and to provide consumers a reliable supply of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL RECOVERY ACT OF 1990

Mr. BURNS. Mr. President, I rise today to introduce legislation to replace the expiring 1985 farm bill. The Food Security Act of 1985 was a revolutionary measure for agriculture. The bill I am introducing today takes it just one step further.

In 1985, the traditional role of the United States of carrying the rest of the world's agricultural production constraints were cast off. Helped by programs such as the Export Enhancement Program, we now face a much different situation.

Burdensome stocks have been reduced. The tools created by the Food Security Act of 1985 have worked to reduce much of that carryover burden. It was touted at that time as a major act and it was a marketing tool. Much work remains to be done, however. Good times have not arrived in our rural areas. We have seen good times come to both the east and west coasts, but mid-America has suffered. Many of our farm families continue to draw down their assets and mortgage their future.

The administration was the first to throw down the gauntlet on the 1990 farm bill. The Agriculture Committees in both the House and the Senate are busy holding hearings and are about to begin markup. The issues are clear.

Cost has become a major item of the debate surrounding a 1990 farm bill. The administration, no more than I, want to keep costs under control. Reducing our budget deficit and our national debt is a priority among all American people. In fact, I suppose if you went and walked up and down the street and talked to a lot of people, they would agree with you.

The goal needs to continue within reason. Conditions that hurt America so badly in the early eighties have been for the most part brought under control but they have not been eliminated.

The costs to farmers continue to rise: fertilizer, farm machinery, oil and gas, everything it takes to produce a crop, those costs continue to go up. All we have to do is go to the implement dealer in our hometowns and just see how much parts cost to fix up machinery that has gone awry. And then go to a farm auction and see old machinery being bought for just parts alone. Prices paid to farmers for their product have not gone up. In fact, in some cases it has gone the other way. Many of our farmers continue to live on borrowed time.

Agriculture, especially farming and ranching, is sort of a unique situation. If we think about it just a little bit, they are the only segment of the American economy that sells wholesale, buys retail, and pays the freight both ways. And we benefit, American society, from that kind of situation.

The American consumer pays less of his expendable dollars for food in this country than any other country in the world, especially developed countries. They grow the food that keeps us all well fed. They also grow the food that keeps the world well fed. They contribute to our balance of trade. In the modern era, our farmers have never suffered a negative trade balance.

We are always in the black. Yet the exodus from our farm communities continues. Each year there are fewer and fewer farmers to work the land, and it is also true in our small towns that serve that agricultural community. They are slowly eroding their capital base.

Also the 1990 farm bill gives me the opportunity to address those remaining imbalances. My proposal would, in essence, reaffirm this society's and Government's commitment to American agriculture to production level. My bill would raise the target price 2 percent annually to compensate somewhat for the increased prices that farmers must pay for their inputs. All we have to do is look at just the fuel costs this year alone. It is going to be much higher than it was last year and, from all predictions, it will be higher in times to come.

In addition, there will be an additional rise in target prices if the Secretary chooses to impose an unpaid land diversion program.

The purpose of my bill is not to increase Federal outlays. In fact, my proposal continues all the usual limits on Government payments, including payment limits and acreage-based limitations. But my bill is meant to increase farm income, preferably through higher returns at the marketplace.

The marketplace is where agriculture really wants to be paid. Our society and this Government has a convenant with the farmers so that they can stay in business and maintain a viable industry, also produce the foodstuffs that this country needs so much.

Food quality and food safety is our primary concern to keep this country well fed and to also feed the people who sometimes are not as fortunate as some of us.

So my bill is meant to repair some of the tears in the safety net that we have seen go away. I hope my colleagues will consider it.

Mr. BOSCHWITZ. Will the Senator yield for a comment on his farm plan?

Mr. BURNS. I sure will.

Mr. BOSCHWITZ. Mr. President, I compliment the Senator from Montana for introducing a bill that does two things, as I understand it: Raises target price to reflect the increases in overhead that the farmers are experiencing and, second, that would attach target prices to the size of the unpaid acreage reduction program.

In the case of wheat, a principal crop in the Senator's State of Montana, the underpaid setasides have been as high as 27.5 percent in recent years. That means that farmer, in the event he wishes to be part of the program, can grow nothing on 27.5 percent of the land, but yet must continue to pay the taxes, overhead, mortgage payments, and all the other costs that continue—the fixed part of his cost structure—on that land. So I compliment the Senator for entering that element into the farm bill for consideration.

While many of us have talked about it, none of us have yet, to the best of my knowledge, put it into any of the farm bills that are being offered that will be considered by the committee. The committee markup is going to begin next week. So, therefore, the Senator from Montana offers a timely new bill that will be considered and now be made part of that markup in this very relevant type of consideration; that in the event the Government compels you to lay aside land in order to qualify for the program, there has to be some balance that results. That will now be made part of our debate.

I compliment the Senator for making that part of our debate and bringing that in a more formal way to the attention and consideration of the committee.

Mr. BURNS. I thank the Senator from Minnesota. Mr. President, I do not think there has been anybody in this body who worked harder on farm legislation than Senator BOSCHWITZ of Minnesota. I thank him for that. As the debate rolls on in this farm legislation, I think it will become even more evident that this Government and this American society is dedicated to a food

production program that is good for all of us.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2372

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Agricultural Recovery Act of 1990."

SEC. 2. PURPOSES.

The purposes of this Act are—

(1) to extend and revise agricultural price supports and related programs for wheat, barley, oats, oilseeds, sugar beets, honey, wool and mohair;

(2) to provide for resource conservation;

(3) to provide for agricultural research; and

(4) to provide consumers with a reliable supply of food and fiber at reasonable prices, and for other purposes.

SEC. 3. TABLE OF CONTENTS.

The table of contents is as follows:

TABLE OF CONTENTS

Sec. 1. Short title.
Sec. 2. Purposes.
Sec. 3. Table of contents.
TITLE I—WOOL AND MOHAIR
Sec. 101. Wool and Mohair price support program.
TITLE II—SUGAR BEETS
Sec. 201. Sugar beet price support program.
TITLE III—HONEY
Sec. 301. Honey price support program.
TITLE IV—WHEAT
Sec. 401. Target prices.
Sec. 402. Loan rates.
Sec. 403. Nonapplicability of certificate requirements.
Sec. 404. Suspension of marketing quotas, and producer certificate provisions.
Sec. 405. Suspensions of certain quota provisions.
TITLE V—BARLEY
Sec. 501. Target prices.
Sec. 502. Loan rates.
Sec. 503. Recalculation of malting barley.
TITLE VI—OATS
Sec. 601. Target prices.
Sec. 602. Loan rates.
TITLE VII—OILSEEDS
Sec. 701. Loans and payments for the 1991 through 1995 oilseeds crops.
TITLE VIII—GENERAL COMMODITY PROVISIONS
Subtitle A—General Commodity Provisions
Sec. 801. Farm acreage bases and nonprogram crops.
Subtitle B—Land Diversion Payments
Sec. 802. Land diversion payments.
Sec. 803. Payment limitations.
Sec. 804. Advance deficiency and diversion payments.
Sec. 805. Producer reserve program for wheat, barley and oats.
Sec. 806. Extension of the reserve.
Sec. 807. Advance announcement of programs.
Sec. 808. Determinations of the Secretary.
Sec. 809. Application of terms in the Agricultural Act of 1949.
Subtitle B—Technical and Conforming Amendments
Sec. 810. Conforming amendments.
TITLE IX TRADE
Subtitle A—Eastern Europe and the U.S.S.R.
Sec. 901. Special assistant for agricultural trade and food aid to Eastern Europe and the U.S.S.R.
Subtitle B—Imports from Canada
Sec. 902. Durum wheat imports.
Sec. 903. Alfalfa seed imports.
TITLE X—CONSERVATION
Sec. 1001. Limiting the conservation reserve program.
Sec. 1002. Inclusion of wetlands in conservation reserve.
Sec. 1003. Inclusion of shelterbelts and windbreaks in conservation reserve.
Sec. 1004. Duties of owners and operators.
TITLE XI—AGRICULTURAL RESEARCH, EXTENSION AND TEACHING
Sec. 1101. Drought research.
Sec. 1102. Alternative uses for agricultural products.
Sec. 1103. Understanding foreign markets for agricultural exports.
Sec. 1104. Improving environmental safety.
TITLE XII—MARKETING
Subtitle A—Spearmint
Sec. 1201. Marketing order regulating the handling of spearmint oil produced in the Far West.
TITLE XIII—RELATED AND MISCELLANEOUS MATTERS
Sec. 1301. Control of noxious weeds on federal lands.
Sec. 1302. Brucellosis eradication.
TITLE XIV—GENERAL EFFECTIVE DATE
Sec. 1401. Effective date.

TITLE I—WOOL AND MOHAIR

WOOL AND MOHAIR PRICE SUPPORT PROGRAM

SEC. 101. Section 703 of the National Wool Act of 1954 (7 U.S.C. 1782) is amended by—

(1) striking out "1990" in subsection (a) and inserting in lieu thereof "1995"; and

(2) striking out "1990" in subsection (b) and inserting in lieu thereof "1995".

TITLE II—SUGAR BEETS

SUGAR BEET PRICE SUPPORT PROGRAM

SEC. 201. Effective only for the 1991 through 1995 crops of sugar beets, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking out "1986 through 1990" in section 201(j)(1) and inserting in lieu thereof "1991 through 1995"; and

(2) striking out "1986 through 1990" in section 201(j)(4)(B) and inserting in lieu thereof "1991 through 1995."

TITLE III—HONEY

HONEY PRICE SUPPORT PROGRAM

SEC. 301. Effective only for the 1991 through 1995 crops of honey, subsection (b) of section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking out "1986" in subsection (b)(1) and inserting in lieu thereof "1991"; and

(2) striking out "1990" in subsection (b)(1) and inserting in lieu thereof "1995"; and

(3) striking out "1986" in subsection (b)(1)(A) and inserting in lieu thereof "1991"; and

(4) striking out "64 cents per pound" in subsection (b)(1)(A) and inserting in lieu thereof "55 cents per pound"; and

(5) striking subsection (b)(1)(B); and

(6) renumbering subsection "(C)" in subsection (b)(1)(C), "(B)"; and

(7) in the new subsection (b)(1)(B) striking "1988, 1989, and 1990", and inserting in lieu thereof "1992, 1993, 1994, and 1995".

TITLE IV—WHEAT

TARGET PRICES

SEC. 401. Effective only for the 1991 through 1995 crops wheat, the Agricultural Act of 1949 section 107 D (7 U.S.C. 1445b-2) is amended by—

(1) striking section (c)(1)(G), and inserting in lieu thereof "(G) For any crop of wheat for which marketing quotas are not in effect, the established price of wheat shall not be less than $4.40 per bushel if a 15 percent unpaid acreage reduction program is in effect; or less than $4.60 per bushel if a 20 percent acreage reduction program is in effect; or less than $4.80 per bushel if a 25 percent acreage reduction program is in effect; and

"(H) in no event shall the established price for wheat be less than $4.08 per bushel for the 1991 crop, $4.16 per bushel for the 1992 crop, $4.24 per bushel for the 1993 crop, $4.32 per bushel for the 1994 crop, and $4.40 per bushel for the 1995 crop."

LOAN RATES

SEC. 402. The Agricultural Act of 1949 is amended effective only for the 1991 through 1995 crops of wheat, by inserting after section 107 (7 U.S.C. 1445a) the following new section:

SEC. 107A. LOANS FOR THE 1991 THROUGH 1995 CROPS OF WHEAT.

"(a) LOANS.—

"(1) Nonrecourse loans.—The Secretary shall make available to producers nonrecourse loans for each of the 1991 through 1995 crops of wheat at a level determined by the Secretary that is the higher of—

"(A) not less than 75 percent, nor more than 85 percent, of the simple average price received by producers of wheat, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of wheat, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period; or

"(B) 95 percent of the level determined for the preceding crop.

"(2) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under this subsection for a crop at a level that is the lesser of—

"(i) the nonrecourse loan level for the crop; or

"(ii) the prevailing world market price for the crop, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to determine the prevailing world market price for a crop; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for the crop.

"(b) LOAN DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary may, for each of the 1991 through 1995 crops of wheat, make payments available to producers who are eligible to obtain a loan agreement under subsection (a),

"(2) COMPUTATION.—A payment under this subsection shall be computed by multiplying—

"(A) the loan payment rate, by

"(B) the quantity of wheat the producers is eligible to place under loan.

"(3) MAXIMUM QUANTITY.—For purposes of this subsection, the quantity of wheat eligible to be placed under loan may not exceed the product obtained by multiplying—

"(A) the individual farm program acreage for the 1990 through 1995 crop years, by

"(B) the farm program payment yield established for the farm for the 1990 through 1995 crop years.

"(4) LOAN PAYMENT RATE.—For purposes of this subsection, the loan payment rate shall be the amount by which—

"(A) the nonrecourse loan level determined for the crop under subsection (a) exceeds

"(B) the level at which a nonrecourse loan may be repaid under subsection (a).

"(c) DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of wheat in an amount computed by miltiplying—

"(A) the payment rate determined under paragraph (2); by

"(B) the individual farm program acreage for the 1990 through 1995 crop years; by

"(C) the farm program payment yield for the crop for the farm for the 1990 through 1995 crop years.

"(2) PAYMENT RATE.—The payment rate for a crop of wheat under this subsection shall be the total of—

"(A) the amount by which the target price for the crop of wheat exceeds the higher of—

"(i) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the secretary (subject to paragraph (4)); or

"(ii) the nonrecourse loan level determined for the crop under subsection (a)(2).

"(3) ESTIMATED PAYMENT RATES.—

"(A) ESTIMATE.—Prior to the time period for entering into a contract to participate in the program established for a crop under this section, the Secretary shall estimate the national weighted average market price to be received by producers during the marketing year for the crop.

"(B) ELECTION.—During the time period for entering into such a contract, the producers on a farm may elect to have the estimated national weighted average market price used for determining the payment rate for payments made to the producers under paragraph (2).

"(d) REPORTING OF ACREAGE.—To be eligible to receive payments under this section, a producer shall report to the Secretary annually (by a date prior to harvest specified by the Secretary) the quantity of the farm acreage base that is devoted to the production of agricultural commodities or conserving uses.

"(e) PRODUCTION CONTROL PROGRAMS.—

"(1) IN GENERAL.—Subject to title V, the Secretary shall not require participation in any production adjustment program for wheat as a condition of eligibility for the loans or payments authorized by this section.

"(2) LAND DIVERSION PAYMENTS.—The Secretary may make land diversion payments to producers of wheat in accordance with section 426.

"(f) FAILURE TO COMPLY.—

"(1) SECRETARY.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans and payments, the Secretary may otherwise make the loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) COMMITTEES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(6)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect the program authorized by this section through the Commodity Credit Corporation.

"(g) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to the assignment of payments) shall apply to payments under this section.

"(j) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) TENANTS AND SHARECROPPERS.—In carrying out the program established by this section, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 403. Sections 379d through 379j of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379d-1379j) (relating to marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1991, through May 31, 1996.

SUSPENSION OF MARKETING QUOTAS, AND PRODUCER CERTIFICATE PROVISIONS

SEC. 404. Sections 331 through 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1331 through 1339, 1379b, and 1379c) shall not be applicable to the 1991 through 1995 crops of wheat.

SUSPENSION OF CERTAIN QUOTA PROVISIONS

SEC. 405. The joint resolution entitled "A joint resolution relating to corn and wheat marketing quotas under the Agricultural Adjustment Act of 1938, as amended", approved May 26, 1941 (7 U.S.C. 1330 and 1340) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1991 through 1995.

TITLE V—BARLEY

TARGET PRICES

SEC. 501. Effective for only the 1991 through 1995 crops of barley, the Agricultural Act of 1949, section 105C (7 U.S.C. 1444d) is amended by—

(1) striking out ", and, if designated by the Secretary, barley,"; and

(2) inserting the following new section "(i) For any crop of barley for which marketing quotas are not in effect, the established price of barley shall not be less than $2.60 per bushel if a 15 percent unpaid acreage reduction program is in effect; or less than $2.75 per bushel if a 20 percent acreage reduction program is in effect; or less than $2.90 per bushel if a 25 percent acreage reduction program is in effect; and"

"(ii) in no event shall the established price for barley be less than $2.41 per bushel for the 1991 crop, $2.45 per bushel for the 1992 crop, $2.50 per bushel for the 1993 crop, $2.55 per bushel for the 1994 crop, and $2.60 per bushel for the 1995 crop."

LOAN RATES

SEC. 502. The Agricultural Act of 1949 is amended by adding the following new section—

(1) effective only for the 1991 through 1995 crops of feed grains, by inserting after section 105 (7 U.S.C. 1444b) the following new section:

"SEC. 105A. LOANS AND PAYMENTS FOR THE 1991 THROUGH 1995 CROPS OF BARLEY.

"(a) LOANS.—

"(1) NONRECOURSE LOANS.—The Secretary shall make available to producers nonrecourse loans for each of the 1991 through 1995 crops of barley at a level determined by the Secretary that is the higher of—

"(A) not less than 75 percent, nor more than 85 percent, of the simple average price received by producers of barley, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of barley, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period; or

"(B) 95 percent of the level determined for the preceding crop.

"(2) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under this subsection for a crop at a level that is the lesser of

"(i) the nonrecourse loan level for the crop; or

"(ii) the prevailing world market price for the crop, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to determine the prevailing world market price for the crop, and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for the crop.

"(b) LOAN DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary may, for each of the 1991 through 1995 crops of barley, make payments available to producers who are eligible to obtain a loan agreement under subsection (a).

"(2) COMPUTATION.—A payment under this subsection shall be computed by multiplying—

"(A) the loan payment rate, by

"(B) the quantity of barley the producer is eligible to place under loan.

"(3) MAXIMUM QUANTITY.—For purposes of this subsection, the quantity of barley eligible to be placed under loan may not exceed the product obtained by multiplying—

"(A) the individual farm program acreage for the 1990 through 1995 crop years, by

"(B) the farm program payment yield established for the farm for the 1990 through 1995 crop years.

"(4) LOAN PAYMENT RATE.—For purposes of this subsection, the loan payment rate shall be the amount by which—

"(A) the nonrecourse loan level determined for the crop under subsection (a), exceeds

"(B) the level at which a nonrecourse loan may be repaid under subsection (a).

"(c) DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of barley in an amount computed by multiplying—

"(A) the payment rate determined under paragraph (2), by

"(B) the individual farm program acreage for the 1990 through 1995 crop years, by

"(C) the farm program payment yield for the crop for the farm for the 1990 through 1995 crop years.

"(2) PAYMENT RATE.—The payment rate for a crop of barley under this subsection shall be the total of—

"(A) the amount by which the target price for the crop of barley exceeds the higher of—

"(i) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary (subject to paragraph (4)); or

"(ii) the nonrecourse loan level determined for the crop under subsection (a)(2).

"(3) ESTIMATED PAYMENT RATES.—

"(A) ESTIMATE.—Prior to the time period for entering into a contract to participate in the program established for a crop under this section, the Secretary shall estimate the national weighted average market price to be received by producers during the marketing year for the crop.

"(B) ELECTION.—During the time period for entering into such a contract, the producers on a farm may elect to have the estimated national weighted average market price used for determining the payment rate for payments made to the producers under paragraph (2).

"(d) REPORTING OF ACREAGE.—To be eligible to receive payments under this section, a producer shall report to the Secretary annually (by a date prior to harvest specified by the Secretary) the quantity of the farm acreage base that is devoted to the production of agricultural commodities or conserving uses.

"(e) PRODUCTION CONTROL PROGRAMS.—

"(1) IN GENERAL.—Subject to title V, the Secretary shall not require participation in any production adjustment program for barley as a condition of eligibility for the loans or payments authorized by this section.

"(2) LAND DIVERSION PAYMENTS.—The Secretary may make land diversion payments to producers of barley in accordance with section 426.

"(f) FAILURE TO COMPLY.—

"(1) SECRETARY.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans and payments, the Secretary may otherwise make the loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) COMMITTEES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(6) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect the program authorized by this section through the Commodity Credit Corporation.

"(g) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to the assignment of payments) shall apply to payments under this section.

"(j) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) TENANTS AND SHARECROPERS.—In carrying out the program established by this section, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

RECALCULATION OF MALTING BARLEY

SEC. 503. Effective for only the 1991 through 1995 crops of barley, appropriate section of the Agricultural Act of 1949, section is amended by adding the following—

(a) The Secretary shall, within forty-five days of enactment of this Act, recalculate the amount of refund of advance deficiency payment a producer of feed barley must make pursuant to section 107C of the Agricultural Act of 1949 (7 U.S.C. 1445b-2) (as amended by paragraph (4) of section 201(b) of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note), as amended by section 602 of the Disaster Assistance Act of 1989 (Public Law 101-82), and as further amended by section 1004 of the Omnibus Budget Reconciliation Act of 1989) (Public Law 101-239)).

(b) The recalculation required by subsection (a) of this section shall reduce the total amount of refund owed by a producer in an amount which reflects the impact of including the average market price for sales of malting barley in the calculations used to originally determine the amount of refund of advance deficiency payment required of such producer: Provided, That any producer of a 1988 or 1989 crop of barley who sold (or held for later sale) all or a portion of such 1988 or 1989 crop production as malting barley shall not be entitled to a reduction in the level of advance deficiency payment refund due on that portion of the crop which was actually sold (or held for later sale) as malting barley, and the Secretary shall establish a reasonable method whereby a producer may show through acceptable records the amount of 1988 or 1989 crop barley on the farm which was marketed (or held for marketing) as feed barley rather than malting barley.

(c) In the case of a producer of a crop of 1988 or 1989 barley who is determined to owe a reduced refund of advance deficiency in accordance with this section, but who prior to the enactment of this Act paid to the Secretary the initially calculated refund (or any amount in excess of the amount of the recalculated refund), then such producer shall be entitled to recoup the excess portion of such refund so paid by the producer, and the Secretary—

(1) shall repay to the producer the excess refund of advance deficiency paid by such producer as determined in accordance with this section;

(2) shall have the option to make such repayment to a producer in a lump sum or in installments within a period of time ending not later than May 31, 1991;

(3) shall, within forty-five days following enactment of this Act, notify a producer that he is entitled to a reimbursement of previously refunded 1988 or 1989 advance deficiency payments under this section, such notice to include a statement of the timing of such repayment (either in lump sum or in installments) and a notification that the amount of the reimbursement owed to the producer by the Secretary shall not bear interest if paid prior to October 15, 1990, and that the reimbursement (or portion thereof) paid after October 15, 1990, shall bear interest at a rate of at least 7 per centum per annum; and

(4) may elect to reimburse producers any excess advance deficiency payment refunds in a lump sum by utilizing negotiable generic certificates redeemable for commodities owned by the Commodity Credit Corporation if such repayment is made to the producer in full within sixty days following the enactment of this Act.

TITLE VI—OATS

TARGET PRICE

SEC. 601. Effective for only the 1991 through 1995 crops of oats, the Agricultural Act of 1949, section 105C (7 U.S.C. 1444d) is amended by—

(1) striking out "oats"; and

(2) inserting the following new section "(i) For any crop of oats for which marketing quotas are not in effect, the established price of oats shall not be less than $1.60 per bushel if a 15 percent unpaid acreage reduction program is in effect; or less than $1.75 per bushel if a 20 percent acreage reduction program is in effect; or less than $1.90 per bushel if a 25 percent acreage reduction program is in effect; and"

"(ii) in no event shall the established price for oats be less than $1.48 per bushel for the 1991 crop, $1.51 per bushel for the 1992 crop, $1.54 per bushel for the 1993 crop, $1.57 per bushel for the 1994 crop, and $1.60 per bushel for the 1995 crop."

LOAN RATE

SEC. 602. Effective only for the 1991 through 1995 crops of oats, the Agricultural Act of 1949 is amended by adding after Section 105 (7 U.S.C. 1444b) the following new section—

"SEC. 105B. LOANS FOR THE 1991 THROUGH 1995 CROPS OF OATS.

"(a) LOANS.—

"(1) NONRECOURSE LOANS.— The Secretary shall make available to producers nonrecourse loans for each of the 1991 through 1995 crops of oats at a level determined by the Secretary that is the higher of—

"(A) not less than 75 percent, nor more than 85 percent, of the simple average price received by producers of oats, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of oats, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period; or

"(B) 95 percent of the level determined for the preceding crop.

"(2) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under this subsection for a crop at a level that is the lesser of—

"(i) the nonrecourse loan level for the crop; or

"(ii) the prevailing world market price for the crop, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to determine the prevailing world market price for the crop; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for the crop.

"(b) LOAN DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary may, for each of the 1991 through 1995 crops of oats, make payments available to producers who are eligible to obtain a loan agreement under subsection (a).

"(2) COMPUTATION.—A payment under this subsection shall be computed by multiplying—

"(A) the loan payment rate, by

"(B) the quantity of oats the producer is eligible to place under loan.

"(3) MAXIMUM QUANTITY.—For purposes of this subsection, the quantity of oats eligible to be placed under loan may not exceed the product obtained by multiplying—

"(A) the individual farm program acreage for the 1990 through 1995 crop years; by

"(B) the farm program payment yield established for the farm for the 1990 through 1995 crop years.

"(4) LOAN PAYMENT RATE.—For purposes of this subsection, the loan payment rate shall be the amount by which—

"(A) the nonrecourse loan level determined for the crop under subsection (a); exceeds

"(B) the level at which a nonrecourse loan may be repaid under subsection (a).

"(c) DEFICIENCY PAYMENTS.—

"(1) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of oats in an amount computed by multiplying—

"(A) the payment rate determined under paragraph (2) by

"(B) the individual farm program acreage for the 1990 through 1995 crop years by

"(C) the farm program payment yield for the crop for the farm for the 1990 through 1995 crop years.

"(2) PAYMENT RATE.—The payment rate for a crop of oats under this subsection shall be the total of—

"(A) the amount by which the target price for the crop of oats exceeds the higher of—

"(i) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary (subject to paragraph (4)); or

"(ii) the nonrecourse loan level determined for the crop under subsection (a)(2).

"(3) ESTIMATED PAYMENT RATES.—

"(A) ESTIMATE.—Prior to the time period for entering into a contract to participate in the program established for a crop under this section, the Secretary shall estimate the national weighted average market price to be received by producers during the marketing year for the crop.

"(B) ELECTION.—During the time period for entering into such a contract, the producers on a farm may elect to have the estimated national weighted average market price used for determining the payment rate for payments made to the producers under paragraph (2).

"(d) REPORTING OF ACREAGE.—To be eligible to receive payments under this section, a producer shall report to the Secretary annually (by a date prior to harvest specified by the Secretary) the quantity of the farm acreage base that is devoted to the production of agricultural commodities or conserving uses.

"(e) PRODUCTION CONTROL PROGRAM.—

"(1) IN GENERAL.—Subject to title V, the Secretary shall not require participation in any production adjustment program for oats as a condition of eligibility for the loans or payments authorized by this section.

"(2) LAND DIVERSION PAYMENTS.—The Secretary may make land diversion payments to producers of oats in accordance with section 426.

"(f) FAILURE TO COMPLY.—

"(1) SECRETARY.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans and payments, the Secretary may otherwise make the loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) COMMITTEES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(6)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect the program authorized by this section through the Commodity Credit Corporation.

"(g) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to the assignment of payments) shall apply to payments under this section.

"(j) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) TENANTS AND SHARECROPPERS.—In carrying out the program established by this section, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

TITLE VII—OILSEEDS

LOANS AND PAYMENTS FOR THE 1991 THROUGH 1995 OILSEED CROPS

SEC. 701. Effective only for the 1991 through 1995 crops of flax, safflower, rapeseed (including canola), title II of the Agricultural Act of 1949 is amended—

(1) in section 201 (7 U.S.C. 1446)—

(A) in the matter preceding subsection (a), by inserting after "tung nuts," the following: "flax, safflower, rapeseed, and canola"; and

(B) by striking subsections (i) and (1); and

(2) by adding at the end the following new section:

"SEC. 204. LOAN AND PAYMENTS FOR THE 1991 THROUGH 1995 OILSEED CROPS.

"(a) OILSEED PRICE SUPPORT.—

"(1) IN GENERAL.—The Secretary shall support the price of flax, safflower and rapeseed (including canola) hereafter collectively known as oilseeds, through loans in each of the 1991 through 1995 marketing years at a level equal to not less than 75 percent, nor more than 85 percent, of the simple average price received by producers for soybeans in the preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in the period, except that the level of price support may not be reduced by more than 5 percent in any year.

"(2) REPAYMENT.—

"(A) IN GENERAL.—The Secretary may permit a producer to repay a loan made under this subsection for a crop at a level that is the lesser of—

"(i) the loan level determined for the crop; or

"(ii) the prevailing world market price for the crop, as determined by the Secretary.

"(B) PREVAILING WORLD MARKET PRICE.—If the Secretary permits a producer to repay a loan in accordance with subparagraph (A), the Secretary shall prescribe by regulation—

"(i) a formula to determine the prevailing world market price for a crop; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for the crop.

"(3) ANNOUNCEMENTS.—

"(A) PRELIMINARY ANNOUNCEMENT.—The Secretary shall make a preliminary announcement of the level of price support for soybeans for a marketing year not earlier than 30 days before the beginning of the marketing year. The announced level shall be based on the latest information and statistics available at the time of the announcement.

"(B) FINAL ANNOUNCEMENT.—The Secretary shall make a final announcement of the level as soon as complete information and statistics are available on prices for the 5 years preceding the beginning of the marketing year. The final level of support may not be announced later than October 1 of the marketing year with respect to which the announcement is made. The final level of support may not be less than the level of support provided for in the preliminary announcement.

"(b) GRADUATED OILSEED PAYMENTS.—

"(1) IN GENERAL.—The Secretary shall make available to producers payments for each of the 1991 through 1995 crops of flax, safflower, and rapeseed (including canola) (hereinafter in this section collectively refered to as 'oilseeds') in an amount computed by multiplying—

"(A) the payment rate determined under paragraph (2) by

"(B) the individual oilseed base for a farm determined under paragraph (3).

"(2) PAYMENT RATE.—The payment rate for a crop of oilseeds shall be the total of—

"(A) the amount computed by multiplying—

"(i) the amount by which $5.02 exceeds the higher of—

"(I) the national weighted average market price received by producers during the marketing year for soybeans, as determined by the Secretary; or

"(II) $4.50; by

"(ii) 30 bushels per acre; and

"(B) the amount computed by multiplying—

"(i) the amount by which $4.50 exceeds the higher of—

"(I) the national weighted average market price received by producers during the marketing year for soybeans, as determined by the Secretary; or

"(II) the support price of soybeans determined under subsection (a)(1); by

"(ii) the average county yield during the 1985 through 1989 crop years, excluding the year in which the yield was the highest and the year in which the yield was the lowest.

"(3) OILSEED BASE.—The oilseed base for a farm shall be the average acreage planted to oilseeds during the 1985 through 1989 crop years.

"(c) REPORTING OF ACREAGE.—To be eligible to receive loans or payments under this section, a producer shall report to the Secretary annually (by a date prior to harvest

specified by the Secretary) the quantity of the farm acreage base that is devoted to the production of agricultural commodities or conserving uses.

"(d) PRODUCTION CONTROL PROGRAMS.—

"(1) IN GENERAL.—Subject to title V, the Secretary shall not require participation in any production adjustment program for oilseeds as a condition of eligibility for the loans or payments authorized by this section.

"(2) LAND DIVERSION PAYMENTS.—The Secretary may make land diversion payments to producers of oilseeds in accordance with section 426.

"(e) FAILURE TO COMPLY.—

"(1) SECRETARY.—If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans and payments, the Secretary may otherwise make the loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(2) COMMITTEES.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(6)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet the other requirements does not affect the program authorized by this section through the Commodity Credit Corporation.

"(f) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(g) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(h) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to the assignment of payments) shall apply to payments under this section.

"(i) SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(j) TENANTS AND SHARECROPPERS.—In carrying out the program established by this section, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

TITLE VIII—GENERAL COMMODITY PROVISIONS

Subtitle A—General Commodity Provisions

FARM ACREAGE BASES AND NONPROGRAMS CROPS

SEC. 801. Effective beginning with the 1991 crops, title V of the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.) is amended to read as follows:

"TITLE V—FARM ACREAGE BASES AND NONPROGRAMS CROPS

"SEC. 501. DEFINITIONS.

"As used in this title:

"(1) COUNTY COMMITTEE.—The term 'county committee' means the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for the county in which the farm is administratively located.

"(2) FARM ACREAGE BASE.—The term 'farm acreage base' means the total of—

"(A) sum of the 1990 crop acreage bases on program crops of the farm; and

"(B) the oilseed base on the farm.

"(3) NONPROGRAM CROP.—The term "nonprogram crop' means a commodity other than a program crop or any crop included in the oilseed base.

"(4) OILSEED BASE.—The term 'oilseed base' means the average of the acreage planted during each of the 1985 through 1990 crops to flax, safflower, and rapeseed (including canola).

"(5) PROGRAM CROPS.—The term 'program crop' means any crop of wheat, barley, or oats.

"SEC. 502. FARM ACREAGE BASE.

"(a) ESTABLISHMENT.—The Secretary shall provide for the establishment and maintenance of farm acreage bases for each farm.

"(b) LIMITATIONS.—Notwithstanding any other provision of law, to be eligible for loans or payments under this Act, the producers on a farm—

"(1) may plant program crops, or crops included in the oilseed base on acreage that is no more than the farm acreage base; and

"(2) shall devote to conservation uses all of the farm acreage base that is not planted to program crops or crops included in the oilseed base.

"(c) COMBINATION OF PROGRAM CROPS.—The producers on a farm may plant any combination of program crops and crops included in the oilseed base, if the total acreage planted to program crops and crops included in the oilseed base does not exceed the farm acreage base.

"SEC. 503. NONPROGRAM CROPS.

"(a) IN GENERAL.—The producers on a farm may plant and harvest nonprogram crops on acreage included in the farm acreage base if the producers forfeit payments prorated on the basis of the crop acreage bases established for the 1990 crop year and the oilseed base that comprises the farm acreage base, except as provided in subsection (b).

"(b) CONSERVING CROPS.—The producers on a farm may plant conserving crops on the farm acreage base of the farm without forfeiting program payments if the crops are not harvested.

"SEC. 504. FAILURE TO COMPLY.

"(a) SECRETARY.—If the failure of the producer on a farm to comply fully with the term and conditions of the program conducted under this section precludes the making of loans and payments, the Secretary may otherwise make the loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(b) COMMITTEES.—The Secretary may authorize the county committees to waive or modify deadlines and other program requirements in cases in which lateness of failure to meet the other requirements does not affect the operation of the program.

"SEC. 505. PLANTING AND PRODUCTION HISTORY OF FARMS.

"Each county committee, in accordance with regulations prescribed by the Secretary, may require any producer who seeks to establish a farm acreage base for a farm to provide planting and production history of the farm for each of the 5 crop years immediatley preceding the 1990 crop year.

"SEC. 506. ESTABLISHMENT OF BASES BY COUNTY COMMITTEES.

"Each county committee may, in accordance with regulations prescribed by the Secretary, provide for the establishment of a farm acreage base with respect to any farm administratively located within the county if the farm acreage base cannot otherwise be established under this title. The bases shall be established in a fair and equitable manner, except that no such bases shall be established for a farm if the producer on the farm is subject to sanctions under any provision of Federal law for cultivating highly erodible land or converted wetland.

"SEC. 507. APPEALS.

"The Secretary shall establish an administrative appeal procedure that provides for an administrative review of determinations made with respect to farm acreage base.".

Subtitle B—Land Diversion Payments

LAND DIVERSION PAYMENTS

SEC. 802. Title VI of the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) is amended by adding at the end the following new section:

"SEC. 426. LAND DIVERSION PAYMENTS.

"(a) IN GENERAL.—Notwithstanding any other provision of this Act, effective only for the 1991 through 1995 crops of wheat, barley, and oats, the Secretary may make land diversion payments to producers if the Secretary determines that the land diversion payments will not undermine United States agricultural competitiveness or lead to lower world market shares for affected commodities.

"(b) CONSERVATION.—

"(1) IN GENERAL.—The land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with the producers.

"(2) CONSERVATION RESERVE.—For the purpose of paragraph (1), land placed in the conservation reserve program established under subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.) shall be considered devoted to approved conservation uses.

"(c) CONTRACT OFFERS.—The amounts payable to producers under land diversion contracts may be determined through the submission of bids for the contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the potential benefits to soil and water conservation and wildlife.

"(d) CONTRACT LENGTH.—The term of a land diversion contract entered into under this section may be from 1 to 5 crop years.

"(e) LIMITATIONS.—Notwithstanding any other provision of law, the Secretary shall limit the total acreage to be diverted under contracts entered into under this section and the conservation reserve program established under subtitle D of title XII of the Food Security Act of 1985—

"(1) in any county or local community so as not to affect adversely the economy of the county or local community; and

"(2) to not more than 40,000,000 acres.".

PAYMENT LIMITATIONS

SEC. 803. (a) IN GENERAL.—Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended—

(1) in paragraph (1)—

(A) by striking "1987 through 1990 crops" and inserting "1991 through 1995 crops";

(B) by inserting after "section)" the following: ", oilseed payments,"; and

(C) by striking "and rice" and inserting "rice, flax, safflower, and rapeseed (including canola)";

(2) in paragraph (2)(A)—

(A) by striking "1987 through 1990 crops" and inserting "1991 through 1995 crops";

(B) by inserting after "honey," the following: "flax, safflower, rapeseed (including canola),"; and

(C) by striking "clause (iii)(II)" and inserting "clause (iii)"; and

(3) in paragraph (2)(B), by striking clauses (iii) through (vi) and inserting the following new clauses:

"(iii) any gain realized by a producer from repaying a loan for a crop of a commodity at a lower level than the original loan level established under the Agricultural Act of 1949;

"(iv) any deficiency payment received for a crop of wheat, or feed grains, under the Agricultural Act of 1949 as the result of the national weighted average market price received by producers during the marketing year for such crop; and

"(v) any loan deficiency payment received for a crop of wheat, or feed grains, under the Agricultural Act of 1949.".

(b) FOREIGN PERSONS.—Section 1001C(a) of the Food Security Act of 1985 (7 U.S.C. 1308-3(a)) is amended by striking "1989 and 1990 crops" and inserting "1991 through 1995 crops".

ADVANCE DEFICIENCY AND DIVERSION PAYMENTS

SEC. 804. (a) IN GENERAL.—Section 107C of the Agricultural Act of 1949 (7 U.S.C. 1445b-2 is amended—

(1) in subsection (a), by striking paragraph (1) and inserting the following new paragraph:

"(1) If the Secretary determines that deficiency payments will likely be made for any of the 1991 through 1995 crops of wheat, or feed grains, under this Act, the Secretary shall make advance deficiency payments available to producers for each of the crops.";

(2) in subsection (a)(2)(F), by striking clause (iii) and inserting the following new clause:

"(iii) not less than 30 percent, nor more than 50 percent, of the projected payment rate,";

(3) in subsection (a)(2)(J), by striking "acreage limitations or set-aside program" and inserting "annual program"; and

(4) in subsection (b)—

(A) by striking "1986 through 1990" and inserting "1991 through 1995"; and

(B) by striking "such payments" and inserting "the annual payments".

PRODUCER RESERVE PROGRAM FOR WHEAT, BARLEY AND OATS

SEC. 805. (a) IN GENERAL.—Effective beginning with the 1991 marketing years for wheat, barley and oats, section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) is amended to read as follows:

"SEC. 110. PRODUCER RESERVE PROGRAM FOR WHEAT, BARLEY AND OATS.

"(a) IN GENERAL.—

"(1) PROGRAM.—The Secretary shall formulate and administer a program under which producers of wheat, barley and oats may—

"(A) store wheat, barley and oats when the commodities are in abundant supply;

"(B) extend the time period for their orderly marketing; and

"(C) provide for adequate, but not excessive, carryover stocks to ensure a reliable supply of the commodities.

"(2) DISPLACEMENT.—The Secretary shall establish safeguards to ensure that wheat, barley and oats held under the program shall not be utilized in any manner to unduly depress, manipulate, or curtail the free market.

"(3) ADDITIONAL AUTHORITY.—The authority provided by this section shall be in addition to other authorities available to the Secretary for carrying out producer loan and storage operations.

"(b) TERMS AND CONDITIONS.—

"(1) IN GENERAL.—In carrying out the producer storage program, the Secretary shall provide original or extended price support loans for wheat and feed grains under terms and conditions designed to encourage producers to store wheat, barley or oats for a period not to exceed 18 months in order to promote orderly marketing when wheat, barley or oats are in abundant supply. Loans made under this section shall be made at such level of support as the Secretary determines appropriate.

"(2) PARTICIPATION.—The Secretary shall ensure that producers are afforded a fair and equitable opportunity to participate in each producer storage program, taking into account regional differences at the time of harvest.

"(c) RATE OF INTEREST.—The rate of interest charged participants in the program authorized by this section shall be not less than the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Corporation may waive or adjust the rate of interest as the Corporation determines appropriate to effectuate the purposes of this section. The Corporation may increase the applicable rate of interest in such amounts and at such intervals as the Secretary determines is appropriate to encourage the orderly marketing of wheat and feed grains securing loans made under this section.

"(d) REPAYMENT.—The Secretary may require producers to repay loans made under this section, together with accrued interest and such other charges as may be required by regulation, prior to the maturity date of the loan, if the Secretary determines that emergency conditions exist that require that the commodity be made available in the market to meet urgent domestic or international needs.

"(e) ANNOUNCEMENT.—The Secretary shall announce the terms and conditions of the producer storage program as far in advance of making loans as practicable.

"(f) UPPER LIMITS.—The Secretary shall determine and establish upper limits on the total quantity of wheat and feed grains that may be stored under storage programs established under this section to be effective during the marketing year for such crop, as follows:

"(1) WHEAT.—The upper limit on the total quantity of wheat that may be stored under such programs shall not exceed 30 percent of the estimated total domestic and export usage of wheat during the marketing year for the crop of wheat, as determined by the Secretary.

"(2) BARLEY OR OATS.—The upper limit on the total quantity of barley and oats that may be stored under such programs shall not exceed 15 percent of the estimated total domestic and export usage of barley or oats during the marketing year for the crop, as determined by the Secretary.

"(g) PAYMENTS.—The program shall provide for the payment of storage payments to producers at rates equal to those paid by the Commodity Credit Corporation to commercial warehouses to encourage participation in the program. The Secretary may elect not to make the payments if the Secretary determines that the estimated market price for wheat, barley or oats is in excess of 150 percent of the current price support rate applicable to the commodity.

"(h) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation. The Corporation may issue such regulations as are necessary to carry out this section.

"(i) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.".

(b) CONFORMING AMENDMENTS.—Section 208(c)(2) of the Agricultural Act of 1980 (7 U.S.C. 4001(c)(2)) is amended—

(1) in subparagraph (A), by striking "the then current release price at which producers may repay producer storage loans on the commodity and redeem the commodity prior to the maturity dates of the loans, as determined under clause (5) of the third sentence of section 110(b) of the Agricultural Act of 1949" and inserting "the higher of 140 percent of the nonrecourse loan rate for the commodity or the established price for the commodity, as determined under title I of the Agriculural Act of 1949 (7 U.S.C. 1441 et seq.)"; and

(2) in subparagraph (B)(i), by striking "the then current level at which the Secretary may encourage repayment of producer storage loans on the commodity prior to the maturity dates of the loans, as determined under clause (5) of the third sentence of section 110(b) of the Agricultural Act of 1949" and inserting "the higher of 140 percent of the nonrecourse loan rate for the commodity or the established price for the commodity, as determined under title I of the Agricultural Act of 1949".

EXTENSION OF THE RESERVE

SEC. 806. Section 302(i) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1(i)) is amended by striking "1990" both places it appears and inserting "1995".

ADVANCE ANNOUNCEMENT OF PROGRAMS

SEC. 807. Section 406(b) of the Agricultural Act of 1949 (7 U.S.C. 1426(b)) is amended—

(1) by striking "1987 through 1991" each place it appears in paragraphs (1) and (2) and inserting "1992 through 1996";

(2) in paragraph (3)(B)(ii)—

(A) by striking "1991" each place it appears and inserting "1996";

(B) by striking "1990" each place it appears and inserting "1995"; and

(C) by striking "Food Security Act of 1985" and inserting "Agricultural Recovery Act of 1990".

DETERMINATIONS OF THE SECRETARY

SEC. 808. Section 1017(b) of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1459) is amended by striking "1986 through 1990" and inserting "1991 through 1995".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 809. Effective only for 1991 through 1995 crops of wheat, barley and oats subsection (k) of section 408 of the Agricultural Act of 1949 (7 U.S.C. 1438(k)) is amended to read as follows:

"(k)(1) Reference made in sections 402, 403, 406, 407, and 416 to the terms 'support price', 'levels of support', and 'level of price support' shall be considered to apply as well to the loan and purchase level for wheat, barley and oats under this Act.

"(2) References made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to loan and purchase operations for wheat, barley or oats under this Act.".

Subtitle B—Technical and Conforming Amendments

CONFORMING AMENDMENTS

SEC. 810. The Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) (as amended by sections 101 and 622 of this Act) is further amended by redesignating sections 107C, 107E, and 107F (7 U.S.C. 1445b-2, 1445b-4, and 1445b-5) as sections 107B, 107C, and 107D, respectively.

TITLE IX—TRADE

Subtitle A—Eastern Europe and the USSR

SPECIAL ASSISTANT FOR AGRICULTURAL TRADE AND FOOD AID TO EASTERN EUROPE AND THE USSR

SEC. 901. The Food Security Act of 1985 (7 U.S.C. 1736-1 Sec. 113 (c)(1) is hereby amended by deleting ";" after "foreign countries" and inserting the following: "with special emphasis on Eastern Europe and the U.S.S.R.;" and strike "1990" in (7 U.S.C. 1736-1 Section 1113. (c)(9)) and insert therein "1995"; and delete "." after industry and add "; and" the following new subsection after (7 U.S.C. 1736-1 Section 1113 (3)(B);

"(C) make recommendations to the President and the Congress with respect to the progress of democracy in Eastern Europe and the USSR and how the export of United States agricultural commodities and the products thereof might foster and promote the growth of democratic institutions in Eastern Europe and the USSR."

Subtitle B—Imports from Canada

DURUM WHEAT IMPORTS

SEC. 902. (a) The Secretary of Agriculture, in consultation with the President of the National Association of Wheat Growers, shall conduct a study of the impact on domestic durum wheat growers of the importation of durum wheat from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture, in consultation with the President of the National Association of Wheat Growers, shall submit to the Congress a report on the study conducted under subsection (a).

ALFALFA SEED IMPORTS

SEC. 903. (a) The Secretary of Agriculture shall conduct a study of the impact on domestic alfalfa seed growers of the importation of alfalfa seed from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

TITLE X—CONSERVATION

LIMITING THE CONSERVATION RESERVE PROGRAM

SEC. 1001. Limiting the conservation reserve to 40 million acres.

(a) IN GENERAL.—Section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831) is amended—

(1) in subsection (a), by striking "1990" and inserting "1995"; and

(2) in subsection (b)—

(A) by striking "and" at the end of paragraph (4);

(B) by striking the period at the end of paragraph (5) and inserting "; and "; and

(C) by adding at the end the following new paragraph:

"(6) during the 1991 through 1995 fiscal years, a total of not more than 40 million acres, subject to section 426(e)(2) of the Agricultural Act of 1949.".

INCLUSION OF WETLANDS IN CONSERVATION RESERVE

SEC. 1002. Section 1231(c) of the Food Security Act of 1985 (16 U.S.C. 3831(c)) is amended by adding at the end the following new paragraph:

"(3) The Secretary may include in the program established under this subtitle a field—

"(A) at least ⅓ of which is wetland or converted wetland; and

"(B) that has been annually planted, or considered to be planted, to produce an agricultural commodity (other than an orchard, vineyard, or ornamental planting) in at least 2 of the 1981 through 1985 crop years.".

INCLUSION OF SHELTERBELTS AND WINDBREAKS IN CONSERVATION RESERVE

SEC. 1003. (a) INCLUSION IN CRP.—Section 1234(c) of the Food Security Act of 1985 (16 U.S.C. 3834(c)) is amended—

(1) in paragraph (3)(B), by striking "establishment of—" "establishment of permanently"; and

(2) by adding at the end the following new paragraph:

(4)(A) In determining the acceptability of contract offers, the Secretary shall, under terms and conditions specified by the Secretary, accept contract offers that provide for the establishment of shelterbelts and windbreaks.

(B) The owner or operator of the land may, within the limitations prescribed under section 1231(e), specify the term of the contract.

"(C) Any land designated for use in establishing a shelterbelt or windbreak shall be eligible for participation in the program established under this subtitle regardless of the soil erosion classification of the land as determined by the Soil Conservation Service.

"(D) An owner or operator using land under this paragraph for the purposes of the program established under this subtitle shall grant an easement to the Corporation on the windbreak or shelterbelt for the useful life of the windbreak or shelterbelt. Any deed on the land shall be encumbered with the easement for the useful life of the windbreak or shelterbelt.".

"(b) COST-SHARING PAYMENTS.—Section 1234(b) of such Act (16 U.S.C. 3834(c)) is amended by inserting after "conservation measures and practices" the following: "(including shelterbelts and windbreaks)".

"(c) COUNTY CROPLAND LIMITATION.—Section 1231(d) of such Act (16 U.S.C. 3831(d)) is amended by adding at the end the following new sentence: "The limitation established under the preceding sentence shall not apply to cropland that is being used for the establishment of shelterbelts and windbreaks.".

DUTIES OF OWNERS AND OPERATORS

SEC. 1004. Section 1232(a) of the Food Security Act of 1985 (16 U.S.C. 3832(a)) is amended—

(1) by striking the period at the end of subparagraph (10) and inserting "; and"; and

(2) by adding at the end the following new subparagraph:

"(11) to cut weeds as needed in order to prevent the spread of noxious weeds. Such cutting shall be done only to contain the spread of such weeds and should in no way result in any direct economic benefit to the owner or operator."

TITLE XI—AGRICULTURAL RESEARCH

DROUGHT RESEARCH

SEC. 1101. (a) The Secretary of Agriculture is encouraged to conduct a study on the impact of rangeland carrying capacity during drought and, within 1 year after the date of enactment of this Act, submit to the Congress a report on such study.

(b) The study shall include—

(1) a review of existing rangeland drought research here and abroad; and

(2) a strategy for the establishment of a national rangeland drought research program, involving international, Federal, State and local agencies.

ALTERNATIVE USES FOR AGRICULTURAL PRODUCTS

SEC. 1102. (a) The Secretary of Agriculture is encouraged to conduct a study on new uses for traditional and alternative agricultural products and, within 6 months, and annually thereafter, after the date of enactment of this Act, submit to the Congress a report on such study.

(b) The annual studies shall include—

(1) a review of existing alternative uses for traditional and alternative crop both here and abroad; and

(2) a strategy for research in new uses for traditional and alternative agricultural products within the national land grant college system.

UNDERSTANDING FOREIGN MARKETS FOR AGRICULTURAL EXPORTS

SEC. 1103. (a) The Secretary of Agriculture shall conduct a study on the complexities of foreign markets and their relationship to agricultural exports within 1 year of the date of enactment of this Act, and submit to the Congress a report on such study.

(b) The study shall include—

(1) a review of existing relevant studies here and abroad; and

(2) a strategy for addressing the needs of agricultural exporters in dealing with foreign markets.

IMPROVING ENVIRONMENTAL SAFETY

SEC. 1104. (a) The Secretary of Agriculture is encouraged to conduct a study on the impact of agricultural chemicals on the environment and, within 1 year after the date of enactment of this Act, submit to the Congress a report on such study.

(b) The study shall include—

(1) a review of existing chemical use research here and abroad; and

(2) a strategy for the assessment of the environmental, economic, and social implications of continued agricultural chemical use nationwide.

TITLE XII—MARKETING

Subtitle A—Spearmint

MARKETING ORDER REGULATING THE HANDLING OF SPEARMINT OIL PRODUCED IN THE FAR WEST

SEC. 1201. The marketing order governing the production, handling and sale of spearmint in the far west is amended by deleting "Montana and" in section (7 CFR Ch. IX Part 985.5).

TITLE XIII—RELATED AND MISCELLANEOUS MATTERS

CONTROL OF NOXIOUS WEEDS ON FEDERAL LANDS

SEC. 1301. (a) The Secretary of Agriculture, in conjunction with the Secretary of the Interior, shall carry out a program to control noxious weeds, including but not limited to leafy spurge and knapweed, on all Federal lands.

(b) The Secretary of Agriculture, in conjunction with the Secretary of the Interior, shall treat federal lands that are contiguous to private lands when such federal lands are infested with noxious weeds at levels of economic infestation, unless the Secretary of Agriculture determines that delaying treatment will optimize biological control and not cause greater economic damage to adjacent landowners.

(c) From appropriated funds made available to the Secretary for such purposes, the Secretary shall provide adequate funding for a program to train personnel to effectively accomplish the objective of this section.

BRUCELLOSIS ERADICATION

SEC. 1302. The appropriate section of the Commodity Credit Corporation Charter Act is amended by inserting at the end, the following: "And provided further, that the eradication of brucellosis be declared a national emergency, thereby allowing the use of Commodity Credit Corporation funds to finally eradicate this disease from the continental United States."

TITLE XIV—GENERAL EFFECTIVE DATE

SEC. 1401. Except as otherwise provided in this Act, this Act and the amendments made by this Act, shall become effective on the date of enactment of this Act.

By Mr. REID:

S. 2373. A bill to promote and enhance the science and mathematics literacy of elementary and secondary school students by providing grants to local educational agencies desiring to participate in curriculum choice programs, and by providing scholarships to individuals who agree to teach mathematics and science in elementary and secondary schools; to the Committee on Labor and Human Resources.

SCIENCE AND MATHEMATICS ACHIEVEMENT READINESS TEACHING ACT

Mr. REID. Mr. President, I rise today to share with my colleagues the concern I have for a growing challenge to the United States.

Mr. President, there are fewer physics teachers in this country today than there are school districts—not schools but school districts.

Mr. President, for every new math and science teacher, there are 13 math and science teachers leaving teaching. The challenge of which I speak is a challenge to the once unrivaled strength and competitiveness of the United States of America.

I do not have to tell anyone that the United States was once unquestionably the world's foremost economic power, but now, Mr. President, there is a question.

I do have to say that such a level of prestige can be attained once more. Here in the United States we have often taken our successes for granted. Increased global competition has sprung up around us so quickly that not many of us took notice until in many respects we were no longer in the lead. We cannot take the energy, force, and might of America for granted any longer. Our world is becoming more competitive by the minute. We truly have our work cut out for us in order to maintain our leadership in the world community.

The most obvious way we can begin to meet the competition and the challenges that the nineties are due to bring is by educating our children. It is nothing new to hear that international comparisons of math and science achievement show American children earning the lowest scores in the world.

Mr. President, I have behind me two charts that I think are quite illustrative of the problem. These charts show that in science achievement for 17-year-old young men and women, the United States is behind China, Japan, and the United Kingdom.

In math achievement for 17-year-old young men and women, we are behind the countries of Canada, Japan, Sweden, and the United Kingdom, yet again.

There are only a few countries on these charts that illustrate the problem we have, Mr. President. We could list other countries that score higher than the United States—many, many countries where students, even in less developed nations, than the U.S. score higher than our students.

So it saddens me to hear that the children of the United States earn low scores when this country of ours is so rich in resources. We hear so much about Japan. Of course, Mr. President, Japan does not have the resources our country does. We certainly should be outscoring them in every category, but we do not. There is no reason why American education should not be the very best in the world.

I began by stating a couple of statistics that I want to repeat. In the United States today, we have fewer physics teachers than we have school districts—not schools, school districts. For every new math and science teacher that we are getting today, we are losing 13 more math and science teachers to the private sector. Teachers are leaving math and science teaching at a rate of 13 to 1—that is for every new teacher we get 13 leave, on to do something else.

My office like every office here on Capitol Hill has been flooded with pleas from corporations. We could name them by the dozens, but Union Carbide, all kinds of aerospace industries, Merck Laboratories, are asking us to address the crisis facing them, the competitive decline of our advanced industries in the international marketplace and our inadequately-educated workforce. Such pleas call for a partnership among industry, government, and educators, to seek long-term solutions to the challenges facing our present and future work force.

Last week I received alarming news from the Nevada Superintendent of Public Instruction. The high school dropout rate in Nevada is approximately 38 percent. I was astounded by this, news which I consider to be tragic. I could not believe that in the Silver State, the State of Nevada, the fastest-growing State in the Union, that 38 percent of high school students were failing to graduate. We desperately need this 38 percent to stay in school and to graduate.

When I say "we," I mean we, the whole country needs more of our students to graduate. The figure of 38 percent, of course is high. But, Mr. President, all over the country the average is more than 25 percent.

We desperately need this 38 percent to stay in school to graduate. First, they must stay in school to absorb skills to enable them to provide for themselves, and second, they must stay in school because we desperately need them to participate in the U.S. work force.

There is a corporation in Nevada, an aerospace firm, that cannot find Americans to work in its facilities. This corporation has been forced to search outside the United States—not outside Nevada—outside the United States for qualified employees. Similar scenarios can be witnessed throughout the whole United States.

We need to better prepare our students to improve general technical literacy as well as to encourage more students to become our Nation's scientists and engineers. Despite an increasing need for Americans who are literate in math and science, very few are pursuing studies in these areas, Mr. President, particularly minorities.

In 1988, in this country of approximately 250 million people, 233 black and Hispanic Americans earned doctorates in science or engineering fields; 233. Together, black and Hispanic Americans constitute 20 percent of our Nation's population. Yet only 4 percent of employed scientists and engineers are black or Hispanic.

Black and Hispanic children currently constitute 25 percent of our public school enrollment. By the year 2000, they will constitute 50 percent.

Women as well as minorities will constitute a great percentage of our future work force, yet are grossly underrepresented in enrollment in scientific and technological disciplines at all levels of schooling.

Without a proportional participation of women and minorities in science and technical careers, we will not be able to compete in the world marketplace. These figures I have on these charts behind me, Mr. President, will be even more out of line unless we do something and do it on a nationwide basis, not a bit here and a bit there. We need a major program. We need an effective program like the one it took for us to get to the moon. Too many people enter our work force who are ill

prepared for jobs with a technology focus. We have failed to equip our students to think intelligently about environment, medicine, energy, space, and other crucial technical fields. Technology is the basis for a world class standard of living.

Mr. President, I am not talking about educating everyone to the level of a Ph.D. I am talking about educating a work force that is technologically literate. That we have failed.

Thomas Jefferson wrote in a letter in 1816 "If a nation expects to be ignorant and free in a state of civilization, it expects what never was, and never will be."

I admire Jefferson's vision of the U.S. coalition with education. If he were here today, he would likely agree that the quality of our work force largely determines our economic future.

The average time allotted to science in our elementary school systems throughout the United States is 15 minutes a day.

Of our Nation's 24,000 high schools, 30 percent of these high schools offer no physics courses. How could they? We have fewer physics teachers than school districts.

Of our Nation's 24,000 high schools 18 percent offer no chemistry courses, and 8 percent offer no biology courses.

This means that 3½ million students will graduate from high school without even having had an opportunity to take physics; 2 million students will not have had an opportunity to take chemistry; and 1 million will not have had the opportunity to take a biology course.

Such assessments clearly indicate that the math and science education of our students needs to be addressed at the elementary and secondary levels and addressed without delay. I am happy to say that many of my colleagues have acknowledged the importance of math and science and have addressed different aspects of it with proposed legislation.

I am pleased that better preparedness of both our students and teachers has been the focus of some of my colleagues. Today I would like to make a contribution toward improving science and math education by introducing the Science and Mathematics Achievement Readiness Teaching Act which will be called SMART.

This bill is designed to provide local educational agencies funds to make substantial improvements in the science and math education of their students. All too often the Federal Government has mandated to local education agencies that they introduce new and improved programs, yet has neglected to provide them with any resource with which to meet this mandate.

Given that our national needs are being threatened, I believe it is the responsibility of the Federal Government to provide greater support to U.S. education. By addressing the educational needs of our children, we can begin the trek back to the strong position we once held as the world's foremost economic power.

The recent reauthorization of school dropout programs, and passage of the National Literacy Act, and the Educational Excellence Act, illustrates the growing sentiment that education must be our Nation's No. 1 priority. Title I of the SMART Act directs the National Science Foundation and the Department of Education to approve science and math curricular packages designed to raise the science and math achievement of our students. Approved curricular packages will be offered to local educational agencies, and those agencies who wish to implement curricular programs, as approved by the National Science Foundation and Department of Education, will apply for grants with which to fund these changes. Such programs will be designed to meet the varying and diverse needs of the many local educational agencies in our Nation, including local educational agencies experiencing high dropout rates.

This title is unique because it permits money to be spent directly on our children. It does not add to the structure of an already burdensome bureaucracy. We know where the problems lie. Let us get down to the business of correcting those problems.

Title II of SMART addresses the need for well-prepared teachers. It aims to ensure that the currently diminishing supply is increased. I repeat for the third time, for every new math and science teacher coming on board, we are losing 13. SMART offers college scholarships—a 2-year commitment to teaching science or math is made in exchange for every year a scholarship is received. For 8 years of teaching math and science, you would get 4 years of free education.

The goals of SMART provide schools the Federal support they so desperately need and provide an incentive to draw large number of teachers into the profession to fill this growing need. The Federal Government has the means and the responsibility to provide support to our schools and to our children. It is time that we, the Congress, lived up to that responsibility, and that the Federal Government, as a result of our action, lives up to the responsibility that they have.

That is why, Mr. President, I am introducing this bill today. By offering our schools the ability to implement new materials and curricula, our children will be able to succeed in math and science. By offering scholarships to those willing to teach will both improve and increase our supply of teachers. I urge my colleagues to recognize the vital importance of this legislation and to support the SMART Act with their cosponsorship. Mr. President, I ask unanimous consent that the text of the SMART Act be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2373

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Science and Mathematics Achievement Readiness Act (SMART)".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the international competitiveness of the United States depends on a technologically capable workforce;

(2) the content and quality of elementary and secondary school science and mathematics programs strongly affect the ability of Americans to provide for their livelihoods;

(3) students in United States schools consistently score below their counterparts in other developed nations in comparative testing in both science and mathematics;

(4) enrollment in science classes at all levels of schooling is steadily declining;

(5) the average amount of time allotted to science instruction in United States elementary schools is 15 minutes per day;

(6) in 1990 more minorities will attend United States schools at a time when minorities are already underrepresented in the sciences and mathematics, indicating that an adjustment is needed in United States science and mathematics curricula to address minority needs;

(7) State and local educational agencies must have Federal assistance in order to attain educational excellence;

(8) the United States not only needs scientists and engineers, but also needs a population which is generally technically literate; and

(9) science and mathematics education curriculum reform measures are vitally needed at the elementary and secondary school levels to shape the talent pool of students, enabling Americans to meet the social and economic challenges facing the United States.

SEC. 3. DEFINITIONS.

For the purposes of this Act—

(1) the term "Director" means The Director of the National Science Foundation;

(2) the term "institution of higher education" has the same meaning given such term in section 1201(a) of the Higher Education Act of 1965;

(3) the term "local educational agency" has the same meaning given such term in section 1471(12) of the Elementary and Secondary Education Act of 1965; and

(4) the term "Secretary" means the Secretary of Education.

TITLE I—CURRICULUM CHOICES

SEC. 101. CURRICULUM CHOICES.

(a) NATIONAL SCIENCE FOUNDATION.—(1) The Director shall develop and compile a set of no less than 10 curriculum choices designed to enhance the science and mathematics literacy of elementary and secondary school students.

(2) The Director shall develop and compile the set of curriculum choices described

in paragraph (1) by the end of fiscal year 1991.

(3) The Director shall transmit the set of curriculum choices described in paragraph (1) to the Secretary by the end of fiscal year 1991.

(b) SECRETARY OF EDUCATION.—The Secretary shall disseminate to local educational agencies throughout the United States the set of the curriculum choices developed pursuant to subsection (a).

SEC. 102. GRANTS AUTHORIZED.

(a) IN GENERAL.—(1) The Secretary is authorized and directed to make grants to local educational agencies to implement the science and mathematics curricula developed pursuant to section 101(a).

(2) Grants awarded pursuant to paragraph (1) shall be awarded by the end of fiscal year 1992.

(3) The Secretary shall not award more than 1 grant pursuant to the provisions of this section to each local educational agency having an application approved pursuant to section 103.

(b) AWARD BASIS.—The Secretary shall award grants under this title on the basis of—

(1) the number of students served by the local educational agency; and

(2) the financial need of the local educational agency.

(c) NUMBER OF GRANTS.—The Secretary shall award not more than 1,000 grants under this title in each fiscal year.

(d) ADMINISTRATIVE COSTS.—(1) Each local educational agency receiving a grant under this title may reserve 5 percent of such funds to pay the Federal share of the administrative costs of implementing the curricula developed pursuant to subsection (a).

(2) For the purpose of this subsection the Federal share shall be 50 percent.

(3) Each local educational agency receiving a grant under this title shall supply the non-Federal share of the administrative costs of implementing the curricula developed pursuant to subsection (a) from non-Federal sources.

SEC. 103. APPLICATION.

(a) IN GENERAL.—Each local educational agency desiring a grant under this section shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may reasonably require. Each such application shall—

(1) describe the activities and services for which assistance is sought;

(2) contain assurances that the local educational agency will implement the curriculum changes for which financial assistance was sought by the end of the fiscal year 1993 or return such financial assistance to the Secretary; and

(3) contain such other information and assurances as the Secretary may reasonably require.

(b) APPROVAL.—The Secretary shall approve applications which comply with the provisions of this Act.

SEC. 104. USE OF FUNDS.

Each local educational agency which receives a grant under this title shall use such grant funds to—

(1) hire teachers;

(2) provide teachers with in-service training; and

(3) purchase textbooks, and other necessary equipment and materials.

SEC. 105. EVALUATION.

(a) GUIDELINES ESTABLISHED.—The Secretary, in consultation with the Commissioner for Educational Statistics, shall develop guidelines to evaluate the success of the curriculum choices developed pursuant to section 101(a).

(b) EVALUATION.—(1) Each local educational agency receiving a grant under this title shall evaluate the success of their curriculum choices in accordance with the guidelines established pursuant to subsection (a).

(2) Each local educational agency receiving a grant under this title shall conduct the evaluation described in paragraph (1) within 2 years of receiving such grant or by the beginning of fiscal year 1995, whichever occurs first.

(3) Each local educational agency performing an evaluation pursuant to paragraph (1) shall transmit the results of such evaluation to the Secretary.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $300,000,000 for fiscal year 1991 and each succeeding fiscal year thereafter to carry out the provisions of this title.

TITLE II—MATHEMATICS AND SCIENCE SCHOLARSHIPS

SEC. 201. FINDINGS.

The Congress finds that—

(1) in order to enhance our Nation's economic productivity, and increase employment opportunities for Americans, the Nation must ensure that students are provided with at least minimal levels of technical literacy during their elementary and secondary schooling;

(2) well-prepared teachers are needed to provide United States students the science and mathematics education they need;

(3) in 1986, nearly one-third of American high school students were being taught science and mathematics courses by teachers not qualified to teach such courses;

(4) teacher salaries are such that students who display talent in technological disciplines do not pursue careers in teaching;

(5) a declining number of students are choosing science and mathematics as fields of study at both the undergraduate and graduate levels, indicating that the number of graduates qualified to teach in such fields of study is also declining;

(6) minorities and women comprise a growing proportion of the American workforce and such individuals are needed to address shortages of science and mathematics teachers; and

(7) the Federal Government has both the responsibility and the means to provide support to teachers to enable teachers to improve their qualifications to teach science and mathematics, and to encourage more persons to teach science and mathematics in elementary and secondary schools.

SEC. 202. SCHOLARSHIP PROGRAM AUTHORIZED.

(a) IN GENERAL.—The Secretary is authorized to annually award scholarships to individuals to assist such individuals in obtaining a teaching degree.

(b) AMOUNT OF SCHOLARSHIPS.—Each scholarship awarded under this title in any fiscal year may not exceed the lesser of—

(1) the cost of tuition, board, and fees for such fiscal year; or

(2) $9,000.

(c) NUMBER OF SCHOLARSHIPS.—(1) The Secretary shall award not more than 5,000 scholarships under this title in each fiscal year.

(2) The Secretary shall award not more than 4 scholarships under this title to any 1 individual for undergraduate study.

(3) The Secretary shall award not more than 2 scholarships under this title to any 1 individual for graduate study.

(d) USE AT ANY INSTITUTION PERMITTED.—Each individual awarded a scholarship under this Act shall use such scholarship to attend any institution of higher education.

SEC. 203. ELIGIBILITY.

(a) IN GENERAL.—A student shall be eligible to receive a scholarship under this title if such individual is a citizen of the United States.

(b) CONTINUED ELIGIBILITY.—Each individual awarded a scholarship under this title shall continue to receive scholarship payments under this title only during such time as the Secretary finds that such student is—

(1) enrolled as a full-time student in an institution of higher education;

(2) pursuing a course of study approved by the Secretary; and

(3) maintaining satisfactory progress as determined by the institution of higher education which the individual is attending.

SEC. 204. APPLICATION.

(a) IN GENERAL.—Each individual desiring a scholarship under this title shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may reasonably require. Each such application shall—

(1) describe the course of study the student will pursue;

(2) describe the cost of attendance for which a scholarship is sought; and

(3) contain such other assurances as the Secretary determines are necessary to ensure compliance with the provisions of this title.

SEC. 205. AGREEMENT.

(a) IN GENERAL.—Each individual awarded a scholarship under this title shall enter into an agreement with the Secretary.

(b) CONTENTS.—Each agreement described in subsection (a) shall—

(1) provide assurances that the individual will, within 2 years of completing such individual's course of study, teach science or mathematics in an elementary or secondary school for a period of not less than 2 years for each fiscal year such individual received a scholarship under this title;

(2) provide assurances that the individual will repay to the Secretary all or a portion of the scholarship awarded by the Secretary under this title in the event that the conditions of paragraph (1) are not complied with; and

(3) set forth procedures under which an individual who teaches less than the 2-year period required under paragraph (1) will repay the scholarship awarded under this title to the Secretary according to a schedule established by the Secretary.

SEC. 206. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $45,000,000 for fiscal year 1991 and each succeeding fiscal year thereafter to carry out the provisions of this title.

By Mr. CHAFEE:

S. 2374. A bill to temporarily suspend the duty on chlor amino base.

S. 2375. A bill to temporarily suspend the duty on 3 nitrophenyl-4-beta-hydroxyethyl sulfone.

S. 2376. A bill to temporarily suspend the duty on 4-chloro-2-nitro aniline.

S. 2377. A bill to temporarily suspend the duty on amino sulfon br.

S. 2378. A bill to temporarily suspend the duty on acet quinone base.

39-059 O-91-2 (Pt. 5)

S. 2379. A bill to temporarily suspend the duty on diamino phenetole sulfate; to the Committee on Finance.

TEMPORARY SUSPENSION OF CERTAIN DUTIES

● Mr. CHAFEE. Mr. President, today I am introducing six bills to extend the duty suspension on the importation of six chemicals that are precursors used in the production of printing inks and dyes for textiles. These particular chemicals are not produced in the United States and the extension of the suspension of the duty will act to lower the overall cost of producing textiles in this country.

As we are all aware, the textile industry has been hit especially hard by imports. I want to do all I can to keep this American industry on a fair competitive footing with its foreign competition. Because our foreign competitors can print and dye their textiles without the added costs that this duty imposes, that obviously means that this duty would place our domestic industry at a competitive disadvantage.

The International Trade Commission has confirmed that there is no domestic production of these chemicals to be adversely affected by a continuation of this duty suspension. Therefore it is senseless to allow the current duty suspensions to expire at the end of this year.

These bills would extend the duty suspensions for these six chemicals from their current December 31, 1990 expiration date through December 31, 1992. These duties have been suspended for less than 2 years, since the enactment of the Omnibus Trade and Competitiveness Act of 1988, Public Law 100-418. These extensions will provide 2 additional years and will give us time to study the effects of these duty suspensions on the chemical industry to determine if we should then repeal the duties outright or continue the suspensions for another period.

Mr. President, I ask unanimous consent that the six bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 2374

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CHLOR AMINO BASE.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

"9902.31.15	4-choloro-2,5-dimethoxy aniline (CAS No. 6358-64-1) (provided for in heading 2922.29.20)	Free	No change	On or before 12/31/92"

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

S. 2375

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NITRO SULFON B.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

'9902.31.09	3-nitrophenyl-4-beta-hydroxyethyl sulfone (CAS No. 41687-30-3) (provided for in subheading 2930.90.20.008)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

S. 2376

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. 4-CHLORO-2-NITRO ANILINE.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new items:

"9902.31.10	4-chloro-2-nitro aniline (CAS No. 89-63-4) (provided for in subheading 2921.42.25)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

S. 2377

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMINO SULFON BR.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

"9902.31.11	3-(4'aminobenzamido) phenyl-beta-hydroxyethyl sulfone (CAS No. 20241-68-3) (provided for in subheading 2930.90.20)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

S. 2378

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ACET QUINONE BASE.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

"9902.2.31.12	2, 5-dimethoxy acetanilide (CAS No. 3467-59-2) (provided for in subheading 2924.29.09)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

S. 2379

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DIAMINO PHENETOLE SULFATE.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

"9902.31.13	3,4 diamino phenetole dihydrogen sulfate (CAS No. 85137-09-3) (provided for in heading 2922.50.30)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.●

By Mr. CHAFEE:

S. 2380. A bill to suspend temporarily the duty on lasamid; to the Committee on Finance.

TEMPORARY DUTY SUSPENSION ON LASAMID

● Mr. CHAFEE. Mr. President, I am pleased to offer legislation today that would extend a temporary duty suspension on lasamid. Lasamid is a chemical used in the manufacture of furosemide, a widely used potent diuretic, primarily prescribed in the treatment of patients who have suffered from congestive heart failures.

Furosemide is currently sold in the United States by Hoechst-Roussel Pharmaceuticals, Inc. [H-RPI] and by several other generic drug companies. However, the only company which manufacturers furosemide in the United States is H-RPI's parent, Hoechst Celanese Corp. All other furosemide sold in the United States is imported.

Hoechst Celanese produces furosemide in my State of Rhode Island by a process which involves the intensive treatment of the precursor chemical lasamid. There are no known American producers of lasamid, and its only

use is as a precursor to the production of furosemide. Since there are no domestic producers of lasamid, no domestic interests would be adversely affected by this bill. By continuing the duty suspension for lasamid, this U.S. producer will be more competitive with foreign producers, thereby benefiting the American workers who manufacture this product. It will also contribute to keeping down medical costs, by reducing costs to produce a major drug relied upon by many Americans.

This bill would extend the duty suspension for lasamid from its current December 31, 1990, expiration date through December 31, 1992. This duty has been suspended for less than 2 years, since the enactment of the Omnibus Trade and Competitiveness Act of 1988, Public Law 100-418. This extension will provide 2 additional years and will give us time to study the effect of the duty suspension on the pharmaceutical industry to determine if we should then repeal the duty outright or continue the suspension for another period.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2380

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LASAMID.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new item:

"9902.31.45	2,4 Dichloro-5-sufamoyl benzoic acid (provided for in subheading 2935.00.45)	Free	No change	On or before 12/31/92".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.●

By Mr. BUMPERS:

S. 2381. A bill to prohibit the obligations of funds in connection with the Follow-on to Lance Missile Program; to the Committee on Appropriations.

ELIMINATION OF FUNDING FOR FOLLOW-ON TO LANCE MISSILE PROGRAM

Mr. BUMPERS. Mr. President, I am today introducing a bill that deals with the proposed research and development of a follow-on to the existing Lance missile. For the RECORD, the Lance missile is a short-range missile that we have deployed in Germany that is nuclear tipped. The Germans are already very apprehensive about it because if there were a war and the Lance missile were used, because of its short range it would most likely fall on the Germans themselves. So they are not exactly euphoric for having this missile on their soil.

But the President, in submitting his 1991 defense budget to us, has asked for $112,228,000 for engineering development whereas this year, 1990, we are spending only $32 million. In addition to that, of course, he is also asking for a significant amount, from the Department of Energy which, as you know, develops nuclear warheads for our missiles.

The bill I am proposing today would simply halt the research and save the Government $112 million for research and development on a missile that will almost certainly never be deployed.

Mr. President, this is a case where I can only believe that the administration is developing a missile hoping that the development of the missile will push policy, namely NATO policy, on allowing the missiles to replace the existing missiles in Germany.

I have just returned from Germany. Completely aside from what I heard, I will give you some quotes on what people in Germany are saying. One senior German foreign ministry official, who is unnamed, was quoted in the New York Times as saying:

The question of modernization of the short-range nuclear missiles is a question that makes us laugh. I don't think there is any possibility of it being implemented. We don't even want a formal funeral for this issue.

Ambassador Ruediger Hartmann, West Germany's Ambassador to the Conventional Forces Talks in Europe; here is his quote:

I do not see in the present political circumstances, especially with the prospect of a treaty relationship between the Federal Republic and East Germany, any readiness on the part of our population to accept the stationing of those forces.

Egon Bahr, defense expert in the Social Democratic Party:

We won't shoot at each other. The short-range missiles can only shoot other Germans. We will not accept them.

Mr. President, when you consider the fact that the Germans obviously do not want them and you consider the fact that we are struggling with budget constraints that are unprecedented around here, this is one system that makes less sense than anything else in the budget.

Four Senators sat across the table from Helmut Kohl about 10 or 12 days ago, and I raised a question:

Mr. Chancellor, the President is asking Congress to appropriate about $200 million for research and development of the follow-on Lance.

Would you object if Congress removes that from the budget?

Everybody in the room laughed. Chancellor Kohl smiled. He said:

Well, I wouldn't presume to meddle in the internal politics or the internal policies of the United States.

But I can tell you that if Helmut Kohl were to announce today that he thought this was a dynamite idea and, yes, he did indeed want the follow-on Lance in Germany, he need not put his name on the ballot on December 2.

Right now, I think Chancellor Kohl is going to be reelected. Incidentally, I did not believe that 6 months ago. He was in great difficulty. But, because of the reunification issue, he has resurrected himself. But the best way in the world for him to unresurrect himself is to even hint that he is going to allow us to put a follow-on nuclear-tipped Lance missile in his country.

Mr. President, my colleague from Arizona, Senator MCCAIN said:

There is no point in engaging in a political contest with the West Germans over land-based missiles. We can do nothing but lose.

And he is absolutely right.

We have another missile that we are spending $119 million on next year, and it is called the SRAM-T. It would be launched from airplanes. And the SRAM-T will do just about anything the Lance missile will do.

My point is if we wanted to deploy a missile in West Germany in a hurry, the SRAM and the SRAM-T warhead would probably be just fine.

I will close, Mr. President, by quoting David Jones, who was chairman of the Joint Chiefs of Staff 10 years ago.

He said, on the deployment of the Lance missile in Germany:

I would let sleeping dogs lie on that one issue.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2381

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROHIBITION ON OBLIGATION OF FUNDS FOR THE FOLLOW-ON TO LANCE MISSILE PROGRAM

Funds appropriated to or for the use of the Department of Defense or the Department of Energy for fiscal year 1991 or any subsequent fiscal year may not be obligated or expended in connection with the Follow-on to Lance missile program, and unobligated funds available to either such department for any fiscal year prior to fiscal year 1991 may not be obligated or expended after the date of the enactment of this Act in connection with such program.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. BOREN, Mr. DASCHLE, Mr. KERREY, Mr. PRYOR, Mr. HARKIN, Mr. BAUCUS, Mr. BOND, Mr. COCHRAN, and Mr. BOSCHWITZ):

S. 2382. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 and the Agricultural Trade Act of 1978 to promote and encourage the export of agricultural commodities and the products thereof,

and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL DEVELOPMENT AND TRADE ACT

Mr. LEAHY. Mr. President, I rise today to introduce the Agricultural Development and Trade Act of 1990. This bill will become the Agricultural Trade title in the farm bill that the Agriculture Committee is developing this year.

This bill addresses all areas of agricultural trade, from our food donation programs to our commercial export programs.

The bill creates a sound foundation for U.S. agricultural trade policy. A foundation that will take U.S. agriculture through the 1990's, whether there is success or failure in the current round of GATT negotiations.

I worked closely with Senator LUGAR, the ranking minority member of the committee throughout the development of this bill.

We reviewed all existing legislation; determined what we believed worked, and what did not. The product of that review is before you today. A revision from the ground up of our agricultural trade laws. A revision that attempts to achieve the following:

End the tangled bureaucracy that has plagued our food aid programs.

Improves our willingness and ability to help the truly needy countries of the world.

Establishes standards whereby the Congress can evaluate the effectiveness of our trade and food aid programs.

A truly competitive trade strategy that makes better use of scarce government and taxpayer resources.

For over 35 years, Public Law 480 has been the cornerstone of this country's food assistance programs. Thirty-six years ago, Hubert Humphrey took this floor and spoke of his dream—Food for Peace.

The words he said that day still ring true: "Democracy and freedom has no greater ally than the abundance of food."

Senator Humphrey recognized that we need more than billions for defense. We must also use our wealth and our agricultural prosperity to stand with those across the globe who face hunger and starvation.

But Public Law 480, the law that Senator Humphrey did so much to establish is now in need of significant revision. Public Law 480 was written at a time when the cold war was the primary concern of our foreign policy. And it has been amended, stretched, changed, and overcome with bureaucratic inertia over the past 40 years.

The bill we are introducing today takes Public Law 480, a bill written for the 1950's, and modifies it to meet the challenges of global hunger in the 1990's.

THE GLOBAL VILLAGE—THE WORLD WE LIVE IN TODAY

To convey the magnitude of the hunger problem, imagine living in a global village of 1,000 people.

In this village there would be 53 people from North America, 87 people from South and Central America, 120 from Africa, 155 from Europe and the Soviet Union, and 550 people from Asia.

Of the 1,000 people living in this village, 750 would be in the developing world. 140 of these villagers—an amount equivalent to the entire population of the Western Hemisphere—would be malnourished. Thirty of these 140 would be children.

In 10 years, this village will grow by 20 percent. The poverty in this village, if left unchecked, will only get worse by the year 2000.

This is the village we live in. A village where North America is dwarfed by the massive size of the world's population, but where the number of hungry equals the population of the entire Western Hemisphere.

THE CHALLENGE OF THE 1990'S

In 1954, with the enactment of Public Law 480, we took on the challenge of helping the hungry of the world. Today, with the introduction of this legislation, we rededicate ourselves to finding new ways to provide food and economic development assistance to the truly needy.

Let me share with you how our bill will improve the effectiveness of the Public Law 480 program.

Public Law 480's goals are clearly and honestly identified.

When our goal is economic development, the Agency for International Development and the PVO's will take the lead. When our goal is market development, the program will be handled by USDA.

We will no longer allow turf battles within the executive branch to prevent food from getting to the starving masses. Deadlines will be imposed on the signing of agreements under this program.

Clearer management responsibilities, as well as the elimination of self-help measures, will prevent shipments from arriving too late, during harvest in the recipient country, or at times of low prices.

Under this bill, countries that need the food will get the food. Too often, foreign policy and other concerns channel food away from the neediest countries to the most politically important ones.

Our bill responds to the economies of the very poor as well as to the advanced developing countries. Grant aid will be provided by AID to the poorest countries. Loans, with shorter terms, will be extended by USDA to those countries that can afford to incur new debt.

We will stop piling debt on more debt in the poorest, debt-ridden countries. This bill contains a comprehensive proposal to relieve the excessive debt burden that plagues the poorest countries. Without an improved debt situation, these countries can never become food secure and develop into commercial markets.

Our bill stresses the development role of food aid which has been paralyzed by an absence of long-term planning. Multiyear programming of food aid is essential to tackling the problems of poverty and food security.

We have also given more flexibility to AID in determining how best to encourage policy change in individual recipient countries. Food alone may be used to encourage reforms or local currencies can be used to fund economic development activities.

We think these reforms will help put food aid on a level playing field with other forms of development assistance.

We establish a new Food for Freedom Program to provide food and assistance to the new democracies in Eastern Europe and around the world.

We give more resources to the Private Voluntary Organizations, including indigenous PVO's, to fulfill their mission to feed the world's poor. They are on the front line and need our support.

The bill creates a food aid advisory board to encourage AID and the PVO's to find better solutions to alleviate hunger in the world. AID's inspector general is also a member of this board.

Over the years, foreign agents who arrange for the shipping of Public Law 480 commodities have been reported to abuse the program by accepting illegal commissions. This bill will require USDA to either serve as agents themselves or allow the recipient country to purchase agricultural commodities on a C&F basis.

We have established a formal mechanism for oversight to ensure that the programs meet the goals set forth.

We believe the reforms in Public Law 480 program will make the program a dependable and useful tool and give new meaning to the goal of food security and improving the lot of the world's families in the coming decade.

As John F. Kennedy stated over 25 years ago,

> So long as freedom from hunger is only half achieved, so long as two-thirds of the nations have food deficits, no citizen, no nation, can afford to be satisfied. We have the ability, as members of the human race. We have the means, we have the capacity to eliminate hunger from the face of the earth in our lifetime. We need only the will.

Our bill provides that will.

COMMERCIAL TRADE

On the commercial side, the bill tries to make sense of our complicated agri-

cultural trade laws. These laws are a tangled, confused set of statutes that have evolved on an ad hoc basis without clear standards and goals.

The bill clarifies our existing commercial trade programs by bringing together, in one piece of legislation, most of our commercial trade authorities. It eliminates redundant, contradictory provisions.

The Secretary of Agriculture will be required to operate our commercial trade programs within a long-term agricultural trade strategy that provides a focused, more competitive framework for our farm programs in the 1990's.

Our bill establishes in law clear authority and guidelines for the operation of an Export Enhancement Program which targets unfair trade practices of foreign countries.

Our bill creates a new Marketing Assistance Program with tough standards so that money spent will lead to increased U.S. agricultural exports.

We modify the Commodity Credit Corporation [CCC] export loan and credit guarantee programs to preserve the financial soundness of the program and address some of the implementation criticisms that have plagued the viability of the program.

Our bill takes the necessary steps to put the CCC loan guarantee programs in a stronger financial position entering the 1990's. Only banks in sound fiscal condition can participate in the CCC guarantee programs. Sister banks are ineligible for credit guarantees. In addition, CCC must undertake random audits to verify that commodities shipped under its programs arrive at their intended destination.

We clarify that commodities should contain at least 90 percent domestic content within the guarantee program.

Our bill reduces the duplicative reporting requirements to free up government staff to devote more of their energy to building U.S. exports.

CONCLUSION

To meet the complex and competitive environment in the 1990's, we have taken a fresh look at our food aid and commercial export programs. I believe the Agricultural Development and Trade Act of 1990 is a forward piece of legislation that will position the United States to meet the immense challenges of trade and development in the next decade. I seek your support in that effort.

I ask unanimous consent that the text of the bill appear in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2382

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Agricultural Development and Trade Act of 1990".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
TITLE I—THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954
Sec. 101. Agricultural Trade Development and Assistance Act of 1954.

TITLE I—THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954
SECTION 101. AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954.

The Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) is amended to read as follows:

"SECTION 1. SHORT TITLE.

"This Act may be cited as the Agricultural Trade Development and Assistance Act of 1954.

"SEC. 2. POLICY.

"It is the policy of the United States to use its abundant agricultural productivity to promote the foreign policy of the United States by enhancing the food security of the developing world through the use of such productivity to—

"(1) combat world hunger, malnutrition and their causes;

"(2) promote broad based and sustainable economic development;

"(3) expand international trade;

"(4) develop and expand export markets for United States agricultural commodities; and

"(5) use foreign currencies accruing under this Act to foster and encourage the development of private enterprise and democratic participation in developing countries.

"SEC. 3. GLOBAL FOOD AID NEEDS.

"Pursuant to the principal findings of the National Research Council of the National Academy of Sciences that doubling food aid over present levels of about 10 million metric tons per year would be necessary to meet projected global food needs throughout the decade of the nineties, it is the sense of Congress that the President increase the United States' contributions of food aid, and also encourage other donor countries to increase their contributions toward meeting new food aid requirements. It is the sense of Congress that the President should encourage other advanced nations to make increased contributions for the purpose of combatting world hunger and malnutrition particularly through the expansion of international food and agricultural assistance programs.

"SEC. 4. DEFINITIONS.

"As used in this Act:

"(1) AGRICULTURAL COMMODITY.—Unless otherwise specified, the term 'agricultural commodity' includes any agricultural commodity or the products thereof produced in the United States, including wood and processed wood products, fish, and livestock as well as value-added, fortified, or high-value agricultural products.

"(2) ADMINISTRATOR.—The term 'Administrator' means the Administrator of the United States Agency for International Development.

"(3) COOPERATIVES.—The term 'cooperatives' means a private sector organizaton whose members own and control the organization and share in its services and its profits and which provides business services outreach in cooperative development for its membership.

"(4) INDIGENOUS NON-GOVERNMENTAL ORGANIZATION.—The term 'indigenous non-governmental organization' means a foreign organization working at the local level to solve development problems in the foreign country in which it is located.

"(5) PRIVATE VOLUNTARY ORGANIZATION.—The term 'private voluntary organization' means a nonprofit organization (tax-exempt if a United States organization) which receives some portion of its annual revenue from the private sector and receives voluntary contributions of money.

"(6) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"TITLE I—FOOD AND DEVELOPMENT ASSISTANCE

"SEC. 101. FOOD AND DEVELOPMENT ASSISTANCE.

"The President shall—

"(1) through the Agency for International Development, carry out a program through which agricultural commodities are donated under section 103 to least developed countries and economic development activities may be funded with revenue generated by the sale of such commodities in the recipient country; and

"(2) through the Department of Agriculture, establish and implement a program under section 107 to offer agricultural commodities for sale on credit to developing countries, and to carry out domestic agricultural trade development activities with the local currency proceeds associated with the repayment of such loans.

"SEC. 102. ELIGIBLE COUNTRIES.

"(a) LEAST DEVELOPED COUNTRIES.—A country shall be considered to be a least developed country and eligible for the donation of agricultural commodities under section 103 if—

"(1) such country meets the poverty criteria established by the International Bank for Reconstruction and Development Civil Works Preference for providing financial assistance; or

"(2) such country is a food deficit country and is characterized by high levels of malnutrition among significant numbers of its population, as determined by the Administrator under subsection (c).

"(b) DEVELOPING COUNTRIES.—A country shall be considered to be a developing country and eligible for assistance under section 107 if such country has a shortage of foreign exchange earnings and has difficulty meeting all of its food needs through commercial channels, as determined by the Secretary.

"(c) INDICATORS OF FOOD DEFICIT COUNTRIES.—To make a finding under subsection (a)(2) that a country is a food deficit country and is characterized by high levels of malnutrition, the Administrator (using the best available information) must determine that the country meets all of the following indicators of national food deficit and malnutrition:

"(1) CALORIE CONSUMPTION.—That the daily per capita calorie consumption of the country is less than 2300 calories.

"(2) FOOD SECURITY REQUIREMENTS.—That the country cannot meet its food security requirements through domestic production or imports due to a shortage of foreign exchange earnings.

"(3) CHILD MORTALITY RATE.—That the mortality rate of children under five years of age in the country is in excess of 100 per 1000 births.

"(d) VIOLATIONS OF HUMAN RIGHTS.—

"(1) INELIGIBLE COUNTRIES.—The Administrator or the Secretary, as appropriate, shall not enter into any agreement under this title to provide agricultural commodities, or to finance the sale of agricultural commodities, to the government of any country determined by the President to engage in a consistent pattern of gross violations of internationally recognized human rights, including—

"(A) the torture or cruel, inhuman, or degrading treatment or punishment of individuals;

"(B) the prolonged detention of individuals without charges;

"(C) responsibility for causing the disappearance of individuals through the abduction and clandestine detention of such individuals; or

"(D) other flagrant denials of the right to life, liberty, and the security of persons.

"(2) WAIVER.—Paragraph (1) shall not prohibit the provision of food assistance to such a country if the food assistance is targeted to the most needy people in such country and is made available in such country through channels other than the government.

"SEC. 103. GRANT PROGRAM.

"(a) IN GENERAL.—To carry out the policies and accomplish the objectives described in section 2, the Administrator may negotiate and execute agreements with least developed countries under section 102(a) to provide commodities to such countries on a grant basis.

"(b) ALLOCATION OF ASSISTANCE.—

"(1) COUNTRY DETERMINATION.—The Administrator shall (subject to section 401) determine whether and to what extent agricultural commodities shall be made available under this section to least developed countries.

"(2) PRIORITY.—In making a determination under paragraph (1), the Administrator shaH give priority to least developed countries that—

"(A) demonstrate the greatest need for food;

"(B) demonstrate the capacity to use food assistance effectively; and

"(C) are willing to adopt policies to promote food security.

"(c) MULTI-YEAR DEVELOPMENT AGREEMENTS.—

"(1) SUBMISSION OF PROPOSAL.—Except as provided in paragraph (3), the Administrator shall, if requested by a recipient country, enter into a multi-year agreement to make agricultural commodities available under this section to such country.

"(2) TERMS OF MULTI-YEAR AGREEMENT.—A multi-year agreement entered into under paragraph (1) shall—

"(A) include an estimate of the annual value or volume of agricultural commodities proposed to be provided to the country under the agreement;

"(B) include a plan for the intended use (on an annual basis) of the revenue generated from the sale within the country of the agricultural commodities provided under the agreement;

"(C) include a statement of the manner in which the agricultural commodities provided under the agreement, or the revenue received for such commodities, will be integrated into the overall development plans of the country;

"(D) include a plan to encourage competitive private sector participation within the country in the storage, marketing, transportation, and distribution of food assistance;

"(E) include a statement that such agreement shall be subject to the availability, during each fiscal year to which such multi-year agreement applies, of the necessary appropriations and agricultural commodities; and

"(F) contain such other terms and conditions as the Administrator determines to be necessary.

"(3) EXCEPTION.—The Administrator may refuse to enter into a multi-year agreement with a country under paragraph (1) if the Administrator determines that assistance should be provided to such country only on an annual basis because—

"(A) the past performance of the country in meeting program objectives does not warrant a multi-year agreement;

"(B) it is anticipated that the need of the country for food aid does not extend beyond 1 year; or

"(C) other circumstances, as determined by the Administrator, indicate there is only a need for a 1 year agreement.

"(d) TRANSPORTATION OF COMMODITIES.—

"(1) HANDLING COMMODITIES.—The Administrator shall transfer, arrange for transportation, and take other steps necessary to make available to recipient countries agricultural ccmmodities to be provided under this section.

"(2) SHIPPING REQUIREMENTS.—In making determinations under this subsection, the Administrator shall consider—

"(A) the time of harvest of any competing commodities in the recipient country; and

"(B) such other concerns determined to be appropriate by the Administrator.

"(e) DEADLINE FOR AGREEMENTS.—An agreement between the recipient country and the Administrator to provide agricultural commodities under this section shall, to the extent practicable, be entered into not later than November 30 of the fiscal year in which such commodities are to be shipped.

"SEC. 104. DIRECT USES OR SALES OF DONATED COMMODITIES WITHIN RECIPIENT COUNTRIES.

"Agricultural commodities provided to a least developed country under section 103 may—

"(1) be used in the recipient country for direct feeding programs or the development of emergency food reserves, or may be distributed through normal commercial channels; or

"(2) be sold in such country by the country or the Administrator (or their designees) as provided in the agreement, and the proceeds of such sale distributed in accordance with section 105.

"SEC. 105. LOCAL CURRENCY ACCOUNTS.

"(a) RETENTION OF PROCEEDS.—All of the revenues generated from the sale of agricultural commodities provided under section 103 shall be deposited into a separate account in the recipient country to be disbursed in such country in accordance with local currency agreements entered into between the recipient country and the Administrator.

"(b) OWNERSHIP AND PROGRAMMING OF ACCOUNTS.—The proceeds of the account referred to in subsection (a) shall be the property of the United States, or the recipient country, as determined appropriate by the Administrator, and shall be utilized for the benefit of the recipient country. Such account shall be jointly programmed by the Administrator and the recipient country.

"(c) OVERALL DEVELOPMENT STRATEGY.—The Administrator shall consider the amounts in the accounts referred to in this section as an integral part of the overall development strategy of the Agency for International Development and the recipient country.

"SEC. 106. USE OF LOCAL CURRENCY ACCOUNTS.

"(a) IN GENERAL.—Amounts contained in an account established under section 105(a) shall be used in the recipient country for economic development purposes, including—

"(1) the promotion of policy reforms to improve food security and agricultural development within the country and to promote broad based economically and environmentally sustainable growth;

"(2) the establishment of development projects that promote food security, alleviate hunger, and improve nutrition;

"(3) the promotion of increased access to food supplies through the encouragement of policies and programs designed to increase employment and incomes within the country;

"(4) the promotion of free and open markets;

"(5) supporting United States private voluntary organizations and cooperatives and encouraging the development and utilization of indigenous nongovernmental organizations;

"(6) the purchase of agricultural commodities (including transportation and processing costs) produced in the country to meet urgent or extraordinary relief requirements in the country or in neighboring countries, or to develop emergency food reserves;

"(7) the payment, to the extent practicable, of the costs of carrying out the program authorized in section 209; and

"(8) private sector development activities designed to further the purposes of this title.

"(b) SUPPORT OF PRIVATE INDIGENOUS NON-GOVERNMENTAL ORGANIZATIONS.—To the extent practicable, not less than 10 percent of the amounts contained in an account established for a recipient country under section 105(a) shall be used by such country to support the development and utilization of indigenous non-governmental organizations and cooperatives that are active in rural development, sustainable agricultural production, and environmental protection projects within such country.

"SEC. 107. CONCESSIONAL CREDIT SALES PROGRAM.

"(a) IN GENERAL.—To carry out the policies and accomplish the objectives described in section 2, the Secretary may negotiate and execute agreements with developing countries under section 102(b) to provide for the sale, for dollars or local currencies, of agricultural commodities to such countries on a deferred payment basis and on such other terms and conditions as required by the Secretary in such agreements.

"(b) ALLOCATION OF ASSISTANCE.—

"(1) COUNTRY DETERMINATION.—The Secretary shall determine whether and to what extent agricultural commodities shall be made available under this section to developing countries.

"(2) PRIORITY.—In making a determination under paragraph (1), the Secretary shall give priority to developing countries that—

"(A) demonstrate the greatest need for food;

"(B) are listed on the priority list established by the Secretary under title I of the Agricultural Trade Act of 1978; and

"(C) have the demonstrated potential to become commercial markets for competitively priced United States agricultural commodities.

"(c) HANDLING OF COMMODITIES.—

"(1) ACQUISITION OF COMMODITIES.—The importing country shall acquire agricultural commodities to be financed under this section, subject to the approval of the Secretary.

"(2) TRANSPORTATION OF COMMODITIES.—Only the Secretary or the Commodity Credit Corporation may serve as the purchasing or shipping agent for the importing country, or both, in arranging the purchase or shipping of commodities financed under this section.

"(d) TIMING OF SHIPMENT OF COMMODITIES.—The Secretary shall determine the timing of the shipment of commodities to be provided under this section. In making a determination under this subsection, the Secretary shall consider—

"(1) the time of harvest of any competing commodities in the recipient country; and

"(2) such other concerns determined to be appropriate by the Secretary.

"SEC. 108. TERMS AND CONDITIONS OF SALES.

"(a) PAYMENT.—

"(1) DOLLARS.—Except as provided in paragraph (2), agreements entered into under section 107 shall require that payment for agricultural commodities be made in dollars.

"(2) LOCAL CURRENCIES.—The Secretary may permit a recipient country to make payment under an agreement entered into under section 107 in the local currency of such country in order to use the proceeds from such payments to carry out activities under section 109.

"(3) EXCHANGE RATE.—Payment in local currency shall be at rates of exchange which are not less favorable than the highest exchange rate legally obtainable in the country and which are not less favorable than the highest exchange rate obtainable by any other nation.

"(b) INTEREST.—An agreement entered into under section 107 shall provide that interest accrue on the payment deferred under such agreement at such rate as determined appropriate by the Secretary, but not in excess of 4 percent per annum.

"(c) DURATION.—Payments required under an agreement entered into under section 107 may be made in reasonable annual amounts over the period (not less than 10 nor more than 20 years from the date of the last delivery of commodities under such agreement) specified in the agreement.

"(d) DEFERRAL OF PAYMENTS.—The Secretary may defer the date on which the recipient country is required to begin making payment, under an agreement entered into under section 107, for a period of not in excess of 2 years after the date of the last delivery of commodities under the agreement, and interest shall be computed from the date of such last delivery.

"(e) MULTI-YEAR DEVELOPMENT AGREEMENTS.—

"(1) SUBMISSION OF PROPOSAL.—Except as provided in paragraph (3), the Secretary shall, if requested by a recipient country, enter into a multi-year agreement to make the financing of the sales of agricultural commodities available under section 107 to such country.

"(2) TERMS OF MULTI-YEAR AGREEMENT.—A multi-year agreement entered into under paragraph (1) shall—

"(A) include an estimate of the annual value or volume of agricultural commodities proposed to be financed under the agreement;

"(B) include a statement of the manner in which the agricultural commodities provided under the agreement, or the revenue received for such commodities, will be integrated into the overall development plans of the country;

"(C) include a plan to encourage competitive private sector participation within the country in the storage, marketing, transpor-

tation, and distribution of agricultural commodities financed under section 107;

"(E) include a statement that such agreement shall be subject to the availability, during each fiscal year to which such multi-year agreement applies, of the necessary appropriations and agricultural commodities; and

"(F) contain such other terms and conditions as the Administrator determines to be necessary.

"(3) EXCEPTION.—The Secretary may determine not to enter into a multi-year agreement with a country under paragraph (1) if the Secretary determines that assistance should be provided only on an annual basis because—

"(A) the past performance of the country in does not warrant a multi-year agreement;

"(B) it is anticipated that the need of the country for financial assistance does not extend beyond 1 year; or

"(C) other circumstances, as determined by the Secretary, indicate there is only a need for a 1 year agreement.

"(f) DELIVERY OF COMMODITIES.—Delivery of the commodities that are subject to an agreement entered into under section 107 shall be made in accordance with the terms of the agreement and shall be subject to the availability of the commodities at the time delivery is to be made, as determined by the Secretary.

"SEC. 109. USE OF PAYMENTS.

"(a) IN GENERAL.—Agreements entered into under section 107 may provide that the Secretary shall use payments made by the recipient country in the form of foreign currencies under section 108 as provided for in subsection (b).

"(b) ACTIVITIES.—The proceeds from the payments referred to in subsection (a) shall be used for one or more of the following activities:

"(1) TRADE DEVELOPMENT.—To carry out programs to help develop markets for United States agricultural commodities on a mutually beneficial basis in the recipient country.

"(2) AGRICULTURAL BUSINESS DEVELOPMENT LOANS.—To make loans to United States business entities (including cooperatives) and branches, subsidiaries, or affiliates of such firms for agricultural business development and agricultural trade expansion in such recipient countries.

"(3) AGRICULTURAL FACILITIES LOANS.—To make loans to domestic or foreign entities (including cooperatives) for the establishment of facilities for aiding in the utilization, distribution, or otherwise increasing the consumption of, and markets for, United States agricultural products.

"(4) TRADE PROMOTION.—To promote agricultural trade development, under procedures established by the Secretary, by making loans or through other activities that the Secretary determines to be appropriate.

"(5) RECIPIENT COUNTRY.—To conduct private sector agricultural trade development activities in the recipient country, as determined appropriate by the Secretary.

"(6) RESEARCH.—To conduct research in agriculture, forestry, and agriculture, including research which is mutually beneficial to the United States and the recipient country.

"(7) U.S. OBLIGATION.—To make payments to reimburse the United States for previous obligations of the recipient country to the United States incurred under this Act or under any other law.

"(c) SPECIAL ACCOUNT.—Foreign currencies received by the Secretary under section 107 shall be deposited in an interest-bearing account to the credit of the United States and shall be used by the Secretary as provided for in this section. Any department or agency of the Government other than the Department of Agriculture using any of such currencies for a purpose for which funds have been appropriated shall reimburse the Commodity Credit Corporation in an amount equivalent to the dollar value of the currencies used.

"(d) EXEMPTION.—Section 1415 of the Supplemental Appropriation Act, 1953, shall not apply to foreign currencies used by the Secretary under paragraphs (b)(1)-(5).

"SEC. 110. PROCEDURES.

"(a) INVITATION FOR BID.—No purchases of agricultural commodities from private stock or purchase of ocean transportation shall be financed under section 107 or 103 unless such purchases are made on the basis of an invitation for bid that is publicly advertised in the United States, and on the basis of bid offerings that shall conform to such invitation and shall be received and publicly opened in the United States. All awards in the purchase of commodities or ocean transportation financed under section 107 or 103 shall be consistent with open, competitive, and responsive bid procedures, as determined appropriate by the Secretary.

"(b) PROHIBITION ON COMMISSIONS.—Commissions, fees, or other payments to any selling agent or to any agent of a purchaser or grantee shall be prohibited in the purchase of agricultural commodities and ocean transportation that are financed under section 107 or 103, unless determined appropriate by the Secretary.

"(c) REPORTING OF FEES.—

"(1) REQUIREMENT.—Notwithstanding any other provision of law, any commission, fee, or other compensation of any kind paid, or to be paid, by any supplier of an agricultural commodity, or any ocean transportation financed or agricultural commodity donated by the Commodity Credit Corporation under this title, to any agents, brokers, or other representatives of the importer or importing country, including a corporation owned or controlled by the importer or the government of the importing country, shall be reported to the Secretary by the supplier of the commodity or ocean transportation.

"(2) CONTENT.—A report filed under paragraph (1) shall identify the person or entity to whom the payment is made and the transaction in connection with which the payment is made.

"(3) PUBLICATION OF INFORMATION.—The Secretary shall—

"(A) maintain all information provided under this subsection for public inspection;

"(B) publish a report containing the information referred to in subparagraph (A) annually; and

"(C) forward a copy of the annual report referred to in subparagraph (B) to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(4) FAILURE TO FILE.—A supplier of a commodity or ocean transportation who fails to file a report under this subsection, or who files a false report, shall be ineligible to furnish, directly or indirectly, commodities or ocean transportation financed under this title for a period of 5 years.

"SEC. 111. VALUE-ADDED FOODS.

"(a) POLICY.—The Congress declares it to be the policy of the United States to assist developing countries that are or have been recipients of high protein, blended, or fortified foods under title II of this Act to continue to combat hunger and malnutrition among the lower income segments of the population of such countries, especially children, through the continued provision of such foods under this title.

"(b) PARTIAL WAIVER OF REPAYMENT.—In implementing the policy declared in subsection (a), the Secretary, in entering into agreements for the sale of high protein, blended, or fortified foods under section 107 with countries that—

"(1) provide assurances that the benefits of any waiver granted under this section will be passed on to the individual recipients of such foods; and

"(2) have a reasonable potential for transferring benefits of such waiver to commercial purchasers of such foods;

may make provisions for a waiver of payment not to exceed an amount equal to the value of that part of the product that is attributable to the costs of processing, enrichment, or fortification of such product.

"(c) MINIMIZE IMPACT.—In implementing this section, the Secretary shall, to the extent practicable, minimize the impact of such section on other commercial and concessional sales of whole grains and, where feasible, agreements under section 107 utilizing the authority contained in this section will provide for sales of such commodities.

"SEC. 112. USE OF COMMODITY CREDIT CORPORATION.

"(a) USE OF COMMODITY CREDIT CORPORATION.—The Commodity Credit Corporation shall acquire and make available to the Administrator such agricultural commodities as are determined under section 401 to be available to carry out agreements entered into under section 103.

"(2) CREDIT SALES.—The Commodity Credit Corporation may finance the sale and export of such agricultural commodities, whether from private stocks or from the stocks of the Commodity Credit Corporation, as are determined under section 401 to be available to carry out agreements entered into under section 107.

"(b) COSTS AND FREIGHT BASIS.—The Commodity Credit Corporation may, in carrying out the provisions of this title, make commodities available under section 103 to the recipient country on a cost and freight (c&f) basis or arrange for sales of commodities financed under section 107 to be made on a cost and freight (c&f) basis).

"(c) LIMITATION ON EXPENDITURES.—The total value of agreements entered into under this title during any calendar year shall not exceed an amount that would require Congress to appropriate in excess of $1,900,000,000 to reimburse the Commodity Credit Corporation for commodities and services provided under such agreements, in addition to any amount by which such agreements in prior years have necessitated, or will necessitate, additional appropriations to reimburse the Commodity Credit Corporation for commodities and services provided in amounts that exceed amounts authorized for prior years.

"SEC. 113. REGULATIONS.

"The Secretary or the Administrator, as applicable, shall promulgate regulations implementing the provisions of this title.

"TITLE II—EMERGENCY AND PRIVATE ASSISTANCE PROGRAMS

"SEC. 201. GENERAL AUTHORITY.

"The President through the Administrator may provide agricultural commodities to foreign countries on behalf of the people of the United States to—

"(1) address famine or other urgent or extraordinary relief requirements;

"(2) combat malnutrition, especially in children and mothers;

"(3) carry out activities that attempt to alleviate the causes of hunger, mortality and morbidity;

"(4) promote economic and community development; and

"(5) promote sound environmental practices.

"SEC. 202. PROVISION OF AGRICULTURAL COMMODITIES.

"(a) EMERGENCY ASSISTANCE.—The Administrator may provide agricultural commodities to meet emergency food needs under section 201 through governments and public or private agencies, including intergovernmental organizations such as the World Food Program and other multilateral organizations, in such manner and on such terms and conditions as the Administrator determines appropriate to respond to the emergency.

"(b) NON-EMERGENCY ASSISTANCE.—The Administrator may provide agricultural commodities for non-emergency assistance under section 201 through eligible organizations (as described in subsection (d)) that have entered into an agreement with the Administrator to use such commodities in accordance with this title.

"(c) FORM OF ASSISTANCE.—Agricultural commodities provided under this title may be made available for direct distribution, sale, barter, or other appropriate disposition in carrying out section 201.

"(d) ELIGIBLE ORGANIZATIONS.—To be eligible to receive assistance under this title an organization shall be—

"(1) a private voluntary organization or cooperative that is, to the extent practicable, registered with the Administrator; or

"(2) an intergovernmental organization, such as the World Food Program.

"(e) MULTI-YEAR AGREEMENTS.—

"(1) APPROVAL.—Except as provided in paragraph (3), the Administrator shall, if requested by an eligible organization, enter into a multi-year agreement with such organization to make agricultural commodities available for non-emergency assistance through such organization under this title.

"(2) TERMS.—A multi-year agreement entered into under paragraph (1) shall—

"(A) include assurances that the eligible organization that is subject to the agreement shall provide assistance under the agreement on a multi-year basis;

"(B) include a statement that such agreement shall be subject to the availability, during each fiscal year to which such multi-year agreement applies, of the necessary appropriations and agricultural commodities; and

"(C) contain such other terms and conditions as the Administrator determines to be necessary.

"(3) EXCEPTION.—The Administrator may refuse to enter into a multi-year agreement with an organization under paragraph (1) if the Administrator determines that assistance should be provided through such organization only on an annual basis because—

"(A) the past performance of such organization does not warrant a multi-year agreement;

"(B) it is anticipated that the need of the country for food aid does not extend beyond 1 year; or

"(C) other circumstances, as determined by the Administrator, indicate there is only a need for a 1 year agreement.

"(f) ADMINISTRATIVE COSTS.—

"(1) IN GENERAL.—Not less than 2 percent of the amounts made available in each fiscal year under this title shall be made available by the Administrator to United States private voluntary organizations or cooperatives to assist such organizations and cooperatives in—

"(A) expanding and establishing new programs under this title; and

"(B) meeting administrative, management, personnel and internal transportation and distribution costs for carrying out programs under this title.

"(2) REQUEST FOR FUNDS.—In order to receive funds made available under paragraph (1), a private voluntary organization or cooperative must submit a request for such funds when submitting a proposal to the Administrator for an agreement under this title.

"(3) CONTENT OF REQUEST.—Such request for funds shall include a specific explanation of—

"(A) the program costs to be offset by such funds;

"(B) the reason why such funds are needed by the private voluntary organization or cooperative in carrying out the particular assistance program; and

"(C) the degree to which such funds will improve the provision of food assistance to countries of the world (particularly those in sub-Saharan Africa) suffering from acute, long-term food shortages.

"(g) EFFECTIVE USE OF COMMODITIES.—To ensure that agricultural commodities made available under this title are used effectively and in the areas of greatest need, organizations or cooperatives through which such commodities are distributed shall—

"(1) to the extent feasible, work with indigenous institutions and employ indigenous workers;

"(2) assess and take into account nutritional and other needs of beneficiary groups;

"(3) help such beneficiary groups design and carry out mutually acceptable projects;

"(4) recommend to the Administrator methods of making assistance available that are the most appropriate for each local setting;

"(5) supervise the distribution of commodities provided and the implementation of programs carried out under this title; and

"(6) periodically evaluate the effectiveness of projects undertaken under this title.

"(h) PRIORITY.—In carrying out the provisions of this title, the Administrator shall give priority to United States private organizations or cooperatives.

"(i) LABELING.—Commodities provided under this title shall, to the extent practicable, be clearly identified with appropriate markings on the package or container of such commodity in the language of the locality in which such commodities are distributed, as being furnished by the people of the United States of America.

"SEC. 203. GENERATION AND USE OF FOREIGN CURRENCIES BY PRIVATE VOLUNTARY ORGANIZATIONS AND COOPERATIVES.

"(a) LOCAL SALE AND BARTER OF COMMODITIES.—An agreement entered into between the Administrator and a private voluntary organization or cooperative to provide food assistance through such organization or cooperative under this title may provide for the sale or barter in the recipient country of the commodities to be provided under such agreement.

"(b) MINIMUM LEVEL OF LOCAL SALES.—In carrying out agreements of the type referred to in subsection (a), the Administrator shall ensure that private voluntary organizations and cooperatives are permitted to sell, in recipient countries, an amount of commodities equal to not less than 10 percent of the aggregate amounts of all commodities distributed under non-emergency programs under this title for each fiscal year, to generate foreign currency proceeds to be used as provided in this section.

"(c) DESCRIPTION OF INTENDED USES.—A private voluntary organization or cooperative submitting a proposal to enter into a non-emergency food assistance agreement under this title shall include in such proposal a description of the intended uses of any foreign currency proceeds that may be generated through the sale, in the recipient country, of any commodities provided under an agreement entered into between the Administrator and the organization or cooperative.

"(d) USE.—Foreign currencies generated from any partial or full sale or barter of commodities by a private voluntary organization or cooperative under a non-emergency food assistance agreement under this title may be used—

"(1) to transport, store, distribute, and otherwise enhance the effectiveness of the use of commodities and the products thereof provided under this title; or

"(2) to implement income generating, community development, health, nutrition, cooperative development, agricultural, and other developmental activities within the recipient country.

"(e) SALES ASSISTANCE.—The Administrator may provide assistance to an organization or cooperative, on request, in the sale of commodities in the recipient country.

"SEC. 204. LEVELS OF ASSISTANCE.

"(a) MINIMUM LEVELS.—

"(1) MINIMUM ASSISTANCE.—Except as provided in paragraph (3), the Administrator shall make agricultural commodities available for food distribution under this title in an amount that—

"(A) for fiscal year 1991, is not less than 1,685,000 metric tons;

"(B) for fiscal year 1992, is not less than 1,710,000 metric tons;

"(C) for fiscal year 1993, is not less than 1,735,000 metric tons;

"(D) for fiscal year 1994, is not less than 1,760,000 metric tons; and

"(E) for fiscal year 1995, is not less than 1,785,000 metric tons.

"(2) MINIMUM NONEMERGENCY ASSISTANCE.—Within the amounts specified in paragraph (1) and except as provided in paragraph (3), the Administrator shall make agricultural commodities available for non-emergency food distribution through eligible organizations under section 202(a) in an amount that—

"(A) for fiscal year 1991, is not less than 1,450,000 metric tons;

"(B) for fiscal year 1992, is not less than 1,475,000 metric tons;

"(C) for fiscal year 1993, is not less than 1,500,000 metric tons;

"(D) for fiscal year 1994, is not less than 1,525,000 metric tons; and

"(E) for fiscal year 1995, is not less than 1,550,000 metric tons.

"(3) EXCEPTION.—The Administrator may waive the requirements of paragraphs (1) and (2) for any fiscal year if the Administrator determines that such quantities of commodities cannot be used effectively to carry out this title or in order to meet an emergency. In making a waiver under this paragraph, the Administrator shall prepare and submit to the Committee on Foreign Affairs and Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report containing the reasons for the waiver.

"(b) USE OF VALUE-ADDED COMMODITIES.—

"(1) MINIMUM LEVELS.—Except as provided in paragraph (2), in making agricultural commodities available under this title, the Administrator shall ensure that not less than 75 percent of the quantity of such commodities required to be distributed during each fiscal year under subsection (a)(2), be in the form of processed or fortified products or bagged commodities, including processed milk, plant protein products, and fruit, nut, and vegetable products.

"(2) WAIVER OF MINIMUM.—The Administrator may waive the requirement under paragraph (1) for any fiscal year in which the Administrator determines that the requirements of the programs established under this title will not be best served by the distribution of fortified or processed food in the amounts required under such paragraph.

"SEC. 205. FOOD AID CONSULTATIVE GROUP.

"(a) ESTABLISHMENT.—There is established a Food Aid Consultative Group (hereinafter referred to in this section as the 'Group') that shall meet regularly to review and address issues concerning the effectiveness of the regulations and procedures that govern food assistance programs established and implemented under this title, and the implementation of other provisions of this title that may involve private voluntary organizations, cooperatives and indigenous nongovernmental organizations.

"(b) MEMBERSHIP.—The Group shall be composed of—

"(1) the Administrator;

"(2) the Secretary;

"(3) the Inspector of the Agency for International Development;

"(4) representatives of each private voluntary organization and cooperative participating in a program under this title, or receiving planning assistance funds from the Agency to establish programs under this title; and

"(5) one representative each from African, Asian and Latin American indigenous nongovernmental organizations determined appropriate by the Administrator.

"(c) CHAIRPERSON.—The Administrator shall be the chairperson of the Group.

"(d) CONSULTATIONS.—In preparing regulations, handbooks, or guidelines implementing this title, or significant revisions thereto, the Administrator shall provide such proposals to the Group for review and comment and shall consult and, when appropriate, meet with the Group regarding such proposed regulations, handbooks, guidelines, or revisions thereto prior to the issuance of such.

"(e) ADVISORY COMMITTEE ACT.—The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Group.

"SEC. 206. USE OF COMMODITY CREDIT CORPORATION.

"(a) AVAILABILITY OF COMMODITIES.—The Commodity Credit Corporation shall (subject to section 401) make available to the Administrator such agricultural commodities as the Administrator may request to implement this title.

"(b) INCLUDED EXPENSES.—With respect to commodities made available under this title, the Commodity Credit Corporation may pay—

"(1) the cost of acquiring such commodities;

"(2) the costs associated with packaging, enrichment, preservation, and fortification of such commodities;

"(3) the processing, transportation, handling, and other incidental costs up to the time of the delivery of such commodities free on board vessels in United States ports;

"(4) the ocean freight charges from United States ports to designated ports of entry abroad;

"(5) the costs associated with transporting such commodities from United States ports to designated points of entry abroad in the case—

"(A) of landlocked countries;

"(B) of ports that cannot be used effectively because of natural or other disturbances;

"(C) of the unavailability of carriers to a specific country; or

"(D) of substantial savings in costs or time that may be effected by the utilization of points of entry other than ports;

"(6) in the case of commodities for urgent and extraordinary relief requirements (including pre-positioned commodities) the transportation costs incurred in moving the commodities from designated points of entry or ports of entry abroad to storage and distribution sites and associated storage and distribution costs; and

"(7) the charges for general average contributions arising out of the ocean transport of commodities transferred pursuant thereto.

"SEC. 207. MAXIMUM LEVEL OF EXPENDITURES.

"(a) MAXIMUM EXPENDITURES.—Except as provided in (b), programs of assistance shall not be undertaken under this title during any fiscal year which call for an appropriation of more than $1,000,000,000 to reimburse the Commodity Credit Corporation for all costs incurred in connection with such programs (including the Corporation's investment in commodities made available).

"(b) WAIVER BY PRESIDENT.—The President may waive the limitation contained in subsection (a) if the President determines that such waiver is necessary to undertake programs of assistance to meet urgent humanitarian or emergency needs.

"SEC. 208. ADMINISTRATION.

"(a) PROPOSALS.—

"(1) TIME FOR DECISION.—Not later than 45 days after the receipt by the Administrator of a proposal submitted—

"(A) by a private voluntary organization or cooperative, with the concurrence of the appropriate United States field mission, for commodities; or

"(B) by a United States field mission to make commodities available to a private voluntary organization or cooperative;

under this title, the Administrator shall make a decision concerning such proposal.

"(2) RESPONSE.—The response of the Administrator to proposals under paragraph (1) shall contain the reasons for the denial of such proposal.

"(3) DENIAL.—If a proposal under paragraph (1) is denied, the response shall specify the conditions that must be met for the approval of such proposal.

"(b) NOTICE AND COMMENT.—Not later than 30 days prior to the issuance of a final guideline to carry out this title, the Administrator shall—

"(1) provide notice of the existence of a proposed guideline, and that such guideline is available for review and comment, to private voluntary organizations and cooperatives that participate in programs under this title, and to other interested persons;

"(2) make the proposed guideline available, on request, to the organizations, cooperatives, and others referred to in paragraph (1); and

"(3) take any comments received into consideration prior to the issuance of the final guideline.

"(c) REGULATIONS.—

"(1) IN GENERAL.—The Administrator shall promptly issue all necessary regulations and make revisions to agency guidelines with respect to changes in the operation or implementation of the program established under this title.

"(2) REQUIREMENTS.—The Administrator shall develop regulations with the intent of—

"(A) simplifying procedures for participation in the programs established under this title;

"(B) reducing paperwork requirements under such programs;

"(C) establishing reasonable and realistic accountability standards to be applied to eligible organizations participating in the programs established under this title, taking into consideration the problems associated with carrying out programs in developing countries; and

"(D) providing flexibility for carrying out programs under this title.

"(3) HANDBOOKS.—Handbooks developed by the Administrator to assist in carrying out the program under this title shall be designed to foster the development of programs under this title by eligible organizations.

"(d) AMENDMENTS ENACTED IN 1990.—With respect to any amendments made to this title during 1990, the Administrator shall—

"(1) promulgate proposed regulations implementing such amendments not later than 120 days after the date of enactment of such amendments;

"(2) promulgate final regulations implementing such amendments not late than 210 days after the enactment of any amendments made to this title during 1990; and

"(3) issue revisions to Agency guidelines implementing such amendments not later than 210 days after the date of enactment of such amendments.

"(e) DEADLINE FOR SUBMISSION OF COMMODITY ORDERS.—Not later than 15 days after receipt of a call forward from a United States field mission for commodities or products that meet the requirements of this title, the order for the purchase or the supply, from inventory, of such commodities or products shall be transmitted to the Commodity Credit Corporation.

"SEC. 209. FARMER-TO-FARMER PROGRAM.

"(a) IN GENERAL.—To further assist developing countries, middle-income countries, and newly emerging democracies to increase farm production and farmer incomes, the Administrator, in consultation with the Secretary, may, notwithstanding any other provision of law—

"(1) establish and administer a program of farmer-to-farmer assistance between the United States and such countries to assist in increasing food production and distribution and improving the effectiveness of the

farming and marketing operations of such farmers;

"(2) utilize United States farmers, agriculturalists, land grant universities and private agribusiness and nonprofit farm organizations to work in conjunction with farmers and farm organizations in such countries, on a voluntary basis, to facilitate the improvement of farm and agribusiness operations and agricultural systems in such countries, including animal care and health, field crop cultivation, fruit and vegetable growing, livestock operations, food processing and packaging, farm credit, marketing, inputs, agricultural extension, and the strengthening of cooperatives and other farmer groups;

"(3) transfer the knowledge and expertise of United States agricultural producers and businesses, on a person-to-person basis, to such countries while enhancing the democratic process by supporting private and public organizations who request and support technical assistance activities through cash and in-kind services;

"(4) enter into contracts, cooperative agreements, or make grants to private voluntary organizations, cooperatives, land grant universities, private agribusiness or non-profit farm organizations, to the extent practicable, to carry out this section;

"(5) coordinate programs established under this section with other foreign assistance activities carried out by the United States; and

"(6) to the extent practicable, augment the funds available for programs established under this section through the use of foreign currencies that accrue from the sale of agricultural commodities under this Act, and local currencies generated from other types of foreign assistance activities.

"(b) DEFINITIONS.—

"(1) EMERGING DEMOCRACIES.—For the purposes of this section, an emerging democracy is a country that has recently begun the transformation of its system of government from a non-representative type of government to a representative democracy and that is encouraging democratic institution building, and the cultural values, institutions, and organizations of democratic pluralism.

"(2) MIDDLE-INCOME COUNTRY.—For the purposes of this section, a middle-income country is a country that has developed economically to the point where it does not qualify for bilateral foreign aid assistance from the United States because its per capita income level exceeds the eligibility requirements of such assistance programs;

"(c) MINIMUM FUNDING.—Notwithstanding any other provision of law not less than 0.1 percent of the amounts made available for each of the fiscal years 1991 through 1995 to carry out this Act, in addition to any funds that may be specifically appropriated to carry out this section, shall be used to carry out programs under this section in developing countries.

"TITLE III—FOOD FOR FREEDOM

"SEC. 301. FOOD FOR FREEDOM.

"(a) ESTABLISHMENT OF PROGRAM.—There is established under this section a program to be known as the 'Food for Freedom Program' (hereinafter referred to in this title as the 'Program').

"(b) AGREEMENTS.—The President may enter into agreements with eligible countries (as described in subsection (d)), or with private voluntary organizations or cooperatives, to provide agricultural commodities under this section to eligible countries to support the democratization of the governments of such countries, the granting of individual liberties to the people of such countries, and the promotion of economic freedom within such countries.

"(c) TYPES OF ASSISTANCE.—Commodities made available under this section may be provided on a grant basis or on credit terms, as authorized in this section.

"(d) ELIGIBLE COUNTRIES.—To be eligible to participate in the program established under this section, a country shall, as determined by the President—

"(1) have begun the transformation of the system of government of the country from a non-representative type of government to a representative democracy; or

"(2) have made commitments to introduce or expand free enterprise elements in the agricultural economy of such country.

"(e) COMMODITY CREDIT CORPORATION.—

"(1) DUTIES.—The Commodity Credit Corporation shall—

"(A) make such agricultural commodities available to the President as are determined under section 401 to be available to carry out agreements entered into by the President under this section; and

"(B) finance the sale and exportation of commodities made available under this section to the extent necessary to carry out agreements entered into by the President under this section.

"(2) PURCHASE OF COMMODITIES.—The Commodity Credit Corporation may purchase commodities for use under this section if—

"(A) the Commodity Credit Corporation does not hold stocks of such commodities at the time of such purchase; or

"(B) Commodity Credit Corporation stocks at the time of such purchase are insufficient to satisfy commitments made in agreements entered into under this section and such commodities are needed to fulfill such commitments.

"(3) EXPENSES.—The Commodity Credit Corporation may pay certain expenses in connection with the Program under this section as are described in section 206(b).

"(4) LIMITATION ON EXPENDITURES.—No funds of the Commodity Credit Corporation in excess of $100,000,000 (exclusive of the cost of commodities) in each fiscal year shall be used to carry out this section unless such excess is authorized in advance in appropriations Acts.

"(f) AGREEMENTS.—If the President enters into an agreement with a private voluntary organization or cooperative under this section, such agreement—

"(1) shall require such organization or cooperative to use any commodities provided to it under this section to carry out the purposes of this section;

"(2) may permit such organization or cooperative to sell or barter any commodities provided to it under this section, and use the amounts generated through such sale or barter—

"(A) to promote the establishment and expansion of private enterprise in the recipient country;

"(B) to aid in the production of food in the recipient country through improved agricultural research, marketing systems, and instruments of production in such country; and

"(C) to help develop commercial markets for the purchase of agricultural commodities; and

"(3) shall contain such other terms and conditions as are determined necessary by the President.

"(g) MULTI-YEAR BASIS.—An agreement entered into under this section may provide for commodities to be made available on a multi-year basis subject to the availability of funds and commodities.

"(h) TRANSSHIPMENT OF COMMODITIES.—An agreement entered into under this section shall prohibit the resale or transshipment of the commodities made available under such agreement to other countries, unless such resale or transshipment is authorized by the President.

"(i) DISPLACEMENT.—In implementing this section, the President shall, to the extent practicable, avoid the displacement of any sales of United States agricultural commodities that would otherwise be made to eligible countries and avoid disrupting foreign and domestic markets for United States agricultural commodities.

"(j) RESTRICTIONS ON AGREEMENTS.—No agreement shall be entered into under this section if such agreement would result in—

"(1) the inability of the Commodity Credit Corporation to provide sufficient commodities to carry out food assistance programs established under titles I and II, or domestic commodity programs established under titles I and II of the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) or agricultural trade programs established under the Agricultural Trade Act of 1978 (7 U.S.C. 1761 et seq.);

"(2) a shortage in the domestic supply of any commodities that would be required under the terms of such agreement; or

"(3) the inability of the Commodity Credit Corporation to maintain adequate carryover stocks to meet any emergency, the requirements of the Agricultural Act of 1949, or the requirements of any other Act.

"(k) REPORT OF PRESIDENT.—Not later than January 14 of each year after a year in which an agreement entered into under this section is in effect, the President shall prepare and submit, to the Committee on Agriculture and the Commitee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report concerning the commodities and funds made available under this section during the previous fiscal year.

"SEC. 302. PRIVATE MARKET ENHANCEMENT.

"(a) PRIVATE SECTOR AGRICULTURE.—To enhance the development of private sector agriculture in countries receiving assistance under this title the President may, in each of the fiscal years 1991 through 1995, use in addition to any amounts or commodities otherwise made available under this Act for such activities, not less than $20,000,000 of Commodity Credit Corporation funds (or commodities of an equal value owned by the Corporation), to provide assistance in the administration, sale, and monitoring of food assistance programs to strengthen private sector agriculture in recipient countries.

"(b) USE OF COMMODITY TRANSACTION.—To carry out this section, the President may provide agricultural commodities under agreements entered into under this Act in a manner that uses the commodity transaction itself as a means of developing in the recipient countries a competitive private sector that can provide for the importation, transportation, storage, marketing and distribution of such commodities.

"(c) USE OF FUNDS.—The President may use the assistance provided under this section and local currencies derived from the sale of commodities under subsection (b) to design, monitor, and administer activities undertaken with such assistance, for the purpose of strengthening or creating the ca-

pacity of recipient country private enterprises to undertake commercial transactions, with the overall goal of increasing potential markets for United States agricultural products.

"SEC. 303. CLASSIFICATION OF EXPENDITURES.

"The value of commodities made available under section 416(b) of the Agricultural Act of 1949 (7 U.S.C. 1431(b)), or under any other Act, and provided through the programs established under this title, and any expenses incurred by the Commodity Credit Corporation in connection with the provision of commodities under this title, shall be in addition to the level of assistance provided under titles I and II and shall not be considered expenditures for international affairs and finance.

"TITLE IV—GENERAL AUTHORITIES AND REQUIREMENTS.

"SEC. 401. COMMODITY DETERMINATIONS.

"(a) AVAILABLE COMMODITIES.—After consulting with other agencies of the Government affected and within policies established by the President for implementing this Act, and after taking into account productive capacity, domestic requirements, farm and consumer price levels, commercial exports, and adequate carryover, the Secretary of Agriculture shall, prior to the beginning of each fiscal year, determine the agricultural commodities and quantities thereof available for disposition under this Act.

"(b) POLICIES FOR IMPLEMENTING ACT.—In establishing policies for implementing this Act, the President should attempt to maintain a stable level of available agricultural commodities under this Act of the kind and type needed to provide food assistance to developing countries and should attempt to make such commodities available to the degree necessary to fulfill multi-year agreements entered into under this Act.

"(c) COMMODITIES NOT AVAILABLE.—The Secretary may suspend the eligibility of a commodity for disposition under this Act if such disposition would reduce the domestic supply of such commodity below that needed to meet domestic requirements, adequate carryover, and anticipated exports for dollars as determined by the Secretary at the time of exportation of such commodity.

"(d) EXCEPTION.—Notwithstanding subsection (c), the Secretary may make commodities available for disposition under this Act if the Secretary determines that some part of the supply of such commodity should be used to carry out urgent humanitarian purposes of this Act.

"(e) INELIGIBLE COMMODITIES.—

"(1) ALCOHOLIC BEVERAGES.—Alcoholic beverages shall not be made available for disposition under this Act.

"(2) TOBACCO.—Tobacco or the products thereof shall not be made available under section 104 or title II of this Act.

"(f) REPRESENTATIVES IN MARKET DEVELOPMENT ACTIVITIES.—The provisions of subsection (e)(1) shall not be construed to prohibit representatives of the United States wine, beer, distilled spirits, or other alcoholic beverage industry from participating in agricultural market development activities carried out by the Secretary with foreign currencies made available under title I of this Act.

"SEC. 402. GENERAL PROVISIONS.

"(a) PROHIBITION.—No agricultural commodity shall be made available under this Act unless the Secretary or Administrator, as appropriate, determines that—

"(1) adequate storage facilities are available in the recipient country at the time of the exportation of the commodity to prevent the spoilage or waste of the commodity; and

"(2) the distribution of the commodity in the recipient country will not result in a substantial disincentive to or interference with domestic production or marketing in that country.

"(b) CONSULTATIONS.—The Administrator or the Secretary, as appropriate, shall consult with representatives from the International Monetary Fund, the World Bank, and the government of the country that receives assistance under this Act to ensure that the importation of United States agricultural commodities and the use of local currencies for development purposes will not have a disruptive impact on the farmers or the local economy of the recipient country.

"(c) TRANSSHIPMENT.—The Secretary or the Administrator, as appropriate, may, under such terms and conditions as are determined to be appropriate, require commitments from countries designed to prevent or restrict the resale or transshipment to other countries, for use for other than domestic purposes, of agricultural commodities donated or purchased under this Act.

"(d) USE OF PRIVATE TRADE CHANNELS.—The Secretary or the Administrator, as appropriate, shall ensure that, in providing commodities or concessional credit sales under this Act, private trade channels are used to the maximum extent practicable in the United States and in the recipient countries with respect to—

"(1) sales from privately owned stocks;

"(2) sales from stocks owned by the Commodity Credit Corporation; and

"(3) donations; and

that small businesses have adequate and fair opportunity to participate in sales made under this Act.

"(e) WORLD PRICES.—In carrying out this Act, the Secretary or the Administrator, as appropriate, shall take reasonable precautions to assure that sales or donations of agricultural commodities will not unduly disrupt world prices for agricultural commodities or normal patterns of commercial trade with foreign countries.

"(f) FOOD FOR PEACE.—The Secretary or the Administrator, as appropriate, shall obtain commitments from countries purchasing commodities under this Act that such countries will widely publicize, to the extent practicable, through the use of the public media and through other means, that such commodities are being provided through the friendship of the American people as food for peace.

"(g) PARTICIPATION OF PRIVATE SECTOR.—The Administrator or the Secretary, as appropriate, shall encourage the private sector of the United States and private importers in developing countries to participate in the programs established under this Act.

"(h) SAFEGUARD USUAL MARKETINGS.—In carrying out this Act, the Secretary or the Administrator, as appropriate, shall take reasonable precautions to safeguard the usual marketings of the United States and to avoid displacing any sales of the United States agricultural commodities that the Secretary or Administrator determines would otherwise be made for cash dollars.

"SEC. 403. DEBT FORGIVENESS.

(a) IN GENERAL.—The President may waive the payments that would otherwise be made to the United States Government by an eligible developing country on account of food aid loan obligations of the Commodity Credit Corporation provided under this Act.

(b) ELIGIBLE DEVELOPING COUNTRIES.—A country shall be an eligible developing country for purposes of subsection (a) if—

"(1) the country meets the least developed country criteria set forth in Section 102(a); and

(2) an International Monetary Fund standby agreement is in effect with respect to that country;

(3) a structural adjustment program of the International Bank for Reconstruction and Development or of the International Development Association is in effect with respect to that country; or

(4) even though such an agreement or program is not in effect, the country is pursuing national economic policy reforms which would be consistent with such an agreement or program.

(c) APPROPRIATIONS ACTION REQUIRED.—The authorities of this section may be exercised only to such extent or in such amounts as are provided in advance in appropriation Acts.

(d) PROHIBITION ON NEW LOANS.—No food aid loans under this Act shall be provided to countries receiving debt relief under subsection (a) for a period of 5 years.

"SEC. 404. EXPIRATION DATE.

"No agreements to finance sales or to provide other assistance under this Act shall be entered into after December 31, 1995.

"SEC. 405. REDUCTION IN DEFICIT IN BALANCE OF PAYMENTS.

"The President may utilize foreign currencies received under this Act in such manner as will, to the maximum extent possible, reduce any deficit in the balance of payments of the United States.

"SEC. 406. INDEPENDENT EVALUATION OF PROGRAMS.

"(a) GRANT PROGRAM.—Not later than 2 years after the date of enactment of this Act, and once every 3 years thereafter, the Comptroller General of the United States shall select five countries that receive assistance under section 103 that are representative of all such countries in three geographic regions and evaluate—

"(1) the uses of the commodities provided under such title in such countries; and

"(2) the uses of the special account funds established in such countries under section 106;

with respect to the impact of such uses and funds on enhancing food security in such countries and the financial management of those funds, with reference to personnel requirements to manage such funds.

"(b) CONCESSIONAL CREDIT SALES PROGRAM.—Not later than 2 years after the date of enactment of this Act, and once every 3 years thereafter, the Comptroller General of the United States shall select five countries that receive assistance under section 107 that are representative of all countries in three geographic regions and evaluate the uses of the funds established under section 109 in such countries with respect to the impact of such uses on agricultural trade development, and the financial management of those funds, with reference to personnel requirements to manage these funds.

"(c) TITLE II PROGRAMS.—Not later than 2 years after the date of enactment of this Act, and once every 3 years thereafter, the Comptroller General of the United States shall select five countries that receive assistance under title II that are representative of all countries in three geographic regions and evaluate the uses of the assistance provided under such title, including an evalua-

tion of the impact of such assistance on enhancing food security in such countries and an evaluation of the use of local currencies for economic development, as well as the financial management of those funds, with reference to personnel requirements to manage these funds.

"(d) REPORT TO CONGRESS.—The Comptroller General of the United States shall submit a report to the Committee on Foreign Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate on their evaluations made under this section.

"SEC. 407. AUTHORIZATION OF APPROPRIATIONS.

"(a) REIMBURSEMENT.—

'(1) IN GENERAL.—There are authorized to be appropriated such sums as may be necessary to carry out this Act, including such amounts as may be required to make payments to the Commodity Credit Corporation to the extent the Commodity Credit Corporation is not reimbursed under titles I, II and III of this Act for its actual costs incurred or to be incurred in carrying out such titles.

"(2) BUDGET.—In presenting the Budget of the United States, the President shall (except as provided in section 303) classify expenditures under this Act as expenditures for international affairs and finance rather than for agriculture and agricultural resources.

"(b) VALUE OF COMMODITIES.—Notwithstanding any other provision of law, in determining the reimbursement due the Commodity Credit Corporation for all expenses incurred under this Act, commodities from the inventory of the Commodity Credit Corporation that were acquired under title I of the Agriculture Act of 1949 (7 U.S.C. 1421 et seq.) shall be valued at a price not greater than the export market price for such commodities, as determined by the Secretary, as of the time such commodity is made available under this Act.

"(c) TRANSFER OF FUNDS.—Notwithstanding any other provision of law, if the President determines it to be necessary for purposes of this Act, the President may provide that not in excess of 15 percent of the amounts available in any fiscal year for carrying out any title of this Act may be used to carry out any other title of this Act.

"(d) COMMODITIES MADE AVAILABLE UNDER SECTION 416.—The value of commodities made available through section 416(b) of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) and provided under titles II or III of this Act, and any expenses incurred by the Commodity Credit Corporation in connection with the provision of such commodities, shall be in addition to the level of assistance provided under this Act and shall not be considered expenditures for international affairs and finance.

"(e) EMERGENCY ASSISTANCE UNDER TITLE II.—Of the funds appropriated to carry out title II, the Administrator shall, for each of the fiscal years 1991 through 1995, make available not less than $200,000,000 of such amounts for unforseen emergency food distribution under section 202(a), such funds to remain available until expended.

"(f) ANNUAL REPORT.—

"(1) IN GENERAL.—the Secretary and Administrator shall each prepare a report concerning the programs and activities implemented under this Act.

"(2) CONTENTS.—Each report shall include—

"(A) the levels and recipients of food and other assistance provided under this Act;

"(B) the countries in which projects or activities are implemented under this Act; and

"(C) a general description of the projects or activities implemented with funds under this Act.

"(3) SUBMISSION.—The Secretary and Administrator shall submit such reports no later than January 15 of each year to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives, and the Committee on Agriculture, Nutrition and Forestry of the Senate. The Secretary may submit such report in conjunction with reports required under sections 601 or 602 of the Agricultural Trade Act of 1978."

SEC. 102. AMENDMENTS TO SECTION 416.

Subsection (b) of section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) is amended to read as follows:

"(b)(1) The Secretary may provide eligible commodities for carrying out programs of assistance in foreign countries as provided for under titles II and III of the Agricultural Trade Development and Assistance Act of 1954.

"(2) As used in this subsection, the term 'eligible commodities' means—

"(A) dairy products, wheat, rice, feed grains, and oilseeds acquired by the Commodity Credit Corporation through price support operations, and the products therof, that the Secretary determines meet the criteria described in subsection (a); and

"(B) such other edible agricultural commodities as may be acquired by the Secretary or the Commodity Credit Corporation in the normal course of operations and that are available for disposition under this subsection.

"(3)(A) Except as provided in paragraph (4), the Secretary shall make available, in each of the fiscal years 1990 through 1995, to carry out programs of assistance under titles II and III of the Agricultural Trade Development and Assistance Act of 1954 not less than the minimum quantities of eligible commodities described in subparagraph (B).

"(B) The minimum quantity of eligible commodities that shall be made available for disposition under this subsection in each fiscal year shall be—

"(i) 500,000 metric tons of wheat, rice, feed grains, and oilseeds from the uncommitted stocks of the Commodity Credit Corporation, or an amount equal to 10 percent of the uncommitted stocks of wheat, rice, feed grains, and oilseeds of such Corporation as of the end of such fiscal year (as estimated by the Secretary), whichever is less; and

"(ii) 10 percent of the uncommitted stocks of dairy products of such Corporation, but not less than 150,000 metric tons of such products to the extent that uncommitted stocks are available.

"(C) The Secretary shall, to the extent practicable, make the estimation of expected year-end levels of the uncommitted stocks of such Corporation prior to October 1, of the fiscal year.

"(D) The determination of the Secretary with respect to the amount of the stocks of such Corporation that shall be made available for disposition under this subsection for such fiscal year shall be published in the Federal Register prior to October 1, of such fiscal year, together with a breakdown by kind of commodity and the quantity of each kind of commodity that shall be made availble.

"(E) The Secretary may waive the minimum quantity requirements of this paragraph for a fiscal year to the extent that there are not sufficient requests for eligible commodities under this subsection for such fiscal year.

"(4) Commodities may not be made available for disposition under this subsection in amounts that—

"(A) will in any way, reduce the amounts of commodities that traditionally are made available through donations to domestic feeding programs or agencies; or

"(B) will prevent the Secretary from fulfilling any agreements entered into under the production adjustment programs provided for in titles I and II of this Act, or other Acts administered by the Secretary.

"(5) To the maximum extent practicable, expedited procedures shall be used in the implementation of this subsection".

SEC. 103. CONFORMING AMENDMENTS AND TECHNICAL CHANGES.

"(1) REPORTING.—Section 1208(d)(2) of the Agricultural and Food Act of 1981 (7 U.S.C. 1736n(d)(2)) is amended by striking out "report submitted pursuant to section 408(a) of" and inserting in lieu thereof "reports submitted to Congress under".

"(2) AVAILABILITY OF COMMODITIES.—Subsection (e) of the Food for Progress Act of 1985 (7 U.S.C. 1736o(e)) is amended—

"(A) in paragraph (1), by striking out "401" and inserting in lieu thereof "titles I or II"; and

"(B) in paragraph (4), by striking out "203" and inserting in lieu thereof "section 103".

TITLE II—THE AGRICULTURAL TRADE ACT OF 1978

SECTION 201. AMENDMENT TO THE AGRICULTURAL TRADE ACT OF 1978.

The Agricultural Trade Act of 1978 (7 U.S.C. 1761 et seq.) is amended to read as follows:

"TITLE I—AGRICULTURAL TRADE POLICY

"Subtitle A—Purpose and Definitions

"SEC. 101. AGRICULTURAL TRADE POLICY OF THE UNITED STATES.

"It is the policy of the United States—

"(1) to provide, through all possible means, agricultural commodities and products for export at competitive prices, with full assurance of quality and reliability of supply;

"(2) to provide food assistance to needy countries;

"(3) to support the principle of free trade and the promotion of fair trade in agricultural commodities and products;

"(4) to aggressively counter unfair foreign trade practices using all available means, including export promotion programs and, if necessary, restrictions on United States imports of foreign agricultural commodities and products as a means to encourage fairer trade;

"(5) to remove foreign policy constraints to maximize United States economic interest through agricultural trade; and

"(6) to provide for increased representation of United States agricultural trade interests in the formulation of national fiscal monetary policy affecting trade.

"SEC. 102. PURPOSE.

"It is the purpose of this Act to increase the profitability of farming and to increase opportunities foir United States farms and agricultural enterprises by—

"(1) increasing the effectiveness of the Department of Agriculture in agricultural trade policy formulation and implementation;

"(2) improving the competitiveness of United States agricultural commodities and products in the world market; and

"(3) providing for the coordination and efficient implementation of all agricultural trade programs.

"SEC. 103. DEFINITIONS.

As used in this Act:

"(1) AGRICULTURAL COMMODITY.—The term 'agricultural commodity' includes any agricultural commodity or product thereof produced in the United States, wood or processed wood products, fish or livestock or value-added, fortified, or high-value agricultural products.

"(2) DEVELOPING COUNTRIES.—The term 'developing country' means a country that—

"(A) has a shortage of foreign exchange earnings and has difficulty accessing sufficient commercial credit to meet all of its food needs, as determined by the Secretary; and

"(B) has the potential to become a commercial market for United States agricultural commodities.

"(3) SECRETARY.—The term 'Secretary' means the Secretary of the United States Department of Agriculture.

"(4) SERVICE.—The term 'Service' means the Foreign Agricultural Service of the United States Department of Agriculture.

"(5) UNFAIR TRADE PRACTICES.—The term 'unfair trade practice' included any act, policy, or practice of a foreign country that is unreasonable or discriminatory and burdens or restricts United States agricultural exports, including—

"(A) export subsidies, including—

"(i) the provision by governments of direct subsidies to an individual, firm, or industry contingent on export performance;

"(ii) currency retention schemes or any similar practices which involve a bonus on exports;

"(iii) internal transport and freight charges on export shipments, provided or mandated by governments, on terms more favorable than for domestic shipments;

"(iv) tax rebates on exports;

"(B) furnishing or ensuring the availability of raw materials to domestic processing operations at artificially low prices, including—

"(i) the maintenance of export taxes, duties, or charges on products that are used as inputs for the production of secondary products at levels that are higher than that levied on the secondary products;

"(ii) any other differential export tax or duty exemption;

"(iii) domestic consumption quotas;

"(iv) the assumption of costs or expenses of production, processing, or distribution by the government;

"(C) financial assistance on preferential terms; and

"(D) variable levies or restrictive licensing practices.

"An act, policy or practice is 'unreasonable' if the act, policy, or practice, while not necessarily in violaton of, or inconsistent with, the international legal rights of the United States, is otherwise unfair and inequitable.

"Subtitle B—Program Implementation

"SEC. 110. LONG-TERM AGRICULTURAL TRADE STRATEGY.

"(a) IN GENERAL.—

"(1) DEVELOPMENT OF MULTI-YEAR STRATEGY.—The Secretary shall develop a long-term agricultural trade strategy for the United States to guide the Secretary in the implementation of agricultural trade programs of the United States under this Act, the Agricultural Trade Development and Assistance Act of 1954, and any other Act.

"(2) GOALS.—The long-term agricultural trade strategy established under paragraph (1) shall be designed to ensure—

"(A) the efficient, coordinated use of United States agricultural trade programs.

"(B) the improvement in the commercial potential of developing country agricultural markets;

"(C) the provision of food assistance to needy countries;

"(D) the growth of United States agricultural exports; and

"(E) the maintenance of traditional markets for United States agricultural commodities;

"(b) COMPONENTS.—In developing the long-term agricultural trade strategy under subsection (a), the Secretary shall—

"(1) establish long-term agricultural trade goals under section 111;

"(2) identify priority markets for the export of United States agricultural commodities under section 112; and

"(3) establish specific market plans for each of the priority markets established under section 112.

"(c) REQUIREMENTS.—In developing the long-term agricultural trade strategy under subsection (a), the Secretary shall—

"(1) consult with the United States Trade Representative, the Secretary of State, the Administrator of the Agency for International Development, and the Agricultural Policy Advisory Committee established pursuant to section 135 of the Trade Act of 1972 (19 U.S.C. 2155);

"(2) consider the effects of exchange rate fluctuations and unfair trading practices on the competitiveness and availability of United States agricultural exports;

"(3) develop strategies that seek to encourage the commercialization of foreign markets for United States agricultural commodities;

"(4) consider the food needs of foreign countries that depend on the United States for food assistance;

"(5) develop strategies designed to make the United States a primary and dependable supplier of agricultural commodities on the world market;

"(6) consider transportation and shipping factors;

"(7) consider the differences in the markets of developed and developing countries (including the debt load of particular countries) and develop the means to increase United States agricultural exports in such markets;

"(8) develop multi-year plans for the implementation of the export assistance programs and food assistance programs established under this Act, the Agricultural Trade Development and Assistance Act of 1954, and other Acts;

"(9) provide for public comment on the development of the long-term agricultural trade strategy; and

"(10) consider such other factors as the Secretary determines appropriate.

"(d) TIME.—The Secretary shall develop a long-term agricultural trade strategy under subsection (a) at least once every 3 years and may annually revise such long-term strategy.

"SEC. 111. LONG-TERM AGRICULTURAL TRADE GOALS.

"(a) IN GENERAL.—The Secretary shall develop agricultural trade goals with respect to the desired levels of United States agricultural exports and market shares over a period of not less than 3 years.

"(b) REQUIREMENTS.—The long-term agricultural trade goals established under subsection (a) shall include—

"(1) as appropriate, the agricultural trade goals for total agricultural commodities over a period of not less than 3 years;

"(2) as appropriate, the agricultural trade goals for certain specified agricultural commodities over a period of not less than 3 years;

"(3) as appropriate, the agricultural trade goals for high-value, processed agricultural commodities over a period of nat less than 3 years;

"(4) the desired levels of expenditures on agricultural export programs; and

"(5) any other statement of trade goals that the Secretary determines appropriate.

"SEC. 112. ESTABLISHMENT OF PRIORITY MARKETS.

"(a) DESIGNATION OF GROWTH MARKETS.—The Secretary shall establish a list of not less than 15 countries (or groups of countries) that are most likely to emerge as growth markets for United States agricultural commodities within the 5 and 10-year periods following the developments of a long-term agricultural trade strategy under this subtitle.

"(b) DEVELOPING COUNTRIES.—Not less than 5 of the countries identified on the list developed under subsection (a) shall be developing countries.

"(c) DESIGNATION AS PRIORITY MARKETS.—Countries identified on the list developed under subsection (a) shall be designated as priority markets for the use of United States agricultural export programs (other than those programs designed to provide food assistance and those programs under title III that are designed to combat unfair trade practices).

"(d) TARGETING OF AGRICULTURAL TRADE PROGRAMS.—The Secretary shall place a priority on the development of agricultural markets, though the use of agricultural trade programs and through other means, in those countries designated as priority markets under subsection (c) in accordance with the individual market plans established under section 113 and in accordance with the long-term agricultural trade goals developed under section 111.

"SEC. 113. ESTABLISHMENT OF MARKET PLANS.

"(a) IN GENERAL.—The Secretary shall develop individual market plans for each country (or groups of countries) designated as a priority market under section 112.

"(b) CONTENTS.—As individual market plan developed under subsection (a) shall contain—

"(1) specific plans for the use of United States agricultural trade programs to assist United States exports and market development in the specific country; and

"(2) the agricultural trade goals for the United States for that country over a period of not less than 3 years.

"(c) INDIVIDUAL MARKET GOALS.—

"(1) PRIMARILY COMMERCIAL MARKETS.—With respect to markets that have strong commercial potential, the individual market plan developed under subsection (a) for a country shall be designed to increase exports of United States agricultural commodities in that country.

"(2) HEAVILY SUBSIDIZED MARKETS.—With respect to markets in which United States exporters face unfair trade practices of other competing countries, the individual market plan developed under subsection (a) for a country shall be designed to directly combat such unfair trade practices and should result in either increased agricultur-

al trade expenditures by the targeted competitor in such market or in a decrease in the market share or the exports of the targeted competitor in that market.

"(3) MARKETS THAT ARE PRIMARILY CONCESSIONAL.—With respect to markets that are primarily concessional and are the recipients of assistance under the Agricultural Trade Development and Assistance Act of 1954, the individual market plan developed under subsection (a) for a country shall be designed to increase United States agricultural exports to such country by increasing over time, the amount of United States agricultural exports moving through commercial channels and under other export programs established in this Act, and to decrease steadily the amount of food and developmental assistance necessary under the Agricultural Trade Development and Assistance Act of 1954.

"SEC. 114. REVIEW.

"(a) FREQUENCY OF REVIEW.—Not less than once every 3 years, the Secretary shall review the agricultural trade performance of the United States based on the long-term agricultural trade strategy and trade goals developed by the Secretary under this Act.

"(b) CONTENT OF REVIEW.—In conducting the review under subsection (a), the Secretary shall—

"(1) determine whether and to what extent individual market plans were successfully implemented during the 3-year period for which the review is being conducted;

"(2) determine whether the use of certain agricultural trade programs resulted in agricultural exports or increased agricultural exports or market share in the priority markets during the 3-year period for which the review is being conducted;

"(3) determine whether the use of agricultural trade programs to combat unfair trade practices has attained the established trade goals developed under this Act during the 3-year period for which the review is being conducted;

"(4) determine the degree to which the long-term agricultural trade goals developed under this Act were reached during the 3-year period for which the review is being conducted;

"(5) conduct a country-by-country analysis of expenditures made under agricultural trade programs (under this Act, the Agricultural Trade Development and Assistance Act of 1954, and any other Act) and the export performance of the United States in such market during the 3-year period for which the review is being conducted; and

"(6) evaluate whether revisions in the long-term agricultural trade strategy, goals, or market plans developed under this Act or in agricultural trade programs are necessary to help meet the purposes of this Act.

"SEC. 115. PRESERVATION OF TRADITIONAL MARKETS.

Notwithstanding any other provision of this Act, the Secretary shall, in implementing the provisions of this Act, seek to preserve traditional markets for United States agricultural commodities.

"SEC. 116. ADMINISTRATION.

The Secretary shall promulgate regulations to implement the provisions of this title.

"TITLE II—AGRICULTURAL EXPORT PROGRAMS

"Subtitle A—Export Assistance Programs

"SEC. 201. DIRECT CREDIT SALES PROGRAM.

"(a) SHORT-TERM PROGRAM.—To promote the sale of agricultural commodities the Commodity Credit Corporation may finance the commercial export sale of such commodities from privately owned stocks on credit terms for not to exceed a 3-year period.

"(b) INTERMEDIATE-TERM PROGRAM.—Subject to subsection (d), to promote the sale of agricultural commodities the Commodity Credit Corporation may finance the commercial export sales of agricultural commodities from privately owned stocks on credit terms for a period of not less than 3 years nor in excess of 10 years.

"(c) DETERMINATIONS.—The Commodity Credit Corporation shall not finance an export sale under subsection (b) unless the Secretary determines that such sale will—

"(1) develop, expand, or maintain the importing country as a foreign market, on a long-term basis, for the commercial sale and export of United States agricultural commodities, without displacing normal commercial sales;

"(2) improve the capability of the importing country to purchase and use, on a long-term basis, United States agricultural commodities; or

"(3) otherwise promote the export of United States agricultural commodities.

"(d) USE OF PROGRAM.—

"(1) GENERAL USES.—The Commodity Credit Corporation may use export sales financing authorized under this section—

"(A) to increase exports of agricultural commodities;

"(B) to compete against United States agricultural export competitors for agricultural export sales;

"(C) to assist countries, particularly developing countries, in meeting their food and fiber needs; and

"(D) for such other purposes as the Secretary determines appropriate consistent with the provisions of subsection (c).

"(2) COST OF FREIGHT.—The Commodity Credit Corporation may include the cost of freight from the United States tod esignated points of entry in other countries in any sale financed under this section.

"(3) GENERAL RESTRICTIONS.—Export sales financing authorized under this section shall not be used for foreign aid or debt rescheduling purposes. The provisions of the cargo preference laws shall not apply to export sales financed under this section.

"(e) TERMS OF CREDIT ASSISTANCE.—Any contract for the financing of exports by the Commodity Credit Corporation under this section shall include—

"(1) a requirement that repayment shall be made in dollars with interest accruing thereon as determined appropriate by the Secretary; and

"(2) a requirement, if the Secretary determines such requirement appropriate to protect the interests of the United States, that an initial payment be made by the purchaser at the time of sale or shipment of the agricultural commodity that is subject to the contract.

"(f) PROHIBITION ON RESALE OR TRANSSHIPMENT.—The Commodity Credit Corporation shall, whenever feasible, obtain commitments from purchasers of commodities under subsection (d) that such purchasers will prevent the resale or transshipment of such commodities to other countries.

"SEC. 202. EXPORT CREDIT GUARANTEE PROGRAM.

"(a) SHOFT-TERM CREDIT GUARANTEES.—The Commodity Credit Corporation may guarantee the repayment of loans made by financial institutions in the United States to finance commercial export sales of agricultural commodities from privately owned stocks on credit terms that do not exceed a 3-year period.

"(b) INTERMEDIATE-TERM CREDIT GUARANTEES.—Subject to the provisions of subsection (c), the Commodity Credit Corporation may guarantee the repayment of loans made by financial institutions in the United States to finance commercial export sales of agricultural commodities from privately owned stocks on credit terms that are for not less than a 3-year period nor for more than a 10-year period.

"(c) REQUIRED DETERMINATIONS.—The Commodity Credit Corporation shall not guarantee under subsection (b) the repayment of a loan made to finance an export sale unless the Secretary determines that such sale will—

"(1) develop, expand, or maintain the importing country as a foreign market, on a long-term basis, for the commercial sale and export of United States agricultural commodities, without displacing normal commercial sales;

"(2) improve the capability of the importing country to purchase and use, on a long-term basis, United States agricultural commodities; or

"(3) otherwise promote the export of United States agricultural commodities.

"(d) PURPOSE OF PROGRAM.—The Commodity Credit Corporation may use export credit guarantees authorized under this section—

"(1) to increase exports of agricultural commodities;

"(2) to compete against United States agricultural export competitors for agricultural export sales;

"(3) to assist countries, particularly developing countries, in meeting their food and fiber needs; and

"(4) for such other purposes as the Secretary determines appropriate consistent with the provisions of subsection (c).

"(e) COST OF FREIGHT.—The Commodity Credit Corporation may include the cost of freight from the United States to designated points of entry in other countries in any sale guaranteed under this section.

"(f) RESTRICTIONS ON USE OF CREDIT GUARANTEES.—Export credit guarantees provided under this section shall not be used for foreign aid or debt rescheduling purposes. The provisions of the cargo preference laws shall not apply to export sales guaranteed under this section.

"(g) RESTRICTIONS.—The Commodity Credit Corporation shall not make credit guarantees available to any country that the Secretary determines cannot adequately service the debt associated with such guarantee.

"(h) TERMS.—Contracts of guarantee entered into under this section shall continue such terms and conditions as the Commodity Credit Corporation determines to be necessary.

"(i) PROHIBITION ON RESALE OR TRANSSHIPMENT.—The Commodity Credit Corporation shall, wherever feasible, obtain a certification from purchasers that such purchasers will prevent the resale or transshipment of the commodities that are subject to the contract of guarantee issued under subsection (b) to other countries.

"(j) ELIGIBILITY OF CERTAIN COMMODITIES.—

"(1) DOMESTIC CONTENT REQUIREMENT.—Except as provided in paragraphs (2) and (3), export sales of United States agricultural commodities shall be eligible for short or intermediate-term export credit guarantees under this section if at least 90 percent of the value of such commodity is derived from agricultural commodities produced in the United States.

"(2) INABILITY TO MONITOR.—The Commodity Credit Corporation may require that any export of United States agricultural commodities shall be composed entirely of commodities produced within the United States and with goods from the United States, to enable such export to be eligible for short or intermediate-term export credit guarantees under this section, if the Commodity Credit Corporation determines that it is not practicable to monitor the export of such commodity to determine the percentage of domestic content of such agricultural commodity as a result of—

"(A) the export commodity being a bulk commodity that is not commonly stored in a manner that will enable the Corporation to determine the domestic content of the product because of the blending of the commodities with commodities produced outside the United States;

"(B) the export commodity being a blend of commodities produced both in and outside of the United States through a procedure that does not make the percentange of domestic content of such product easily verifiable; or

"(C) the determination, by the Commodity Credit Corporation, that the domestic content of the export commodity or of a particular type of export commodity is not practicable to verify.

"(3) LIMITATION OF PERCENTAGE COVERED BY GUARANTEE.—An export credit guarantee made available with respect to the export of an agricultural commodity that is not composed of commodities produced entirely in the United States shall not cover any portion of the exported commodity that was derived from agricultural commodities produced outside the United States.

"(k) INELIGIBILITY OF FINANCIAL INSTITUTIONS.—A financial institution shall be ineligible to negotiate letters of credit guaranteed by the Commodity Credit Corporation under this section if it is determined by the Corporation that such financial institution—

"(1) is not in a sound fiscal condition;

"(2) does not have sufficient experience in transactions of the type being guaranteed by the Commodity Credit Corporation; or

"(3) is—

"(A) a branch, agency, subsidiary, or home office of the foreign financial institution issuing the letter of credit; or

"(B) a branch, agency, subsidiary of any other financial institution headquartered in the same country as the foreign financial institution issuing the letter of credit.

"(l) ARRIVAL OF COMMODITIES.—The Commodity Credit Corporation shall establish procedures providing for the annual audit of a number of export transactions under this section to ensure that the agricultural commodities that were the subject of such transactions arrived in the country of destination as provided in the sales agreement.

"(m) FRAUD.—No export credit guarantee issued under this section shall be valid with respect to any exporter or assignee who has knowledge of any scheme to misuse any such credit guarantee or to misappropriate any agricultural commodities the sale of which subject to such guarantee, as determined by the Secretary.

"SEC. 203. DEFERRED PAYMENT SALES.

"(a) IN GENERAL.—The Secretary may provide financing through the Commodity Credit Corporation to exporters of United States agricultural commodities that desire to provide deferred payment terms to purchasers in other countries in order to meet sales competition from other countries or to make additional export sales.

"(b) AVAILABILITY OF FINANCING.—Financing shall be available under this section only with respect to export sales to those countries that are eligible for financing under the short-term export credit sales program established under section 201(a).

"(c) ELIGIBILITY FOR FINANCING.—To be eligible to receive financing assistance under this section, the United States exporter shall—

"(1) enter into a contract to export United States agricultural commodities to a foreign country on deferred payment terms that shall not exceed a 3-year period;

"(2) provide deferred payment terms referred to in paragraph (1);

"(3) establish to the satisfaction of the Corporation that the exporter must provide such deferred payment terms in order to meet sales competition from other countries or to make additional export sales;

"(4) submit, for approval by the Commodity Credit Corporation, an export sales plan;

"(5) provide assurances, to the satisfaction of the Commodity Credit Corporation, that exports have been made in accordance with an approved plan under paragraph (4); and

"(6) comply with any other terms and conditions determined by the Corporation to be necessary.

"(d) TERMS OF REPAYMENT.—

"(1) REPAYMENT IN DOLLARS.—Payments under contracts entered into under this section to the Commodity Credit Corporation shall be made in dollars by the exporter in accordance with the terms and at interest rates contained in the approved export sales plan under subsection (c).

"(2) INTEREST.—Interest rates under paragraph (1) shall not exceed those charged for financing under the short-term export credit sales program established under section 201(a).

"(e) PERFORMANCE GUARANTEE.—The Commodity Credit Corporation may, if the Corporation determines such action appropriate to protect the interests of the United States, require a performance guarantee from the exporter at the time of the export sale.

"(f) REVIEW.—Financing agreements entered into under this section shall be subject to such other terms and conditions as the Commodity Credit Corporation determines necessary or appropriate and shall be subject only to review by the National Advisory Council on International Monetary and Financial Policies.

"(g) USE OF COMMODITY CREDIT CORPORATION.—The funds, facilities, and authorities of the Commodity Credit Corporation may be used in carrying out this section.

"(h) EFFECT ON COMMODITY CREDIT CORPORATION.—The authority provided under this section shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provision of law.

"SEC. 204. MARKETING ASSISTANCE PROGRAM.

"(a) IN GENERAL.—The Secretary may establish and carry out a program to encourage the development, maintenance, and expansion of commercial export markets for United States agricultural commodities through the provision of cost-share assistance to United States organizations that implement a market development program in a foreign country.

"(b) TYPE OF ASSISTANCE.—Cost-share assistance under this section may be provided in the form of funds of, or commodities owned by, the Commodity Credit Corporation, as determined appropriate by the Secretary.

"(c) REQUIREMENTS FOR PARTICIPATION.—

"(1) IN GENERAL.—To be eligible for cost-share assistance under this section, a United States organization shall—

"(A) be an eligible trade organization;

"(B) prepare and submit a marketing plan to the Secretary that meets the guidelines governing such plans established by the Secretary; and

"(C) meet any other requirements established by the Secretary.

"(2) PROVISION OF ASSISTANCE.—

"(A) VIABLE MARKETS.—Funds or commodities shall be made available for use under this section only in connection with marketing plans developed for foreign countries that are, or have the potential to be, viable commercial markets for United States agricultural commodities, the export of which would have a significant positive effect on farmgate agricultural commodity values and on financial returns to farmers.

"(B) PRIORITY BASIS FOR EXPORT ASSISTANCE.—The Secretary shall provide export assistance under this section on a priority basis—

"(i) in the case of agricultural commodities with respect to which there has been a favorable decision under section 301 of the Trade Act of 1974 (19 U.S.C. 2411);

"(ii) in the case of agricultural commodities for which exports have been adversely affected, as defined by the Secretary, through retaliatory actions related to a favorable decision under section 301 of the Trade Act of 1974 (19 U.S.C. 2411); or

"(iii) to counter or offset the adverse effect on the export of a United States agricultural commodity of an unfair trade practice of a foreign country.

"(d) ELIGIBLE TRADE ORGANIZATIONS.—An eligible trade organization shall be—

"(1) a United States agricultural trade organization or regional state-related organization that is formed to promote the export and sale of agricultural commodities and that does not stand to profit directly from specific sales of agricultural commodities;

"(2) a cooperative organization or State agency that promotes the sale of agricultural commodities; or

"(3) a private organization that promotes the export and sale of agricultural commodities if—

"(A) there is no organization or agency described in paragraphs (1) or (2) that represents the particular agricultural commodity that is marketed by the private organization; and

"(B) the export of the particular agricultural commodity has been hampered by an unfair trade practice of a foreign country.

"(e) APPROVED MARKETING PLAN.—

"(1) IN GENERAL.—A marketing plan submitted by an eligible trade organization under this section shall describe the advertising or other marketing-oriented export promotion plan to be carried out by the eligible trade organization with respect to which cost-share assistance under this section is being requested.

"(2) REQUIREMENTS.—To be approved by the Secretary, a marketing plan submitted under this subsection shall—

"(A) specifically describe the manner in which assistance received by the eligible trade organization under this section will be expended in implementing the marketing plan;

"(B) specifically describe the manner in which funds provided by the eligible trade

organization will be expended in implementing the marketing plan;

"(C) establish specific market goals to be achieved as a result of the marketing promotion program; and

"(D) contain whatever additional requirements are determined by the Secretary to be necessary.

"(3) AMENDMENTS.—A marketing plan may be amended by the eligible trade organization at any time, with the approval of the Secretary.

"(4) BRANDED PROMOTION.—An agreement entered into under this section may provide for the use of branded advertising to promote the sale of agricultural commodities in a foreign country under such terms and conditions as may be established by the Secretary.

"(f) DURATION OF COST-SHARE ASSISTANCE.—

"(1) ONE TO THREE YEAR BASIS.—The Secretary may provide assistance under this section on a 1 to 3 year basis, subject to annual reviews for compliance with the approved marketing plan by the Secretary.

"(2) REQUIREMENTS FOR MULTI-YEAR ASSISTANCE.—In order to be eligible to receive multi-year assistance under this section, the eligible trade organization shall—

"(A) establish, to the satisfaction of the Secretary, that multi-year funding is necessary to implement a successful marketing promotion program; and

"(B) submit a marketing promotion plan that specifically describes how assistance under this section will be used on a multi-year basis.

"(g) OTHER TERMS AND CONDITIONS.—

"(1) TERMINATION OF ASSISTANCE.—The Secretary may terminate any assistance made, or to be made, available under this section if the Secretary determines that—

"(A) the eligible trade organization is not adhering to the terms and conditions of the program established under this section;

"(B) the eligible trade organization is not implementing the approved marketing plan or is not adequately meeting the established goals of the marketing promotion program;

"(C) the eligible trade organization is not adequately contributing its own resources to the marketing promotion program;

"(D) the unfair trade practice that was the basis of the provision of assistance has been stopped and marketing assistance is no longer required to offset its effects; or

"(E) the Secretary determines that termination of assistance in a particular instance is in the best interests of the program.

"(2) AVAILABILITY OF RECORDS.—An eligible trade organization that receives assistance under this section shall maintain all records concerning the use of assistance under this program for a period of 5 years and shall permit the Secretary to have full and complete access to the financial records of the organization relating to the use of assistance under this program while such organization is a participant in this program and for a period of 5 years thereafter.

"(3) LEVEL OF COST SHARE ASSISTANCE.—Cost share assistance provided under this section to private organizations as described in subsection (d)(3) shall not exceed 50 percent of the cost of implementing the marketing plan.

"(h) USE OF COMMODITY CREDIT CORPORATION.—The Secretary may use the funds, facilities, and authorities of the Commodity Credit Corporation in carrying out the provisions of this section.

"SEC. 205. BARTER OF AGRICULTURAL COMMODITIES.

"(a) IN GENERAL.—The Secretary may donate eligible commodities in barter for foreign products by U.S. exporters and may exchange eligible commodities for strategic or critical materials.

"(b) ELIGIBLE COMMODITIES.—Unless otherwise specified, eligible commodities includes—

"(1) commodities and products thereof acquired by the Commodity Credit Corporation through price support operations, and

"(2) commodities and products thereof acquired by the Secretary or the Corporation in the normal course of business and available for disposition.

"(c) BARTER BY U.S. EXPORTERS OF AGRICULTURAL COMMODITIES.

"(1) PURPOSE.—The Secretary shall encourage United States exporters of agricultural commodities to barter such commodities for foreign products—

"(A) to prevent waste of agricultural commodities in the United States;

"(B) to acquire such foreign products needed by such exporters; and

"(C) to develop, maintain, or expand foreign markets for United States agricultural exports.

"(2) ELIGIBLE ACTIVITIES.—The Secretary may furnish eligible commodities to U.S. exporters for the following activities—

(A) to finance the distribution, handling, and processing costs of agricultural commodities in the importing country or in a country through which such commodities must be transshipped,

(B) to finance other activities in the importing country that provide food assistance to needy people.

"(3) TECHNICAL ASSISTANCE.—The Secretary shall provide technical advice and assistance relating to the barter of agricultural commodities to any United States exporter who requests such advice or assistance.

"(4) MULTI-YEAR AGREEMENTS.—The Secretary may enter into a multi-year agreement with a United States exporter to make eligible commodities available for barter programs.

"(5) USE OF FOREIGN CURRENCIES.—Local currencies generated through barter of eligible commodities shall be used within the foreign country—

"(A) to transport, store, distribute, and otherwise enhance the effective use of commodities;

"(B) to implement developmental programs, including income generating, community development, health, nutrition, cooperative development, agricultural programs, and other developmental activities; or

"(C) to develop commercial sales of United States agricultural commodities.

"(d) EXCHANGE FOR STRATEGIC OR CRITICAL MATERIALS.—

"(1) IN GENERAL.—The Secretary may barter eligible commodities to acquire strategic and critical materials produced in a foreign country.

"(2) USE OF PRIVATE TRADING FIRMS.—To the maximum extent practicable, the Secretary shall solicit bids from, and utilize, private trading firms to arrange or make barters or exchanges for strategic or other materials under subsection (1).

"(3) PRIORITY OF ELIGIBLE COMMODITIES.—The Commodity Credit Corporation shall give priority to eligible commodities which are—

(A) easily storable commodites, and

(B) prime incentive goods to stimulate production of critical and strategic materials.

"(4) DETERMINATION OF STRATEGIC OR CRITICAL MATERIALS.—The President shall determine, according to section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98(b))—

(A) which materials are strategic and critical materials; and

(B) the quantities and qualities of strategic and critical materials to be acquired under this section.

"(5) TRANSFER OF STRATEGIC OR CRITICAL MATERIALS TO STOCK PILE.—The Secretary shall transfer, as approved by the President, strategic and critical materials to the stock pile, as provided for by the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.).

"(6) REIMBURSEMENT OF THE CORPORATION.—The Corporation shall be reimbursed for the strategic and critical materials transferred to the stock pile, provided that—

(A) the reimbursement shall be equal to the fair market value, as determined by the Secretary of the Treasury, of the strategic and critical materials; and

(B) such reimbursement shall be made from the funds available for the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.).

"(7) CORPORATION AUTHORITY NOT LIMITED.—Nothing contained herein shall limit the authority of the Corporation to acquire, hold, or dispose of such quantity of strategic and critical materials as it deems advisable in carrying out its functions and protecting its assets.

"(e) STRATEGIC PETROLEUM RESERVE.—The Secretary shall, to the maximum extent practicable, make available at least $300,000,000 of eligible commodities for use by the Secretary of Energy in acquiring petroleum products (including crude oil) for the Strategic Petroleum Reserve (42 U.S.C. 6234), provided—

(1) the volume of petroleum products stored in the Strategic Petroleum Reserve is less than the level prescribed under section 6234 of Title 42; and

(2) the Secretary of Energy requests such commodities.

"(f) BARTER COORDINATED WITH OTHER DONATIONS.—The Secretary shall determine that the eligible commodities provided in the foreign country are incidental to other donations of the commodity in the foreign country.

"(g) PROHIBITED ACTIVITIES.—The Secretary shall take reasonable precautions to prevent the misuse of eligible commodities in a barter or exchange program, including activities that—

"(1) displace or interfere with commercial sales of United States agricultural commodities that otherwise might be made;

"(2) unduly disrupt world prices of agricultural commodities or the normal patterns of commercial trade with recipient countries; or

"(3) allow the resale or transshipment of eligible commodities to countries other than the intended recipient.

"SEC. 206 AGRICULTURAL CREDIT REVOLVING FUND.

"(a) ESTABLISHMENT.—The revolving fund known as the Agricultural Export Credit Revolving Fund established under section 4(d) of the Agricultural Trade Development and Assistance Act of 1954 (as such section existed prior to the date of enactment of this Act), shall be available without fiscal

year limitation for use by the Commodity Credit Corporation (hereinafter referred to in this subsection as the 'Corporation') for financing in accordance with this section and section 714c(f) of Title 15 the following—

"(1) commercial export sales of United States agricultural commodities out of private stocks or stocks owned or controlled by the Corporation on credit terms of not to exceed a 3-year period;

"(2) export sales of United States breeding animals (including, cattle, swine, sheep, and poultry), including the cost of freight from the United States to designated points of entry in other nations; and

"(3) the establishment of facilities in importing countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing fungible agricultural commodities produced in and exported from the United States (through the use of local currency generated from the sale of United States agricultural commodities).

"(b) USE.—The Corporation shall use the revolving fund only to extend credit for purposes of market development and expansion and only where there is substantial potential for developing or enhancing regular commercial markets for United States agricultural commodities.

"(c) MARKETING OPPORTUNITIES.—The Secretary shall ensure that the revolving fund is used in such a manner as to involve equitable use of the funds to finance sales to the greatest feasible number of countries consistent with maximizing market opportunities. In carrying out this objective, the Secretary shall establish procedures under which—

"(1) not less than 85 percent of the estimated amount in the revolving fund for any fiscal year shall be made available for the purposes described in paragraph (1) of subsection (a); and

"(2) not to exceed 25 percent of the estimated amount in the revolving fund for any fiscal year shall be made available for the financing of credit sales to any one country for the purposes described in subsection (a).

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Agricultural Export Credit Revolving Fund such sums as may be necessary to carry out the provisions of this section. All funds received by the Corporation in payment for credit extended by the Corporation using the revolving fund, including interest or other receipts on investments and credit obligations, in financing export sales of the types specified in subsection (a) shall be added to and become a part of such revolving fund.

"(e) TERMINATION.—The revolving fund is abolished effective October 1, 1995, and all unobligated money in such fund on September 30, 1995, shall be transferred to and become part of the miscellaneous receipts account of the Treasury.

"(f) AUTHORITY.—The authority provided under this section shall be in addition to, and not in lieu of, any authority granted to the Secretary or the Corporation under any other provision of law.

"(g) LIMITATIONS.—The authority provided under this subsection to incur obligations to make loans shall be effective only to the extent that such obligations do not exceed annual limitations on new direct loan obligations which shall be provided in annual appropriations Acts.

"SEC. 207. COMBINATION OF PROGRAMS.

"(a) FAILURE TO MEET FINANCIAL QUALIFICATIONS.—If a country does not meet the financial qualifications for participation in the export programs established under sections 201 or 202, the Secretary may provide agricultural commodities to such country under section 205 to the extent necessary to reduce the cost to such country of purchasing United States agricultural commodities and to make it possible for such country to meet such qualifications.

"(b) REVIEW.—The Secretary shall review and adjust annually the quantity of commodities provided to a country under subsection (a— to encourage such country to place greater reliance on the increased use of commercial trade to meet the qualifications referred to in subsection (a).

"(c) COMBINED CREDIT PROGRAMS.—The Commodity Credit Corporation may carry out a program under which commercial export credit guarantees available under section 202 are combined with direct credits fom the Commodity Credit Corporation under section 201 to reduce the effective rate of interest on export sales of agricultural commodities.

"SUBTITLE B—IMPLEMENTATION

"SEC. 211. FUNDING LEVELS.

"(a) DIRECT CREDIT PROGRAMS.—The Commodity Credit Corporation may make available for each fiscal year such funds of the Commodity Credit Corporation as it determines necessary to carry out any direct credit program established under section 201.

"(b) EXPORT CREDIT GUARANTEE PROGRAMS.—

"(1) SHORT-TERM GUARANTEES.—

"(A) MINIMUM AMOUNTS.—The Commodity Credit Corporation shall make available for each of the fiscal years 1991 through 1995, not less than $5,000,000,000 in credit guarantees under section 202(a) to extend short-term credit to finance the export sales of United States agricultural commodities.

"(B) LIMITATION ON ORIGINATION FEE.—Notwithstanding any other provision of law, the Secretary may not charge an origination fee with respect to any credit guarantee transaction under section 202(a) in excess of an amount equal to one percent of the amount of credit extended under the transaction.

"(2) INTERMEDIATE-TERM CREDIT GUARANTEES.—The Commodity Credit Corporation shall make available for each of the fiscal years 1991 through 1995, not less than $500,000,000 in credit guarantees under section 202(b) to extend intermediate-term credit to finance the export sales of United States agricultural commodities.

"(c) MARKETING ASSISTANCE PROGRAMS.—The Commodity Credit Corporation or the Secretary shall make available for market promotion activities authorized to be carried out by the Commodity Credit Corporation under section 204—

"(1) in addition to any funds that may be specifically appropriated to implement a market development program, not less than $225,000,000 of the funds of, or an equal value of commodities owned by, the Commodity Credit Corporation; and

"(2) any funds that may be specifically appropriated to carry out a marketing assistance program under section 204.

"SEC. 212. REGULATIONS.

"The Secretary or the Commodity Credit Corporation, as appropriate, shall promulgate regulations to carry out the provisions of this title.".

"SEC. 213. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated, without fiscal year limitation, such sums as may be necessary to carry out this title.

"TITLE III—RESPONSE TO UNFAIR TRADE PRACTICES

"SEC. 301. PURPOSE OF AUTHORITIES.

"It is the purpose of this title to authorize the Secretary to carry out such agricultural trade programs as may be necessary to carry out the agricultural trade policy of the United States with respect to the use of unfair agricultural trade practices by foreign countries.

"SEC. 302. EXPORT ENHANCEMENT PROGRAM TO COMBAT UNFAIR TRADE PRACTICES.

"(a) IN GENERAL.—The Secretary shall carry out in accordance with this section a program to discourage unfair trade practices by foreign countries and to encourage the development, maintenance, and expansion of export markets for United States agricultural commodities by making United States agricultural commodities price competitive.

"(b) EXPORT INCENTIVE.—In carrying out the program established under this section, the Secretary may—

"(1) make agricultural commodities, acquired by the Commodity Credit Corporation, available to United States exporters, users, processors, or foreign purchasers at no cost either directly or through the issuance of commodity certificates; and

"(2) make cash grants to United States exporters, users, and processors.

"(c) TERMS AND CONDITIONS OF PROGRAM.—

"(1) WHEN AVAILABLE.—The Secretary shall use commodities made available under this section to the extent necessary to counter or offset the adverse effect on the export of a United States agricultural commodity of the unfair trade practice of a foreign country that directly or indirectly benefits producers, processors, or exporters of agricultural commodities in such foreign country.

"(2) MARKET PRICES.—The Secretary shall provide commodities under this section to United States exporters, users, or processors or foreign purchasers to the extent necessary to make United States agricultural commodities available at the world market price in the foreign market.

"(3) INTERESTED FOREIGN MARKETS.—The Secretary shall consider providing assistance under the program established under this section with respect to sales to be made with respect to all foreign markets in which other countries are engaging in unfair trade practices, giving priority to sales to be made to buyers in those foreign markets that have been traditional markets for United States agricultural commodities and that are increasing their imports of United States agricultural commodities over previous levels.

"(4) DISPLACEMENT.—The Secretary shall avoid the displacement of usual marketings of United States agricultural commodities in carrying out this section.

"(5) PRECAUTIONS AGAINST RESALE.—The Secretary shall take reasonable precautions to prevent the resale or transshipment to other countries, or use for other than domestic use in the importing country, of agricultural commodities receiving export assistance under this section.

"(6) COMPETITIVE DISADVANTAGE.—The Secretary shall take such action as necessary to ensure that equal treatment is provided to domestic and foreign purchasers and users of United States agricultural commodities in

any case in which the importation of a manufactured product made, in whole or in part, from a commodity made available for export under this section would place domestic users of the commodity at a competitive disadvantage.

"(7) FREIGHT COST.—The Secretary may include the cost of freight from the United States to designated points of entry in foreign countries.

"(8) DIFFERENT COMMODITIES.—The Secretary may provide to a United States exporter, user, or processor, or foreign purchaser, under the program established under this section, agricultural commodities of a kind different than the agricultural commodity involved in the transaction for which assistance under this section is being provided.

"(9) OTHER EXPORT PROGRAMS.—The Secretary may provide commodities under this section in conjunction with other export promotion programs conducted by the Secretary or the Commodity Credit Corporation.

"(d) RESTRICTION ON PURCHASE OF COMMODITIES.—United States agricultural commodities shall not be purchased with funds available under section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes", approved August 24, 1935, for the sole purpose of use under the program under this section. Such commodities or products thereof shall not be provided to a United States user, exporter, processor, or foreign purchaser under the program established under this section except by mutual agreement of such user, exporter, processor, or purchaser and the Secretary.

"(e) USE OF COMMODITY CREDIT CORPORATION.—The Secretary of Agriculture shall carry out the program established under this section through the Commodity Credit Corporation.

"(f) INAPPLICABILITY OF PRICE RESTRICTIONS.—Any price restrictions that otherwise may be applicable to dispositions of agricultural commodities owned by the Commodity Credit Corporation shall not apply to agricultural commodities provided under this section.

"(g) EFFECT ON COMMODITY CREDIT CORPORATION.—The program established under this section shall not prejudice any authority of the Commodity Credit Corporation to sell surplus agricultural commodities (obtained by the Commodity Credit Corporation in the normal course of its operations) in world trade at competitive prices as elsewhere authorized by law.

"(h) FUNDING LEVELS.—The Commodity Credit Corporation shall make available for each of the fiscal years 1991 through 1995, not less than $500,000,000 nor more than $900,000,000 of the funds or commodities of the Commodity Credit Corporation for the purpose of carrying the program established under this section.

"SEC. 303. REGULATIONS.

"The Secretary or the Commodity Credit Corporation, as appropriate, shall promulgate regulations necessary to carry out this title.

"SEC. 304. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated, without fiscal year limitation, such sums as may be necessary to carry out this title.

"TITLE IV—GENERAL PROVISIONS

"SEC. 401. AGRICULTURAL EMBARGO PROTECTION

"(a) PREREQUISITES; SCOPE OF COMPENSATION.—Notwithstanding any other provisions of law, if the President or other member of the executive branch of the Federal Government causes the export of any agricultural commodity to any country or area of the world to be suspended or restricted for reasons of national security or foreign policy under the Export Administration Act of 1979 (50 U.S.C. App 2401 et seq.) or any other provision of law, and if such suspension or restriction of the export of such agricultural commodity is imposed other than in connection with a suspension or restriction of all exports from the United States to such country or area of the world, and if sales of such agricultural commodity for export from the United States to such country or area of the world during the year preceding the year in which the suspension or restriction is imposed exceed 3 percent of the total sales of such commodity for export from the United States to all foreign countries during the year preceding the year in which the suspension or restriction is in effect, the Secretary of Agriculture shall compensate producers of the commodity involved by making payments available to such producers, as provided in subsection (b) of this section.

"(b) AMOUNT OF PAYMENTS.—If the Secretary makes payments available to producers under subsection (a), the amount of such payment shall be determined—

"(1) in the case of an agricultural commodity for which payments are authorized to be made to producers under Title I of the Agricultural Act of 1949 (7 U.S.C. 1441 et seq.), by multiplying—

"(A) the farm program payment yield for the producer or the yield established for the farm for the commodity involved; by

"(B) the farm program acreage established for the commodity; by

"(C) the amount by which the average market price per unit of such commodity received by producers during the 60-day period immediately following the date of the imposition of the suspension or restriction is less than 100 percent of the parity price for such commodity, as determined by the Secretary on the date of the imposition of the suspension or restriction; or

"(2) in the case of other agricultural commodities for which price support is authorized for producers under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), by multiplying the amount by which the average market price per unit of such commodity received by the producers during the 60-day period immediately following the date of the imposition of the suspension or restriction is less than 100 percent of the parity price for such commodity, as determined by the Secretary on the date of the imposition of the suspension or restriction, by the quantity of such commodity sold by the producer during the period that the suspension or restriction is in effect.

"(c) TIME FOR PAYMENTS.—The payments made pursuant under paragraph (1) of subsection (b) shall be made for each markeitng year or part thereof during which the suspension or restriction is in effect and shall be made in equal amounts at 90-day intervals, beginning 90 days after the date of the imposition of the suspension or restriction.

"(d) COMMODITY CREDIT CORPORATION.—The Secretary shall use the Commodity Credit Corporation in carrying out the provisions of this section.

"(e) REGULATIONS.—The Secretary may issue such regulations as are deemed necessary to carry out the provisions of this section.

"SEC. 402. DEVELOPMENT OF PLANS TO ALLEVIATE ADVERSE IMPACT OF EMBARGOES.

In order to alleviate, to the maximum extent possible, the adverse impact on farmers, elevator operators, common carriers, and exporters of agricultural commodities when the President or other member of the executive branch of the Federal Government causes the export of any agricultural commodity to any country or area of the world to be suspended or restricted, the Secretary of Agriculture shall—

"(1) develop a comprehensive contingency plan that includes—

"(A) an assessment of existing farm programs with a view to determining whether such programs are sufficiently flexible to enable the Secretary to efficiently and effectively offset the adverse impact of such a suspension or restriction on farmers, elevator operators, common carriers, and exporters of commodities provided for under such programs;

"(B) an evaluation of the kinds and availability of information needed to determine, on an emergency basis, the extent and severity of the impact of such a suspension or restriction on producers, elevator operators, common carriers, and exporters; and

"(C) the development of criteria for determining the extent, if any, to which the impact of such a suspension or restriction should be offset in the case of each of the sectors referred to in clause (1)(B) of this section;

"(2) for any suspension or restriction for which compensation is not provided under section 401 of this title, develop and submit Congress such recommendations for changes in existing agricultural programs, or for new programs, as the Secretary considers necessary to handle effectively, efficiently, economically, and fairly the impact of any such suspension or restriction;

"(3) for any suspension of restriction for which compensation is provided under section 401 of this title, develop and submit to Congress a plan for implementing and administering section 401; and

"(4) require the Commodity Credit Corporation, before such corporation purchases any contracts for the purpose of offsetting the impact of a commodity suspension or restriction, to—

"(A) prepare an economic justification for each commodity involved in the suspension or restriction to determine if such a purchase is necessary;

"(B) estimate any suspension- or restriction-related benefits and detrimental effects to the exporters, and use both estimates in determining the extent, if any, Federal assistance is needed; and

"(C) limit its purchases to only those types and grades of commodities suspended or restricted from shipment and make such purchases at prices at or near the current market prices.

"SEC. 403. CONTRACTING AUTHORITY TO EXPAND AGRICULTURAL EXPORT MARKETS.

"(A) IN GENERAL.—the Secretary may contract with individuals for services to be performed outside the United States as the Secretary determines necessary or appropriate for carrying out programs and activities to maintain, develop, or enhance export markets for United States agricultural commodities and products.

"(b) NOT EMPLOYEES OF THE UNITED STATES.—Such individuals shall not be regarded as officers or employees of the United States.

"SEC. 404. TRADE CONSULTATIONS CONCERNING IMPORTS.

"(a) CONSULTATION BETWEEN AGENCIES.—The Secretary shall require consultation between the Administrator of the Service and

the heads of other appropriate agencies and offices of the Department of Agriculture, including the Administrator of the Animal and Plant Health Inspection Service, before relaxing or removing any restriction on the importation of any agricultural commodity into the United States.

"(b) CONSULTATION WITH TRADE REPRESENTATIVE.—The Secretary shall consult with the United States Trade Representative before relaxing or removing any restriction on the importation of any agricultural commodity or a product thereof into the United States.

"SEC. 405. TECHNICAL ASSISTANCE IN TRADE NEGOTIATIONS.

The Secretary shall provide technical services to the United States Trade Representative on matters pertaining to agricultural trade and with respect to international negotiations on issues related to agricultural trade.

"TITLE V—FOREIGN AGRICULTURAL SERVICE

"SEC. 501. UNDER SECRETARY FOR INTERNATIONAL AFFAIRS AND COMMODITY PROGRAMS.

(a) ESTABLISHMENT.—There is hereby established in the Department of Agriculture the position of Under Secretary of Agriculture for International Affairs and Commodity Programs to be appointed by the President, by and with the advice and consent of the Senate. The Under Secretary of Agriculture for International Affairs and Commodity Programs is authorized to exercise such functions and perform such duties related to foreign agriculture and agricultural stabilization and conservation, and shall perform such other duties, as may be required by law or prescribed by the Secretary of Agriculture.

(b) PROHIBITION.—The prohibition on the use of designation "Assistant Secretary of Agriculture for International Affairs and Commodity Programs" (as contained in section 501(c) of the Agricultural Trade Act of 1978 as it existed prior to the amendments to such Act made by the Agricultural Development and Trade Act of 1990) shall continue after the date of enactment of the Agricultural Development and Trade Act of 1990.

"SEC. 502. ADMINISTRATOR OF THE FOREIGN AGRICULTURAL SERVICE.

"(a) ESTABLISHMENT.—There is hereby established in the Department of Agriculture the position of Administrator of the Foreign Agricultural Service to be appointed by the President, by and with the advice and consent of the Senate.

"(b) DUTIES.—The Administrator of the Foreign Agricultural Service is authorized to exercise such functions and perform such duties related to foreign agriculture, and shall perform such other duties, as may be required by law or prescribed by the Secretary of Agriculture.

"(c) USE OF SERVICE.—In carrying out the duties under this section, the Administrator shall oversee the operations of the Foreign Agricultural Service, the General Sales Manager, and the Agricultural Attache Service.

"(d) OTHER SPECIFICATIONS.—The Administrator may be paid at the highest level authorized under Subchapter 8 of chapter 53 to title 5 of the United States Code. Notwithstanding any other provision of law, if the Administrator was a member of the Foreign Service of the United States prior to the appointment as Administrator, the Administrator may rejoin the Foreign Service after the end of the Administrator's tenure and may retain full retirement rights and benefits as a member of the Foreign Service.

"(e) EFFECTIVE DATE.—The requirement for advice and consent of the Senate with respect to the appointment of the Administrator of the Foreign Agricultural Service shall not apply to any individual serving as such Administrator prior to the date of enactment of this Act.

"SEC. 503. RESPONSIBILITIES OF THE FOREIGN AGRICULTURAL SERVICE.

"(a) IN GENERAL.—The Service shall assist the Secretary in carrying out the agricultural trade policy of the United States by acquiring information pertaining to agricultural trade, carrying out market promotion and development activities, and implementing the programs authorized in this Act, the Agricultural Trade Development and Assistance Act of 1954, and other Acts.

"(b) OTHER RESPONSIBILITIES.—In carrying out its responsibilities, the Service shall—

"(1) promote the export of United States agricultural commodities and products thereof;

"(2) facilitate economic assistance and agricultural development programs;

"(3) represent United States agricultural producers, processors and exporters in bilateral and multilateral negotiations to reduce unfair trade practices of foreign countries on agricultural trade, in cooperation with the United States Trade Representative;

"(4) collect and distribute information regarding foreign production, supply, and distribution of agricultural commodities and products thereof, and government policies affecting agricultural production and trade; and

"(5) perform such other duties as the Secretary requests.

"SEC. 504. PROVISION OF TRADE ASSISTANCE.

"(a) ESTABLISHMENT.—The Trade Assistance Office within the Service established under section 4206 of the Omnibus Trade and Competitiveness Act of 1988 (7 U.S.C. 5216) shall be maintained by the Secretary to carry out the duties described in subsections (b) and (c) of this section under the direction of the Administrator of the Service.

"(b) PRIMARY RESPONSIBILITY.—This office shall provide trade assistance and information to persons who are interested in exporting United States agricultural commodities and products or who believe they have been injured by unfair trade practices with respect to trade in agricultural commodities and products.

"(c) DUTIES.—This office shall—

"(1) compile and make readily available international trade information, including information concerning trade practices carried out by other countries to promote the export of agricultural commodities and products, trade barriers imposed by other countries, unfair trade practices of other countries, and remedies under United States law that might be available to persons injury by unfair trade practices; and

"(2) provide information and assistance to persons interested in participating in programs carried out by the Foreign Agricultural Service, the Commodity Credit Corporation, and other agencies with respect to the international marketing and export of domestically produced agricultural commodities and products or who believe they have been injured by unfair trade practices of other countries with respect to trade in agricultural commodities and products.

"SEC. 505. STAFF OF THE FOREIGN AGRICULTURAL SERVICE.

"(a) PERSONNEL OF THE SERVICE.—To ensure that the agricultural export programs of the United States are carried out in an effective manner, the authorized number of personnel for the Service shall not be less than 900 staff years each fiscal year.

"(b) RANK OF FOREIGN AGRICULTURAL SERVICE OFFICERS IN FOREIGN MISSIONS.—Notwithstanding any other provision of law, the Secretary of State shall, on the request of the Secretary of Agriculture, accord the diplomatic title of Minister-Counselor to the senior Service officer assigned to any United States mission abroad. The number of Service officers holding such diplomatic title at any time may not exceed twelve.

"SEC. 506. AUTHORIZATION OF APPROPRIATIONS.

"There are hereby authorized to be appropriated for the Service such sums as may be necessary to carry out the provisions of this Act.

"TITLE VI—REPORTS

"SEC. 601. LONG-TERM AGRICULTURAL TRADE STRATEGY REPORTS.

"(a) IN GENERAL.—The Secretary of Agriculture shall every 3 years prepare a Long-Term Agricultural Trade Strategy Report based upon the long-term agricultural trade strategy developed by the Secretary under title I of this Act.

"(b) CONTENTS.—The Report required in subsection (a) shall—

"(1) detail the Long-Term Agricultural Trade Strategy developed by the Secretary under Title I; and

"(2) for each report after the first report, shall review the agricultural trade performance of the United States during the previous 3-year period in light of the long-term agricultural trade strategy and trade goals developed by the Secretary for such period under this Act.

"(c) CONSULTATION.—In preparing each such report, the Secretary shall consult with the United States Trade Representative to ensure that the report is coordinated with an annual national trade policy agenda included in the annual report for the relevant fiscal year prepared under section 163 of the Trade Act of 1974 (19 U.S.C. 2213).

"(d) UPDATE.—The Secretary shall prepare an annual update to the report required in subsection (a) that shall contain a description of any revisions to the long-term agricultural trade strategy made by the Secretary and such other information as may be specified in this section or determined appropriate by the Secretary.

"(e) TREATMENT AS ANNUAL BUDGET SUBMISSION.—Provisions of each Long-Term Agricultural Trade Strategy Report and annual update of such report that relate to recommended levels of spending on international activities year shall be treated as the President's annual budget submission to Congress for such activities for such fiscal year, and shall be submitted along with the budget request for other programs of the Department of Agriculture for such fiscal year.

"(f) AVAILABILITY OF REPORT.

"(1) SUBMISSION TO CONGRESS.—The Secretary shall submit the report required in this section (and any updates to such report) to the Committee on Agriculture and the Committee on Ways and Means of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry and the Committee on Finance of the Senate.

"(2) AVAILABILITY TO PUBLIC.—Except as provided in paragraph (2), the Secretary may make the report required in this section available to the general public.

"(3) CONFIDENTIAL.—The Secretary may designate portions of the report required in this section as confidential and not to be released to the general public if—

"(A) the Secretary determines that the release of such information would disadvantage the United States with respect to its competitors in specific foreign markets; or

"(B) any of such information is determined to be business confidential.

"(4) NOT APPLICABLE TO REVIEW OF STRATEGY.—The provisions of paragraph (3)(A) shall not be applicable with respect to the portion of the report that reviews the agricultural trade performance of the United States over a previous 3-year period in accordance with subsection (b)(2).

"SEC. 602. OTHER REPORTS TO CONGRESS.

"The Secretary shall submit reports to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate concerning the information set forth in this section. This information may be provided in individual reports, in a consolidated report, or in the Long-Term Agricultural Trade Strategy Report (and annual updates to such report) prepared under section 601.

"(1) BARTER.—The Secretary shall, no later than January 15 of each year, submit a report concerning the use of the barter authorities by the Secretary or the Commodity Credit Corporation under this Act or under any other Act (except the barter provisions contained in titles I and II of the Agricultural Trade Development and Assistance Act of 1954) during the previous fiscal year.

"(2) EXPORT ASSISTANCE UPDATE.—The Secretary shall, no less than bi-monthly, submit a report specifying the cumulative amount of export assistance provided by the Commodity Credit Corporation and the Secretary under the programs provided under this Act, the Commodity Credit Corporation Charter Act, and under the Agricultural Trade Development and Assistance Act of 1954 during the current fiscal year.

"(3) TRADE ASSISTANCE OFFICE.—The Secretary shall, no later than January 15 of each year, submit a report that describes the type of information that is currently available through the Trade Assistance Office of the Service and the type of assistance provided to persons through such office during the previous fiscal year.

SECTION 202. AMENDMENT TO THE AGRICULTURAL ACT OF 1954.

The Agricultural Act of 1954 (7 U.S.C. 1741 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 108. ANNUAL REPORTS BY AGRICULTURAL ATTACHES.

"(a) The Secretary shall require appropriate officers and employees of the Department of Agriculture, including those stationed in foreign countries, to prepare and submit annually to the Secretary detailed reports that—

"(1) document the nature and extent of—

"(A) programs in such countries that provide direct or indirect government support for the export of agricultural commodities and the products thereof; and

"(B) other trade practices that may impede the entry of United States agricultural commodities and the products thereof into such countries; and

"(2) identify opportunities for the export of United States agricultural commodities and the products thereof to such countries.

"(b) The Secretary shall—

"(1) annually compile the information contained in such reports;

"(2) in consultation with the agricultural technical advisory committees established under section 135(c) of the Trade Act of 1974 (19 U.S.C. 2155(c)), include in the compilation a priority ranking of those trade barriers identified in subsection (a) by commodity group;

"(3) include in the compilation a list of actions undertaken to reduce or eliminate such trade barriers; and

"(4) no later than January 15 of each year, make the compilation available to Congress, the trade assistance office authorized under section 504, the agricultural policy advisory committee, and other interested parties.

"(c) The Secretary and the United States Trade Representative shall convene a meeting, at least once a year, of the Agricultural Policy Advisory committee and the agricultural technical advisory committees to develop specific recommendations for actions to be taken by the Federal Government and private industry to—

"(1) reduce or eliminate trade barriers or distortions identified in the annual reports required to be submitted under subsections (a) and (c); and

"(2) expand United States agricultural export opportunities identified in such annual reports.

"SEC. 109. ATTACHE EDUCATIONAL PROGRAM.

"The Administrator shall establish a program within the Service that directs attaches of the Service who are reassigned from abroad to the United States, and other personnel of the Service, to visit and consult with producers and exporters of agricultural commodities and products and State officials throughout the United States concerning various methods to increase exports of United States agricultural commodities and products.

TITLE III—GENERAL PROVISIONS

SEC. 301. FOOD SECURITY WHEAT RESERVE.

Subsection (i) of section 302 of the Agricultural Act of 1980 is amended by striking "1990" each place it appears and inserting in lieu thereof "1995".

SEC. 302. COTTONSEED OIL AND SUNFLOWER OIL EXPORTS.

Section 301(b)(2)(A) of the Disaster Assistance Act of 1988 is amended by striking "and September 30, 1990," and inserting in lieu thereof "through September 30, 1995,".

SEC. 303. AGRICULTURAL FELLOWSHIP PROGRAM FOR MIDDLE INCOME COUNTRIES AND EMERGING DEMOCRACIES.

(a) ESTABLISHMENT.—The Secretary of Agriculture shall establish a fellowship program for middle income countries and emerging democracies (the "Cochran Fellowship Program") to provide fellowships to persons from eligible countries who specialize in agriculture for study in the United States.

(b) ELIGIBLE COUNTRIES.—Countries that meet the following requirements shall be eligible to participate in the program established under this section:

(1) A country that has developed economically to the point where it no longer qualifies for bilateral foreign aid assistance from the United States because its per capita income level exceeds the eligibility requirements of such assistance programs (hereinafter referred to as "middle-income" country);

(2) A middle-income country that has never qualified for bilateral foreign aid assistance from the United States, but with respect to which an ongoing relationship with the United States, including technical assistance and training, would provide mutual benefits to such country and the United States; and

(3) A country that has recently begun the transformation of its system of government from a nonrepresentative type of government to a representative democracy and that is encouraging democratic institution building, and the cultural values, institutions, and organizations of democratic pluralism.

(c) PURPOSE OF THE FELLOWSHIPS.—Fellowships under this section shall be provided in order to allow the recipients to gain knowledge and skills that will—

(1) assist eligible countries to develop agricultural systems necessary to meet the food needs of their domestic populations; and

(2) strengthen and enhance trade linkages between eligible countries and agricultural interests in the United States.

(d) INDIVIDUALS WHO MAY RECEIVE FELLOWSHIPS.—The Secretary shall utilize the expertise of United States agricultural counselors, trade officers, and commodity trade promotion groups working in participation countries to help identify program candidates from both the public and private sectors of those countries.

(e) PROGRAM IMPLEMENTATION.—The Secretary shall consult with other United States Government agencies, United States universities, and the private agribusiness sector, as appropriate, to design and administer training programs to accomplish the program objectives.

(f) AUTHORIZATION OF APPROPRIATONS.—There are hereby authorized to be appropriated without fiscal year limitation such sums as may be necessary to provide funding to carry out the program established under this section, except that the amount of such funds shall not exceed:

(1) for eligible countries that meet the requirements of subsection (b)(1), 3,000,000 dollars;

(2) for eligible countries that meet the requirements of subsection (b)(2) 2,000,000 dollars; and

(3) for eligible countries that meet the requirements of subsection (b)(3), 5,000,000 dollars.

(g) COMPLEMENTARY FUNDS.—When the Secretary of Agriculture determines that it is advisable in furtherance of program purposes, the Secretary may accept money, funds, property, and services of every kind by gift, devise, bequest, grant, or otherwise, and may, in any manner, dispose of all such holdings and use the receipts generated from such disposition as general program funds under this section. All funds so designated for the program established under this section shall remain available until expended.

TITLE IV—CONFORMING PROVISIONS AND TECHNICAL CHANGES

SEC. 401. AMENDMENTS TO THE OMNIBUS TRADE AND COMPETITIVENESS ACT OF 1988.

The Omnibus Trade and Competitiveness Act of 1988 is amended by striking sections 4201, 4202, 4205, 4206, 4211, 4212, 4213, 4305, and 4311 (7 U.S.C. 5211, 5212, 5215, 5216, 5231, 5232, 5233, 1736t note, and 1691 note, respectively).

SEC. 402. AMENDMENTS TO THE FOOD SECURITY ACT OF 1985.

The Food Security Act of 1985 is amended by striking sections 1125, 1132, 1151, 1162, and 1167 (7 U.S.C. 1736t, 1736x, 2275, 1736z, and 1736aa).

SEC. 403. AMENDMENTS TO THE AGRICULTURE AND FOOD ACT OF 1981.

The Agriculture and Food Act of 1981 is amended by striking sections 1203, 1204, and 1205 (7 U.S.C. 1736i, 1736j, and 1736k).

SEC. 404. AMENDMENT TO THE FOOD FOR PEACE ACT OF 1966.

The Food for Peace Act of 1966 is amended by striking section 4 (7 U.S.C. 1707a).

SEC. 405. AMENDMENT TO THE AGRICULTURAL ACT OF 1949.

The Agricultural Act of 1949 is amended by striking subsection (d) of section 416 (7 U.S.C. 1431(d)).

● Mr. LUGAR. Mr. President, the first issue the Agriculture Committee will take up in preparation for the 1990 farm bill is legislation to reform and improve our food aid programs and to maintain the growth of our export programs. The committee has worked for more than 1 year to prepare this legislation and has consulted with hundreds of individuals in the Government and private sector. This legislation reflects that wide process of consultation.

The food aid that America sends overseas is a relatively small percentage of our total export but I believe there is no greater symbol of what we stand for as a country than those shipments, boxes, bags, and containers which we have been sending for more than 40 years to those in need. This spring, farmers in Indiana and farmers all across the country can take special pride knowing that some of their crops will feed mothers and infants in the Philippines. Some will go to Calcutta where Mother Teresa feeds all the sick, the homeless, and the poor who come to her missions. Some will go to southern Sudan where a brave young missionary from Indiana, Father Todd Riebe, works in the besieged city of Juba to bring aid and comfort to thousands of starving people.

We are now in a situation where the traditional demands for food aid continue while new democracies in Eastern Europe and Central America add even more requirements on our limited resources. This means our food aid programs must work efficiently and respond rapidly. Over the years these programs have been encrusted with bureaucratic requirements—many of them imposed by Congress—that hamper quick and efficient operation. One of the major goals of this legislation is to make the process responsive to the demands that face us in the new decade.

In our commercial export and market promotion programs, we hope to maintain our record of the past 5 years by steadily increasing exports and finding new markets. Constructing this part of the legislation now is a particularly difficult task because the administration is engaged in agricultural trade negotiations in the Uruguay round. We must retain our ability to respond to unfair trade practices and break down trade barriers while maintaining the administration's flexibility to negotiate a trade agreement in Geneva that will benefit the national agricultural interest.

At the same time we need to be thinking in the long term about the agricultural potential of an Eastern Europe moving suddenly toward free market economies. These countries should be good markets for some of our products and they will likely be competitors for other countries. Likewise, the European Community is less than 2 years away from constructing a unified market and we must be thinking about the effects of that important development on American agriculture.

Mr. President, I noted at the outset that this legislation is the product of wide consultation. It contains suggestions from the administration officials who manage our aid and export programs, the private voluntary organizations and cooperatives who carry out many of our aid programs overseas, and farmers and farm groups who provide the basic commodities on which the programs are based. We intend to keep up that process of consultation and I believe there will be room for some modification of the bill throughout the legislative process. A number of Senators have introduced separate legislation affecting trade and aid programs and these must also be considered.

There are a few important issues still to be examined. There are several very interesting proposals for debt forgiveness and staff is working with the administration and the Congressional Budget Office to achieve a consensus that could be added to the bill. In a committee hearing several weeks ago I expressed concern for the need for a loan loss reserve in the GSM loan guarantee programs. However, this may not require legislation and I understand the administration is working on this concept now. Finally, of course, we need to receive a CBO estimate of the budget impact of the bill.

Mr. President, this legislation was created through an open and bipartisan process that I hope extends throughout the entire farm bill. I want to thank the chairman of the committee, my good friend Senator LEAHY, and his excellent staff for the great care and consideration they took in consulting with the administration and with my staff. Our work together to the Agriculture Committee combined with Senator LEAHY's chairmanship of the Appropriations Subcommittee on Foreign Aid and my membership on the Foreign Relations Committee give us both an extra dimension of interest in the issues that this bill addresses. Mr. President, I am pleased to cosponsor this legislation and I recommend it to my Senate colleagues.

Mr. President, I ask unanimous consent that a letter and an article relative to this subject be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Indianapolis Star, Mar. 6, 1990]

PRIEST FEARS WAR IN SUDAN WILL RESUME—LETTER TO CITY WOMAN TELLS OF STARVATION, SHELLING

(By Lynn Ford)

An Indiana priest serving as a missionary in a civil war-ravaged nation in east Africa fears a recent break in fighting between government and rebel forces won't last.

In a letter to an Indianapolis woman who serves as his Catholic "prayer partner," the Rev. Todd Riebe of Terre Haute said widespread starvation continues in Juba, Sudan, although rocket fire ended in late January—a month dominated by escalating violence.

"There haven't been any shellings since Jan. 25—due, I'm sure, to the prayers of many," he wrote to Deborrah Thurston, a member of the Discaloed Carmelite Secular Order. "Still, we are all busy building trenches and shelters, as we suspect that January was a preview of coming attractions.

"We have a government that is willing to starve its people to death, and "liberators" who are willing to bomb entire villages and towns. If both sides are willing to sacrifice all the people, who are they fighting this war for?"

Fighting between government forces and the rebel Sudan People's Liberation Army has resulted in hundreds of thousands of deaths, many due to starvation.

Thousands of starving people reportedly are being held captive in Juba, their attempts to flee thwarted by government forces.

Father Riebe, the only American among priests serving in Juba for a Roman Catholic group known as Combont Missionaries, said relief workers continue to fly food into the nation.

"The people get 100 grams of sorghum a day," wrote the 37-year-old priest, who is headmaster of the Catholic-run Combont Secondary School in Juba. "It's just enough to keep people alive.

"The real problem, however, is peace. Without it, people cannot live."

Father Riebe's comments came in a letter dated Feb. 16 that Thurston received Thursday. He and Thurston, jail monitoring project director for the Indiana Juvenile Justice Task Force, have communicated frequently by mail since Father Riebe was assigned to the Sudan in 1985.

The priest, who sought to bring global attention to the Sudanese situation in a January letter to colleagues in Washington, D.C. and Naimbi, Kenya, said he continues to seek help.

"We have to put all possible pressure on the government and on the SPLA (Sudanese People's Liberation Army) to negotiate." he wrote to Thurston. "I have talked by radio with the U.S. ambassador in (the Sudanese capital Khartoum, and I have been in touch with the ambassador in Kenya by mail.

"The U.S. has limited influence with the SPLA and no influence with Khartoum. Perhaps our best bet is to influence other governments to stop all money and arms from reaching either party."

Israel may be aiding the liberation army in its opposition to the Sudanese government, Father Riebe wrote.

"A security man told me that they examined one of the SPLA shells that didn't explode and found it to be made in Israel," wrote the priest, who has a master's degree in journalism from Ohio State University and is a former editor of *Comboa Missions* magazine. "There's only one source for this and, as a journalist, I know that's not enough to confirm this. But here, we live on rumors."

[Text of letter from Father Todd Riebe, MCCJ]

FEBRUARY 17, 1990.

DEAR DEB: Many thanks for your letter of Jan. 31st which arrived yesterday. The food relief flights are bringing our mail—and so we are in closer contact with the world now than in "ordinary" times. Our God is the God of all consolation!

Thanks for keeping up on our situation and for the prayers and sacrifices. There hasn't been any other shelling since January 25—due, I am sure, to the prayers of many. We are all busy building trenches and shelters as we suspect that January was a "preview of coming attractions." The relief flights are easing the situation a bit. People get 100 grams of sorghum a day. It's just enough to keep people alive.

The real problem, however, is peace. Without it, people cannot live. We have to put all possible pressure on the govt. and the SPLA to negotiate. I have talked by radio with the U.S. ambassador in Khartoum and have been in touch with the amb[assador] in Kenya by mail. The U.S. has limited influence with the SPLA (they did fight with them to get relief in) and no influence with Khartoum. Perhaps our best bet is to influence other governments to stop all money and arms from reaching either party. I understand that Germany cut off all aid to Khartoum last week. The world must make negotiating a settlement the depending factor on any aid to either side. A security man told me that they examined one of the SPLA shells that didn't explode and found it to be made in Israel. There's only one source for this—and as a journalist I know that's not enough to confirm. But here we live on rumors. The fact of the matter is that a lot of countries are aiding both sides in the slaughter going on here—and even if the U.S. doesn't have influence with the SPLA or Khartoum, it does have influence with other countries. Continuing the war must be made to be more costly for both the SPLA and the government. And we must make negotiating a settlement more and more attractive.

I feel, Deb, that I have looked evil in the face here in Southern Sudan. We have a government that is willing to starve its people to death and "liberators" who are willing to bomb entire villages and towns filled with citizens all for the sake of winning a war. But if both sides are willing to sacrifice all the people—who are they fighting this war for? The answer to that is frightening.

Incidentaly [sic], both U.S. ambassadors told me that they are praying for us. At first I was consoled—but my older and wiser confreres have told me that if politicians are praying—it means our situation is really a bad one! Let us continue all the same! Again, thanks for your concern for Sudan.

Love,

TODD.●

Mr. BAUCUS. Mr. President, I am very pleased to join Senator LEAHY and other members of the Agriculture Committee today in sponsoring the Agricultural Development and Trade Act of 1990.

This is a critical piece of legislation that will hopefully be incorporated in the 1990 farm bill that the Agriculture Committee will begin action upon new week.

Mr. President, as chairman of the Senate Finance Committee's International Trade Subcommittee I am all too familiar with the international trade difficulties this Nation faces.

But the international trade picture is not universally bleak. The United States has consistently run a strong trade surplus in agricultural products.

Last year, the United States exported about 75 percent of its wheat crop and 40 percent of its soybean crop as well as significant quantities of rice, beef, corn, and many other commodities. In my State more than 85 percent of the wheat crop normally goes for export as does a growing percentage of beef production.

The success this Nation has had exporting agricultural products is no accident, it is a direct result of the hard work of American farmers. But it is also partially the result of strong agricultural export programs.

I have always been an enthusiastic supporter of those programs, including the Targeted Export Assistance Program [TEA]—renamed the Marketing Assistance Program in this bill, the Export Enhancement Program [EEP], and GSM 102 and 103 credit guarantees. These programs have been essential to our efforts to expand export markets for American farmers.

In the 1985 farm bill and the 1988 Trade Act, we introduced and later expanded upon two programs that I particularly want to highlight—TEA and EEP.

TEA is designed to direct market development funds to agriculture groups seeking to do market development efforts in foreign markets. TEA dollars have been used to fund activities ranging from trade shows to television advertising. TEA dollars have supported the export of products ranging from beef to Christmas trees.

In 1988, USDA testified that TEA was the star of the export programs. I wholeheartedly agree. I earlier introduced legislation with several of my colleagues to extend the TEA program and that suggestion has been incorporated into the legislation we are introducing today.

The EEP is another star of the export programs. Under the EEP, USDA uses surplus commodities to subsidize the export of U.S. agricultural products.

The EEP has increased U.S. wheat exports tremendously. In 1986—before the EEP program was in full swing, the U.S. share of the world wheat market was about 25 percent. In 1988—after 2 years of EEP, the U.S. share had increased to 50 percent. The EEP has put literally billions of dollars in the pockets of wheat farmers.

I was a supporter of the EEP in 1985. I successfully argued for its expansion in 1988, and I strongly support efforts to extend it in this legislation.

I am also pleased that this legislation will settle once and for all an issue that has plagued U.S. forest product exporters. The Congress has made it clear on several occasions that it considers forest products an agricultural product as the term is used in agricultural trade legislation. But there have been those in the administration that refused to accept this interpretation when it came to Government credit guarantees for agricultural exports.

This legislation very clearly resolves this question in favor of forest product exporters. Once this legislation becomes law it should be absolutely clear that the Congress intends for forest products to have access to both GSM 102 and 103.

This is not a perfect bill. I will seek to expand funding levels for TEA and EEP in the markup of the farm bill. But it is a very good bill. It extends all essential agricultural export programs and should send a strong message to our farmers and our international competitors that the United States intends to expand its agricultural exports.

Mr. BOREN. Mr. President, today I am joining with the distinguished chairman and ranking member of the Senate Agriculture Committee, Senators LEAHY and LUGAR, in the introduction of the Agricultural Development and Trade Act of 1990. The importance of international markets to American agriculture cannot be understated. For example, roughly three-fourths of the Oklahoma wheat crop is sold abroad. Unfortunately, American agriculture products too often face closed markets and heavily subsidized competition. This legislation renews and modifies our most vital export programs in an effort to meet this competition head to head.

I am proud to say that the bill is substantively similar to S. 2147, the Agricultural Trade Promotion Act of 1990, which I introduced with my colleague Senator THAD COCHRAN of Mississippi. Like S. 2147, this legislation reauthorized the Export Enhancement Program which is so critical to the U.S. wheat industry as it faces virtually limitless restitution subsidization by the European Community.

Today's legislation also renews the GSM Export Credit Guarantee Programs which greatly facilitate private financing for the sale of U.S. agricultural commodities. It is important to note that, like S. 2147, today's bill addresses two problem areas that have threatened the integrity of the pro-

grams. First, the bill redefines domestic content requirements, so the U.S. taxpayer isn't guaranteeing the sale of foreign-grown commodities. Second, the bill calls for higher standards for participating banks, so foreign banks no longer play a shell game with loans backed by the U.S. Government.

Mr. President, I would also like to comment on this bill's rewrite of Public Law 480, the 1954 law governing our international food aid programs. Through Public Law 480, we not only feed the world's hungry, we advance the structural development of the world's poorest countries and begin developing new markets for our agricultural exports in more developed countries. These various goals often produce conflicting paths for America's food aid and have sometimes confused the mission of our programs.

Even greater confusion and inefficiencies have resulted from the five-agency bureaucratic structure which oversees our international food aid system. This kitchen run by AID, USDA, State, OMB and Treasury has not produced a very tasty dish. Putting one cook in charge of each of our three food programs will provide greater accountability, unity of purpose, and clearer leadership. Under this bill, AID will run our title II donation program and our new grant program, while USDA will run the concessional loan program. This restructuring of the responsibility for Public Law 480 is a major step toward eliminating the two problems which have plagued our food aid programs.

First, missions will now be clearly defined; AID will pursue economic development under our grant programs to least developed countries, USDA will pursue market development under our loan program to developing countries, and AID will continue to provide humanitarian aid under title II. Second, with one agency at the helm of each of these three programs, I am convinced that efficiency and effective leadership will increase. I commend the work of the chairman in this regard and encourage the administration to embrace this reorganization that will remove excess bureaucracy and help our food aid programs respond to a changing world.

Again, Mr. President, I would like to thank Senators LEAHY and LUGAR for the leadership they have displayed in the crafting of this bill. I truly believe this legislation will be recognized as one of the most important titles of the 1990 farm bill.

Mr. DASCHLE. Mr. President, I am pleased to join Senators LEAHY and LUGAR in introducing the Agricultural Development and Trade Act of 1990. I want to thank Senator LEAHY and his staff for their work in developing this legislation. They have spent several months talking with parties who are involved in trade and food aid programs, and have developed a careful and thorough proposal to revamp our agricultural trade and food relief programs.

This proposal reorganizes the authority for international food relief and agriculture trade programs, and strengthens our efforts to establish and expand overseas markets for America's farmers and livestock producers. The bill represents our commitment to keep American agriculture competitive in world markets. We will not abandon American farmers and livestock producers in their struggle against trade barriers and export subsidies.

While the proposal offers several significant improvements for trade and food relief programs, there are a few provisions that deserve special mention.

FOOD FOR FREEDOM

Farmers and livestock producers have played an important role over the years in relieving hunger and in demonstrating America's support for democracy. The Food for Freedom Program established in this legislation stems from that tradition.

Food for Freedom is created to help countries that are moving from nonrepresentative forms of government to representative democracies, and that have made commitments to introduce and expand free enterprise elements in their agricultural economies. The program is designed to support the transition to democracy, individual liberties and economic freedom.

It is my expectation that the countries of Eastern Europe will be the primary beneficiaries of this program. There is a great need in these countries for food. In fact, it is the people's long frustration with food shortages at the root of the unrest from which democracy has sprung. Food aid can and will make a difference in these countries, as well as give us an opportunity to introduce the people to our agricultural products.

The legislation allows the Secretary of Agriculture to use up to $150 million to carry out this program.

EXPORTS OF VALUE-ADDED PRODUCTS

The legislation integrates value-added agricultural products into the improved export and market-development programs. This is an important step. The United States has fallen behind our competitors in exports of value-added products. By developing and expanding markets for these products we will create jobs and economic opportunities in rural areas.

A General Accounting Office study released February 2, 1990, found that the United States has fallen far behind the Europeans in exports of high-value products. The EC now holds a 41-percent share of the high-value market. The United States share is only 9 percent.

The United States has more to offer the world than only raw agricultural products. If we only export raw products, we ship economic progress overseas. We give other countries the opportunity to expand their economies through processing industries that create jobs and other economic activities. Agricultural processing can be an important stimulus for economic growth in rural areas. A 1983 study by the Department of Agriculture found that expanding our share of the world market for high-value agricultural products by 5 percent could mean 1 million more American jobs.

Increasing our share of the value-added market does not mean displacing sales of bulk commodities. Research has said that our share of the value-added trade could be increased from 7 to 15 percent without disrupting bulk exports. An increase of this proportion would have subtantial benefits: A $50-billion increase in gross national product, a $10-billion increase in Federal tax receipts and more than 1 millon in additional jobs.

The legislation makes value-added or high-value agricultural products produced in the United States eligible for market-development and export-enhancement programs. Multiyear commitments are authorized.

I am considering offering an amendment that would further develop our efforts to expand overseas markets for value-added agricultural products. The proposal I have in mind would target a portion of our market development aid to value-added research and promotion, and encourage more participation in this program.

FOOD AID

Farmers and the international development community have expressed serious concerns about the way U.S. food assistance programs have developed over recent years. Reports of aid decisions based on State Department politics instead of actual food needs, of corruption, of poor distribution systems, and of food spoiling on docks or being "dumped" at harvest time have undermined the effectiveness of the Food for Peace (Public Law 480) Program. Some people have even suggested that the program be disbanded.

In spite of the legitimate issues that have been raised about a few Public Law 480 projects, it is important to remember the many benefits of the Food for Peace Program. The essence of Public Law 480 is to target a small portion of the U.S. agricultural abundance to the poorest people in the world, thereby alleviating emergency nutritional needs, facilitating long-term support of nutritional requirements, stimulating economic development in recipient countries, supporting U.S. agriculture, and promoting future U.S. trade opportunities.

At its best, Public Law 480 can meet all these objectives. The legislation being introduced today is designed to ensure that Public Law 480 operates at its best. Perhaps the single most important improvement in the program is the establishment of solid accountability through the clear delineation of goals and responsibilities.

Under current law, a Development Coordinating Committee [DCC] comprised of the Department of State, the Department of Agriculture [USDA], the Agency for International Development [AID], the Department of Commerce, and the Office of Management and Budget [OMB] make joint decisions about all proposed Public Law 480 projects. Any one of the agencies in the DCC can block a food aid proposal, and it often appears that no agency is actually responsible for the decisions or their consequences. Under the new legislation, the DCC process would be abolished, and a "Consultative Group" including private voluntary organizations and indigenous nongovernmental organizations would be established. USDA and AID would cooperate to administer Public Law 480 projects, and each agency would be responsible for its own components of the program.

Other key aspects of the new Public Law 480 language include authorization of multiyear agreements, minimum tonnage levels, requirements that local nutritional needs as well as cultural and agricultural settings be taken into account, and provisions to improve food distribution and storage. The legislation would authorize grants and loans to the world's least developed countries for the purchase and subsequent resale of U.S. commodities. The recipient governments would use the local currency generated from food sales to finance AID-approved development projects, and the funds would be jointly administered by AID and the local government. Finally, the legislation would authorize emergency feeding projects, the farmer-to-farmer program, and nonemergency donations of commodities to private voluntary organizations and indigenous nongovernmental organizations for direct distribution, sale, barter, or other AID-approved uses.

By Mr. PRESSLER:

S. 2383. A bill to authorize an exchange of lands in South Dakota and Colorado; to the Committee on Energy and Natural Resources.

EXCHANGE OF CERTAIN LANDS

Mr. PRESSLER. Mr. President, I rise today to introduce legislation authorizing an exchange of lands in South Dakota and Colorado between the U.S. Forest Service and Homestake Mining Co. Currently, Mr. President, Homestake Mining Co. owns some of the most beautiful and scenic land in the Black Hills of South Dakota. It includes Spearfish Canyon in the heart of the Black Hills National Forest—one of nature's real treasures.

The South Dakota lands involved are intermingled with National Forest lands and comprise potentially valuable additions to the Black Hills National Forest. They would contribute greatly to better public access to hunting and fishing, and enhance outdoor recreation and fish and wildlife habitat protection.

The transfer includes some 12,274 acres of land in western South Dakota and 1,410 acres in Colorado. The National Forest Service lands in Summit County, CO, are intermingled with or adjacent to privately owned and developed lands. These lands are either currently developed, permitted for ski area or local government purposes, or adjacent to developed or permitted areas or communities.

Mr. President, this land exchange has support from many environmental organizations including the Sierra Club, the South Dakota Wildlife Federation, and the Natural Resources Users' Coalition. I ask unanimous consent that letters from these organizations be printed in the RECORD immediately following my remarks.

This land exchange proposal offers an excellent opportunity to preserve some of the most beautiful land in the Nation for wildlife and for the enjoyment of the public. I hope my colleagues will act quickly to approve this legislation. I ask unanimous consent that the text of the bill be printed in full at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2383

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS AND PURPOSES.

(a) The Congress finds and declares that—

(1) certain lands located within or adjacent to the Black Hills National Forest in Lawrence, Meade and Pennington Counties, South Dakota, are currently in private ownership;

(2) these lands, which are owned by Homestake Mining Company of California (hereinafter referred to as "Homestake"), are intermingled with National Forest lands and comprise potential valuable additions to the Black Hills National Forest to serve important public objectives, including but not limited to: (1) public access and opportunities for hunting, fishing and other outdoor recreation; (2) fish and wildlife habitat protection (including Blue Ribbon trout habitat in Spearfish Creek); (3) the preservation of scenic beauty; (4) public access to, and the enhancement of the outstanding scenic, natural and recreational values of Spearfish Canyon and other canyons within the Black Hills; (5) protection of the scenic backdrop to the Spearfish Canyon National Forest Scenic Byway; and (6) more efficient National Forest land management;

(3) such lands, if not acquired for addition to the Black Hills National Forest, may be sold and developed for purposes which may be incompatible with the above mentioned objectives;

(4) Homestake has offered to sell or exchange such lands, which total approximately twelve thousand two hundred and seventy-four acres, with the United States so that they may be acquired for National Forest and land conservation purposes;

(5) Homestake has identified national forest lands in Summit County, which it or local government units would like to acquire, and which are intermingled with or adjacent to privately owned and developed lands. These lands, which are either currently developed, permitted for ski area or local government purposes, or adjacent to developed or permitted areas or communities, do not appear necessary for retention in government ownership to serve the public interest or objectives, and are therefore suitable for disposal through a land exchange; and

(6) given the relative environmental and other values of the lands proposed for exchange in this Act, the land exchange set forth herein is clearly in the public interest and represents the land acquisition strategy which can best meet dual public objectives of acquiring the Spearfish Canyon and other South Dakota properties, while at the same time minimizing or eliminating cash outlays by the United States to achieve such objectives.

(b) It is the purpose of this Act to authorize, direct and expedite the consummation of the interstate land exchange and transfer set forth herein in order to further the public interest by acquiring lands in South Dakota with important values for permanent public management and protection and to transfer certain lands to non-Federal ownership in Summit County, Colorado.

SEC. 2. SOUTH DAKOTA-COLORADO LAND EXCHANGE.

(a) Notwithstanding any other provision of law, the Secretary of Agriculture is hereby authorized and directed to exchange lands with Homestake as set forth in this Act upon receipt of an offer from Homestake which conforms with the provisions of this Act.

(b) Except as otherwise provided in this subsection, Homestake shall convey to the Secretary of Agriculture all right, title and interest of Homestake in certain lands in Lawrence, Meade and Pennington Counties, South Dakota, which comprise approximately twelve thousand two hundred and seventy-four acres, including approximately 1,250 acres of riparian lands in Spearfish Canyon which encompass some 20 miles of stream frontage on Spearfish Creek, and which are generally depicted on maps entitled "Forest Service-Homestake Land Exchange—South Dakota Lands to Forest Service", numbered A-H, and dated February 1990; *Provided, however,* That in making such conveyance Homestake shall retain:

(1) all mineral rights in the above described lands owned, held or controlled by Homestake as of the date of enactment of this Act: *Provided further,* That any future exercise of such mineral rights shall be subject to the laws, rules and regulations of the United States pertaining to surface and other use of lands conveyed to the Secretary of Agriculture where mineral rights are reserved;

(2) all water rights within the watershed of Spearfish Creek and its tributaries

owned, held or controlled by Homestake as of the date of enactment of this Act; and

(3) cabin sites as indicated on the map numbered "A" referenced in this subsection within the watershed of Spearfish Creek and its tributaries which are intermingled with the lands to be conveyed to the Secretary of Agriculture but which are owned and permitted by Homestake to private parties and will continue to remain in private ownership.

(c) Upon receipt of title to the lands identified in subsection (a) of this section, the Secretary of Agriculture shall simultaneously convey to Homestake subject to valid existing rights and existing National Forest improvements, all right, title and interest of the United States in:

(1) approximately 1,410 acres of lands located in Summit County, Colorado, as generally depicted maps entitled "Forest Service-Homestake Land Exchange—Lands to Homestake", numbered 1-6, and dated March 1990: *Provided, however,* That the lands identified on Map number 5 and generally known as the South Frisco Bay parcel shall not be patented to Homestake unless and until the Town of Frisco and Summit County, Colorado, jointly agree to a land use plan for such parcel: *Provided further,* That if the South Frisco Bay parcel is not patented to Homestake within eighteen months of the date of enactment of this Act, the Secretary shall in lieu thereof pay Homestake cash equalization moneys without regard to the 25 per centum limitation contained in subsection 3(a) of this Act or offer Homestake timber credits pursuant to that subsection.

(2) up to forty acres of lands located in Lawrence County, South Dakota, which currently comprise thirty-eight National Forest cabin permit sites, as generally depicted on a map entitled "Forest Service-Homestake Land Exchange—Spearfish Cabin Sites to Homestake", dated February 1990, and which shall in turn be sold to the current cabin permittees by Homestake at fair market value upon application by the permittees or their successors in interest: *Provided,* That the transfer of any particular cabin site to Homestake pursuant to this subparagraph shall be contingent on the permittee's request of such a transfer: *Provided further,* That if such a request is not made, the site shall continue to be permitted by the Secretary of Agriculture in accordance with existing rules, regulations and procedures.

(d) Patents issued by the Secretary of the Interior for the lands conveyed pursuant to subparagraph 2(c)(1) of this Section shall reserve to the public, for administration by the Secretary of Agriculture or by such State or local units or agencies of government, or by private non-profit organizations, as the Secretary of Agriculture in consultation with local planning authorities determines appropriate and qualified to fulfill the purposes of the reservation:

(1) the right of access for fishing use along all streambeds (up to the ordinary high water mark) on streams which flow through the lands conveyed;

(2) a right-of-way for the Colorado Trail along its existing routes through the lands identified on Map 3 or along relocated routes as may be identified by the Secretary of Agriculture in consultation with local planning authorities;

(3) a right-of-way for relocation of the existing bicycle path through the lands identified on Map 2 to a new route as may be identified by the Secretary of Agriculture in consultation with local planning authorities.

(e) The Wheeler Administrative Site Withdrawal (C-28287) is hereby revoked.

SEC. 3. TERMS AND CONDITIONS OF EXCHANGE.

(a) The values of the lands to be exchanged pursuant to this Act shall be equal as determined by the Secretary of Agriculture, or if they are not equal, shall be equalized by the payment of money to Homestake or to the Secretary subject to the 25 per centum cash equalization limitation of section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716). The Secretary shall try to reduce the amount of cash equalization to as small an amount as possible. In lieu of any cash equalization payment which may be due Homestake pursuant to this Act, the Secretary may offer Homestake a monetary credit, which shall be considered "moneys received" within the meaning of the Act of May 23, 1908, against any moneys owed the Secretary by Homestake or its agents for timber sales within the Black Hills National Forest.

(b) In order to expedite the consummation of the exchange directed by this Act, Homestake shall arrange and pay for appraisals by a qualified appraiser or appraisers mutually acceptable to Homestake and the Secretary of all lands to be included in the exchange. Such appraisals shall be completed and submitted to the Secretary for approval within sixty days of the enactment of this Act. In the event the Secretary and Homestake are unable to agree to the appraised value of a certain tract or tracts of land to be included in the exchange within one hundred and twenty days of the date of enactment of this Act, the appraisal, appraisals, or appraisal issues in dispute shall be referred to bargaining or third party resolution/arbitration as set forth in section 3 of the Federal Land Exchange Facilitation Act of 1988 (Public Law 100-409, 43 U.S.C. 1716(d)). In determining which of the bargaining or third party dispute resolution/arbitration mechanisms to utilize pursuant to such section, Homestake and the Secretary shall recognize that Congress has already determined that the exchange directed by this Act is in the public interest and shall give emphasis to the appraisal dispute mechanism of mechanisms which will best permit the deadlines set forth in this Act to be timely met.

(c) Upon the completion of appraisals, the exchange of lands authorized and directed by this Act shall be consummated pursuant to an exchange agreement between the Secretary and Homestake executed in accordance with the policies and procedures normally used in National Forest land exchanges. The exchange shall be consummated at the earliest possible date and in no case later than two hundred and seventy days after the date of enactment of this Act.

(d) Lands acquired by the United States within or adjacent to the exterior boundaries of the Black Hills National Forest shall be incorporated in and shall be deemed to be a part of the Forest. The exterior boundary of the Black Hills National Forest is hereby authorized to, and shall be modified to, incorporate such lands upon their acquisition by the United States. Upon their inclusion in the National Forest System such lands shall be managed in accordance with the laws, rules and regulations generally applicable to the National Forest System, unless otherwise specifically provided by this Act.

CONVEYANCE TO SUMMIT COUNTY, COLORADO

SEC. 4.

(a) The Secretary of Agriculture is hereby authorized and directed to convey to Summit County, Colorado all right, title and interest of the United States in approximately three hundred and twenty-five acres of land as generally depicted on a map numbered 7 and entitled "Summit County Landfill," dated March 1990. Such conveyance shall be completed within six months of the date of enactment of this Act and shall be subject to the following conditions:

(1) the lands conveyed shall continue to be used for solid waste disposal, expansion of the Summit County landfill, or other authorized purposes of Summit County government;

(2) in the event Summit County ever sells, exchanges or otherwise disposes of all or a portion of the lands acquired pursuant to this section, all proceeds of such sale, exchange or disposal shall accrue to the United States, or the Secretary of Agriculture may elect to reacquire, without compensation to Summit County, any or all portions of such lands which have not been used for solid waste disposal, as he determines appropriate prior to their sale, exchange or disposal;

(3) the patent issued by the Secretary of the Interior pursuant this section shall not contain a reverter provision and under no circumstances shall lands used for solid waste disposal be eligible for reversion to the United States for operation of law after the issuance of such permit.

NATURAL RESOURCES USERS' COALITION,
Rapid City, SD, March 22, 1990.

RICH HARR,
Homestake Mining Co., Land Management Division, Lead, SD.

DEAR MR. HARR: The NRUC is a coalitian of 20 environmental and outdor recreational oriented organizations with a total membership fluctuating between 300 and 3500 persons. The NRUC Officers and Board of Directors unanimously and heartily indorse the proposed South Dakota-Colorado Land Exchange which would transfer approximately 14000 acres owned by Homestake Mining Co., located in the Black Hills of SD for approximately 1300 acres of US Forest Services land in Summit County, Colorado. We see many advantages for increased public recreation and wildlife habitat enhancement by US Forest Service acquisition of the Homestake Mining Co. land in the Black Hills via the proposed exchange.

Sincerely,

GARY ENGEL,
President, NRUC.

SOUTH DAKOTA WILDLIFE FEDERATION,
March 7, 1990.

MR. RICH HARR,
Homestake Mining Land Division, Lead, SD.

DEAR RICH: I would like to express my appreciation for the tour of the proposed land exchange areas conducted by the Homestake Land Management Division. As chairman of the Public Land Committee for the S.D. Wildlife Federation I feel that the proposed exchange of Homestake Land in the Black Hills to the U.S. Forest Service for Forest Service Lands in Colorado, is a good proposal.

The presentation of the proposed exchange yourself and Jim Wainwright, including the flight over the proposed areas and the tour by vehicle, helped clarify the

value of these areas to the public. Several values are apparent and include valuable deer winter range and wildlife habitat, high quality trout fisheries, as well as aesthetic natural beauty, (Spearfish Canyon).

We feel this exchange would be beneficial from a national standpoint as well as for South Dakota because of the numbers of people who come to the Black Hills from many other states to enjoy the recreational and scenic values.

We will encourage the U.S. House of Representatives and Senate to act favorably on this proposal.

Sincerely,

DON HAUSLE,
Chairman,
Public Lands Committee.

BLACK HILLS GROUP
OF THE SIERRA CLUB,
Rapid City SD, March 23, 1990.

MR. RICH HARR,
Homestake Mining Co.,
Lead, SD.

DEAR MR. HARR: We are pleased to inform you of our support for the proposed land exchange of Homestake lands in South Dakota for U.S. Forest Service land in Colorado. These lands have been under Homestake's good care for many years. We look forward to being involved in their stewardship when they are in the public trust.

To this end we intend to pursue a Wild and Scenic River designation for the Spearfish and Spearfish Creeks. We hope we will have the support of all the parties involved here in our endeavors.

We would also like to request that Homestake consider the transferral of the mineral rights in the lands conveyed to the Forest Service, and that the latter remove these lands from mineral entry.

The Black Hills Group is not familiar with the Federal land in Colorado selected for this exchange. We will defer to Sierra Club Groups in Colorado for any concerns they might have for that land.

Respectfully yours,

MICHAEL M. MELIUS,
Conservation Chair.

By Mr. BOREN (for himself and Mr. HEINZ):

S. 2384. A bill to amend the Internal Revenue Code of 1986 with respect to the treatment of certain real estate activities under the limitations on losses from passive activities; to the Committee on Finance.

TAX TREATMENT OF CERTAIN REAL ESTATE ACTIVITIES

● Mr. BOREN. Mr. President, I join today with the Senator from Pennsylvania [Mr. HEINZ] in introducing legislation to modify the passive loss rules to allow qualifying real estate professionals to offset their real estate losses against their income on the same basis as taxpayers in all nonrental businesses.

Under the passive loss rules enacted by the Tax Reform Act of 1986, taxpayers generally may offset losses incurred in activities in which they materially participate against any income. An exception to this rule is made for all taxpayers engaged in rental activities, including rental real estate. Such taxpayers are treated as passive investors regardless of the extent of their involvement in a rental real estate activity. Because of this treatment they may not offset their real estate losses against other income, including income earned from real estate activities, even if they participate in real estate business on a full-time basis.

This treatment unfairly discriminates against taxpayers in the real estate business and is exacerbating the financial institution crisis by inhibiting the carrying and work-out of distressed properties. The legislation would remedy these problems without allowing a return to tax sheltering through real estate investments.

The bill provides that the rental real property activities of an individual engaged in the real property business will be treated in the same manner as nonrental activities under the passive loss rules. To qualify under the bill, an individual must spend at least 50 percent of his or her working time and more than 500 hours in real property operations during a taxable year. Individuals who meet these tests would then be allowed to establish their material participation in real estate activities on the same basis as individuals in any other nonrental trade or business may establish material participation in such trade or business. Tax shelter investors in real estate and others whose principal occupation is not the real property business would receive no benefit from the bill.

In addition to removing an inequity in the Tax Code, this bill could have a significant beneficial impact on the financial institutions crisis in many States. By allowing real estate professionals to offset losses from distressed properties against their income, the bill would limit defaults on savings and loan and bank loans for such properties and encourage skilled developer-owner-operators to purchase and work out the distressed properties now overhanging the real estate markets in many areas. This would prevent further deterioration in property values in many markets and a further negative spiral of the problems of financial institutions.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2384

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 469 of the Internal Revenue Code of 1986 (relating to passive activity losses and credits limited) is amended by adding at the end the following new paragraphs:

"(7) TAXPAYERS ENGAGED IN THE REAL PROPERTY BUSINESS.—In the case of a taxpayer engaged in the real property business, the determination of what constitutes an activity and whether an activity is a passive activity shall be made by treating the taxpayer's rental real property operations, undertakings and activities in the same manner as nonrental trade or business operations, undertakings, and activities.

"(8) INDIVIDUALS ENGAGED IN THE REAL PROPERTY BUSINESS.—For purposes of paragraph (7), an individual is engaged in the real property business if—

"(A) such individual spends at least 50 percent of such individual's working time in real property operations; and

"(B) such individual spends more than 500 hours during the taxable year in real property operations.

"(9) REAL PROPERTY OPERATIONS.—For purposes of paragraph (8), the term 'real property operations' means any real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing, brokerage, appraisal, and finance operations.

"(10) WORKING TIME.—For purposes of paragraph (8), the term 'working time' means any time spent as an employee, sole proprietor, S corporation shareholder, partner in a partnership, or beneficiary of a trust or estate.

"(11) CLOSELY HELD C CORPORATIONS ENGAGED IN THE REAL PROPERTY BUSINESS.—For purposes of paragraph (7), a closely held C corporation is engaged in the real property business if—

"(A) 1 or more shareholders owning stock representing more than 50 percent (by value) of the outstanding stock of such corporation materially participate in the aggregate real property activities of such corporation; or

"(B) such corporation meets the requirements of section 465(c)(7)(C) (without regard to clause (iv)) with respect to the aggregate real property activities of such corporation."

(b)(1) Paragraph (2) of section 469(c) of such Act is amended to read as follows:

"(2) PASSIVE ACTIVITY INCLUDES CERTAIN RENTAL ACTIVITIES.—Except for rental activities treated in the same manner as nonrental trade or business activities pursuant to paragraph (7), each rental activity is a passive activity without regard to whether or not the taxpayer materially participates in the rental activity."

(2) Paragraph (4) of such section 469(c) is amended to read as follows:

"(4) MATERIAL PARTICIPATION NOT REQUIRED FOR PARAGRAPH (3).—Paragraph (3) shall be applied without regard to whether or not the taxpayer materially participates in the activity."

(c) The amendments made by this section shall apply to taxable years beginning after December 31, 1989.●

● Mr. HEINZ. Mr. President, I rise to join with the Senator from Oklahoma [Mr. BOREN] in introducing legislation to provide that those engaged in the real property business will be treated under the passive loss rules in the same manner as those engaged in nonrental businesses. This bill is carefully targeted to remedy an inequity in the Tax Code that is causing an unjustified economic distortion. The passive loss rules now treat all persons in the real estate business as passive investors, regardless of the degree of their participation in real estate activities.

The bill recognizes that real estate development and operation is an

active industry and that real estate professionals should be subject to the passive loss rules on the same basis as persons in other industries. The bill does not provide relief from the passive loss rules for persons in other occupations who might invest in real estate to shelter their other business or professional income.

The bill establishes special tests to determine if a taxpayer is in the real estate business, and not a mere investor in real estate. The tests require that a taxpayer spend at least 50 percent of his or her working time and more than 500 hours per year in real property operations. Real property operations mean real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation management, leasing, brokerage, appraisal, and finance operations.

If a taxpayer establishes that he or she is in the real estate business, then the taxpayer is allowed to establish his or her material participation under the rules applicable to those in other businesses. Thus, only those in the real estate business will benefit from this bill, and it merely puts them on an equal footing with taxpayers in other businesses.

By allowing material participants in the real estate industry to operate under the same rules as material participants in other industries, an unfair economic distortion would be removed. This distortion now is encouraging defaults of distressed properties where the owner is unable to fund continuing losses from after-tax income, which is not required for persons in other industries. Eliminating this distortion will provide some relief from the financial institution crises by encouraging continued operation of buildings with substantial out-of-pocket losses and severe reductions in value.●

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2385. A bill to establish the National Forest Foundation; to the Committee on Agriculture, Nutrition, and Forestry.

TO ESTABLISH THE NATIONAL FOREST FOUNDATION

● Mr. DOMENICI. Mr. President, much of American's environmental greatness lies within our National Forests and Grasslands.

Vast stretches of our land—8 percent, in fact, of America—is land within the jurisdiction of the Forest Service. These lands are found in 44 of our 50 States, and in Puerto Rico and the Virgin Islands.

These lands are spectacular areas of rugged mountains, prairies, trout streams, wilderness. They are lands providing resources for America's economic greatness.

Some of my most cherished memories come from a special place in my home State of New Mexico, the Cibola National Forest. When my children were younger, we often visited Las Huertas Canyon.

We enjoyed the drive, spending afternoons together in the mountains. I still carry fond memories of the shaded stream, picnics, and the drive around the north end of the mountain with a car full of children.

The American people not only want the Federal Government to protect this resource, but I am convinced they want to participate personally in protecting and improving our forests.

As a result, Mr. President, I am today introducing the National Forest Foundation Act, legislation that will bring together the talents and resources of the private sector with those in the Forest Service to enhance the multiple-use management of our National Forests and Grasslands.

This bill would establish a charitable, nonprofit corporation to raise and direct money and other resources into our National Forests and Grasslands. Specifically, the Foundation will funnel private donations for projects to rehabilitate and enhance the natural and cultural resources on the national forests.

These donations will be used to complement ongoing Federal efforts. For instance, they might be used to protect and interpret archaeological sites, clean up visitor areas, develop and maintain trails, and plant trees.

Specifically, under this bill, the Foundation would:

First, encourage, accept, and administer private gifts of money and property to benefit the services and activities of the U.S. Forest Service;

Second, undertake and conduct activities to enhance the on-the-ground management and enjoyment of lands in our National Forest System;

Third, conduct and encourage educational, technical, and other activities that support multi-use management, research, cooperative forestry, and other Forest Service programs; and

Fourth, promote cooperation among the Forest Service, the private sector, conservation organizations, educational institutions, and the general public.

Mr. President, I see this legislation as a perfect complement to the President's "America the Beautiful" initiative. The President's initiative proposes, among other things, a reforestation program to plant more than 1 billion trees per year on private lands and in communities across America.

This bill shares many of the same goals. What "America the Beautiful" would do for private forested lands and communities, the National Forest Foundation would accomplish for our National Forests and Grasslands, using the assistance and resources of the private sector.

Achieving balanced management of America's resources requires cooperation. It requires comprehensive planning as well as sensitive administration and wise use.

The Foundation would provide a means for the private sector to actively participate in numerous projects such as buying and developing habitat for improvement, recreation development, restoring and understanding our cultural heritage, returning an abused riparian area to health, management, research, reforestation, and educational programs.

Mr. President, this concept first came to me from a former legislative fellow on my staff, a man who had served as a District Ranger in New Mexico. Like most public land managers, he was faced with the difficult task of meeting public demands for enjoyment of the National Forests, while working within limited budgets.

In seeking to reconcile these differences, he discovered the willingness to individuals and private organizations to provide their talent and resources to accomplish worthwhile projects that never were funded.

So the National Forest Foundation will provide a vehicle to facilitate that kind of cooperation, cooperation between the private sector and the Forest Service.

Under my bill, the Foundation would be governed by a 15-member Board of Directors appointed by the Secretary of Agriculture. The Chief of the Forest Service would serve as an ex officio, non-voting member.

Through its Board of Directors—consisting of trained and experienced professionals in natural resource management, law, or research—the National Forest Foundation would provide a broad and diverse multiple-use focus to a great variety of projects of interest to all Americans. Board members would serve without pay, but could be reimbursed for expenses.

Under this bill, the Secretary of Agriculture is authorized to provide the Foundation $500,000 per year during the initial 2 years of the Act. This would be start-up money.

Further, the Secretary is authorized to provide up to $1,000,000 per year for 5 years in funds, on a 1-for-1 basis, to match private contributions.

Finally, Mr. President, I would note that two other foundations have been successful in accomplishing very specific and, in many ways, similar goals to the National Forest Foundation. These are the National Parks Foundation and the National Fish and Wildlife Foundation.

These foundations have been very successful in bringing the private sector together with the public land managers to protect and enhance our public resources.

I see the Foundation as a catalyst in developing cooperative relationships with private conservation organiza-

tions, industry, the academic community, and the philanthropic community in meeting the multiple-use objectives of our National Forests and Grasslands.

Mr. President, in developing this bill I had the pleasure of working with numerous conservation organizations, and I have received a number of letters of support from these organizations.

I ask unanimous consent that the text of the bill, as well as two of letters supporting this concept, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2385

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Forest Foundation Act".

SEC. 2. ESTABLISHMENT AND PURPOSES OF FOUNDATION.

(a) ESTABLISHMENT.—There is established the National Forest Foundation (hereinafter referred to as the "Foundation") as a charitable and nonprofit corporation domiciled in the District of Columbia.

(b) PURPOSES.—The purposes of the Foundation are to—

(1) encourage, accept, and administer private gifts of money, real and personal property for the benefit of, or in connection with, the activities and services of the Forest Service of the Department of Agriculture;

(2) undertake and conduct activities that further the purposes for which units of the National Forest System were established and are administered;

(3) undertake, conduct and encourage educational, technical and other assistance, and other activities that support the multiple use, research, cooperative forestry and other programs administered by the Forest Service; and

(4) promote cooperation among the Forest Service, the private sector and other governmental and educational agencies and institutions.

SEC. 3. BOARD OF DIRECTORS OF THE FOUNDATION.

(a) ESTABLISHMENT AND MEMBERSHIP.—The Foundation shall have a governing Board of Directors (hereinafter referred to as the "Board"), which shall consist of fifteen Directors, each of whom shall be a United States citizen. At all times, a majority of members of the Board shall be educated or have actual experience in natural or cultural resource management, law, or research. To the extent practicable, members of the Board shall represent diverse points of view relating to natural and cultural resource issues. The Chief of the Forest Service shall be an ex officio nonvoting member of the Board. Appointment to the Board shall not constitute employment by, or the holding of an office of, the United States for the purposes of any Federal law.

(b) APPOINTMENT AND TERMS.—Within one year from the date of enactment of this Act, the Secretary of Agriculture (hereinafter referred to as the "Secretary") shall appoint the Directors of the Board. Directors shall be appointed for terms of six years; except that the Secretary, in making the initial appointments to the Board, shall appoint one-third each of the Directors to terms of two, four, and six years respectively. A vacancy on the Board shall be filled within sixty days of such vacancy in the manner in which the original appointment was made. No individual may serve more than twelve consecutive years as a Director.

(c) CHAIRMAN.—The Chairman shall be elected by the Board from its members. A chairman shall serve for a two-year term, and may be re-elected to the post during his or her tenure as a Director.

(d) QUORUM.—A majority of the current voting membership of the Board shall constitute a quorum for the transaction of business.

(e) MEETINGS.—The Board shall meet at the call of the Chairman at least once a year. If a Director misses three consecutive regularly scheduled meetings, that individual may be removed from the Board by majority vote of the Board of Directors and that vacancy filled in accordance with subsection (b) of this section.

(f) REIMBURSEMENT OF EXPENSES.—Voting members of the Board shall serve without pay, but may be reimbursed for the actual and necessary traveling and subsistence expenses incurred by them in the performance of their duties for the Foundation. Such reimbursement may not exceed such amount as would be authorized under section 5703 of title 5, United States Code, for the payment of expenses and allowances for individuals employed intermittently in the Federal Government service.

(g) GENERAL POWERS.—The Board may complete the organization of the Foundation by appointing officers and employees, adopting a constitution and bylaws consistent with the purposes of the Foundation and the provisions of this Act, and undertaking other such acts as may be necessary to function and to carry out the provisions of this Act.

(h) OFFICERS AND EMPLOYEES.—(1) Officers and employees may not be appointed until the Foundation has sufficient funds to pay for their services. No individual so appointed may receive pay in excess of the annual rate of basic pay of an employee of the Federal Government at grade GS-18 of the General Schedule as provided under section 5332 of title 5, United States Code.

(2) The Board shall appoint a chief executive officer who shall serve at the direction of the Board and who shall have demonstrated knowledge and experience in matters relating to natural and cultural resource conservation, management, law, or research.

SEC. 4. CORPORATE POWERS AND OBLIGATIONS.

(a) IN GENERAL.—The Foundation—

(1) shall have perpetual succession;

(2) may conduct business throughout the several States, territories, and possessions of the United States and in foreign countries commensurate with and in support of international activities which the Secretary is authorized to carry out pursuant to other laws;

(3) shall have its principal offices in the Washington, D.C. metropolitan area; and

(4) shall at all times maintain a designated agent in the District of Columbia authorized to accept service of process for the Foundation.

(b) NOTICE AND SERVICE OF PROCESS.—The serving of notice to, or service of process upon, the agent required under this paragraph, or mailed to the business address of such agent, shall be deemed as service upon or notice to the Foundation.

(c) SEAL.—The Foundation shall have an official seal selected by the Board which shall be judicially noticed.

(d) POWERS.—To carry out its purposes under section 2, the Foundation shall have, in addition to powers otherwise authorized under this Act, the usual powers of a corporation in the District of Columbia, including the power to—

(1) accept, receive, solicit, hold, administer and use any gift, devise, or bequest, either absolutely or in trust, or real or personal property or any income therefrom or other interest therein;

(2) acquire by donation, gift, devise, purchase or exchange any real or personal property or interest therein;

(3) unless otherwise required by the instrument of transfer, sell, donate, lease, invest, reinvest, retain or otherwise dispose of any property or income therefrom;

(4) borrow money and issue bonds, debentures, or other debt instruments;

(5) sue and be sued, and complain and defend itself in any court of competent jurisdiction (except that the Directors of the Board shall not be personally liable, except for gross negligence);

(6) enter into contracts or other arrangements with public agencies, private organizations, and persons and to make such payments as may be necessary to carry out the purposes thereof;

(7) lease space for the conduct of its activities in the District of Columbia or elsewhere; and

(8) do any and all acts necessary and proper to carry out the purposes of the Foundation.

(d) PROPERTY.—(1) The Foundation may acquire, hold and dispose of lands, waters, or other interests in real property by donation, gift, devise, purchase or exchange. For the purposes of this Act, an interest in real property shall include, but not be limited to, mineral and water rights, rights of way, and easements appurtenant or in gross. A gift, devise, or bequest may be accepted by the Foundation even though it is encumbered, restricted, or subject to beneficial interests of private persons if any current or future interest therein is for the benefit of the Foundation.

(2) The Foundation and any income or property received or owned by it, and all transactions relating to such income or property, shall be exempt from all Federal, State, and local taxation with respect thereto.

(3) Contributions, gifts, and other transfers made to or for the use of the Foundation shall be treated as contributions, gifts, or transfers to an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1986.

SEC. 5. ADMINISTRATIVE SERVICES AND SUPPORT.

(a) STARTUP FUNDS.—For purposes of assisting the Foundation in establishing an office and meeting initial administrative and other startup expenses, the Secretary is authorized to provide the Foundation $500,000, from funds appropriated pursuant to section 10(a), per year for the two years following the date of enactment of this Act.

(b) MATCHING FUNDS.—In addition to the startup funds provided under subsection (a) of this section, for a period of five years from the date of enactment of this Act, the Secretary is authorized to provide matching funds for administrative expenses incurred by the Foundation as authorized by section 10 of this Act including reimbursement of

expenses under section 3, not to exceed then current Federal Government per diem rates.

(c) ADMINISTRATIVE EXPENSES.—At any time, the Secretary may provide the Foundation use of Department of Agriculture personnel, facilities, and equipment, with partial or no reimbursement, with such limitations and on such terms and conditions as the Secretary shall establish.

SEC. 6. VOLUNTEERS.

The Secretary may accept, without regard to the civil service classification laws, rules and regulations, any director, officer, employee or agent of the Foundation as a volunteer for purposes of the Volunteers in the National Forests Act of 1972 (16 U.S.C. 558a through 558d; 86 Stat. 147).

SEC. 7. AUDITS AND REPORT REQUIREMENTS.

(a) AUDITS.—For purposes of the Act entitled "An Act for audit of accounts of private corporations established under Federal law," approved August 30, 1964 (36 U.S.C. 1101 through 1103; Public Law 88-504) the Foundation shall be treated as a private corporation established under Federal law.

(b) ANNUAL REPORTS.—The Foundation shall, transmit each year to Congress a report of its proceedings and activities of the previous year, including a full and complete statement of its receipts, expenditures, and investments.

SEC. 8. UNITED STATES RELEASE FROM LIABILITY.

The United States shall not be liable for any debts, defaults, acts or omissions of the Foundation nor shall the full faith and credit of the United States extend to any obligations of the Foundation. The Foundation is not an agency or establishment of the United States.

SEC. 9. AMENDMENT AND REPEAL.

The Congress expressly reserves the right to repeal or amend this Act at any time.

SEC. 10. AUTHORIZATION OF APPROPRIATIONS.

(a) START-UP FUNDS.—For the purposes of section 5(a) of this Act, there are authorized to be appropriated $1,000,000.

(b) MATCHING FUNDS.—For the purposes of section 5(b) of this Act, during the five-year period following enactment of this Act, there are authorized to be appropriated $1,000,000 annually to the Secretary of Agriculture to be made available to the Foundation to match, on a one-for-one basis, private contributions made to the Foundation.

THE NATIONAL WILD TURKEY FEDERATION, INC.,
Edgefield, SC, March 28, 1990.

Hon. PETE V. DOMENICI,
U.S. Senate, Senate Dirksen Office Building, Washington, DC.

DEAR SENATOR DOMENICI: On behalf of the 60,000+ members of the National Wild Turkey Federation in 362 chapters in 45 states, I want to express our enthusiastic support for your bill to establish the National Forest Foundation for the benefit of, or in connection with, the activities and services of the Forest Service of the Department of Agriculture.

The National Wild Turkey Federation has had an excellent working relationship with the Forest Service for a number of years. In 1986 we signed a Memorandum of Understanding with the USDA Forest Service expressing our intent to cooperate together to enhance the management of the American wild turkey on lands administered by the Forest Service.

Since then, the NWTF has contributed more than $175,000 toward various projects with the Forest Service including habitat enhancement, wild turkey restoration, purchase of equipment, and research efforts.

Through the partnership program "Making Tracks," initiated in 1989, our cooperation with, and support for projects on National Forest System lands has increased.

Your bill to establish the National Forest Foundation will provide the opportunity for organizations like the National Wild Turkey Federation to increase their conservation efforts with the Forest Service by involving the private sector and other governmental and educational agencies and institutions thus increasing the financial resources available for our natural resources.

Sincerely,

ROB KECK,
Executive Vice President.

WILDLIFE MANAGEMENT INSTITUTE,
Washington, DC, March 28, 1990.

Hon. PETE V. DOMENICI,
Dirksen Senate Office Building, Washington, DC.

DEAR PETE: After reviewing your proposal to establish the National Forest Foundation, we enthusiastically offer our support.

The Wildlife Management Institute is dedicated to improving resource management on the National Forest System. Considerable progress has been made in recent years, and we believe that a foundation as you envison could expedite even more positive results.

The Forest Service has aggressively implemented the Challenge Cost Share Program authorized by Congress in 1986. Millions of private dollars flow to the Service annually for fish and wildlife habitat improvement projects. We desperately need similar efforts to boost range restoration, watershed improvements and reforestation on the National Forest System. We believe that your foundation could help spread and finance Challenge Cost Share for all these resource programs, and thereby expedite forest plan implementation.

With best regard.

Sincerely,

LONNIE L. WILLIAMSON,
Vice President.●

By Mr. DASCHLE (for himself, Mr. LEAHY, and Mr. KERREY):

S. 2386. A bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to improve agricultural research and related programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1990

● Mr. DASCHLE. Mr. President, today I am introducing legislation on behalf of myself, Senator LEAHY, and Senator KERREY that will be the focus for the research, teaching, and extension title of the 1990 farm bill. This bill is the result of the culmination of several hearings that the Subcommittee on Agricultural Research and General Legislation has held on research over the last year. All of the hearings have had the primary goal of guiding the members of the subcommittee on what is needed in the research, teaching and extension title of the 1990 farm bill.

The legislation has three main goals: to improve priority setting and technological assessment of publicly funded agricultural research; to enhance the competitive research program, while maintaining formula funding, and provide for research programs in areas that have received inadequate attention; and to create an overall sense of order to the statutes relating to research.

Many observers and users of the agricultural research system have long been critical of the speed at which the agricultural research system adapts to changing demands. The priority setting legislation that I have developed will breathe new life into the Joint Council on Food and Agricultural Policy and the Users Advisory Board. A new focus is placed on the socioeconomic implications of our research programs through more extensive technology assessment, related to a set of overall goals for the research system.

This legislation will explicitly address certain key areas of research that have either only recently emerged or have had inadequate attention placed on them in the past. Doing more demand-related research is something that I have long advocated. In commodity policy the Government has a responsibility to try to facilitate achieving a balance between supply and demand. Too often we have focused almost exclusively on supply enhancing research that has led to the need for supply control commodity programs. We must do more research to enhance the demand for agricultural products, including developing both new crops and new uses and products. This legislation establishes a mechanism for expanding research and commercialization of new agricultural crops and products.

Farmers and consumers are concerned about protecting the quality of the Nation's water supply. You cannot open a newspaper today without reading an article on the Nation's water quality problems, and yet the research community remains behind the curve on providing the basic information needed to tackle the problems. To get the information to farmers and landowners, clear priorities must be established which will result in better coordination of water quality research efforts. This legislation will establish a research and education mandate that will give farmers the information they need to continue to protect the environment.

U.S. agriculture has the potential to be crippled from global climate. Senator LEAHY, the chairman of the Agriculture Committee, has taken a leadership role in the issue of climate change by introducing S. 1610. This legislation has been incorporated into this legislation and its provisions can lead us toward finding answers to address this important issue.

As we strive to maintain the sustainability of our planet from the threats of global climate change and water quality degradation, we must focus more on ways our farming community can contribute more while maintaining its profitability. This means paying more than just lip service to concepts such as sustainable agriculture and integrated resource management. We must actively pursue research programs that will help us implement practices that turn these concepts into reality. This bill includes legislation that Senator LEAHY has introduced which will improve the research and extension system's ability to address the concept of sustainable agriculture.

Taken together with a renewed commitment to the basic funding mechanism of our public agricultural research institutions and a new emphasis on competitive grants, this legislation will place U.S. agriculture where it needs to be in the 21st century.●

ADDITIONAL COSPONSORS

S. 22

At the request of Mr. PRESSLER, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 22, a bill to prohibit all United States military and economic assistance for Turkey until the Turkish Government takes certain actions to resolve the Cyprus problem.

S. 435

At the request of Mr. REID, the names of the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Hawaii [Mr. INOUYE] were added as cosponsors of S. 435, a bill to amend section 118 of the Internal Revenue Code to provide for certain exceptions from certain rules determining contributions in aid of construction.

S. 2041

At the request of Mr. SYMMS, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 2041, a bill to amend title XVIII of the Social Security Act to provide uniform national conversion factors for services of certified registered nurse anesthetists.

S. 2108

At the request of Mr. LEAHY, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 2108, a bill to promote the production of organically produced foods through the establishment of a national standard production for organically produced products and providing for the labeling of organically produced products, and for other purposes.

S. 2152

At the request of Mr. MCCONNELL, the names of the Senator from Indiana [Mr. LUGAR], and the Senator from North Carolina [Mr. SANFORD] were added as cosponsors of S. 2152, a bill to provide for international negotiations to achieve agreement on regulation of certain precursor and essential chemicals critical to the manufacture and trafficking of illicit narcotics.

S. 2222

At the request of Mr. BRADLEY, the names of the Senator from Colorado [Mr. WIRTH], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of S. 2222, a bill to amend the Internal Revenue Code of 1986 with respect to the tax treatment of payments under life insurance contracts for terminally ill individuals.

S. 2342

At the request of Mr. HATCH, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 2342, a bill to amend the Public Health Service Act to authorize additional grants for home health care demonstration projects, to require that applications be submitted to the chief executive officer of the State concerned in connection with such grants, and for other purposes.

SENATE JOINT RESOLUTION 224

At the request of Mr. BYRD, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of Senate Joint Resolution 224, a joint resolution to designate the month of May 1990 as "National Trauma Awareness Month."

SENATE JOINT RESOLUTION 273

At the request of Mr. BREAUX, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of Senate Joint Resolution 273, a joint resolution to designate the week of October 7-13, 1990, as "National Health Care Food Service Week."

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the names of the Senator from Idaho [Mr. SYMMS], and the Senator from Idaho [Mr. MCCLURE] were added as cosponsors of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990, as "National Scleroderma Awareness Week."

SENATE RESOLUTION 231

At the request of Mr. BRADLEY, the names of the Senator from Oregon [Mr. HATFIELD], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Resolution 231, a resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

SENATE RESOLUTION 263

At the request of Mr. LAUTENBERG, the names of the Senator from Arkansas [Mr. PRYOR], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of Senate Resolution 263, a resolution to express the Sense of the Senate regarding the need to establish a sound national transportation policy integrating all modes of transportation and maintaining a significant Federal role.

AMENDMENTS SUBMITTED

CLEAN AIR ACT AMENDMENTS

GORE (AND OTHERS) AMENDMENT NO. 1425

Mr. GORE (for himself, Mr. LAUTENBERG, Mr. BREAUX, Mr. PELL, Mr. KERRY, Mr. LIEBERMAN, Mr. WIRTH, Mr. CRANSTON, Mr. LEAHY, Mr. BRYAN, and Mr. ADAMS) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes, as follows:

On page 269 beginning at line 4 strike all through line 18 (paragraph (5)) and redesignate the succeeding paragraphs accordingly.

On page 273, line 22 strike "To" and on page 273 beginning at line 23 strike all through line 9 on page 274.

SENATE CONCURRENT RESOLUTION—112 RELATING TO AN ADVISORY OPINION FROM THE INTERNATIONAL COURT OF JUSTICE REGARDING LITHUANIA

Mr. MOYNIHAN submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 112

Whereas the State of Lithuania was historically an independent European power and existed as a sovereign state from 1386 to 1795;

Whereas the State of Lithuania was annexed by the Russian Empire in 1795, but its people continued to resist the annexation;

Whereas Lithuania regained its independence following World War I and functioned as an independent sovereign state until 1940;

Whereas Nazi Germany and the Soviet Union reached an illegal agreement in 1939 which placed the independent State of Lithuania within the "sphere of influence" of the Soviet Union;

Whereas the Soviet Union subsequently annexed Lithuania;

Whereas the Soviet Congress of People's Deputies has condemned the German-Soviet pact as "legally untenable and invalid from the moment [it was] signed";

Whereas the Lithuanian people are a distinct ethnic group and represent the overwhelming majority of the persons living in Lithuania today;

Whereas the Lithuanian people have declared their sovereign independence from the Soviet Union; and

Whereas the General Assembly has previously requested and received from the International Court of Justice advisory opinions concerning the right of self-determination

for the peoples of Western Sahara and the legal status of Namibia;

Whereas President Gorbachev has repeatedly expressed the Soviet Union's strong desire to adhere to international legal norms and its belief that the United States and the Soviet Union should make greater use of the International Court of Justice;

Whereas it is in the interests of the United States, the Soviet Union, the people of Lithuania and the world community that disputes be resolved in accordance with principles of law rather than through the use of force: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) expresses its grave concern regarding the situation in Lithuania;

(2) calls upon the Soviet Union to adhere to its stated acceptance of the norms of international law as they apply to Lithuania;

(3) strongly urges the President and the Secretary of State to make all appropriate efforts to ensure that either the Security Council or a special session of the General Assembly requests from the International Court of Justice an advisory opinion concerning the right of the Lithuanian people to exercise self-determination.

SENATE CONCURRENT RESOLUTION 113—RELATIVE TO NUCLEAR SALES TO SOUTH ASIA

Mr. GLENN (for himself, Mr. PELL, and Mr. BOSCHWITZ) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 113

Whereas 140 parties to the Nuclear Non-Proliferation Treaty will assemble in August to deliberate the status of that treaty in its twentieth year of existence;

Whereas section 403 of the Nuclear Non-Proliferation Act of 1978 directs the President to take immediate and vigorous steps to seek agreement from all nations to ensure that IAEA safeguards will be applied to all peaceful nuclear activities in, under the jurisdiction of, or under the control of any non-nuclear-weapon state;

Whereas France, China, and the Soviet Union have recently announced their intentions to sell nuclear reactors to Pakistan and India without any requirement for full-scope international safeguards;

Whereas both of these nations have fought three wars in 43 years and the situation in South Asia remains potentially volatile;

Whereas both nations are continuing research and development activities related to nuclear explosive devices and have in the past used peaceful nuclear technology for such purposes; and

Whereas full-scope international nuclear safeguards benefit the peace and security of all nations: Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That (a) it is the sense of the Congress that—

(1) the sale or transfer by any nation of nuclear materials and equipment or sensitive nuclear technology to any non-nuclear-weapon state without the requirement of full-scope safeguards will undermine international efforts to halt the regional and global spread of nuclear weapons;

(2) the President should continue his efforts to encourage Pakistan, India, and other non-nuclear-weapon states that are not parties to the Nuclear Non-Proliferation Treaty to agree to full-scope safeguards;

(3) the President should urge all current adherents to the Nuclear Non-Proliferation Treaty to join the United States in seeking these objectives; and

(4) the President should continue and expand his efforts to encourage all nuclear supplier nations to require full-scope safeguards as a condition for future nuclear commerce and cooperation with all non-nuclear-weapon nations.

(b) For purposes of subsection (a)—

(1) the term "non-nuclear-weapon state" is used within the meaning of the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow on July 1, 1968; and

(2) the terms "nuclear materials and equipment" and "sensitive nuclear technology" have the same meanings as are given to such terms in paragraphs (4) and (6), respectively, of section 4(a) of the Nuclear Non-Proliferation Act of 1978.

Mr. GLENN. Mr. President, the French Government announced last month that it is ready and willing to supply a nuclear reactor to Pakistan as part of a broader program of nuclear cooperation to be negotiated over the next few weeks.

I ask unanimous consent to have printed in the RECORD at the end of my remarks some recent press accounts of this development from around the world, including two notices of official opposition to this deal from the Governments of the United States and Japan.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

France's announcement comes in the wake of new Chinese nuclear offers to Pakistan and rumors that even the Soviets are considering a reactor sale. These deals appear to have broken a decade-old international embargo intended to prevent significant nuclear sales to Pakistan until it agrees to safeguard all of its nuclear facilities. In other words, let information be known about all of their facilities. That is basically what safeguards are.

In addition, both France and the Soviet Union appear willing to sell reactors to India, also without any requirement for full-scope safeguards.

The consequences of all of these nuclear deals will extend far beyond South Asia, as pressures will grow among other nuclear supplier nations to abandon full-scope safeguards as a requirement for nuclear commerce. My colleague, Senator EXON summed up France's recent announcement very well in his statement here on March 6, when he said that "* * * the French decision flies in the face of an international approach to controlling the spread of such technology—control which is slowly and dangerously eroding."

I agree with that assessment. This deal, and others like it, will certainly complicate international efforts to stop the spread of nuclear weapons. Offering nuclear cooperation without full-scope safeguards is bad enough, but offering such technology to two nations that are already engaged in a nuclear arms race is particularly hard to justify, even in the context of the billions of dollars we ourselves are providing to Pakistan. Indeed, our continuing failure to hold Pakistan to its many peaceful nuclear assurances may well have signaled to the world that America would turn a "blind eye" toward new nuclear commerce with Pakistan. That perception needs to be corrected—the time has come to open that eye.

I am not going to use this occasion to remind my colleagues about the specifics of Pakistan's continuing efforts to acquire the bomb, the repeated violations of its solemn nuclear assurances to the United States, or the growing reality of a nuclear arms race in South Asia.

Mr. President, I have discussed these efforts in previous statements over and over again on the floor and expect to address them again and again as developments warrant. I have a list of those times I have risen on the floor. I think there are a dozen or so. I ask unanimous consent they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[See *Cong. Rec.*, 16 November 1989, p. 29418; 17 November 1989, p. 29823; 22 June 1989, p. S782; 16 May 1989, p. 2306; 18 December 1987, p. 36226; 11 December 1987, p. 35187; 8 October 1987, p. 22130; 3 August 1987, p. 21954; and 8 May 1987, p. 11773.]

Mr. GLENN. Mr. President, however, the decisions by France, the Soviet Union, and China to sell nuclear reactors to mutually hostile nations in South Asia raise two fair questions. First, what difference does it make to us of these deals proceed? And second, what, if anything, can America—in partnership with France and other nuclear supplier nations—do about these growing commercial pressures on the international nuclear nonproliferation regime, pressures which may bring the benefits of nuclear energy to precisely those nations that are the least willing to accept its full responsibilities?

I believe we should be deeply concerned about all of these recent deals, for reasons that go far beyond the secret nuclear activities now underway in Pakistan and India. I would like to discuss some of these reasons.

THE SPOILS OF PROLIFERATION

The United States has for many years urged other nuclear suppliers nations to require their foreign customers to place all of their nuclear facilities under international safeguards—a condition we have required of our own foreign customers ever since enactment of the Nuclear Non-Proliferation Act of 1978.

Mr. President, I was the author of that act in 1978, the Nuclear Non-Proliferation Act. We had some choices to be made at that time. There were those in our midst who said the best way to try to control nuclear energy into the future was to let our people sell abroad, sell anywhere, encourage that, get American nuclear industry involved anywhere in the world that we wanted to go, and that way we would know what was going on. I viewed that as a rather defeatist attitude at the time.

On the other hand, there was the proposal that we try to work with foreign governments and say that there be only half a dozen or so basic suppliers of nuclear equipment and technology that could be used to make a bomb and, if we could somehow get those nations to cooperate sufficiently, we could probably for the next 12 or 15 years stop the spread of the equipment and the technology to make nuclear weapons. In that interim time period, we would do our level best to try to negotiate down the stockpiles, vis-a-vis the Soviet Union, and get some agreement on this.

Meanwhile, let us not spread sensitive nuclear technology and nuclear weapons capability to more and more nations around the world, and we ask that other nations follow our lead in not providing that kind of technology and that kind of equipment to other nations around the world.

For nations that would foreswear development of nuclear weapons, we ask them to sign the nonproliferation treaty. That treaty basically says to the United States, "We will cooperate with you in things nuclear if you foreswear going to nuclear weapons, and in return for that, we will try to cooperate with you in all the peaceful benefits of nuclear energy."

What has been the result of that? I think it has been pretty good. It has not been perfect by a long shot, but we have had some 140 nations sign up under the NPT. It gets reviewed every 5 years. It is up for review again this summer. We have 140 nations that have become parties to that treaty. So I think our policy through the years has had a pretty decent effect on curbing the technology and equipment flow that will permit more and more nations to come into a nuclear weapons capability.

What has happened over those 12 or 15 years? We have found also that, gradually, the technology spread goes on. Gradually this method, this idea, or this concept of how you go about making a nuclear weapon has spread, enough so that if the people have the equipment and a little more technology, we are going to have a breakout of many nations around the world, perhaps, with a nuclear weapons capability.

It is rather ironic that this threat comes at the particular time when we just about have some agreements with the Soviet Union, finally, to scale down some of the nuclear dangers of the world. That is one reason why I see this as being so important.

The roots of this policy go all the way back to the Acheson/Lilienthal and Baruch plans shortly after World War II, when it was already acknowledged that some form of international controls would be needed over many potentially sensitive steps of the nuclear fuel cycle. For what we viewed as security reasons then, those proposals by Acheson, Lilienthal, and Baruch were not placed into effect.

Over the years, other nations have come to see the wisdom of requiring their nuclear customers to have full-scope safeguards. Japan, for instance, now requires this condition, as do Canada, Australia, Sweden, Norway, Czechoslovakia, and Poland. Even West Germany—a nation that has suffered repeated nuclear export scandals in recent years, including this year—has shown some preliminary signs that it, too, may finally be willing to require its foreign nuclear customers to adopt such controls.

France's action, however, along with the deals announced by the Soviets and the Chinese, jeopardize not just a nuclear embargo to Pakistan—these sales together represent a direct assault on an important long-term goal of the global nuclear nonproliferation regime, an assault that may have produced some new business, but absolutely nothing by way of additional nuclear restraint.

The United States-sponsored international embargo on nuclear sales to Pakistan in particular was established for the simple reason, which surely is no secret to the French, that Pakistan has sought ever since the Indian nuclear test in 1974 to become a nuclear-weapon state; former Prime Minister Ali Bhutto once said that Pakistan would go so far as to "eat grass" to accomplish that aim. Unfortunately, it is Pakistan's poorest citizens who are eating the most grass as the nation continues to divert its scarce resources away from pressing economic development goals in order to acquire bombs. There has surely been no perestroika in Pakistan's nuclear program.

The question is, when a nation takes such steps as Pakistan has taken with its nuclear program, and then complains about an urgent national shortage of electric power, it is then incumbent on foreign suppliers to satisfy that need? The answer is obviously no. Among other goals, nuclear nonproliferation policies seek to raise the cost and expand the time required for additional nations to acquire nuclear weapon capabilities. An international nuclear embargo—even an imperfect one—serves this purpose well by encouraging proliferant nations to reassess the full costs of their nuclear policies.

In other words, the purpose of such a nuclear embargo is not simply to punish, but to offer some real economic and technological incentives for nations to conclude that the bomb is simply not worth its heavy price. The greater the "need" that both Pakistan and India now feel for nuclear energy, the greater will be their incentive to reconsider the costs of their weapon options.

Yet France has recently cited the urgent need for electricity in India and Pakistan as a reason to supply nuclear technology.

Although such an argument may well serve some business and other foreign policy interests, this argument simply does not stand up as a nonproliferation measure. The needs these countries are experiencing merely reflect the costs they are paying for proliferation. By offering nuclear technology to nations that are each actively pursuing weapon options, France, the Soviet Union, and China are simply lowering the costs that both Pakistan and India will have to pay for the bombs in their basements. And once transferred, nuclear know-how and assembled facilities cannot be summoned back home when—once again—solemn commitments are broken.

LESSONS FROM THE FRENCH CONNECTION

France, of all nations, should know better than to pursue such a course. Much like the United States, Great Britain, West Germany, and other nations with advanced nuclear industries, France has also been victimized by repeated Pakistani efforts to acquire technology and components for its bomb program. A classic example of such procurement efforts was discussed in the book, "The Islamic Bomb," which chronicled the activities of a certain individual, Mr. S.A. Butt, who, in the authors' words, "* * * would organize Pakistan's surreptitious purchasing network from a little office on the outskirts of Paris, running the most successful foray into nuclear espionage since the Soviet Union set out to penetrate Anglo-American nuclear efforts during and right after World War II." [Steve Weissman and Herbert Krosney, "The Islamic Bomb," New York Times Books, 1981, p. 47-48.]

More recently, the technical section of the Pakistani Embassy in Paris has been cited in West German press as involved in assisting an illicit export from West Germany of technology and equipment associated with tritium, a material used in H-bombs. That is right, H-bombs [Welt Am Sonntag, 25 December 1988, p. 1; translated in FBIS-WEU-88-249, 28 December 1988, p. 6.]

Late last year, the West German newsweekly Der Spiegel reported that several tons of zircaloy—a cladding material used in fabricating nuclear fuel—was obtained in France, at a high price, and transshipped to Pakistan through West German intermediaries [Der Spiegel, 6 November 1989, p. 125-131; translated in JPRS-TND-89-022, 29 November 1989, p. 37.]

But France has not been alone in suffering from violations of its nuclear export regulations and other nonproliferation controls. Using United States-origin heavy water and a Canadian reactor—both of which were supplied for peaceful purposes—India produced the plutonium used in its so-called peaceful nuclear explosion in 1974. Having learned a lesson from this experience, both Canada and the United States now require their foreign nuclear customers to have full-scope safeguards.

The Soviets have had their own problems in this area. On June 21, 1988, the Wall Street Journal reported the remarks of a Soviet diplomat acknowledging that in 1985 the Soviet Union may have been duped into illicitly providing heavy water—reportedly to India—by means of a West German intermediary. Yet this apparent disrespect for nonproliferation controls evidently did not discourage the Soviets from entering into a $8 billion industrial agreement with India in November 1988 that included finance for two 1,000-megawatt reactors, without a full-scope safeguards requirement. Earlier that year, the Soviets also leased India a nuclear-powered submarine. So much for the high price of proliferation.

These transactions bring commercial interests into direct competition with international security concerns, a tension that is particularly evident in France's recent deal with Pakistan. France argues that the specific reactor to be exported will be safeguarded, that nuclear sales will only further restrain Pakistan's nuclear ambitions, and that no sensitive nuclear fuel cycle technology will be transferred. The Soviets and Chinese have used similar arguments to rationalize their current nuclear discussions with India and Pakistan. These arguments, however, need to be weighed against Pakistan's long and well-established record of not living up to its previous nuclear assurances—a record we have discussed over and over and over again with Pakistan—particularly those assurances given to the United States, and against the ample evidence that both South Asian nations are actively pursuing their nuclear weapons options.

The massive aid we provide to Pakistan has led the United States to be justifiably accused in recent months of turning a blind eye to proliferation; at least our blindness is not so severe that it prevents us from seeing the folly in selling nuclear technology to countries actively working on the bomb. Such a policy appears even less responsible coming at a time when the purchasing nations are confronting each other over an ethnic dispute that has led both nations to war more than once in recent history. K. Subrahmanyam, one of India's leading defense analysts, summarized the situation in Kashmir in these words: "Anything is possible when two forces are facing each other and have the history that these two have." (Reuters, 1 February 1990.)

We should not, therefore, be too reassured by the argument that France and the Soviet Union would, in equanimity, like to sell reactors to India as well. The interests of the international nuclear salesmen appear once again to be ascending over security concerns in the region.

WITHER THE NPT?

The repercussions of these deals will surely extend beyond the region of South Asia. I am especially concerned about the future of the Nuclear Non-Proliferation Treaty [NPT]. Unlike the 140 nations that have become parties to this treaty, France and China not only continue to refuse to join but have even criticized the treaty as being inequitable and contrary to the sacred principle of national sovereignty. Yet if such a view is valid, why then have 140 nations voluntarily chosen to become parties to this agreement? Also, safeguards simply do not inequitably hold back the peaceful development of atomic energy—they are designed instead to hold back the secret development of bombs. That is a significant difference.

These new nuclear deals in South Asia come on the eve of an international conference that will soon take place in Geneva to deliberate the status of the NPT. The eagerness of France, the Soviet Union and China to do nuclear business with non-signatories to the NPT only serves to weaken the international nuclear regime centered on that treaty.

It is unreasonable to expect that some nations which have signed the NPT might begin to wonder if it is worthwhile to remain parties if they can obtain the benefits of nuclear cooperation without the responsibilities of treaty membership? And how long will other nuclear suppliers feel it is in their own commercial interests to sit back and watch France and other nations profit from nuclear sales based on less comprehensive nuclear conditions than these suppliers require of their own customers?

STANDARDS FOR NUCLEAR COOPERATION

There is little doubt that the international nuclear regime is now facing a crisis that no nation can afford to ignore. Under existing standards, all non-nuclear-weapon-states that are party to the NPT must have safeguards of the International Atomic Energy Agency [IAEA] over all of their nuclear facilities. These controls reassure both the nuclear nations and their buyers' neighbors that nuclear technology will be used exclusively for peaceful purposes. When nuclear cooperation takes place under these controls, all members of international society—not just those involved in specific deals—stand to benefit from the increased security produced by those controls.

Under current French policy, however, nuclear business can evidently continue as usual even if its partner is a nonsignatory of the NPT, even if the partner is operating an unsafeguarded uranium enrichment plant, even if it is building an unsafeguarded nuclear fuel reprocessing plant, even if it is secretly buying up parts for an unsafeguarded plutonium production reactor, even if it is conducting explosive tests of various components of nuclear devices, even if it cannot keep its most solemn nuclear assurances, and even if it is continuing to violate national and international nuclear export controls.

The same policy evidently now applies with respect to the nuclear cooperation standards of the Soviet Union and, of course, China. All three nations have simply brushed aside international criticism of such nuclear supply practices. "Purely a domestic affair," we are told. "Cooperation will only produce further restraint," they add.

Yet if France is so convinced that Pakistan is committed to its peaceful international nuclear commitments, why then does France not go all the way and sell Pakistan its long-sought nuclear fuel reprocessing plant as well? This is the process of making the fissile material that goes into nuclear weapons. France's evident decision not to supply such a plant raises several interesting questions: Does France not have full confidence in the ability of the IAEA to safeguard a commercial sized nuclear reprocessing plant and the plutonium it produces? Or, does France still harbor some doubts about Pakistan's ability or willingness to live up to its peaceful nuclear commitments? If the later is true, then France's case for selling a reactor is only further eroded.

As France continues to pursue such a policy, pressures will grow among other nuclear supplier nations to follow suit. Since there are many export-hungry nuclear firms in other nations, France's deal could well lead to a global free-for-all in nuclear technology and a further threat to world peace. Is this what we can now expect from the new Europe? Will Pakistan, India, and other nations interested in acquiring nuclear explosives now provide the markets needed to rescue Eu-

rope's nuclear industry from the doldrums it is now facing?

History will be the ultimate judge of France's current and past nuclear policies, just as history will judge our own policies. History will judge whether the following activities have truly served the cause of global peace:

Did the French sale of a reactor and highly enriched uranium to Iraq, a nation committed to the total destruction of its neighbor, Israel, and continued talks with the Iraqi Government on supplying a new reactor to replace the Osirak reactor that Israel bombed in 1981, serve the cause of global peace?

Did it serve the cause of global peace for France to transfer technical data for a large nuclear fuel reprocessing plant in Pakistan, a deal that was ultimately terminated in 1977, as a direct result of strong United States opposition?

Or to assist India in building an unsafeguarded breeder reactor to produce large quantities of nuclear materials that could be used in nuclear weapons?

Or to supply to Israel with an unsafeguarded reactor for plutonium production and an unsafeguarded reprocessing plant at the Dimona site for plutonium separation?

Or to supply two large power reactors to South Africa and nuclear fuel services to keep them running?

Or to supply ballistic missile technology to India, Pakistan, and Israel?

RESOLUTION ON FULL-SCOPE SAFEGUARDS

France's apparent decision to resume nuclear sales to Pakistan is thus a test not only of its commitment to halting the global spread of nuclear weapons—it is also a test of our own commitment to that goal. The easy course would be for Congress, once again, to turn a blind eye toward the new specter of proliferation. But we cannot continue to sweep these threats to the international nuclear regime under the carpet year after year without someday having to confront the deadly consequences.

That is why I believe the U.S. Congress should firmly express its concerns about foreign nuclear policies that we see as potentially dangerous to world peace. America must demonstrate its determination to support publicly the principles of nonproliferation that have guided the actions of well over 100 nations in the postwar era, those 140 signers of the Non-Proliferation Treaty. The time has come for the people of the United States to lend some support to our diplomats who have been urging France and other nations for many years not to sell nuclear reactors in South Asia and other regions without full-scope safeguards.

Mr. President, I submit today a sense-of-the-Congress resolution addressing the pending sales of nuclear reactors to South Asia without any requirement for full-scope safeguards.

Mr. President, I am pleased to have as an original cosponsor of this resolution the distinguished chairman of the Foreign Relations Committee, Senator PELL, whose long support for nuclear nonproliferation efforts are already well recognized both among his colleagues and across the country.

The preamble identifies several circumstances leading to this resolution. First, it notes that an international meeting will take place later this year to discuss the status of the Nuclear Non-Proliferation Treaty, an agreement that has for 20 years promoted international peace and security through its provisions relating to full-scope safeguards and the provision of technical assistance on the peaceful uses of atomic energy to all treaty signatories. Second, it recalls section 403 of the Nuclear Non-Proliferation Act of 1978 which directs the President to promote the international acceptance of full-scope international safeguards. Third, it states that France, China, and the Soviet Union have announced their intention to sell reactors to Pakistan and India without full-scope safeguards. Fourth, it notes that both Pakistan and India have gone to war on three occasions in 43 years and that the regional situation remains potentially volatile. Fifth, it acknowledges that each is continuing activities related to the acquisition of nuclear explosive devices, and that each has in the past used peaceful nuclear technology for such purposes. And finally, the preamble affirms that full-scope safeguards benefit the peace and security of all nations.

The body of the resolution states the sense of Congress: First, that the sale by any nation of nuclear materials and equipment or sensitive nuclear technology to nonnuclear weapon nations, without a requirement for full-scope safeguards, will undermine international efforts to halt the regional and global spread of nuclear weapons; second, that the President should continue his efforts to encourage India, Pakistan, and all other nonnuclear weapon states that are not parties to the NPT to agree to full-scope safeguards; third, that the President should urge all parties to the Nuclear Non-Proliferation Treaty to join the United States in pursuing these objectives; and fourth, that the President should continue and expand his efforts to encourage all nuclear supplier nations to require full-scope safeguards as a condition for future nuclear commerce and cooperation.

THE VALUE OF FULL-SCOPE SAFEGUARDS

I want to be very clear about my intentions in submitting this resolution. I do not expect that the global threat of nuclear proliferation will be eliminated by any magic wand, including full-scope safeguards administered by the International Atomic Energy Agency. Many nations that have agreed to these safeguards—including Iraq, Iran, Libya, and North Korea—still show some interest in acquiring nuclear weapons. Nevertheless, full-scope safeguards have an extremely important role to play in stopping the global race for the bomb.

Take Iraq, for example. Here is a nation that belongs to the Nuclear Non-Proliferation Treaty, a nation that has agreed to full-scope international safeguards, yet it continues to engage in secret efforts to acquire parts for nuclear weapons. Whether Iraq intended to use these parts at home or to reexport them to its friends in other regions is still an open question.

The fact remains, however, that Iraq is surely acting in violation of the spirit, if not the letter, of its treaty commitments. With an appropriate combination of money, secrecy, profit-hungry middlemen and unscrupulous suppliers of specialized equipment, governments of nuclear-supplier nations that regard nonproliferation as a low-policy priority, and time, Iraq will eventually acquire what it evidently is now seeking—the bomb and a long-range missile to deliver it.

No nation can steal or buy a full-fledged nuclear arsenal on the black market. In fact, the last remaining barrier facing Iraq is its lack of plutonium or high-enriched uranium to support the creation of a nuclear arsenal.

Now just imagine where we would be today if Iraq had no safeguards whatsoever, if international nuclear suppliers were selling Iraq nuclear technology without full-scope safeguards, and if the safeguard windows that now exist in Iraq were slammed shut. Is there anybody who would argue that the world would be a safer place without such safeguards? Of course not.

Safeguards provide that window. They establish a global standard. They are a benchmark for international society to confirm that its members are complying with nonproliferation commitments. They are an arms control verification measure that has no substitute, precedent, or parallel in the international arena. They are invaluable because they target the material that fuels a nuclear arms race—a nation with full-scope safeguards, implemented in accordance with the NPT, cannot build a nuclear arsenal without violating its treaty commitments.

The Iraq example contains many lessons. First, the need for eternal vigilance, even with nations that are party to the NPT; second, the value of tough export controls, aggressively and competently implemented; third, the vital importance of international cooperation in stopping proliferators in their

tracks; fourth, the continuing value of full-scope safeguards as a key nonproliferation measure, one of the last remaining legal and technical barriers separating a nation with a potential nuclear capability from a nation with a nuclear arsenal; fifth, the limits of military responses to proliferation—Israel's understandable attack on Iraq's Osirak reactor in 1981 led almost everyone to breathe a sigh of relief; yet, Israel's attack did little to halt Iraqi nuclear weapon ambitions and may well, in fact, have inflamed them; moreover, in striking a safeguarded reactor, Israel also struck at NPT and the very concept of international safeguards; and sixth, the need for greater international sanctions against nations that break their solemn international nuclear commitments—when pledges are broken, a heavy price must be paid.

ADDITIONAL MEASURES NEEDED

Thus, the main purpose of this resolution is to voice the support of Congress for America's ongoing diplomatic efforts to encourage all nuclear-supplier nations to adopt full-scope safeguards as a key condition for exports of nuclear technology and components. The unstable circumstances we are now facing in South Asia and in other regions where nuclear proliferation threatens, calls, however, for something more than just a resolution against these specific transactions. We need to come up with some constructive ideas for new areas where cooperation between nuclear-supplier nations might serve the cause of nuclear nonproliferation.

I urge France to cooperate with its ally, the United States, and not to assist the nuclear programs of nations that are clandestinely using stolen technology in the illicitly obtained equipment to build bombs. There is certainly no shortage of areas where stronger bilateral and multilateral cooperation would be in order. The potential gains from this cooperation far outweigh whatever short-term material benefits that would accrue from new nuclear business with proliferant nations.

Mr. President, I want to offer some suggestions for enhanced cooperation between all nations that are committed to stopping the global spread of nuclear weapons—let us move forward together in the following particular areas:

One. Joint development of low-enriched fuels for civilian research reactors so that bomb-grade fuels can be eliminated entirely from such reactors around the world.

Two. Joint R&D on superefficient lightwater reactors so that the world nuclear power industry can make better use of its uranium resources and reduce the urgency of plutonium use—a lot more collaborative research also needs to be done in the peaceful applications of nuclear fusion technology, in search for a safe means to permanently store spent fuel from our reactors as an alternative to nuclear fuel reprocessing, in the pursuit of superconducting materials to reduce the costs of transmitting electricity from existing power sources, and in improved measures of energy efficiency and conservation.

Three. Expanded joint research on health, safety, and environmental issues, especially at plutonium-handling facilities, so that the full costs of such enterprises can be fully evaluated.

Four. Improvements in information sharing and more collaborative international research to address the global nightmares of nuclear terrorism and proliferation.

Five. Discussions aimed at imposing joint multilateral sanctions—a form of collective nuclear security—against nations that cross the nuclear weapon threshold, even short of nuclear testing.

Six. New efforts to harmonize our respective export controls over dual-use commodities and technical know-how associated with nuclear weapon development and their means of delivery—and encouragement of stiffer domestic penalties for violations of these laws in all nations.

Seven. A renewed international commitment to collaboration in locating and in assessing the disposition of any significant quantities of bomb-usable materials that may have been lost, stolen, or diverted to illicit uses.

Eight. Creation of some common international guidelines or an inspection regime so that the military aircraft exported by both of our nations will not be used for nuclear delivery purposes.

Nine. Expanded joint research into the security of large computers to reduce the risk that they will be misused for purposes of building bombs or their delivery systems.

Ten. Increased national contributions to the IAEA for safeguards research, coupled with a renewed diplomatic commitment by all NPT parties to encourage universal membership in that treaty, and the establishment of an international fellowship program—perhaps in association with the United Nations—to promote scholarly research on nuclear nonproliferation.

Mr. President, this list provides just a sampling of the areas for enhanced cooperation in the years ahead. The list is not meant to be exhaustive or all-inclusive, and many of these proposals may already be on the agenda.

The immediate task before Congress, however, is to register our concerns about the rapidly deteriorating conditions for nuclear trade in South Asia. Today, I ask my colleagues to join me in voicing sincere concerns about these developments. The time has come to urge the French, Soviet, and Chinese Governments to reconsider their policy of authorizing exports of nuclear reactors to Pakistan, India, or any other nonnuclear weapon nation, without full-scope international nuclear safeguards.

CONCLUSION

The course I am proposing—a combination of strong opposition to the proposed South Asian nuclear sales with active support for new avenues for multilateral cooperation to stop nuclear proliferation—will surely not eliminate the never-ending global threat of nuclear proliferation. I believe it will, however, accomplish two concrete goals.

It will signal the importance the American people attach to responsible nuclear export policies and to the long-term objective of halting the proliferation of nuclear weapons.

And it will stimulate some thought and action among some of the world's greatest nations about one of the world's most difficult problems.

For these reasons alone, I urge each of my colleagues to voice their concerns about this new challenge we are now facing.

Mr. President, I ask unanimous consent that Senator BOSCHWITZ be included as a cosponsor of this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I think this is an issue we, too, often take lightly and think is beyond our control. But I cannot look into the future for my children and my grandchildren. I could not look them in the eye and say we did not try, when a nuclear war and even the spectre of nuclear war is so horrible. That has been the objective ever since we worked clear back in 1978 on the Nuclear Non-Proliferation Act. The objective was to halt the spread of nuclear weaponry around the world. That is the reason I think resolutions like this one expressing the sense of the Congress, indeed, I feel the sense of the American people, are so important.

EXHIBIT 1

[From the Washington Post, Feb. 24, 1990]

THE FRENCH REACTOR

With its decision to sell a nuclear reactor to Pakistan, France has departed from the rules by which the world tries to discourage the spread of nuclear weapons. Pakistan has been working doggedly to build a nuclear bomb. It is determined to achieve nuclear parity with India, which, if it does not already have weapons, is clearly capable of producing them on short notice.

In its defense France can argue that the reactor it sends to Pakistan will be dedicated to peaceful purposes and will be subject to international inspection. Inspections have generally proved effective in preventing the diversion of fuel to military uses. The French reactor will make no direct contribution to the Pakistani bomb.

But it may make indirect contributions. The French reactor will increase the numbers of Pakistanis trained in nuclear technology and raise the level of their sophistication. Less tangibly but perhaps more harmfully, this sale suggests that at least one Western country is prepared to overlook a customer's illicit activities in the nuclear field. That will be extremely helpful to those people who, in the internal debate in Pakistan, argue that there's no need to make concessions to international rules because they aren't enforced.

To the coutrary, they have been enforced fairly well during the years by the countries with nuclear technology to sell. There have been lapses, but on the whole the performance was surprisingly good unitl recently. The general principle is that the advanced countries are not to sell this portentous technology for any purpose to any country that declines to put all of its nuclear facilities—all of them—under international inspection. This principle is getting frayed in the obsessive competition between India and Pakistan. In 1988 the Soviety Union ignored the rules when it sold two reactors to India, which runs many closed and uninspected facilities. Last fall, in a countermove, China said that it would see a reactor to Pakistan. Now France has agreed to provide another—the first Western country in some years to ignore the requirement for full safeguards.

Tension between India and Pakistan is now rising once again over Kashmir. South Asia is becoming a place where a regional nuclear war is not only imaginable but is perhaps more likely than anywhere else. Other countries can't do a great deal to diminish the prospect of that catastrophe, but they have an obligation to do what they can. One thing that they can certainly do is to refuse to sell nuclear technology to countries that, pursuing military ambitions, refuse to open all their nuclear plants to inspection.

[From Reuter, Feb. 23, 1990]

FRENCH PRESIDENT REJECTS UNITED STATES PROTEST OVER NUCLEAR PLANT SALE

DHAKA, February 23.—French President Francois Mitterrand has brushed aside a U.S. protest over the sale of a nuclear power plant to Pakistan.

"If they (the United States) want to protest, let them protest," Mitterrand, who arrived in Dhaka from Pakistan on Thrusday, told journalists. He did not elaborate.

Mitterrand told a news conference in Islamabad on Wednesday Paris was ready to provide Pakistan with a nuclear power plant under full international safeguards.

He said he had authorised French companies to present an offer quickly for the sale of a nuclear plant in collaboration with one or more foreign firms.

The United States said the sale could provoke a nuclear arms race between India and Pakistan, which have fought three wars and refused to sign a nuclear non-proliferation treaty.

Asked if he also expected India to protest, Mitterrand said: "Of course India would not be pleased. But Pakistan was also not pleased when we sold a nuclear power plant to India in 1982."

Mitterrand said he did not think Pakistan had the capability of producing an atomic bomb. "They have few elements," he said, but added "and very good scientists".

The United States criticised the decision to sell the reactor to Pakistan, saying France should have insisted on fuller safeguards.

The State Department said France had apparently only insisted on Pakistan giving guarantees on the peaceful use of the reactor itself, rather than on full International Atomic Energy Agency (IAEA) safeguards which would have forced the country to give such assurances on its entire nuclear programme.

"We believe that a full-scope safeguards requirement would have made a much more significant contribution to strengthening international non-proliferation efforts in general and in the south Asian region in particular," the statement said.

U.S. aid to Pakistan is tied to an annual assurance from the President to Congress that Pakistan does not possess a nuclear device.

Washington has frequently warned Pakistan that it views its atomic military research programme as unsafe for the region.

[From Kyodo News, Mar. 8, 1990]

CONCERN OVER FRENCH NUCLEAR DEAL WITH PAKISTAN

TOKYO, March 8.—The Japanese Foreign Ministry on Thursday conveyed its concern to France over its sale of a nuclear power plant to Pakistan without Pakistan's agreement to open all its nuclear facilities for international inspection, officials said. Hiroshi Ota, director general for science and technology affairs, summoned to the ministry of French Minister Jean-Jacques Subrenat to file Japan's concern.

Ota noted that the French nuclear sale to Pakistan, which is not a member of the Nuclear Nonproliferation Treaty, did not ensure a full-scope safeguard inspection of the facilitiy and expressed concern over the lack of such safeguards, the officials said.

Japan withholds nuclear cooperation to nonmembers of the nonproliferation treaty, which obliges signatories to conclude a separate safeguard agreement with the International Atomic Energy Agency (IAES) within 18 months.

Japan is also worried because it is difficult to monitor the management of used nuclear fuels in nations which are not members of the treaty and are not legally bound by the full-scope safeguard inspections, ministry sources said. Japan cannot remain indifferent to these situations, the sources said, referring also to the ministry's recent call to North Korea to allow outside inspection of its nuclear facilities.

The treaty signatories, which have emphasized nuclear arms reduction until now, will likely shift their attention to the issue of peaceful usage of nuclear power when they meet in August in Geneva, the sources said. The member nations gather once in five years to study implementation of the treaty.

French President Francois Mitterrand said in Pakistan last month that his Government has authorized French industrial firms to make technical and commercial offers to sell a 900 megawatt reactor.

Pakistan has tried to set up a nuclear power plant since 1982, but none of the leading suppliers of nuclear technology have submitted bids due to American pressure for Pakistan to sign the nonproliferation treaty. France, one of the five advanced nuclear nations, is not a member of the treaty.

[From Reuter, Feb. 22, 1990]

FRANCE ASSAILED FOR NUCLEAR DEAL WITH PAKISTAN

(By John Chiahemen)

President Francois Mitterrand's approval of a nuclear plant for Pakistan provoked a storm of protest from environmentalists on Thursday, and a U.S. official said Washington would keep a close watch on the deal.

Mitterrand, who is touring Asia, announced on Wednesday that Paris would provide Pakistan with a nuclear power station and settle a dispute over a previous nuclear deal. He told reporters the plant would be under full international safeguards.

Asked if he believed Pakistan's assurances that it was not producing nuclear weapons, Mitterrand said he had "decided to show full confidence in Pakistan."

The French Greens party said in a statement on Thursday that underdeveloped Pakistan had no need of a nuclear industry. "This 105.4 in 1988—needs pills, not the atomic bomb," it added.

Ronald Lehman, director of the U.S. Arms Control and Disarmament Agency, told a satellite news conference on Thursday the United States was not opposed to the peaceful use of nuclear power but added: "We have concerns about the possibility of an arms race in south Asia and we are urging restraint."

"We will be watching this extremely closely," Lehman said in Washington.

The Paris daily Le Monde quoted a U.S. spokesman as saying Islamabad had offered France insufficient safeguards.

Pakistan is widely believed to be developing nuclear weapons, and U.S.-led Western pressure forced Paris to cancel a contract to supply a nuclear reprocessing plant in 1978.

The bomb fear was echoed on Thursday by the ultra-right French opposition party, the National Front.

"The whole region is tense . . . we should not give certain countries, often unstable, the means for future adventure," party leader Jean-Marie Le Pen told a news conference.

The environmentalist group Robin Hood said it planned to mobilize a protest against what it called Mitterrand's role as a "travelling salesman" of the nuclear industry.

"We are rather shocked, worried and disappointed to see that each time Mitterrand travels abroad, it is always to sell a nuclear plant," said spokesman Jacky Bonnemains.

France is currently involved in nuclear projects in China, Hungary and the Soviet Union. It completed its first plant in 1956 and now builds a French adaptation of a U.S.-designed pressurized water reactor.

Industry sources said the Pakistani contract would be executed by Framatome, which built South Africa's two pressurized water reactors and one in South Korea.

Bonnemains said environmentalists were concerned not so much by military implications as by how a Third World country could handle waste from such plants. "Pakistan is badly organized in terms of coping with risks," he said.

MITTERRAND BREAKS TABOO IN RENEWING NUCLEAR COOPERATION WITH PAKISTAN

(By Rene Slama)

ISLAMABAD, February 22.—French President Francois Mitterrand has broken a longstanding taboo by agreeing to relaunch nuclear cooperation with Pakistan after more

than a decade of U.S. and Indian pressure to steer clear.

The French Leader's announcement here Wednesday, described as a "historic decision" by Pakistan Prime Minister Benazia Bhutto, has already triggered a negative reaction from the United States.

Mr. Mitterrand told a joint press conference with Ms. Bhutto that he would sanction the sale of a nuclear power plant to Pakistan, ending speculation over the issue since his three-day official visit started Monday.

The offer would "be in accordance with the international regulations, including controls and guarantees, which apply to any export of nuclear plants and materials," he said.

Asked about concerns that Islamabad would develop a nuclear weapons program, he said: "We have decided to show confidence in Pakistan."

In Washington, the State Department reacted to the announcement by saying France had no assurances the plant would not be put to military use.

"France has apparently agreed to sell a nuclear reactor to Pakistan without requiring that Pakistan accept full-scope IAEA safeguards on all nuclear activities in Pakistan, not just on the item being exported," spokesman Adam Shub said.

He said the United States opposed foreign assistance for civil nuclear programs in countries which have no nuclear weapons unless they accept all safeguards adopted by the International Atomic Energy Agency (IAEA).

"We have urged that all nuclear supplier states adopt a similar nuclear export policy," he added.

The pro-government Pakistan Times on Thursday greeted the announcement with an eight-column banner headline: "France to give nuclear power plant." A subhead read, "Deal pledged having full confidence in Pakistan's peaceful plan: Mitterrand."

The story eclipsed the Pakistan hockey team's victory in the World Cup semi-finals.

[From the Washington Times, Feb. 22, 1990]

FRANCE TO SELL NUCLEAR PLANT TO PAKISTAN

ISLAMABAD, Pakistan.—French President Francois Mitterrand announced yesterday that he has approved the sale of a nuclear power plant to Pakistan, ending a 14-year ban on French sales of nuclear energy to this country.

Mr. Mitterrand said at a news conference that "France pledges to authorize French industrial enterprises . . . to make rapidly a technical and commercial offer for the sale of a nuclear power plant to Pakistan."

He did not say how big the plant would be.

Mr. Mitterrand, on a four-day visit to Pakistan, is the first French leader to visit the country in 25 years. He leaves for Bangladesh tomorrow.

Prime Minister Benazir Bhutto said a French-supplied plant would be "open to all international safeguards and monitoring teams."

Pakistan, however, is not a signatory to the international nuclear nonproliferation treaty and refuses to sign it unless India does.

Pakistan must convince Washington each year that it does not have a nuclear weapon before Washington frees millions of dollars in loans. Mrs. Bhutto has often said Pakistan does not have a nuclear weapon, nor does it want to produce one.

"Pakistan is not trying to enter into a nuclear arms race," she said again yesterday, adding that Islamabad has pressed India to sign a regional nuclear weapons test ban. India has refused.

Mr. Mitterrand's announcement only vaguely referred to a 14-year-old dispute between Pakistan and France over a promised sale of a nuclear reprocessing plant.

France reneged on the deal because of U.S. pressure to drop the sale unless Pakistan agreed to sign international nuclear treaties and open its nuclear facilities to international monitoring teams.

Pakistan lodged a variety of complaints until a French arbitration board ruled in its favor and ordered Paris to pay a fine. No figure was ever disclosed, but Pakistani media have cited figures ranging from $250 million to $400 million.

[From the Washington Post, Feb. 22, 1990]

FRANCE TO SELL NUCLEAR POWER PLANT TO PAKISTAN

(By Steve Coll)

NEW DELHI, February 21.—France has approved the sale of a nuclear power plant to Pakistan, ending a 14-year embargo that was enacted partly in response to U.S. fears that Pakistan might use such technology to build a nuclear bomb.

French President Francois Mitterrand announced the sale today in Islamabad, the Pakistani capital, where he was concluding a four-day visit. Mitterrand and Pakistani Prime Minister Benazir Bhutto said the French-supplied plant would be used only for commercial purposes and be subject to international safeguards and monitoring.

Nonetheless, the sale is certain to renew fears in the United States and other countries about Pakistan's nuclear program and about the possibility of a nuclear arms race between Pakistan and India, which have fought three wars during the last four decades. Neither India nor Pakistan is a signatory of the Nuclear Non-Proliferation Treaty enacted in 1968 to prevent the spread of nuclear weapons.

The French announcement comes as relations between Pakistan and India are at their lowest ebb in several years because of a flare-up in a long-running dispute over the northern Indian state of Jammu and Kashmir. The dispute has generated harsh rhetoric, border skirmishes and sometimes violent demonstrations in both Pakistan and India.

India detonated a nuclear explosive device in its northwestern desert in 1974 but has said since then that it does not possess nuclear weapons and has no plans to build them. India's contention is generally accepted in the West, but U.S. specialists believe the country has the capability to build a substantial number of nuclear bombs in a short period should it choose to undertake such a program.

Pakistan never has tested a nuclear explosive, but since the successful Indian test 16 years ago, it has embarked on an aggressive and at times clandestine program to develop nuclear technology. Pakistani nationals have been convicted twice during the 1980s in U.S. courts of attempting to smuggle out of the United States sophisticated technology that could be used in the construction of a nuclear bomb.

Partly because of these court cases, the United States has made its large sums of aid to Pakistan—more than $500 million annually—contingent on a public guarantee by Pakistan that it does not possess nuclear weapons. While Pakistan has continued to assure the United States that it has adhered to this condition, some U.S. officials have said they believe Pakistan has developed the technology to construct a small number of nuclear bombs.

Prime Minister Bhutto reiterated today that Pakistan has no nuclear weapons and no plans to build them. "Pakistan is not trying to enter into a nuclear arms race," she told reporters in Islamabad.

Pakistan already has one small nulcear power plant near the southern port city of Karachi. The plant was constructed by Canadian firms and is subject to international nuclear safeguards, although there have been some reports of inspection and monitoring problems in the past.

With few fossil fuels and limited hydroelectric resources, Pakistan has been hampered by chronic shortages of electricity even as its economy has expanded rapidly in recent years. Oil imports drain a substantial portion of the country's foreign exchange, and Pakistani politicans, including Bhutto, have said commercial nuclear power is essential to meet development needs.

President Jimmy Carter cut off all aid to Pakistan during the late 1970s and urged allies such as France to halt nuclear sales because of fears about the Pakistani nuclear program. After the Soviet invasion of Afghanistan in 1979, the United States resumed aid at higher levels than before because Pakistan was seen as a critical ally in the U.S. effort to contain Soviet expansion. The Afghan rebels who helped to expel Soviet troops from Afghanistan last year are mainly based in Pakistan.

[From the Los Angeles Times, Feb. 22, 1990]

FRANCE TO SELL NUCLEAR PLANT TO PAKISTAN

(By Rone Tempest)

PARIS.—Breaking ranks with its Western allies on the issue of nuclear proliferation in the Third World, France on Wednesday approved the sale of a nuclear power plant to Pakistan, a country many experts believe has an active nuclear weapons development program.

In a joint press conference in Islamabad with Pakistani Prime Minister Donazir Bhutto, French President Francois Mitterrand announced, "France is committed to authorize French industrial enterprises, in possible cooperation with one or several foreign partners, to make a technical and commercial offer for the sale of a nuclear power plant to Pakistan."

Mitterrand, on a four-day visit to Pakistan, added that the offer is "subject to international norms and, notably, controls and guarantees that apply to all exportation of nuclear material.

Bhutto agreed that the plant will be "open to all international safeguards and monitoring teams."

However, since 1974, when neighboring India exploded its own nuclear device in the Rajasthan desert, Pakistan has been accused of numerous violations of national and international laws involving the export of nuclear weapons materials in an apparent race to match its archrival.

Because of fears regarding Pakistan's weapons program, the U.S. government in 1978 persuaded France to halt construction of a plutonium extraction plant that a French company had contracted to build and for which the Pakistanis had already partly paid. During Mitterrand's visit, the issue of the canceled contract and the money has been a key test for the shaky Bhutto government.

Both Pakistan and India have refused to sign the international agreement on nulcear non-proliferation. Since 1980, when West Germany agreed to build a nuclear power plant in Argentina, all Western countries possessing nuclear tochnology, including France and the United States, have maintained an unofficial embargo against selling larger-scale nuclear projects to all countries in the Third World that have not signed the treaty.

"There were no sales of reactors and no major nuclear fuel contracts by Western countries since 1980," said Leonard Spector, a specialist on nuclear proliferation with the Carnegie Endowment for International Peace in Washington. Interviewed by telephone, Spector contended that the French proposal, although couched in terms of international safety and inspection procedures, would contribute to a dangerously escalating spread of materials that could be used in the making of nuclear weapons.

"Coming after all we know about Pakistan's nuclear program" Spector said, "It is surprising to see a European country break ranks with other suppliers and make a sale that appears to condone the Pakistan behavior.."

At its nuclear research facility in Kahuta, near Islamabad, Pakistani scientists are believed to have developed a uranium enrichment plant that is capable of isolating an isotope found in normal uranium and concentrating it into weapons-grade material. They have also been accused of using another small reactor, supplied by the United States to produce trilium, another material used in nuclear weapons.

Since 1980, Pakastanis or suspected Pakistani agents have been charged in the United States and several European countries with attempting to smuggle materials that could be used in nuclear weapons development. In 1985, Pakistani Nazir Vaid was arrested in Houston for attempting to smuggle high-speed switches used in nuclear weapons to his country.

Some doomsday scenarios about a future nuclear war began in the India Pakistan region. In recent weeks, in fact, the two countries have been involved in a heated war of words and sober-rattling over Kashmir, a mountainous region with a mostly Muslim population. Pakistan controls the northern part of the region and India the southern part. The issue has been at the heart of two wars between the countries.

However, Spector noted that France follows the Soviet Union and China in pledging nuclear projects in the region. In 1988, the Soviet Union, which until then had participated in the unofficial embargo of developing countries that have not signed the nuclear non-proliferation treaty, agreed to sell India two nuclear power plants. The agreement was subject to international inspection, and the Soviets added the unusual provision that they would take back all the spent nuclear fuel so that it could not be converted into weapons-grade material.

Late last year, the Chinese government offered to assist Pakistan in the construction of two nuclear power plants. Many believe the Chinese have been involved in Pakistan's efforts to build nuclear weapons, particularly in the technology for a missile delivery system.

France is second in the world behind the United States in the use of nuclear power for generating electricity—in fact, it derives a larger percentage of its power from nuclear facilities than does the United States—and has a highly developed industry known for its aggressive sales in sometimes controversial settings.

The French nuclear industry, for example, assisted in the construction of the Iraqi nuclear power plant that was destroyed by Israeli jets in a 1981 raid after the government of then-Prime Minister Menachem Begin asserted that Iraq planned to use the facility to develop nuclear weapons, the so-called Islamic bomb.

[From UPI, Feb. 21, 1990]

FRANCE TO SUPPLY NUCLEAR PLANT TO PAKISTAN

(By Denholm Barnetson)

ISLAMABAD, PAKISTAN.—French President Francois Mitterrand announced Wednesday that France will provide a nuclear power plant to Pakistan, honoring an agreement signed 14 years ago despite fears Islamabad may be developing nuclear weapons.

"We have decided to show full confidence in Pakistan," Mitterrand told a joint news conference with Prime Minister Benazir Bhutto on the third day of a four-day visit.

He announced that under an agreement signed Wednesday with Pakistan, "France pledges to authorize French industrial enterprises . . . to make rapidly a technical and commercial offer for the sale of a nuclear power plant to Pakistan.

"This offer will be in accordance with the international regulations, including controls and guarantees which apply to any export of nuclear plants and materials," he said.

Mitterrand said the terms of the deal will be discussed later, "but the political decision has been taken."

France agreed in 1976 to build a 900-megawatt nuclear processing plant at Chasma in Pakistan's Northwest Frontier Province, but reneged on the deal two years later under U.S. pressure after reports Islamabad planned to build a nuclear bomb.

Pakistan had demanded France honor the deal and pay millions of dollars in compensation, including interest on a down payment of $200 million. Wednesday's agreement said the two countries would seek an "amicable settlement" on the issue of compensation.

Pakistan already has one Canadian-built 137-megawatt nuclear power plant. China promised in November to build a 300-megawatt facility to help meet the country's chronic energy shortage.

Islamabad also has a uranium enrichment laboratory but has denied reports it is using it to build a nuclear bomb. It has refused to sign the nuclear Non-Proliferation Treaty, which would require international inspection of the plant, unless arch-rival India also does so.

France has supplied nuclear powerplants to a number of countries, including India, South Korea and China, but orders have declined recently due to environmentalist lobbies.

Bhutto, calling the agreement "historic," denied it would lead to a further deterioration in relations with India, already tense over a month-old uprising in the Indian state of Jammu and Kashmir. India has accused Pakistan of backing the militants, charges Islamabad denies.

"I don't think the decision will lead to further tensions because it is under international safeguards and it will be monitored," she said.

Mitterrand said France "sold a nuclear power station to India so I don't see why it would be so scandalous to supply one to Pakistan."

Mitterrand also announced France will lend Pakistan about $30 million to help with its energy shortage.

[From Kyodo News, Jan. 31, 1990]

PAKISTAN MOVES TO SETTLE NUCLEAR PLANT PURCHASE

ISLAMABAD, January 31.—Pakistan Foreign Secretary Tanvir Ahmad left Tuesday for Paris to finalize arrangements for buying a 900-megawatt nuclear power plant from France.

Pakistan has been trying to acquire the 900-megawatt nuclear powerplant from France since 1982, but the deal reportedly has been opposed by the United States, which wants Pakistan to sign a nuclear nonproliferation treaty or allow international inspection of all its nuclear facilities.

However, the directer general of the Vienna-based International Atomic Energy Agency said at a press conference in Islamabad earlier this month that according to his information, the sale of the 900-megawatt nuclear powerplant to Pakistan has been held up only because of financial snags.

Finance Minister Ehsan Ul-Haq Piracha had paid a secret visit to Riyadh last week, apparently to seek financial support from the Saudi Arabian Government. It was Saudi Arabia which had paid the down payment for a nuclear fuel reprocessing plant contracted by late Prime Minister Zulfikar Ali Bhutto and unilaterally canceled by France in 1978.

The government of Prime Minister Benazir Bhutto has already concluded an agreement for acquiring a 300-megawatt nuclear powerplant from China in November this year.

[From the New York Times, Nov. 1, 1989]

CLASH ERUPTS ON WAYS TO HALT SPREAD OF MISSILES

(By Michael R. Gordon)

WASHINGTON, October 31.—The Bush Administration expressed opposition today to legislation to impose sanctions against companies contributing to the spread of ballistic missiles.

Richard A. Clark, Assistant Secretary of State for Politico-Military Affairs, told the Senate Foreign Relations Committee that the adoption of such legislation would hamper the Administration's efforts to stop the spread of missile proliferation through diplomatic means.

But Congressional supporters of sanctions legislation rejected the Administration's arguments, saying that the United States needed to take a tougher stand against the spread of ballistic missiles.

"Exhortation and quiet negotiations may be useful, but exhortation cannot replace sanctions," said Senator John McCain, an Arizona Republican who is co-sponsoring a sanctions bill along with Senator Albert Gore Jr., Democrat of Tennessee.

In an unusually blunt statement, a Pentagon official acknowledged publicly that the United States was trying to stop France from selling rocket technology to Brazil and India and was concerned about Israel's continuing cooperation with South Africa's missile program.

"We have taken a strong stand against the proposed French sale of liquid rocket propulsion technology to Brazil and India for their space launch vehicle programs," Henry Sokolski, acting deputy for nonproliferation policy at the Pentagon, told the committee.

CONCERN OVER ISRAELI ROLE

Mr. Sokolski added that reports of Israeli assistance to South Africa were "a matter of serious concern at the highest levels" of the Defense Department. He added the Defense Department had "discussed the possibility of Israeli-South African collaboration at the highest levels with the Israeli Ministry of Defense."

Mr. Sokolski said that the Pentagon was considering a proposal to suspend contracts with foreign companies that fail to comply with export controls intended to stem the spread of ballistic missiles.

But Mr. Clark of the State Department, Mr. Sokolski of the Pentagon and officials from the Commerce Department and Arms Control and Disarmament Agency said that sanctions legislation could hurt the Administration's efforts to work with other nations to stop missile proliferation.

"The possibility that the U.S. might act unilaterally against a foreign firm or country could seriously hamper the information-sharing mechanism," set up by Western industrialized nations to stop missile proliferation, Mr. Clark said.

"Partners who might wish to consult with us on missile-related activities of their own companies would be unlikely to do so if the result would be to invite U.S. sanctions against those companies," he added.

Mr. Clark asserted that the Administration already had sufficient authority to penalize American and foreign companies and foreign countries that contribute to missile proliferation.

SOME REMAIN UNCONVINCED

Mr. Clark's arguments did not appear to sway Congressional backers of sanctions.

"Congress must act to make illegal traffic in these technologies very hazardous to the pocketbooks of certain kinds of corporations and their subsidaries," Senator Gore said.

Despite the Administration complaints and Congressional avowls of tough action, the scope of some proposed legislation appeared to be limited.

Under the legislation proposed by Senators McCain and Gore, a company in a foreign country that is cooperating with the United States to restrain the spread of ballistic missiles could be banned from contracting with the United States for two to five years if the company violated its Government's export laws by selling banned missile technologies.

Such legislation would not appear to apply to possible sales of rocket technology to Brazil by Arianespace, the French company, because such a transaction will only occur if it is approved by the French Government. French officials say that no final decision to approve such a sale has been made, but they maintain that such a transaction is consistent with international export guidelines.

[From the New York Times, Oct. 19, 1989]

U.S. SEEKS TO STOP BRAZIL'S MISSILE-TECHNOLOGY DEAL

(By Michael R. Gordon)

WASHINGTON, October 18.—The Bush Adminsitration has begun a campaign to dissuade France from selling Brazil rocket-motor technology that American officials say could be used to make ballistic missiles.

Administration officials say the sale of the technology, which is intended for Brazil's space program, would be a major setback to Western efforts to stem the spread of ballistic missiles to the third world.

The Bush Administration has protested to the French Government against the sale and a team of State Department officials flew to Paris last week to underscore American concerns, officials said today. Britain and West Germany have also expressed concerns over the sale, Western diplomats said.

A spokesman for the French Embassy here acknowledged that France was considering the sale of missile technology to Brazil but said that no final decisions had been made.

PACKAGE DEAL FOR TECHNOLOGY

The dispute between Paris and Washington arose when Brazil solicited bids this year from Arianespace, a French company, and McDonnell Douglas, the American company, for the launching of two communications satellites. As part of a package deal, Brazil also sought rocket technology so that it could develop its own capability to launch satellites.

In an effort to win the sale, Arianespace presented a proposal that called for the transfer of technology for the Viking rocket motor, a liquid-fueled rocket motor that is used in the Arianespace launching vehicle, according to a spokesman for the Brazilian Embassy here.

McDonnell Douglas did not offer missile technology, a company spokesman said. Instead, the American company told Brazil that it was willing to give Brazilian engineering a chance to work on the space shuttle, a company said. McDonnell Douglas said it was also willing to pay the cost of educating two Brazilian engineers in the United States in propulsion technology.

LIMITS ON SHARING TECHNOLOGY

A spokesman for the Brazilian Embassy there said that Brazil favors the French proposal but added that no final decision had been made.

Bush Administration officials asset that the proposed French sale would undercut a 1987 understanding among Western nations intended to stem the spread of ballistic missiles.

That understanding states that international cooperation on space programs is allowed "as long as such programs could not contribute to nuclear weapons delivery systems," like ballistic missiles.

Bush Administration officials said the missile technology should not be provided to the Brazilian space program because Brazil has a history of deriving military rockets from its civilian space program. They said they did not believe that effective safeguards could be worked out to insure that the rocket technology provided to the Brazilian space programs does not find its way to the Brazilian military and through arms sales, to the Middle East.

French officials, however, denied that France was undercutting the pact.

A French Embassy spokesman said that the 1987 agreement explicitly allowed the transfer of technology in some instances and said that France would provide rocket-engine technology to Brazil only if adequate safeguards were worked out to insure that it is used for peaceful purposes.

If a decision is made to provide the technology to Brazil, it will be transferred in stages, the spokesman said. That will enable Paris to cut off the technology if it is being misused by the Brazilians, he said.

A spokesman for Brazil's Embassy insisted that Brazil would not use the Viking rocket motor technology for military ends. The technology, the spokesman said, is for the "peaceful space industry in Brazil, which we think we have a right to do."

[From AP, Oct. 5, 1989]

U.S. PROTESTS FRENCH PLAN TO GIVE BRAZIL ROCKET MOTOR

(By Ruth Sinai)

WASHINGTON.—Despite strong U.S. protests, the French government plans to trade Brazil sensitive rocket technology that could be used by U.S. enemies to make ballistic missiles, government and industry officials said Thursday.

France has promised to give Brazil the technology of a liquid fuel motor called Viking, which powers the Ariane space launch vehicle, the officials said. In return, the French company Arianespace would be awarded a $60 million contract for the launch of two Brazilian communications satellites, they added.

The U.S. officials, who spoke only on condition of anonymity, said French President Francois Mitterrand personally made the decision to give the technology to Brazil, promising that safeguards would be placed to prevent use of the motor for lethal purposes.

But a statement issued by the government in Paris denied a final decision had been made. "The definitive contract will be submitted to the government for approval and this contract has not yet been given" to the government, the statement said.

"This contract will have to follow certain purposes and restrictions regarding technology transfers," it said.

The United States, however, is doubtful such safeguards can be implemented effectively.

"If someone like Libya wants to use this motor to harmful purposes, who will stop them?" asked one official.

Libya has been seeking to buy from Brazil equipment and know-how in an effort to develop a ballistic missile arsenal capable of delivering chemical weapon warheads, according to U.S. experts.

Brazil, one of an estimated 20 Third World countries which have some form of ballistic missile capability, has been exporting some missile technology while and attempting to develop a more accurate and sophisticated arsenal of its own.

Word of the planned French sale was first reported by Signal magazine, published by the Armed Forces Communications and Electronic Association.

Representatives of McDonnell Douglas Corp., the St. Louis-based firm competing for the Brazilian launch contract against Arianespace, were informed of the French proposal by Brazilian officials and conveyed the information to the Defense Department, officials said.

A spokesman for McDonnell Douglas, Bob O'Brien, said that if the French "transfer is made, obviously it wouldn't enhance our chances" to win the contract. He said Brazil had been expected to announce its decision already but has not done so yet.

The United States first protested the planned French sale last July during the seven-nation economic summit in Paris, one official said.

For awhile it appeared the protest had stopped the French plan, the official said. But the French government reconsidered when it appeared France stood to lose the lucrative satellite launch contract, he said.

The United States has warned France the technology transfer would violate the Missile Technology Control Regime, a 1987 agreement to stem the proliferation of such weapons, of which France is a signatory, the official said.

But France contends the Viking motor will be used for peaceful purposes and would not violate the agreement.

The United States is still reviewing whether it can stop the deal, the official said.

SENATE CONCURRENT RESOLUTION 114—RELATIVE TO THE FEDERAL CROP INSURANCE PROGRAM

Mr. DASCHLE (for himself, Mr. LEAHY, Mr. BENTSEN, Mr. BOREN, Mr. BURDICK, Mr. BURNS, Mr. GRASSLEY, Mr. HARKIN, Mr. KERREY, and Mr. SIMON) submitted the following concurrent resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

S. CON. RES. 114

Whereas the President's Budget for fiscal year 1991 proposes elimination of the Federal Crop Insurance Program beginning with the 1991 crop year; and

Whereas the Federal Crop Insurance Corporation is now in the process of receiving comments from the public regarding changes in the program which it plans to implement this spring for the 1991 crops utilizing funds of fiscal year 1991; and

Whereas the failure to request funds for the program and other actions by the Federal Crop Insurance Corporation, may have created doubt concerning the viability of the Federal Crop Insurance Program as a means of protecting farmers from the financial hazards of crop failures; and

Whereas doubt created about the future of the program makes it difficult for farmers to obtain credit for planning 1991 crops; and

Whereas these contradictory actions tend to unnecessarily disrupt the farm economy; and

Whereas the Secretary of Agriculture has publicly stated that the failure to request funds for fiscal year 1991 is intended to induce the Congress to address questions such as funding for both farm disaster assistance and crop insurance; and

Whereas Congress is expected to consider major legislative changes in providing producers with risk management tools through the Federal Crop Insurance Program and/or other forms of disaster assistance; and

Whereas because of time constraints, if legislative changes in the program are adopted, such changes could only be fully implemented with great difficulty before 1991 fall crops are planted by farmers: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Secretary of Agriculture and the Federal Crop Insurance Corporation should endeavor to restore confidence in the Federal Crop Insurance Program by continuing to—

(a) expend funds made available for the program;

(b) operate the program in a manner that preserves, to the maximum extent practicable, the same type of operations and current operating agreements as are being carried out in fiscal year 1990; and

(c) operate the program in the manner specified in paragraph (b) until the Congress of the United States has had an opportunity to consider appropriations for the program for fiscal year 1991, as well as legislative changes in the program to be effective for some or all of the 1992 crops.

● Mr. DASCHLE. Mr. President, many farmers in South Dakota depend on Federal crop insurance to protect them against losses and to manage their risk. Crop insurance often is required by lenders.

The President has proposed eliminating the Federal Crop Insurance Program beginning with the 1991 crop year. At this time, it is not clear whether the Congress will support the President in his proposal or continue the program in its current form, or in some improved version. The Senate soon will begin writing the 1990 farm bill. Crop insurance is an important issue in that deliberation.

The Federal Crop Insurance Corporation, by failing to request funds for the program, has created doubt among insurance providers and farmers as to the future of the program. In my State, this means winter wheat farmers may soon receive notices that their crop insurance policies may not be renewed for the 1991 crop year, which for them begins this fall.

This action will make it more difficult for some farmers to obtain credit for planting, and will unnecessarily disrupt the rural economy.

Any changes in the crop insurance program should be accompanied by an orderly transition period. Cutting off insurance at this point is not fair to farmers.

The resolution I offer today expresses the sense of the Congress that the administration restore confidence in the Crop Insurance Program by continuing to spend funds available for the program, operate the program in a manner that preserves the level of operations and current operating agreements throughout the 1991 fiscal year, or until Congress has had an opportunity to consider appropriations for the program for fiscal year 1991, as well as legislative changes in the program to be effective for some or all of the 1992 crops.

This resolution is necessary to restore confidence in the program and prevent policies from being terminated until Congress has decided the future of the program.●

● Mr. HARKIN. Mr. President. I rise today to join in calling upon the administration and the Secretary of Agriculture to restore the confidence of the American farmer in the Federal Crop Insurance Program.

As we all know, the administration has proposed the elimination of multiple peril crop insurance beginning with the 1991 crop year in its fiscal year 1991 budget submission and its 1990 farm bill proposal. The administration has proposed a permanent disaster program for farmers. That proposal is inadequate protection for farmers against disaster risk.

Pronouncements from FCIC have left our agricultural producers wondering whether there will be multiple peril crop insurance for the program for the 1991 crop year.

It is unfair to American producers to lead them to believe that the current crop insurance program is in jeopardy for the 1991 crop year. Nothing has been done by Congress to alter our current form of crop protection. It only creates unnecessary and unwarranted confusion and concern to lead farmers to fear that this important protection against financial hazards of crop failure may well be yanked out from under them even after they have signed up for the coverage.

This resolution points out these facts and requests the Secretary of Agriculture and the Federal Crop Insurance Corporation to restore the confidence in the Federal Crop Insurance Program by continuing to operate and make funds available until Congress has had the opportunity to consider appropriations for FCIC and possible changes in the program.

This is a crucial time for our American farmer as we craft the agricultural policies for the next 5 years. And this certainly is not the time to damage their confidence in the Federal Government or its current agricultural programs.●

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Friday, March 30, 1990, at 10:30 a.m. to hold a oversight hearing on immigration.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:30 a.m., March 30, 1990, to receive testimony on S. 639, to establish a hydrogen research and development program.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DISABILITY POLICY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Disability Policy of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Friday, March 30, 1990, at 9:30 a.m. for a hearing on the Reauthorization of the Developmental Disabilities Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Friday, March 30, 1990, at 10:30 a.m. to conduct a markup on the nomination of T. Timothy Ryan, Jr., to be Director of the Office of Thrift Supervision.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

EXCELLENCE IN SCIENCE AND MATH AT XAVIER UNIVERSITY OF NEW ORLEANS, LA

● Mr. BREAUX. Mr. President, a great deal of attention lately has been focused on the need for improvement in mathematics and science education in the United States. The recent Education Summit held between the Nation's Governors and President Bush stressed the need for a greater commitment to math and science instruction.

I fully support the commitment that was expressed at the Education Summit to math and science and am hopeful that Congress will recognize the need for additional resources. I want my colleagues to know, however, that there are some good things happening in this vital area of education in my home State of Louisiana. An article in the New York Times of March 28, 1990 tells of an extremely successful program at Xavier University in New Orleans, LA that has helped a number of minority students succeed in the sciences. Xavier has produced more black medical students than any other university in the United States except Howard University, which is a much larger school. An incredible 95 percent of these students go on to complete their studies and become doctors.

I am proud of the innovative professors and dedicated students at Xavier and of the work that they have done to put this program together. Institutions of higher education in Louisiana are involved in a number of innovative programs as part of an effort to broaden their students' horizons and improve conditions in Louisiana. I am glad that one of the most successful of these programs is receiving the national attention that it deserves. I recommend the Xavier program as a model for math and science instruction programs around the country, minority or otherwise. Mr. President, I ask that the New York Times article that I mentioned be entered into the CONGRESSIONAL RECORD in its entirety.

The article follows:

TINY BLACK COLLEGE TAKES HIGH ROAD IN SCIENCE

(By Susan Chira)

NEW ORLEANS.—Xavier University, a few buildings on a dot of land squeezed between a highway, a drainage canal and rows of housing projects, hardly seems the stuff of educational legend. But this small college, where students' combined S.A.T. scores average a relatively low 840, excels at a task that has daunted far bigger and richer schools; turning out black doctors and pharmacists.

With just 2,900 students, Xavier ranks second in the country, behind only the much larger Howard University, in producing black medical students, and first in producing black pharmacists.

This success stands in sharp contrast to a dismal national record in science education. Although President Bush and the governors of the states want American math and science scores to lead the world in 10 years, the United States now trails far behind. While many students fare poorly in science, blacks represent only 2.6 percent of the nation's employed scientists and engineers, the National Science Foundation reports.

LITTLE MONEY OR RESOURCES

Xavier, the only historically black Roman Catholic college in the United States, has worked with little money or resources. Until two years ago, its main science building was an old World War II barracks. Despite a new science complex built with foundation grants, students complain of scarce research equipment. Professor's salaries are low. And most students, while bright and motivated, have test scores that would disqualify them from better-known state university or Ivy League schools.

A small group of determined professors, helped by several foundation grants they drummed up, designed a system combining introductory courses that build in remedial work with students tutoring and study groups, individual attention from faculty, and outreach to budding high school scientists.

"The typical college faculty member sees his job as weeding out kids who come into science courses, in the interest of maintaining quality," said J. W. Carmichael, a chemistry professor who began Xavier's drive toward science excellence by creating a summer program for high school students in 1977. "I could always drop people from a helicopter into Lake Pontchartrain and see how many drown. But what we do is start from the shore and teach them how to swim."

Many of Xavier's techniques, explained Joseph G. Danek and Roosevelt Calbert, who oversee the National Science Foundation's programs to attract minority members and women to science careers, echo those that researchers believe work with groups intimidated by science: one-on-one contact with faculty members, support groups to combat isolation, and study groups where students solve problems together, the way they will as doctors and scientists.

SUCCESS LEADS TO GRANT

Xavier has had demonstrable success: 95 percent of those admitted to medical school become doctors. And that success helped the school gain a $1.8 million grant from the Howard Hughes Medical Institute, the largest grant that foundation has ever given to a black college.

The school's underlying philosophy is to buttress student self-confidence, often shaken in high school or at predominantly white universities, by helping them meet the high standards Xavier sets. But at Xavier, in contrast to some schools, promoting self-esteem is not a euphemism for tolerating mediocrity. As students progress, the special supports included in the introductory courses drop off, so that courses come to resemble those that students will encounter in medical or graduate school. Professors gently steer those who fail into other majors.

"Gradually, they saw away at your cane and you have to walk on your own," said Yvonne Collins, a sophomore who says she intends to become an obstetrician to help reduce high black infant mortality rates.

Deirdre Labat's biology lecture and Professor Carmichael's chemistry drill session show how Xavier works. It is early morning, and students file into the auditorium for a lecture on molecular biology, a particularly difficult topic. Professor Labat begins by summarizing what the students learned the previous week, making sure they understand the structure of DNA, the genetic building block.

SCIENCE COMES TO LIFE

Then, to illustrate protein synthesis, she grabs the cord of the overhead projector and stretches it out to represent messenger RNA, which contains the genetic coding to make new cells. A student becomes transfer RNA, which picks up amino acids and transports them to the protein synthesizing site in the cell. Tugging gently on the students' arms, she walks them through protein synthesis.

The bright red biology workbooks Xavier students carry are another innovation. Professor Labat and other biology teachers decided that most introductory science textbooks are too overwhelming, forcing students to memorize too many facts. So they drew up a workbook that told students exactly what their teachers wanted them to know.

The workbooks, one for each introductory science course, also include less conventional exercises, developed to fill some gaps Xavier teachers discovered in their students' knowledge. When solving science problems requires certain kinds of mathematical equations, the workbooks review them.

The workbooks define vocabulary words—not just difficult science terms, but words like "simultaneous" or "discrete" as well, because teachers found students were mssing test questions because they did not understand the words. The workbooks explain how to write résumés, scientific experiments and applications—skills students will need to advance their scientific careers and to apply to professional schools.

Jose Santiago, a senior who will enter the M.D.-Ph.D. program at Tulane Medical School next year, has spent two summers doing research at the University of San Diego, alongside students from Harvard, Stanford and other big-name schools. "I was the only sophomore in the lab," he said. "But I did just as well."

When he compared notes with the other students, Mr. Santiago said, he realized how much Xavier teachers, had helped him. "They do everything to encourage you here," he said. "The other students were so worried about their grades and not so worried about learning. Here you learn more than you're tested for."

"What doesn't work," said Dr. Danek of the National Science Foundation, "is taking

these kids out of 12th grade and saying, 'You need remedial work.' All that says is you're way behind. What does work is saying: 'You may be somewhat behind at this time, but you're a talented person. You're behind because your high school didn't give you opportunities. We're going to help you advance, at an accelerated rate.' "

Xavier students also said they drew support from attending a predominantly black school. Kyran Mitchell, who entered Xavier on a basketball scholarship but stayed to earn top grades in biology after he was cut from the team, said, "When you mess up at a predominantly white school, it's, 'They messed up.' "

Some of the same methods, however, are being used at predominantly white schools to encourage minority members and women to stick with science. Sam Carrier, provost at Oberlin College, says his research and Oberlin's experience show that didn't have good college preparation," he said. "We don't shatter their illusions. Nobody tells them their scores were only so-so. Most of these kids would have gotten wiped out at, big white schools. But here they've done well, and then they can compete."

LESSONS PRESSED HOME

Whatever students miss in lectures or in the workbooks, they can go over in required weekly drill sessions. At Professor Carmichael's chemistry drill the other day, students passed in their homework, picked up required chemistry and vocabulary quizzes, and pulled out their calculators. At his desk, Professor Carmichael checked how many had turned in the yellow cards on which students record the grades they receive for every quiz or homework assignment in every course. The cards which must be signed weekly by students' academic advisers, are another way Xavier guarantees that students are in frequent contact with a faculty member and that they understand exactly what standards they will be held to.

While students took the vocabulary test, the professor graded the chemistry quizzes, so that students could find out immediately what questions they got wrong and could go over the answers with him at his desk. He then gave them more practice problems in troublesome areas.

"Aw, come on, Carmichael," one student groaned as he handed back her paper. "You know what I meant."

"I can't give you an answer for what you meant to put down there," he told her.

Students who still have trouble may seek free tutoring from older students at a center open five days a week, from afternoon until late in the evening. The tutoring center is set up so that students can get help fast without stigma before the next test comes along.

WORKBOOKS AND TUTORING

The carefully crafted lectures, drills, workbooks and tutoring sessions all fill in gaps that many students do not even recognize they have. Indeed, a dozen students interviewed said they felt extremely well-prepared for Xavier and had little trouble keeping up with the courses.

That, Professor Carmichael said, is exactly what the school wants to hear. "Actually, many of these kids setting up student support groups, conducting special orientations for minority students interested in science to meet with science professors and including students in faculty research have helped raise grades and retain students.

Xavier did not always have a reputation for achievement in science. In 1977 Dr. Carmichael started a summer program, SOAR, for Stress on Analytical Reasoning, to teach students problem-solving and test-taking skills and prepare them for college science courses. SOAR expanded so that now Xavier offers high school students summer courses to help prepare them for algebra, biology and chemistry, as well as SOAR 2, which emphasizes physics, mathematics, computer science and engineering.

The summer programs, free for most students, not only help keep high school students interested in science but also became a hugely effective recruiting tool. Mr. Santiago, a New Yorker from Brooklyn, attended SOAR on a foundation grant and then chose Xavier.

DEMONSTRABLE GAINS

After the summer courses began Professor Carmichael, Professor Labat and several other faculty members began revamping the introductory science courses. From 1987 through 1989, the Association of American Medical Colleges reports Xavier placed more black students in medical school—87—than any other school in the country except Howard—158. Howard is more than four times Xavier's size.

Now, said Professor Labat and George Baker, professor of engineering, Xavier wants to steer more students into engineering and graduate school. Professor Baker has helped double engineering enrollment in 10 years, and oversees several projects, including ones for engineering students who fail at other schools. According to the National Science Foundation, blacks hold only about 2 percent of the Ph.D.'s in natural sciences and engineering. Because few of their students know black Ph.D.'s or engineers, Xavier teachers expect this to be their toughest challenge yet.●

THE APACHE HELICOPTER

● Mr. McCAIN. Mr. President, I rise today to discuss an article that appeared yesterday on page 2 of the Philadelphia Inquirer. The article is titled "Probe uncovers serious flaws in Apache helicopter." This article attacks an aircraft that the U.S. Army feels is one of our major success stories. It is based on old facts and undisclosed sources. It also makes accusations about maintenance that the Army and McDonnell Douglas Helicopter Co. have worked on in a joint effort for over a year.

Mr. President, I wish to make three points concerning the Apache and the charges made in this article.

First, there was not one mission that the Army gave the Apache helicopter to perform in Panama, or which the Army started, that was not completed. "The Apaches performed the missions as we expected them to perform," Col. Gene Cole, commander of the 82d Aviation Brigade at Fort Bragg, NC, told the Fayetteville (NC) Observer. "They did exactly what we wanted. The Apache survivability was even better than it's advertised to be.

The 11 Apaches involves in "Operation Just Cause" flew for nearly 250 hours, and 138 of these hours were at night. Only three Apaches were damaged. One took 23 small arms hits, including damage to the rotors and at least one hit in the engine, but returned to Howard Air Force Base under its own power.

In fact, Maj. Gen. Tom Arwood, the Army's deputy chief of staff for readiness, told Aerospace Daily that the pilots were pleased with the performance of the night vision system, particularly the Apache's targeting equipment, and that there were no difficult problems repairing aircraft.

Second, Mr. President, let me address the problem of spare parts. Three severe high wind conditions led to massive damage to the Army's Apache fleet during the year previous to "Operation Just Cause." In order to repair the damage done to the Apache's at Fort Hood, Fort Polk and in Europe, the Army had to make an unexpected draw down on its spare parts inventory. We knew that the spare parts situation was critical long before we went into Panama, but through the coordination of the Army and the McDonnell Douglas Helicopter Co., the Army was able to receive the spares it needed from the plant in Mesa, AZ.

Finally, let me address the source of the story. This article is based on an unpublished, unedited, bootlegged draft, and I repeat bootlegged draft, of a GAO report. Further, the article appears to come from a report that has been written to defend conclusions that were reached before the report was prepared.

The references to maintenance problems in this bootleg report deal with well known issues. These problems have been worked on by the Army and McDonnell Douglas for roughly a year and all seem eminently solvable. The fact that the spare parts were not available was well known by the Army long before the report and was the result of a series of freak storms. Taking these issues out of context from a report that has never had meaningful military review scarcely does any one a service.

Finally, Mr. President, let me say that I have talked to the Army about all of these issues. I was told that the Apache performed its mission in a superb fashion. I was told that the Apache was given missions that could not have been done by the Cobra helicopter. Let the record show that the AH-64 Apache helicopter earned high marks for the Army for its survivability, night vision capability, weapons accuracy and overall performance during "Operation Just Cause" in Panama. ●

GREEK INDEPENDENCE DAY

● Mr. METZENBAUM. Mr. President, I am pleased to join the people of Greece and Greek-Americans in the commemoration of Greek Independ-

ence Day on March 25. This day marks the end of 400 years of Greek subjugation by the Ottoman Empire, from the fall of Constantinople in 1453 until Greece proclaimed its independence in 1821.

March 25 is designated as a national day of celebration of Greek and American democracy; 2,500 years ago, Greece established the traditions of individual freedom and justice that are the cornerstones of democracy. The principle of Government by the people, based on equality under the law, is the essence of our national heritage. This precious gift of democracy has served as a bond between our two nations, and as a shining beacon for the oppressed nations of the world. As the dawn of democracy breaks across Eastern Europe and Central America, it is all the more appropriate that we honor the Greek people for the democratic heritage they have given the world.

We also owe a profound debt to Greece for its magnificent contributions to Western culture. The achievements of the Greeks in the fields of philosophy, science and the arts have had an immeasurable influence on the development of our society. Greeks and Greek-Americans continue to demonstrate their dedication to individual thought and creativity.

Today, Greece is a thriving nation that is still dedicated to the ideals of freedom, equality and democracy. I am proud to offer my congratulations to the people of Greece, and their brethren here in the United States, on the 169th anniversary of their independence.●

THE CASE OF THE STONOV FAMILY

● Mr. GRASSLEY. Mr. President, as part of the congressional call to conscience, I want to bring attention to the case of the Stonov family.

On Tuesday, I had the honor of meeting with Natalia Stonov here in Washington. Mrs. Stonov is the wife of the preeminent Soviet refusenik, Leonid Stonov.

As she say in my office, we talked for some time about the plight of Soviet Jews and her husband's life as a long-term refusenik. I would like to share their story and what I believe the United States can do to help them secure freedom.

Leonid and Natalia Stonov live in Moscow. Leonid has been refused exit since 1979. It seems that the Soviets think he harbors deep, dark secrets he gained from his job as chief of laboratory for testing herbicides and defoliants. Leonid left this job more than 12 years ago, but the Soviets still refuse him exit based on nebulous "state secret" grounds.

From the time they submitted their applications for exit visas, the Stonov's have been prevented from pursuing professional careers. He is an agricultural scientist, she is a physician.

In 1981, Leonid was stripped of his academic degrees by the Higher Attestation Commission for applying for an exit visa. The persecution they have suffered, just because they are Jewish, pervades their family roots. Leonid's father was a well-known Soviet writer, who was arrested in 1949 and accused of anti-Soviet activities. He was jailed for 10 years in concentration camps.

And in Moscow the Stonovs remain. Glasnost has not reached them. Their wall to freedom has not been torn down. The Helsinki accords are not being realized for them or the other remaining long-term refuseniks.

What must the United States do on their behalf? I believe that as long as there are long-term refuseniks being denied freedom, we have a serious issue with which we must confront the Soviets. Just as human rights has been an integral part of our diplomatic and economic relations with the Soviets for the last decade, human rights must remain on the front burner, on the top of the agenda, and be an uncompromising component of our continued relations.

We must not forget the Stonovs. I will always remember Mrs. Stonov sitting in my office, proudly wearing a Star of David around her neck. I can only wonder if she could wear it so freely in Moscow. I will remember her telling me of her fears—fears not only for her and Leonid, but fears they have for their sisters and brothers who also share their fate.

And as long as they are denied freedom, this vision will remain in my mind; especially when I am called upon, on the Senate floor, to consider legislation concerning our relations with the Soviet Union.

I must add my thanks to Leonid, who serves as the monitor in a project I established last fall. Since November, Leonid has provided me with firsthand information on refugee processing in Moscow and the status of human rights in Soviet society. I have taken his information and concerns to our Government in hopes of bringing to light problems with the process.

I have great respect for his courage in taking on such a role. However, though I value him as a crucial resource, I would gladly put my project on hold if Leonid and Natalia could join us in America. But until that day comes, we must continue to fight for their freedom.●

STRUCTURAL IMPEDIMENTS INITIATIVE

● Mr. RIEGLE. Mr. President, some of my colleagues on the Finance Committee yesterday introduced legislation to respond to the lack of progress in the important trade negotiations we are now engaged in with Japan.

As a coauthor of the Super 301 provision of the 1988 Trade Act, I share the frustration of my colleagues over lack of progress in the structural impediments initiative. I applaud the distinguished chairman of the Trade Subcommittee, Senator BAUCUS, for sending the signal that Congress expects meaningful results from these negotiations and that it is prepared to take further action if results are not forthcoming.

I was pleased to see that President Bush quickly requested a summit with the Japanese Prime Minister right after he was reelected a few weeks ago. This is the first time a President has personally intervened in a trade matter to this extent. Over half the summit was devoted to trade issues.

Since the summit, there has been the appearance of movement in Japan's negotiating position. We will know very soon whether the movement is real or just appearance. The next round of negotiations takes place in Washington next week.

I am not a cosponsor of Senator BAUCUS' bill at this time. This is not because I believe the bill goes too far. Just the opposite. If the negotiations fail, I do not think this bill would go far enough.

If the negotiations fail, the bill in essence requires that there be more negotiations—as much as another year and a half more. No action would be required even at the end of this second set of negotiations; retaliation would remain at the discretion of the administration.

I believe we will need a stronger response if the current negotiations fail. We should not be content to wait another year and a half—for a total of 2½ years—for Japan to give our products the same treatment we give theirs.

We will have a better sense of what the U.S. response ought to be after the negotiations next week. The Japanese Government will have every opportunity at that time to respond to our concerns. I would like to give them that opportunity and then decide what further action may be necessary.

Again, I share my colleagues' frustration, applaud them for sending an important signal, and look forward to working with them on this matter in the future.●

NOTRE DAME COUNCIL ON INTERNATIONAL BUSINESS DEVELOPMENT

● Mr. LUGAR. Mr. President, it has become increasingly apparent that U.S. college graduates are ill-equipped to participate productively in a global economy. I rise today to recognize a group of business students at the Uni-

versity of Notre Dame who have taken it upon themselves to address this issue. I commend these students for their initiative in forming the Notre Dame Council on International Business Development, and I ask that their statement of purpose be inserted in the RECORD.

The statement follows:

STATEMENT OF THE NOTRE DAME COUNCIL ON INTERNATIONAL BUSINESS DEVELOPMENT

The U.S. business and political communities, as well as a number of institutions of higher education, are engaged in discussions of the globalization of American commerce. Our present economic system cannot attain the goal of increased globalization and success within the global economy so long as our business school academics, business students, and corporate leaders concentrate solely on the domestic market.

Lack of practical business experience is a problem both for professors and students, especially in the area of international business. Insufficient scholarship opportunities for study and practical experience abroad leave students ill-prepared for competition in international business. Our future business leaders simply must be better equipped in the languages, cultures, ethics and business procedures of other countries.

Unfortunately, our short horizons permeate all levels of education and commerce in this country. This limited vision must be corrected before we fall too far behind other nations who, compared to ourselves, think and act on a far more international basis.

For these reasons, the students of the University of Notre Dame have set out to change this pattern and provide leadership on campus and at other learning institutions by establishing the Notre Dame Council on International Business Development. With the support of the University Administration and the Business School, this select group of students conducted a Student Forum on Globalization on March 15, 1989 entitled "Catching the Global Wave." Here the students discussed the practical application of the philosophical and ethical foundations of Notre Dame in the global business setting. The organization leaders have subsequently received formal University recognition for the Notre Dame Council on International Business Development. This organization gave an October 20, 1989 presentation to the Notre Dame Business School's Advisory Council in which suggestions for curriculum changes and the students' educational concerns were voiced.

This program is unique in that it is completely student operated. Periodic Roundtable discussions with internationally experienced business people and the inclusion of students from other universities are planned throughout 1990. This spring's Forum topic is "Europe 1992," and this summer a number of Notre Dame students will complete research internships in Europe. Close association with the Peace Institute at Notre Dame, which brings foreign students to campus for year-long study programs, also provides direct interaction with a diverse group and further allows business students to understand how commerce can be a means to promote world peace.

Interaction with alumni will be the focus of a Notre Dame International Alumni Organization, which presently is being started. This complementary program will provide the Notre Dame Council on International Business Development with another source of guest speakers, internships and career possibilities. So, while the student program increases students' international awareness, the alumni program will allow for practical application of that awareness. In effect, these two organizations will create a bridge between the world of academics and the world of international business.

The University of Notre Dame continues to exercise its role as a premier institution of higher education while promoting the necessity to focus business education on ethical behavior within the global economy.●

HONORING THE JELKIN-HARMS UNIT NO. 142, THE AMERICAN LEGION AUXILIARY OF TRIPP, SD

● Mr. DASCHLE. Mr. President, I rise today to pay tribute to the dedicated members of the Jelkin-Harms Unit No. 142 of the American Legion Auxiliary of Tripp, SD. Together with the members of the American Legion, they put valuable hours into projects for the purpose of enhancing the lives of veterans and other residents within their community. Their hard work is one of the reasons why Tripp, SD, is such a great place to live.

I am proud of the strong, visible presence of the American Legion Auxiliary in Tripp. For years, the students of the Tripp Public School District have learned many valuable lessons about alcohol and drug abuse prevention, child safety and civic pride as a result of the school programs sponsored by the American Legion Auxiliary. Each year, the students of the Tripp community are reminded of what it means to be a good citizen through the American Legion American Essay Program. I cannot think of a better group of role models for these young students than the veterans and their wives who live in Tripp and the surrounding community and know what it truly means to serve one's country.

The many fine contributions of the American Legion Auxiliary do not stop with their sponsored school activities. The American Legion Auxiliary is very proud of its recent cosponsorship of a successful community blood drive. The countless hours of volunteer service provided by the American Legion Auxiliary members are one reason the community blood drive far surpassed last year's blood donor total. This project to promote the "gift of life" exemplifies the community spirit that typifies rural areas throughout South Dakota. I am proud of the American Legion Auxiliary's efforts to enhance the lives of their fellow South Dakotans, and I am confident that rural communities, like Tripp, will continue to thrive because of their many fine contributions.●

WORDS OF INSPIRATION

● Mr. KERREY. Mr. President, I would like to enclose in the RECORD a speech given by Frank LaMere of Nebraska's Winnebago Tribe at Nebraska's annual Jefferson-Jackson Day dinner on March 24, 1990.

His speech was delivered at that point in the program listed as: "Words of inspiration." I must confess I was skeptical as he rose to speak. There is an old fashioned streak in me that recoils at creative attempts to substitute for the traditional "Invocation."

I rose like the rest of the audience to hear Frank's words. However, I was not prepared to be inspired. Instead, I expected to be embarrassed and made to feel so uncomfortable that I would be hunting for the responsible party after the meal.

As it occurred, I was falsely apprehensive. Frank LaMere moved me and helped me to remember something important. I urge my colleagues to read his words and to reflect on them. They are inspiring, offering much-needed guidance in the confusing world we find ourselves in, in the 1990's.

SPEECH BY MR. FRANK LAMERE

Senator Exon, Senator Kerrey, Senator Sanford, Congressman Hoagland, distinguished guests, fellow Democrats, an Indian orator in the 19th century once said, "Tribe follows tribe, nation follows nation, like the endless waves of the sea."

Think about that as we gather to strengthen the resolve of our party and as we work to preserve democratic values that hopefully will be here long after we are gone.

Think about the Cheyenne Indians, one time landlords of our western Nebraska Plains, who cried when they went into battle, "Nothing lives long but the Earth and the mountains, it's a good day to die," reflect, if you will, on their willingness to lay down their lives that their traditions would survive and that their people would live free.

Think about this and you will know what I have known, that we as Americans, Indians and Democrats, are not so different after all.

I come here tonight, begging the indulgence of my Winnebago elders and those in this Chamber who are more capable and more worthy of sharing with you their words of inspiration.

Knowing that I would come before this forum, I asked our creator to bestow upon this Democratic Party, the strength, the wisdom, the compassion and the willingness to continue as we have since our beginnings. To continue to remember the old, the disenfranchised, the yet unborn, to continue to defend the helpless, to empower, to provide opportunity and to stand with our working men and women. To continue to insure that this democracy will not forget the leadership role we play in the free world and the encouragement that we provide to all those who would be free.

Knowing that I would come before this forum tonight, seeking to instill, to motivate and to inspire, I looked to the press and the media in the last weeks and days to learn of democratic changes abroad that would appeal to your senses.

To learn of elections, unification, rebellion and self-government. To learn of constitutions, human rights, statesmen and freedom fighters. In short, to learn about heroes.

Indeed, I was prepared to come here extolling the virtues of foreign governments and praising the names of emerging world leaders.

But then, I thought about a young Nebraska sailor, here with us tonight, who had given his all for this country in winning the Congressional Medal of Honor. I thought of his pain and devastation, and what he has overcome. I am moved by it. I thought of the meritorious service of our Congressman and the struggles that our senior Senator faced many years ago in the jungles of Luzon and New Guinea. I have been told that he was not weak. I thought of black boys, white boys, Indian boys, and women who died trying to get home to Nebraska.

I thought of Tony Lamere, my best friend and younger brother, who at 20 years and 20 days, lost his life in Vietnam defending the Constitution. I remember my mother's broken heart and the tears of my Winnebago people. I remember his last letter to me in which he wrote, "I can take no pride like others here in being fearless or in saying that I am not afraid when I go into battle. I can only take pride in going out on patrol, day after day, being more afraid than I have ever been in my life."

These are our heroes Nebraska. They had been here all the time. They have inspired us through their sacrifice and they have paid our admission into this hall tonight. They have allowed us to stand on their shoulders and have secured for us the right to talk of things noble and democratic. They have left for us a legacy of freedom born of pain and endurance.

Do not forget these heroes, Nebraska. They are all that we have. They are the only heroes that we will ever need.●

HOUSE PASSAGE OF CHILD CARE

● Mr. DURENBERGER. Mr. President, over a year and a half after the Act for Better Child Care was introduced and 20 years after child care was first debated at the Federal level, we see a glimmer of hope in enacting the first comprehensive child care bill ever to pass the Congress. Child care is a critical national concern, both for the welfare and enrichment of our children and for the competitiveness of our economy.

While the bill passed by the House looks considerably different from the bill first introduced by the ABC Coalition, I believe this coalition deserves considerable credit for the leadership and the attention they have brought to this issue and for bringing it to the forefront of the political agenda.

I believe that the bill passed by the House reflects the lessons learned over the past 20 years—lessons that more Federal dollars, mandates, and bureaucracies do not, in and of themselves, solve problems. Experience has taught us that giving consumers the resources and information they need to make wise choices in the marketplace is the best way to both expand access and improve quality for many public services, including child care. The House bill properly adopts this concept.

It is unfortunate that the child care bill almost got side-tracked once again over an issue not even related to child care—and that is the use of vouchers in education. The education community has tried to block passage of this bill because they are concerned that permitting parents to choose the most appropriate child care program for their child through the use of a voucher system will lead to public funding of private educational institutions. This simply will not be the case. I am pleased that the House in the end chose to adopt the language Senator FORD and I added to the Senate package that lifts the restrictions on religious provided care and allows parents to choose the most appropriate form of care for their child whether it be in a church setting or not.

Changes that would have—for the first time—prohibited Federal funds to be used in religious-based child care programs would have had serious implications on the supply and affordability of child care in this country. My amendment to the Senate package—which was adopted today by the House bill—made sure that parents would be able to choose religious child care programs. This is extremely important if we are to meet the goals of this bill and ensure adequate supply levels of child care for all low-income families. An estimated one-third of all child care is provided in religious-based programs. In Minnesota, churches play a large and growing role—providing an estimated 35–40 percent of all child care services. Outside the metro area, this figure is around 25 percent ranging from a low of 5 percent in region 8 to 41 percent in region 5. Denying this choice to low-income families is absurd.

All but a handful of States have no restrictions on the use of public funds for religious-based child care programs. Indeed, Minnesota's own sliding scale fee program has no such restrictions. The fact is that allowing public subsidies to be used by parents choosing religious child care programs has worked well in Minnesota and in other States around the country. To reverse these practices would not only be a step backward in a State that prides itself for its leadership role in promoting individual choice in services but also would threaten existing programs reliant on funds received from both State and Federal programs.

The biggest winners of this breakthrough in House action, however, are the children. Most of all what is needed for so many families is additional money in their pockets so they can meet the work-family demands they face and can be assured of a quality child care program for their children while they work. We are finally on track in meeting these needs.●

YOUR MEAL TONIGHT, PRODUCED BY INDIANA FARMERS

● Mr. LUGAR. Mr. President, I would like to take this opportunity to introduce my colleagues to a distinguished group of Indiana students. These Hoosiers participated in the third annual Eighth Grade Youth Essay Contest, which I proudly sponsor in conjunction with the Indiana Farm Bureau and Bank One of Indianapolis. I would like to submit their names as an example of excellence in Hoosier education.

Each participant entered an essay on the theme "Your Meal Tonight, Produced by Indiana Farmers." I ask that the two winning essays, written by Marc Hill from Hancock County and Karah Simmons from Whitley County, be printed. As State winners of the Youth Essay Contest these two students are being honored today during a trip to our Nation's capital.

The material follows:

ESSAY BY MARC HILL, DOE CREEK MIDDLE SCHOOL, HANCOCK COUNTY

(Mrs. Carol Cummings, teacher)

As I sit on the tractor waiting for my father to unload the combin's load of soybeans into the augerwagon, I think about my meal tonight. My mom radioed in and said we will be having pork chops, mashed potatoes, gravy, corn, bread and butter and milk. Leaning back in the seat, I begin to think about my supper and Indiana agriculture.

Indiana ranks third in the country in pig production. We raise hogs so we have pork on the menu often. Pork helps the body to make cells and muscle tissue. Each person requires two servings from the meat group each day for good health.

Indiana ranks 28th in potato production. Potatoes are a very versatile food. They have carbohydrates and a major source of energy. We need three to four servings of vegetables each day. Our state ranks fifth in corn production. Corn is also a carbohydrate and a source of energy.

Our great state also ranks 14th in milk production. Milk is a wonderful source of calcium and is a major contributer to the structure of bones and teeth. Our bodies need three to four servings of milk products each day.

Indiana also produces a wide variety of other products, such as chickens, sheep, beef, popcorn, sunflower seeds, wheat, oats, apples and tomatoes.

It is very important to have a well-balanced diet. It will contribute to such things as a longer life, better health and more enjoyment out of life.

Boy, I sure wish he would hurry up. I am starving for some of that great Indiana home-grown food.

ESSAY BY KARAH SIMMONS, SOUTH WHITLEY MIDDLE SCHOOL, WHITLEY COUNTY

(Mrs. Prater, teacher)

Hey, you, there in there in the mirror? This is your body talking. You weren't going to skip breakfast, were you? I get so tired when you do that and my poor brain can hardly concentrate. Breakfast is what I need to get started on the nutrients I require every day to stay healthy and active.

Remember studying the food groups in health class. The dairy food group with

milk, cheese and ice cream helps me build and maintain bones, teeth, muscles and nerves because they are rich in calcium. Then there is the meat group. It includes meat, fish, poultry, eggs, cheese, dried beans, peas and nuts. They have protein, which every living thing needs. Without them, I become listless and fatigued. Vegetables and fruits make up the group that give me vitamins which help my vision, keeps my skin and organs in good condition, promotes steady nerves and gives me a normal appetite. Good digestion helps to convert food into energy and keeps bones and muscles healthy. I also need foods from the bread and cereal group. They supply me with carbohydrate for fuel and fiber for digestion.

Just think, I, your body, need all these nutrients, and you live in a state like Indiana where your can find so many of them. Indiana has dairy farms, hogs, cattle, sheep and chickens. It also produces grain crops, like corn, wheat and oats. Vegetables and fruits are also grown here in the spring and summer and can be stored for later use. Why, there is everything a body needs!

Now, go and have your breakfast, and don't go skipping dinner or supper either. Remember, you take care of me and give me the right nutrients and I will be healthy and here for a long time to help you enjoy your retirement!

YOUR MEAL TONIGHT WINNERS

DISTRICT WINNERS

District 1: Seth Zartman, Amy J. Van DeWalle.
District 2: Chris Hummer, Karah Simmons.
District 3: Craig A. Frey, Brandie Reid.
District 4: Gwyn Cordes, Adam Reynolds.
District 5: Stephanie Shubert, Sean Sharma.
District 6: Sara Gibbs, Marc Hill.
District 7: Trent Swartzentruber, Desha Secrest.
District 8: Lori Hertel, Anil Soni.
District 9: John Alvey, Terri Tempel.
District 10: Carmen Elliott, Travis Campbell.

COUNTY WINNERS

Allen: Pam Lontie, Jason Gerig.
Bartholomew: Anil Soni, Erin Baldwin.
Benton: Patrick Andrew Thurston, Kelli Noel Thurston.
Boone: Matt Sink, Stephanie Shubert.
Carroll: Craig A. Frey.
Daviess: Trent Swartzentrulow, Desha Secrest.
De Kalb: Chris Hummer, Danielle Bash.
Delaware: Arrick Garringer, Stormie Morgan.
Fayette: Brian Thackrey, Lori Hertel.
Franklin: Adam Mergenthal, Jill Ellis.
Fulton: Seth Zartman, Debby King.
Gibson: Greg Lear, Christy Hasenour.
Harrison: Todd Buckingham, Sunshine Kaufer.
Henry: Aaron Armstrong, Jennifer Schweizer.
Huntington: Matt Webb, Anna Rinehart.
Jefferson: Mike Howe, Stacy Ash.
Jennings: Travis Campbell, Brandi Corya.
Lagrange: Amy Wieseman.
Madison: Sara Gibbs.
Miami: Taylor Ortiz, Julie Sutton.
Newton: John Waldron, Amanda Taylor.
Nobel: Chet Smith, Jill Kunce.
Orange: Joe Sibbitt, Alicia Ragains.
Posey: Dixon Crouch, Katy McFadin.
Ripley: John Imgram, Carmen Elliott.
Rush: Roy Redd.
Shelby: Christopher Miller.
Spencer: John Wetherill.
Steuben: Adam Henderson, Kymberly Monchilow.
Sullivan: Brian Harris, Tara Weitekamp.
Tippecanoe: Stephanie Anna Rumble.
Vanderburgh: John Alvey, Jane Kim.
Wabash: Mark White, Gwyn Cordes.
Warrick: Joan Maurer.
Wells: Adam Reynolds, Shannon Pulfer.
Whitely: Matt McManama, Karah Simmons.●

HONORING THE OTTO QUANDE RENVILLE UNIT NO. 50, AMERICAN LEGION AUXILIARY OF SISSETON, SD

● Mr. DASCHLE. Mr. President, I rise today to pay tribute to the dedicated members of the Otto Quande Renville Unit No. 50 of the American Legion Auxiliary of Sisseton, SD. Together with the members of the American Legion, they put valuable hours into projects for the purpose of enhancing the lives of veterans and other residents within their community. Their hard work is one of the reasons why Sisseton, SD, is such a great place to live.

I am proud of the strong, visible presence of the American Legion Auxiliary in Sisseton. For the past 50 years, students in the Sisseton public school district have learned a lesson in patriotism from the many men and women of the American Legion who know first hand what it means to sacrifice for the good of their country. Each year, the men and women of the Sisseton American Legion present an American flag to every elementary school child who memorizes and successfully recites the Pledge of Alegiance to the Flag. Civic pride is also emphasized by the American Legion Auxiliary's annual "Government Day," during which students from Sisseton and the surrounding community tour the Roberts County Courthouse and meet and discuss issues of concern with their county's elected officials.

The lives of the elderly citizens of the Sisseton community are also enhanced by the many contributions of the American Legion Auxiliary. For example, the auxiliary provides wheel chairs, hospital beds, walkers, and other needed durable medical equipment to elderly citizens who have been recently discharged from the hospital and must rely on this medical equipment during their recuperation. Without the assistance of the American Legion Auxiliary, many elderly citizens on fixed incomes would never be able to afford this expensive durable medical equipment.

These are just a few of the many fine projects sponsored by the Otto Quande Renville Unit No. 50. Their commitment and dedication to serving their fellow citizens is a reminder that Sisseton's veterans and their families have not finished serving their country.●

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: calendar items numbered 678, 679 and 680, and all nominations placed on the Secretary's desk in the Marine Corps. I further ask unanimous consent that the nominees be confirmed en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

AIR FORCE

The following-named officer for appointment to the grade of general while assigned to a position of importance and responsibility under title 10, United States Code, section 601:

To be general

Lt. Gen. Ronald W. Yates, [redacted], USAF.

The following-named officer for appointment to the grade of lieutenant general while assigned to a position of importance and responsibility under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Thomas R. Ferguson, Jr., [redacted], USAF.

The following-named officer for appointment to the grade of lieutenant general while assigned to a position of importance and responsibility under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. David J. Teal, [redacted], USAF.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE MARINE CORPS

Marine Corps nominations beginning William G. Byrne, Jr., and ending Michael V. Villalva, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 20, 1990.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

ORDER FOR RECORD TO REMAIN OPEN

Mr. MITCHELL. Mr. President, I ask unanimous consent that the RECORD remain open today until 4 p.m. for statements, for the introduction of legislation, and that committees may file legislative and executive calendar business until that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I am advised that Senator RIEGLE would like to make a statement.

I see the distinghished Senator from Alaska [Mr. MURKOWSKI] is here. If the Republican leader has no further business, I would be prepared to yield to the distinguished Senator.

Mr. President, I yield the floor.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

VIETNAM

Mr. MURKOWSKI. Mr. President, I thank the majority and minority leaders.

Mr. President, there are still some holdouts in the worldwide rush to democracy as we see it developing today. We have seen the retreat in China, and certainly in Vietnam the situation has reached a standstill.

As we look at Vietnam, we recognize the Vietnamese have largely withdrawn their troops from Cambodia. The evidence has been that they have become more cooperative in the ongoing search of the final accounting of our MIA's.

Even as we speak here today a team of United States experts is in Vietnam interviewing villagers near crash sites where American aircraft are believed to have gone down.

And the Vietnamese have further agreed to address the question of Americans who we believe were taken alive but for which no final accounting has ever been made.

Nevertheless, it is fair to say that our relationship currently with Vietnam remains very distant.

We have no formal diplomatic ties.

Trade is embargoed, and for all practical purposes, the nation of Vietnam is virtually cut off from the United States.

But the question is what cost, if any, does this impose on our Nation? What would be the result if Americans could freedly travel within Vietnam? Would that exposure help resolve the question of the possibility of Americans being held captive in that country today?

A Vietnam that is closed to United States today is still open to trade from Europe and our Asian trade partners and competitors—and they are moving in, Mr. President—the French, the Germans, and others.

Any path toward normalization with Vietnam must take several facts into account in its consideration.

First of all and foremost, we still do not have a satisfactory accounting of our MIA's, those missing in action.

The recognition that the Vietnamese Communists still play a very major role in Cambodia's ongoing civil war is evidenced by virtually every news account coming from that part of the world.

Finally, we must maintain a realization that Vietnam needs us much more than we need them.

Those facts notwithstanding, the initiation of some type of relationship with Vietnam could bring certain benefits. It could lead to the expeditious resolution of the MIA question; the issue of trade is paramount as we look at our ability to be competitive in the world marketplace, and the opportunities for trade and the potential of a labor force that could generate the same degree of productivity that we see in the ASEAN countries; and, finally, the possibility of an end to the Soviet monopoly of the Vietnamese military bases and presence in Cam Ranh Bay, and so forth.

So I bring the attention of my colleagues to the realization that the time may be developing for a people's revolution, if you will, in Vietnam as we have seen in Eastern Europe—possibly a new Vietnam that would nurture the seeds of democracy and that would lead to the development of an economic vitality that we have seen as we reflect back on the lessons of history in both our relationship with Japan today, with Germany today, both nations, which we defeated in World War II.

So I ask my colleagues to reflect on the reality that these truly are extraordinary times, and extraordinary times provide extraordinary opportunities.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Michigan.

Mr. RIEGLE. I thank the majority leader.

NOMINATION OF TIMOTHY RYAN, JR.

Mr. RIEGLE. I take the floor to add a few comments on the subject that the minority leader spoke about just a few moments ago, namely, the nomination of Timothy Ryan to be Director of the Office of the Thrift Supervision.

I appreciate the kind reference that the minority leader made to the efforts of the Banking Committee to expedite the handling of that nomination.

At the specific written request of Secretary Brady, the committee acted with unusual speed to take up this nomination, and to deal with it this week.

We received the nomination papers only on Friday of last week, had a lengthy nomination hearing on Wednesday, and then under the use of emergency procedures brought the matter forward for a vote in committee this morning.

So we have tried in every way to accommodate the need for the fastest possible response to this particular job vacancy and all the factors that attach to it.

I might say that the job in question is not a single job. The person who receives that job becomes the Director of the Office of Thrift Supervision which oversees the entire savings and loan industry. But that person also gets two additional jobs. He becomes a member of the FDIC [Federal Deposit Insurance Corporation], which is responsible for providing all the deposit insurance for all savings and loans, and also becomes a member of the RTC [Resolution Trust Corporation], which is this very important responsibility to take and dispose of this mounting volume of assets that have been repossessed by the Government from failed institutions.

So these are three very, very big and important jobs that one gets in a package, if one becomes Director of the Office of Thrift Supervison.

I say today that there is no more difficult financial job in our country than that job. I say that over and above the job of being corporate controller and treasurer of any one of the corporate giants in the country or one of the Fortune 500, or any other top financial job in or out of Government, that today the person responsible for taking this job and sorting through the aftermath of the savings and loan collapse will have the single most demanding and difficult financial job in our country. So, obviously, we want someone of a towering size and capacity to tackle that assignment.

That was the issue that divided the committee quite sharply today as we took up this nomination. The vote, when it was taken, was a vote of 11 votes in favor of reporting the nomination to the Senate and 10 votes against. Obviously, the shift of one vote would have changed the outcome. So it shows, I think, how closely divided the committee was on this issue.

It was not decided on a partisan basis, as the votes themselves will indicate, in terms of how they were cast. I say on behalf of those 10, of which I was one as the chairman of the committee, we felt that the nomination was not strong enough and did not meet the standard of adequate qualification. The concern of those of us who voted that way goes to the issue of the enormous importance and complexity of this job and the need to have someone who is a bona fide financial professional, not necessarily someone out

of the savings and loan industry, but someone who certainly has a background at the highest levels of finance in this country and has been involved in very complex financial issues and matters, and who would bring a wealth of experience and know-how and professional contacts of others whose opinions may be drawn upon to be able to do this particular job.

That is important not only because you obviously want somebody that is up to the job and has the basic qualifications, but the job requires independent judgment. So while one might seek opinions elsewhere, this particular job, because it is an agency that is required by its very charter to express independent judgments, needs to have someone running it who is fully capable to draw off a wide body of experience and knowledge, albeit with outside advice, but in the end to be able to make solid, top-level, executive-level financial judgments and decisions.

So to be able to do that independently, to safeguard that aspect of the job, again leads to the qualification question of somebody who really has a towering reputation and body of professional experience over many years that would show that kind of financial track record and capability.

This issue will be coming to the Senate floor, I hope, next week. We must, today and over the weekend, try to work out the scheduling arrangements, but the thought within the Banking Committee was that upon the disposition of the legislation on clean air, that if it is agreeable with the leadership of the Senate, that this matter come up promptly.

There are other extenuating circumstances with respect to outstanding court issues and court challenges that make it necessary for us to continue to move on an expedited basis.

I take the time now just to lay that minimum foundation as an add-on to comments I made late last evening here on the floor to address this point to my colleagues.

It is very important, that I say to all my colleagues in the Senate who have not yet examined this issue closely, that would be all the Members not serving on the Senate Banking Committee, the other 79 Members of the Senate who will be taking this issue up in close detail for the first time, I urge all of you to withhold a judgment on this until you have had a chance to hear the full debate.

Obviously, any time there is a divided opinion within the committee, where one vote makes a difference as to whether or not a nomination is reported or turned down, it indicates that there is a lot of argument and factual information that ought to be weighed on both sides of the question, without in any way prejudicing the outcome. I have endeavored to run a fair process in every way, shape and form, and will continue to. I think Members ought to know that this is an important enough job, and there are enough important debating points that will be expressed and need to be heard, that I think Members ought to withhold, for now, any final judgment on this matter.

I think that also applies, even more importantly, to any phone calls they might get from the White House or any other place that says: "Look, we would like you to say today that you will vote for this guy; he is a great guy" and so forth and so on. That happens as a matter of course with nominees, regardless of administration. So that is nothing out of the ordinary. I think it is very important with respect to the serious relevance of this particular job in solving this outstanding financial problem of such incredible size in the savings and loan industry that Members will want to have all of the facts and the benefit of all of the debate before they finally make a final judgment.

There were Senators today in the committee meeting that were not quite sure how they would vote until all of the debate took place in the committee, and I suspect that may well be the case on the floor as well.

So I hope that Senators would take the committee report—we intend to have it done as quickly as it can be completed and sent to the printer—I hope that you will read it and will feel free to inquire of those of us on the Banking Committee on either side of the issue for any answers to any questions that we can provide. We will try to be helpful in any way we can.

I might say that in talking last night, myself with the nominee, we met for the first time and had a pleasant exchange, and I thought a constructive dialog back and forth.

So this issue has nothing to do with personalities as such. It has everything to do with the question of what constitutes an appropriate body of experience and qualifications to take on what is, I think without any question, the most complex, demanding and difficult financial job in the United States today.

So with that, Mr. President, I will yield back the remainder of my time and I will be prepared to discuss this item further next week.

ORDERS FOR MONDAY, APRIL 2, 1990

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 1 p.m. on Monday, April 2; that, following the time for the time leaders, there be a period for morning business not to extend beyond 1:30 p.m. with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. MITCHELL. On Monday, Mr. President, the Senate will resume consideration of the clean air bill at 1:30 p.m.

I again urge Senators with amendments to the bill to come forward with those amendments on Monday. There will be no rollcall votes on Monday. Any rollcall votes ordered on Monday will be stacked to occur to Tuesday.

On Tuesday morning, when the Senate begins its business, it will resume consideration of the clean air bill, and the managers hope to have ready for consideration at that time a managers' package of allowance amendments.

The Senate will complete action on the clean air bill on Tuesday, no later than 8 p.m., and hopefully earlier than that. Senators should be aware that no consideration will be given to requests for extending the time for final passage of this bill.

Mr. President, I have no further business.

RECESS UNTIL MONDAY, APRIL 2, 1990 AT 1 P.M.

The PRESIDING OFFICER. Pursuant to the previous order of this body, the Senate stands in recess until 1 p.m., Monday, April 2, 1990.

Thereupon, at 2:49 p.m., the Senate recessed until, April 2, 1990, at 1 p.m.

NOMINATIONS

Executive nominations received by the Senate March 30, 1990:

THE JUDICIARY

RICHARD W. VOLLMER, JR., OF ALABAMA, TO BE U.S. DISTRICT JUDGE FOR THE SOUTHERN DISTRICT OF ALABAMA VICE WILLIAM BREVARD HAND, RETIRED.

IN THE COAST GUARD

REAR ADM. WILLIAM J. KIME, U.S. COAST GUARD, TO BE COMMANDANT, U.S. COAST GUARD FOR A TERM OF 4 YEARS WITH THE GRADE OF ADMIRAL WHILE SO SERVING.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 30, 1990:

IN THE AIR FORCE

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be general

LT. GEN. RONALD W. YATES, [redacted] USAF.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be lieutenant general

MAJ. GEN. THOMAS R. FERGUSON, JR., [redacted] USAF.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be lieutenant general

MAJ. GEN. DAVID J. TEAL, xxx-xx-xxxx, USAF.

IN THE MARINE CORPS

MARINE CORPS NOMINATIONS BEGINNING WILLIAM G BYRNE, JR, AND ENDING MICHAEL V VILLALVA, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON MARCH 20, 1990.

HOUSE OF REPRESENTATIVES—*Monday, April 2, 1990*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We exalt, O God, in the gift of freedom and the excitement of liberty, and are appreciative of all the opportunities to build and achieve in our lives. Yet, as we enjoy these gifts, so grant us, O God, the responsibility to use these gifts with wisdom and discretion, with integrity and honor. Remind us, gracious God, that You have given us commandments and moral instruction in the way of a responsible life so that we may lead good and holy lives one with another. In Your name, we pray. Amen.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Mississippi [Mr. MONTGOMERY] come forward and lead the House in the Pledge of Allegiance.

Mr. MONTGOMERY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

The message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment, a joint resolution of the House of the following title:

H.J. Res. 500. Joint resolution to designate April 6, 1990, as "Education Day, U.S.A."

The message also announced that the Senate agrees to the amendment of the House to the bill (S. 388) "An act to provide for 5-year, staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes."

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 393. An act entitled "Camp W.G. Williams Land Exchange Act of 1990";

S. 1230. An act to authorize the acquisition of additional lands for inclusion in the Knife River Indian Villages National Historic Site, and for other purposes;" and

S. 1859. An act to restructure repayment terms and conditions for loans made by the Secretary of the Interior to the Wolf Trap Foundation for the Performing Arts for the reconstruction of the Filene Center in Wolf Trap Farm Park in Fairfax County, VA, and for other purposes.

The message also announced, that pursuant to Public Law 93-29, as amended by Public Law 98-459, the Chair on behalf of the President pro tempore, appoints Dr. Virginia Zachert, of Georgia, from the private sector, to the Federal Council on the Aging.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

Washington, DC, March 30, 1990.

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5 of rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope received from the White House at 3:35 p.m. on Friday, March 30, 1990 and said to contain a message from the President whereby he transmits an amendment to the International Regulations for Preventing Collisions at Sea, 1972, as amended.

With great respect, I am,

Sincerely yours,

DONNALD K. ANDERSON,
Clerk, House of Representatives.

AMENDMENT TO INTERNATIONAL REGULATIONS FOR PREVENTING COLLISIONS AT SEA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-169)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, April 2, 1990.)

UNLV BASKETBALL TEAM COMPOSED OF MIDDLE AMERICANS

(Mr. BILBRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILBRAY. Mr. Speaker, as a UNLV alumnus, I come here not to praise my team or to talk about Duke. What concerns me is what is going on in the press.

They are a young team and they are young people, 18-, 19-, 20-year-olds who have been branded by many as thugs, or disreputable young men because they are junior college or community college transfers into UNLV, and these young people are condemned for some reason because they come out of the inner cities, and they play rough, tough, and hard basketball. But as the Loyola Marymount coach stated, they are a real class act.

Ever since the beginning of the tournament, at a time when even they did not know in their own tournament that Loyola Marymount would be in the tournament, they wore a black patch for Hank Gathers of Loyola Marymount, a team we have played consistently over the years, which they respect.

The team has worked hard to get into the NCAA finals. I do not say who is going to win tonight. I am not here with bragging rights, but I do not think it is wrong for a young person to go to a junior college or community college, or to fight his way into college and have to work hard and to be an average student.

I think it is important to recognize that UNLV is a State institution, a State college with low tuition, because we believe in Nevada that every young person in this country that wants to go to college should have the opportunity to go to college. We do not want to make it so expensive like a Duke, or Harvard, or Stanford, that one cannot get in. Only the upper one-tenth of 1 percent are eligible for those institutions.

Tonight when UNLV plays basketball, look out there, look at a bunch of kids that could be your sons, kids that want their education, enjoy their school, and are average, typical Americans that live in Nevada, that enjoy our State, and could be from any State in this country.

The University of Nevada Las Vegas is Middle America. We are not an elitist school. We will be playing for the average citizens of this country. We are not a school to not be proud of. I am an alumnus of that university, and I am proud to be a UNLV alumnus, and proud that this time our team is representing us out there.

When watching tonight, just remember they are average kids. They are not the upper one-tenth of 1 percent, but they are great kids, and they are playing hard.

TRIBUTE TO THE PAGE HIGH SCHOOL PIRATES OF GREENSBORO, NC

(Mr. COBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBLE. Mr. Speaker, this is the season to praise basketball champions, and my district is no exception.

About a week ago the Page High School Pirates of Greensboro, NC, were declared the State 4A champs. The Pirates lost not a single game during the 1989-90 season while winning 31.

The average grade point average compiled by these basketball players is 3.8. The Pirates emphasize team performance over individual statistics, unselfishness for the good of the team was their motto.

At this time in our history, Mr. Speaker, when greed appears to be universally ubiquitous, here was a basketball team whose members emphasize the importance of academics over athletics, unselfishness over personal acclaim, hard work over frivolity.

Perhaps we can all learn from the example set by the Page Pirates, North Carolina's reigning 4A boys' basketball champions.

LEAVE A WAKE-UP CALL FOR NETWORK NEWS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, last week, an anxious world learned from an overdose of press stories that President Bush has made a decision, on broccoli. The story that the President of the United States doesn't like broccoli was covered and recovered all week by a press corps seemingly anxious to torture us all with this mindless minutia.

While the world was being offered this not-quite award-winning news about the President's taste in vegetables, the television cameras and journalists covering the broccoli shipments to the White House continued to ignore the relentless march of famine and starvation in Ethiopia and Sudan, where hundreds of thousands of people are at risk of losing their lives very soon.

One expert, just returned from Sudan, told our congressional hearing that he saw old women 40 feet up in trees gathering leaves so that their families would have something to eat. Tree leaves for dinner. That's all there was. Hearings have been held in both the United States House and Senate on this impending disaster in the Horn of Africa, but not a single television camera is present to record the horror stories of those just returned from Ethiopia and Sudan to tell us of the men, women, and children bravely waging a battle against starvation.

How, I wonder, can the world's press spend a week chasing stories about broccoli and ignoring stories about mass starvation? How can they treat the light so seriously and the serious so lightly?

The winds of hunger blow every hour and every day. And, in an age when news and entertainment seem a tangled web, the issues of famine and hunger can't compete with the President's broccoli and the Trump's divorce. So will someone please leave a wake-up call for the network news. Starving men, women, and children need their attention. Now.

□ 1210

CONSIDERATION OF A CONSTITUTIONAL AMENDMENT ON FLAG PROTECTION

(Mr. DOUGLAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOUGLAS. Mr. Speaker, we are making progress on protecting that flag that hangs behind you here on the floor of the House.

As you know, 2 weeks ago we voted 309 to 101 to withdraw a brief filed on behalf of the House that said the Supreme Court can take its time deciding on the constitutionality of the Flag Protection Act. Luckily the House withdrew that brief and last week the Court announced that on May 25 it will hear oral arguments in a special session to determine the constitutionality of the Flag Protection Act.

If the act is upheld, that is the end of the problem. But I fear that it will not be upheld, and therefore I am very pleased that the Speaker has announced both in writing and orally to the cosponsors of the Michel-Montgomery amendment that in July after the Court hands down its opinion in June we will have a chance to vote on a constitutional amendment to properly protect our Nation's flag.

I still have at the desk discharge petition No. 7 that would compel a vote, but with the Speaker's announcement we at least know we will have a vote in July after the Court decision in June, and that is good news for those Americans who really want to properly honor and respect our Nation's flag.

CELEBRATING THE 25TH ANNIVERSARY OF THE OLDER AMERICANS ACT

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, in July the Nation will celebrate the 25th anniversary of the Older Americans Act which has helped millions of senior citizens to live happier and more fulfilling lives.

I am proud to be a cosponsor of House Concurrent Resolution 276, a resolution to celebrate this important silver anniversary.

The Older Americans Act was signed into law by President Johnson on July 14, 1965. In the past 25 years, the act has provided needed funds to States for the establishment of community planning, social services, and personnel training for senior citizens.

It has also provided, in 1988 alone, over 240 milion meals to needy elderly Americans, 40 percent of which were delivered at home.

I urge my colleagues in Congress to reauthorize the Older Americans Act when it expires in 1991.

The act is a proven, successful way to ensure America's elderly have an opportunity to lead happy, productive lives.

GENERAL LEAVE

Mr. DORGAN of North Dakota. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Virginia [Mr. BOUCHER].

The SPEAKER pro tempore (Mr. BENNETT). Is there objection to the request of the gentleman from North Dakota?

There was no objection.

THOUGHTS ON CONSTRUCTION OF A NEW FARM BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Dakota [Mr. DORGAN] is recognized for 5 minutes.

Mr. DORGAN of North Dakota. I thank the Speaker.

Mr. Speaker, I will take just a few minutes today, but I did want to talk about the work of the U.S. House this week in constructing a new farm bill.

I just spoke on the floor a few minutes ago about what is happening in Ethiopia and Sudan. Hundreds of thousands of people are at risk of starvation. And not a month or two, or 6 months or a year from now; they are at risk now. These are folks who do not have enough to eat.

If anyone in this Chamber looked in the eyes of a young 1- or 2-year-old child in Ethiopia who is starving today, we would bleed for that young child. Yet that is happening in hundreds of thousands of cases.

In this country, we have something called the Farm Belt, stretching from North Dakota to Texas. We produce wonderful agricultural products. We built the most impressive, effective, ef-

ficient Farm Belt in the history of civilization.

And yet somehow the policymakers in this country have convinced us to look at our farming activities as some sort of national liability. It is not. It is a national asset of significant strength.

We produce food in great quantity. There are other people in the world who are starving.

We have found it very easy to snap our fingers and move guns to almost anybody in the world that wants them. We are wonderful at moving guns to governments that do not need them.

The question is, can we also raise food in great quantities and get food to people who in this world are desperately hungry, and do it in a way that gives those who produce it a decent return?

Now I have been hearing from my colleagues in Congress for a while about this wonderful, unprecedented economic expansion in America. They say we have had 7, 8, or 9 years of unprecedented economic expansion, economic growth? You will not witness that growth in the Farm Belt.

It has been great times in Hollywood, wonderful on Wall Street, and there are some States in between that have done quite well. About 16 States, as a matter of fact, have done very, very well.

But a whole lot of States in this country have suffered a long, protracted economic recession and North Dakota is one.

The collapse in commodity prices on the farm has thrown the Farm Belt into a literal recession. My State has had an 8-year price recession followed by 2 years of drought.

Now as we construct a farm bill this year, again working with the Committee on Agriculture in the House, what should we be trying to do? Should we be trying to decrease support prices for family farmers? I do not think so.

Everything that family farmers purchase is increasing in price: feed, seed, fertilizer, petroleum. So how can a farmer make it if what they purchase increases in price and if what they sell decreases in price?

President Bush says, "Let us take the target price for $4 per bushel for wheat down to $3.35." That is a prescription for economic failure of massive proportions in the Farm Belt.

It seems to me we ought to be developing a philosophy here in the Congress that our intent is to try to preserve the network of family farms and to construct a price support system that allows that to happen.

We do not need to pay price supports to someone who milks 3,500 cows. I do not care much about those folks. If they want to milk more than 100 cows, let them milk them at their own risk. We do not need to pay big price supports to big operators. If they want to farm two counties, God bless them. They have every right to do that in America. But the Federal Government does not have to be a financial partner.

□ 1220

However, a small family-sized farm faces an uncertainty that is not faced by another business person. Their price is subject to international whipsaws and price variations. It goes up and down, unpredictably, in ways we cannot understand or control.

For that reason, a long time ago we decided to provide some price supports for family farm units. Otherwise, when prices go down and stay down we would wash out all the family farmers. So, we built that little bridge over the price depression valley, and that was to help farmers across those international price depressions. Unfortunately, the bridge has become a set of golden arches, almost, for the largest farmers in the country.

Now, our job, it seems to me, is not to retreat on price supports, and not to decide we do not want to support family farmers. It seems to me family farmers are very important to this country. Our job is to determine how we can do that in a way that makes sense for them and makes sense for the country. It seems to me that everything we are doing in the farm bill ought to flow from this central philosophy. Our intent is to maintain and support a network of family-sized units in this country. If Americans think food is expensive now, how would they like to pay the cost of food produced by 2,000 megacorporations—then we would understand what food prices are all about.

Today, we have the highest quality food at the lowest cost of any industrial country in the world. Our agricultural system has worked to build the best system in the world, and now is losing family farms by the thousands, week after week, because they cannot make it when prices are below the cost of production.

We must do better. We can provide a better price support for family farmers at less cost to the Federal Government if we decide that it is family farmers we are going to support, rather than giant agriculture factories who want to farm county after county in America's heartland.

That is our challenge in the 101st Congress this year as we write the new farm bill.

THE INTRODUCTION OF THE INVESTMENT ADVISERS DISCLOSURE AND ENFORCEMENT ACT OF 1990

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. BOUCHER] is recognized for 5 minutes.

Mr. BOUCHER. Mr. Speaker, I am pleased to be joined today by seven of my colleagues on the Energy and Commerce Committee as well as the major trade associations representing the financial planning community, consumers, and State securities regulators as I introduce the Investment Advisers Disclosure and Enforcement Act of 1990.

Our goal is to provide better investor information and protection by reforming the Investment Advisers Act of 1940. The seven members of the Energy and Commerce Committee who join me as original cosponsors include Chairman JOHN DINGELL, Subcommittee Chairman ED MARKEY, and my colleagues DENNIS ECKART, JIM COOPER, JIM SLATTERY, and RON WYDEN.

Chairman DINGELL, Chairman MARKEY, and Mr. ECKART will be making their own statements of support. Following my remarks I would like to include, for the RECORD, statements of endorsement from the American Association of Retired Persons, the Consumer Federation of America, the International Association of Financial Planners, the Institute of Certified Financial Planners, the National Association of Personal Financial Advisers, and the North American Securities Administrators Association [NASAA].

Numerous press reports and studies have documented widespread fraud and abuse by financial planners. Estimates of investor losses range from hundreds of millions of dollars to more than $1 billion annually. The estimates continue to grow, and even the lowest estimates clearly point to the need for better regulation.

Individuals lose their life savings. Parents see their children's college educations put in jeopardy. Couples who have worked to have a financially secure retirement live their senior years in poverty.

The losses occur in a variety of ways:

Some who call themselves financial planners, or something similar, have no skill or training and, through negligence and inappropriate advice, incur avoidable losses for their customers.

Some unscrupulous practitioners gain custody over their customers' funds and through churning of the accounts exhaust the funds through unnecessary expenses.

Others simply steal the money.

A more typical form of abuse is self-dealing. Self-dealing occurs when a planner encourages a client to purchase a financial product for which the planner receives a special fee or commission when the product is sold. Financial planners hold themselves out to be objective advisers, but many of them have a hidden agenda. They are more product salespersons than they are objective sources of information.

In fact, the majority of those who call themselves financial planners make most of their income from the commissions they earn on the sale of the financial products they recommend. There would seem to be an inherent conflict of interest in an adviser purporting to offer objective advice, and then making recommendations in which he has a financial interest. But this practice is in fact widespread and generally quite legal.

Studies by the Consumer Federation of America and NASSA document the enormous annual losses that occur through this self dealing process. Most typically the consumer does not know the extent of the commission, or other incentive, that the planner is receiving for offering this supposedly objective advice.

The problems are serious. The abuses are growing. Better regulation is needed.

The Securities and Exchange Commission, which has authority over the industry, has acknowledged the absence of resources adequate to police investment advisers and financial planners. The SEC's staff for this function has not grown since 1980, during which period the number of registrations has tripled.

I am therefore persuaded that the best immediate help for investors is to empower consumers with the information they need to make a fully informed decision about the financial planners they select and the recommendations they make.

That is the purpose of the legislation. The bill has five essential provisions.

First it requires all practitioners, without regard to the financial product they recommend or sell, who hold themselves out to the public as financial planners, investment advisers, or similar terms, to register as investment advisers under the 1940 Investment Advisers Act. They will then have an obligation under Federal law to place their clients' interests above their own.

Second, the bill prohibits any misrepresentation of the qualifications of the financial planner. A statement of the education and experience of the practitioner will be required.

Third, the bill mandates full written disclosure to the customer of compensation, including fees, commissions, and other nonfinancial incentives which the practitioner will receive from anyone other than the customer when particular financial products are sold. This information is vital for the customer properly to evaluate the advice he receives.

Fourth, the bill creates a private right of action to enable customers to sue for damages when they sustain losses because of 1940 act violations. Not only are we providing a significant means of redress, but the mere presence of the private right of action will act as a significant deterrent to abusive planner practices.

Finally, consistent with a current SEC legislative proposal, we have established a list of civil penalties for the Commission to pursue under the act, enabling the Commission to enforce the act without having to go to court.

The organizations endorsing our legislation today are diverse. It's not often that businesses endorse a bill that provides greater regulation for their industry.

It is also a little unusual for industries to stand together with State regulators and consumers to endorse any legislation. I want to commend each organization represented today for the spirit of accommodation they have put forth in the interest of advancing public policy.

While the legislation is a major step forward, other efforts to combat financial planner misconduct will also be required. I want to stress the importance of the SEC maintaining its cooperative efforts to work with State regulators to combat fraud in the financial planning industry. We should also provide additional resources for the SEC so that its excellent staff can improve the auditing of financial planning firms, and take action where appropriate.

Finally, I want to note ongoing negotiations with the regulated professions of accounting, securities brokerage, and lawyers over the scope of their exemptions from coverage under the 1940 act. We were not able to conclude these negotiations prior to today, but I anticipate our accommodating their special concerns before the subcommittee markup commences.

In conclusion Mr. Speaker, there is clearly a need for better consumer information regarding financial planners and more effective enforcement of both the spirit and the letter of the Investment Advisers Act. I believe that the measure we are introducing today will, when enacted make significant progress in that direction. I urge my colleagues to join me in this effort. I yield back the balance of my time.

AARP Supports New Bill To Regulate Financial Planners

Washington, DC.—The American Association of Retired Persons (AARP) lent its support today to a new bill that would regulate financial planners for the first time.

AARP announced its support for the legislation at a Capitol Hill press conference held by the bill's sponsor, U.S. Rep. Rick Boucher (D-Va.)

"AARP has become increasingly concerned about the recent proliferation of investment advice services and their adverse impact on consumers," said Martin Corry, AARP's Director of Federal Affairs. "AARP is concerned that many older people seeking financial guidance fall prey to incompetent or unscrupulous individuals who give poor investment advice or who offer questionable sales promotions."

For older consumers, this impact can be particularly devastating and can often result in the loss of accumulated savings reserved for retirement.

Since millions of older people entrust their retirement savings and investment decisions to financial planners, Corry said AARP believes Congress should address problems in the financial planning industry.

AARP is the nation's leading organization for people age 50 and over. It serves their needs and interests through legislative advocacy, research, informative programs and community services provided by a network of local chapters and experienced volunteers throughout the country. The organization also offers members a wide range of special membership benefits, including Modern Maturity magazine and the monthly Bulletin.

CFA Endorses Representative Boucher's Financial Planners Disclosure and Enforcement Act

Washington, DC.—Today the Consumer Federation of America endorses the "Financial Planners Disclosure and Enforcement Act of 1990," introduced by Representative Rick Boucher (D-VA).

"CFA estimates that consumers lose or misinvest at least a billion dollars a year at the hands of unscrupulous and incompetent financial planners," said CFA financial planning specialist Barbara Roper. "The current regulatory system is a seive. Representative Boucher's bill would go a long way toward plugging the holes."

The Boucher bill attacks the two most serious financial planning abuses: use of financial planning by con men as the perfect cover for fleecing their victims and self-dealing by so-called "legitimate" planners who planning practice is little more than the hook to catch clients for the real money-making business of selling financial products.

The bill, which would amend the Investment Advisers Act of 1940, has four key elements:

It defines all financial planners as investment advisers, thus forcing them to register with and be inspected by the Securities and Exchange Commission, as well as requiring them to serve as fiduciaries who place their clients' interests before their own.

It mandates up-front detailed disclosure of compensation, including commissions and other awards from product sponsors, in actual dollar amounts and as a percentage of recommended investments, thus enabling consumers to determine before they spend their money whose interests the planner is really representing.

It gives the SEC a means of enforcing the law, short of criminal prosecution, by creating civil penalties for infractions of the statute.

It makes it easier for defrauded consumers to sue for redress by creating a private right of action under the Act for individuals who can demonstrate financial damages resulting from violations of the Act.

"We believe this combination of prevention and enforcement is the best approach to take to protest consumers from unscrupulous financial planners," Roper said. "We urge Congress to act quickly to put these protections in place."

"When all financial planners are subject to SEC oversigtht as investment advisers, con men will find it more difficult to set up as financial planners without triggering regulatory attention," she said. "When all planners are considered fiduciaries, those whose only interest is selling products will have to find a new way of doing business."

"By hitting financial planners where it hurts, in the pocket book, the civil penalties and private rights of action provisions will create an incentive for compliance with the act that previously has not existed," she continued.

The Boucher bill stands on its own as a strong consumer protection package, since its disclosure provisions and private rights of action provide consumer protections without straining the SEC budget. But any approach to consumer protection in this area must also address the inadequacy of SEC resources. For this reason, CFA also supports legislation to allow the SEC to keep the fees it levies and to adjust those fees to reflect budget requirements. Such a proposal is currently included in the international securities law enforcement bill (H.R. 1396), and CFA urges its passage.

(Consumer Federation of America is a coalition of more than 240 pro-consumer organizations with approximately 50 million members.)

The Institute of
Certified Financial Planners,
Denver, CO, March 2, 1990.

Congressman Rick Boucher,
428 Cannon House Office Building,
Washington, DC.

Dear Congressman Boucher: In keeping with our conversations with Mr. Larry Clinton, Legislative Assistant, we are writing to lend our support to your draft legislation which we have termed: "Financial Planners as Investment Advisers Disclosure and En-

forcement Act of 1990." We believe this title better connotes a premise of the draft bill—that financial planners and those using similar titles do act as investment advisers under most circumstances and should thus be registered as investment advisers.

Registration of investment advisers is a protection for the public, and the Institute has for many years encouraged and strongly recommended registration (federal and state) for its own members who offer investment advice. For years the Institute has required disclosure in writing and in advance of an engagement, for members participation in our Direct Public Awareness Program. Our support for your holding out provision is based on our belief that the public expects to receive investment advice when they engage the services of a personal financial consultant, financial advisor, or financial planner. For example, a July, 1987 survey the Institute conducted of subscribers to Sylvia Porter's Personal Finance magazine revealed that 75% of them expected to get such services. Therefore, failure to register as an investment adviser, thus enabling one to legally give investment advice under federal law, may mislead consumers engaging the services of financial planners, advisors, or consultants. Preventing misrepresentation is a purpose of the Investment Advisers Act of 1940.

However, the Institute's support for this holding our provision is conditional on similar treatment for all investment advisers. The financial services marketplace has changed dramatically over 50 years. If it ever was equitable for an individual attorney or accountant, for example, to be excluded from registration on the basis of title, it is no longer fair to do so if he/she is offering financial planning or investment advisory services. The public is similarly entitled to basic protection with any firm or entity which, in the changed marketplace, offers or provides such services. The statute should treat all advisors equally, and not condone some doing what ever they wish while others are held to specified standards. The Institute terms this concept a "level playing field" and our support of your bill is conditioned upon this principle. Otherwise, the bill would simply add more regulation upon the regulated, placing them at a competitive disadvantage with those exempted while performing similar services for the public.

We are similary supportive of the bill's disclosure provisions. Material disclosure by investment advisers goes to the heart of the federal statute. Potential clients need and deserve full and fair disclosure about an adviser's background, business practices, fees charged, potential conflicts of interest, etc. Again, these provisions must be uniformly applied. Proper public protection means no one actually giving investment advice should be exempted.

Lastly, we believe that the bill's provision of a private right of action is a more proconsumer, less costly approach to providing consumer protection there are self-regulatory approach proposed by others. Empowerment of the consumer should keep both investment advisers and federal regulators on their toes. But again, this needs uniform application to all investment advisers to ensure blanket protection to consumers.

The Institute does not view financial planning as synonymous with investment advising. Financial planning is a broader concept and involves advice on other topics besides securities. We are working with others on the state level, where professions are regulated, to also assure public protection. Nonetheless, we are pleased to join you and others in supporting this federal legislation which would provide greater assurances of protection to the investing public, and allow qualified and competent financial planners and investment advisers, who do put client interests first, to be treated identically with those who might otherwise hide behind a regulatory exclusion in offering investment advisory services.

Thank you for your leadership.

Sincerely,

ROBERT P. GOSS, Esq., CFP,
Executive Director.
GARY W. WEBSTER, CFP,
Chairman, Government Affairs Committee.

STATEMENT OF NAPFA

The National Association of Personal Financial Advisors strongly endorses the Investment Advisors Disclosure and Enforcement Act of 1990.

Financial planning has grown rapidly in the past ten years. By some estimates,[1] more than 250,000 individuals and companies now offer financial planning services to the public. The regulation of financial planners currently falls under the purview of the Securities and Exchange Commission (SEC). Unfortunately, the SEC's budget has not kept pace with growth in the financial planning industry. Furthermore, a recent SEC study of the financial planning industry[2] indicates that many financial planners do not comply with existing regulatory requirements.

The National Association of Personal Financial Advisors (NAPFA) is a non-profit trade association whose members are practicing financial planners nationwide. NAPFA has become alarmed by the following developments:

Studies by the Consumer Federation of America and the North American Securities Administrators Association (NASAA) that indicate fraud and abuse of consumers by financial planners is a growing concern.

That the majority of financial planners hold themselves out to the public as objective advisors, yet, at the same time, earn most of their income from the sale of investment products to their clients.

That most planners who earn income from the sale of investment products do not disclose this fact, as required by law, to clients.

That the number of investment advisors registered with the Securities and Exchange Commission has increased 217% since 1980, yet the SEC's staff years devoted to investment company and advisor matters during the same period increased just 13%.

NAPFA's support of this legislation is based on our understanding, as practitioners, of the financial planning engagement. A financial planner has privileged knowledge of a client's personal financial affairs. In order to provide effective guidance in decisions about financial strategies and choices among investment products, the planner must be fully aware of all aspects of the client's financial life. With complete understanding of the client's means and circumstances, the planner can provide truly useful counsel. However, with this knowledge the self-interested planner can also render extensive, sometimes irreparable, financial damage. NAPFA has become concerned that financial planners are not taking seriously their fiduciary responsibilities to the client.

NAPFA supports the proposed legislation because it empowers the consumer and reinforces the fiduciary nature of the relationship between planner and client.

The "private right of action" provision of this bill serves notice to the thousands of individuals who use the term "financial planner" that they must act prudently and with care when providing financial advice to clients. For the consumer it offers a powerful tool for rectifying damage from an advisor who has violated his or her fiduciary duty to the client.

The "holding out" provision of this bill appropriately extends the reach of the legislation to all financial advisory relationships, regardless of terminology. It is fitting that the legislation does not attempt to define financial planning, since it is the nature of the relationship with the consumer that must be protected.

Finally, and most importantly, the compensation disclosure requirements of this bill give the consumer the information needed to be an equal partner in the financial planning engagement. Part of the planner's fiduciary duty is to inform the client about the costs of the engagement. Disclosure of costs will do three things: discourage self-interested planners from abusing clients; encourage competition in the financial planning industry; and bring the discussion of costs into the open, allowing the client the opportunity to become educated about and participate in important planning decisions.

NAPFA is extremely encouraged by this legislation. We endorse it because it is a positive step forward in protecting consumers, because it is consistent with and supports existing regulatory efforts and because it fosters good business practices in the financial planning industry.

STATEMENT OF SUSAN E. BRYANT, PRESIDENT, NORTH AMERICAN SECURITIES ADMINISTRATORS ASSOCIATION; ADMINISTRATOR, OKLAHOMA SECURITIES COMMISSION

Thank you, Congressman Boucher.

I am here today to show the strong support of the North American Securities Administrators Association (NASAA) for the proposed "Financial Planners Disclosure and Enforcement Act." We believe this bill provides the tools needed for a meaningful federal crackdown on the fraud and abuse we have witnessed by some self-proclaimed financial planners.

State securities agencies have their hands full today fighting the growing number of con artists who masquerade as financial planners. If enacted, the proposed legislation would complement ongoing state-level initiatives to modernize and improve the laws protecting investors from unscrupulous as well as negligent financial planners.

NASAA—which, in the U.S., is the national organization of the state securities agencies—is gratified today to see that our longstanding concern about financial planner fraud and abuse has the ear of Congress. In 1988 NASAA released its 30-state study showing that more than 22,000 investors

---

[1] "Financial Planning Abuses: A Growing Problem," A report of the Consumer Federation of America; July, 1987.

[2] "Financial Planners," Report of the Staff of the United States Securities and Exchange Commission to the House Committee on Energy and Commerce's Subcommittee on Telecommunications and Finance; February, 1988.

had lost a staggering $400 million in 79 major financial planning scams.

But the need for more federal enforcement is only part of the picture. This proposed legislation will also help solve the need for greater disclosure of the compensation and conflicts of those providing investment advice to the public. Studies by NASAA, the Consumer Federation of America (CFA) and the Securities and Exchange Commission (SEC) provide ample startling evidence that even otherwise "legitimate" investment advisers may be more interested in their own finances than those of their clients.

State securities agencies traditionally have played a key role in the regulation and oversight of financial planners and investment advisers and there is now a growing trend for even tighter state regulation of this industry. We are pleased to see that some of the important provisions of this proposed legislation are in fact patterned after the state model investment adviser law and regulations finalized by NASAA in 1987. As a result, NASAA encourages the adoption of the proposed Act, as currently drafted, not only to help close the gaps that exist in the federal investment adviser regulatory scheme, but also to foster even greater uniformity between state and federal regulatory provisions.

The SEC and its Investment Management Division should be commended for their valiant efforts to protect the interest of investors despite chronic limitations on staff and budget. The Division has worked effectively with states in moving in the direction of coordinated state-federal oversight of the investment advisory and financial planning industry. NASAA is pleased that the proposed legislation would allow for the continuation and even expansion of the joint state-federal programs now in place.

Congressman Boucher, NASAA appreciates your commitment to exploring new federal approaches to protecting consumers from fraud and abuse in the financial planning industry. It is abundantly clear to those of us "in the field" that the investment advisory and financial planning industry, if only because of the number of "bad apples" it has attracted, needs more scrutiny and oversight. We applaud the "Financial Planners Disclosure and Enforcement Act" as a well-drafted and serious-minded effort to get to work on the job that needs to be done on behalf of American investors.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DOUGLAS) to revise and extend their remarks and include extraneous material:)

Mr. GINGRICH, for 60 minutes each day, on April 2, 3, 4, and 5.

Mr. DOUGLAS, for 60 minutes, each day, on April 3 and 4.

(The following Members (at the request of Mr. DORGAN of North Dakota) to revise and extend their remarks and include extraneous material:)

Mr. DORGAN of North Dakota, for 5 minutes, today.

Mr. WASHINGTON, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BOUCHER, for 5 minutes, today.

Mr. SKELTON, for 30 minutes, today.

Mr. HUTTO, for 5 minutes, on April 3.

Mr. WASHINGTON, for 5 minutes, on April 3.

Mr. SKELTON, for 30 minutes each day, on April 3, 4, and 5.

Mr. LIPINSKI, for 5 minutes each day, on May 1, 8, 15, and 22.

Mr. LIPINSKI, for 60 minutes each day, on May 2, 9, 16, and 23.

Mr. DURBIN, for 60 minutes, on April 3.

Ms. PELOSI, for 60 minutes, on May 15.

Mr. MILLER of California, for 60 minutes, on April 4.

Mr. NAGEL, for 60 minutes, on April 24.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. DOUGLAS) to include extraneous matter:)

Mr. MACHTLEY.

Mr. CONTE.

Mrs. MORELLA.

Mr. MCEWEN.

Mr. GEKAS.

(The following Members (at the request of Mr. DORGAN of North Dakota) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mrs. LLOYD in five instances.

Mr. HAMILTON in 10 instances.

Mr. DE LA GARZA in 10 instances.

Mr. SOLARZ.

Mr. CLEMENT.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 393. An act entitled "Camp W.G. Williams Land Exchange Act of 1990;" to the Committee on Interior and Insular Affairs.

S. 1230. An act to authorize the acquisition of additional lands for inclusion in the Knife River Indian Villages National Historic Site, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1859. An act to restructure repayment terms and conditions for loans made by the Secretary of the Interior to the Wolf Trap Foundation for the Performing Arts for the reconstruction of the Filene Center in Wolf Trap Farm Park in Fairfax County, VA, and for other purposes; to the Committee on Interior and Insular Affairs.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 500. Joint resolution to designate April 6, 1990, as "Education Day, U.S.A."

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 388. An act to provide for 5-year, staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills of the House of the following titles:

On March 30, 1990:

H.R. 2692. An act to amend the Woodrow Wilson Memorial Act of 1968 to provide that the Secretary of Education and two additional individuals from private life shall be members of the Board of Trustees of the Woodrow Wilson International Center for Scholars.

On April 2, 1990:

H.R. 4099. An act to suspend section 332 of the Agricultural Adjustment Act of 1938 for the 1991 crop of wheat.

ADJOURNMENT

Mr. DORGAN of North Dakota. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 23 minutes p.m.) the House adjourned until tomorrow, Tuesday, April 3, 1990, at 12 noon).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2876. A letter from the Assistant Secretary for Installations, Logistics and Environment, Department of the Army, transmitting notification of the Department of the Army's intent to study the conversion to contract performance the Commercial Activities Program, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2877. A letter from the Chairman, National Credit Union Administration, transmitting the 1990 annual report of the Administration, pursuant to 12 U.S.C. 1752a(d); to the Committee on Banking, Finance and Urban Affairs.

2878. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-183, "Board of Education Capital Construction Contracting Authority Temporary Act of 1990," pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

2879. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-182, "D.C. Public School Nurse Assignment Act of 1987 Amendment Temporary Act of 1990," pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

2880. A letter from the Chairman, Council of the District of Columbia, transmitting copies of the D.C. Act 8-138, "District of Columbia Comprehensive Plan Amendments Act of 1989" and D.C. Act 8-184, "District of Columbia Comprehensive Plan Amendments Act of 1989 NCPC-Recommended Amendments, and Closing of Public Alleys in Square 669, S.O. 88-452, Act of 1990," pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

2881. A letter from the Secretary of Transportation, transmitting the Department's views on the bill H.R. 1463, the "National Capital Transportation Amendments of 1989"; to the Committee on the District of Columbia.

2882. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting notification of a proposal to offer the VIP Security Course to Nicaragua's President-Elect Chamorro's security personnel, pursuant to 22 U.S.C. 2349aa-3(a)(1); to the Committee on Foriegn Affairs.

2883. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions for Don Melvin, of Indiana, to hold the rank of Minister during his tenure of service as the U.S. Representatives on the Council of the International Civil Aviation Organization, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2884. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2885. A letter from the Acting Assistant Attorney General, Department of Justice, transmitting a draft of proposed legislation entitled, "Debt Collection Act amendments of 1990"; to the Committee on the Judiciary.

2886. A letter from the Secretary of Veterans Affairs, transmitting the Department's views on H.R. 1397, a bill entitled the "Veterans' and Survivors' Compensation Indexing Act" and H.R. 2644, a bill to amend section 3001 of title 38 to authorize VA to require mandatory disclosure of claimants' and dependents' Social Security numbers in all claims for disability and death benefits; to the Committee on Veterans' Affairs.

2887. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend Federal laws in order to extend the low-income housing credit, and for order purposes; to the Committee on Ways and Means.

2888. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend Federal laws in order to extend the low-income Home Energy Assistance Act of 1981; jointly, to the Committee on Education and Labor and Energy and Commerce.

2889. A letter from the General Counsel, Department of Defense, transmitting draft language to transfer jurisdiction, custody, and control of the Pentagon reservation from GSA to the Department of Defense; jointly, to the Committees on Armed Services, Public Works and Transportation, and Government Operations.

2890. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend the Internal Revenue Code of 1986 to stimulate employment in, and to promote revitalization of, economically distressed areas designated as enterprise zones, by providing Federal tax relief for employment and investments, and for other purposes; jointly, to the Committee on Ways and Means; the Judiciary; Banking, Finance and Urban Affairs; Public Works and Transportation; and Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina. Committee on Merchant Marine and Fisheries. H.R. 4009. A bill to authorize appropriations for fiscal year 1991, for the Federal Maritime Commission, and for other purposes; with an amendment (Rept. 101-440). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOUCHER (for himself, Mr. DINGELL, Mr. MARKEY, Mr. ECKART, Mr. COOPER, Mr. SLATTERY, and Mr. WYDEN):

H.R. 4441. A bill to permit private remedies to be used for the enforcement of the Investment Advisers Act of 1940, to improve the disclosure to customers of investment advisers under that act, and for other purposes; to the Committee on Energy and Commerce.

By Mr. RICHARDSON (for himself, Mr. MATSUI, Mr. TORRES, and Mr. BUSTAMANTE):

H.J. Res. 536. Joint resolution approving the findings of the Comptroller General of the United States contained in the General Accounting Office [GAO] report, dated March 29, 1990, regarding employer sanctions; jointly, to the Committees on the Judiciary and Education and Labor.

By Mr. MCEWEN:

H. Con. Res. 296. Concurrent resolution in support of Lithuanian independence; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

343. The SPEAKER presented a memorial of the Legislature of the State of California, relative to timber exports; jointly, to the Committees on Agriculture, Foreign Affairs, and Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

Mr. RICHARDSON introduced a bill (H.R. 4442) for the relief of Carmen Etienne, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2121: Mr. FOGLIETTA and Mr. MORRISON of Connecticut.

H.R. 3037: Mr. VISCLOSKY and Mr. CLAY.

H.R. 3356: Mr. FAUNTROY.

H.R. 3520: Mr. TORRES.

H.R. 3909: Mr. FALEOMAVAEGA, Mr. CHAPMAN, Ms. KAPTUR, Mr. JONTZ, Mrs. MORELLA, Mr. HATCHER, Mr. QUILLEN, Ms. LONG, Mr. PANETTA, Mr. CAMPBELL of Colorado, and Mr. ATKINS.

H.R. 3998: Ms. SLAUGHTER of New York.

H.R. 4060: Mr. MRAZEK.

H.R. 4147: Mr. ACKERMAN.

H.R. 4208: Mr. FROST, Mr. MOODY, Mr. WHEAT, Mr. HATCHER, Mr. BARNARD, and Mr. FAZIO.

H.R. 4369: Mr. IRELAND and Mr. NEAL of North Carolina.

H.R. 4393: Mr. ECKART.

H.J. Res. 439: Mr. NIELSON of Utah.

H. Con. Res. 268: Mrs. MORELLA.

H. Con. Res. 289: Mr. MANTON, Mr. BATES, Mr. GEJDENSON, Mr. YATRON, Mr. ROHRABACHER, Mr. FAUNTROY, Mr. DERRICK, Mr. TORRES, Ms. PELOSI, Mr. NEAL of Massachusetts, and Mr. SYNAR.

SENATE—*Monday, April 2, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 1 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we reverence God, our Creator and our Judge, the prayer will be led by the Senate Chaplain, the Reverend Dr. Richard C. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

It is a good thing to give thanks unto the Lord, and to sing praises unto thy name, O most High: To shew forth thy loving kindness in the morning, and thy faithfulness every night.—Psalm 92:1, 2.

Almighty God, Lord of history and Ruler of the nations, we acknowledge Your supreme Lordship in the words of President John Adams as he welcomed Congress to this building for the first time in November 1800. He said: "It would be unbecoming the Representatives of this Nation to assemble, for the first time, in this solemn temple, without looking up to the Supreme Ruler of the Universe, and imploring His blessing.

"May this territory be the residence of virtue and happiness! In this city may that piety and virtue, that wisdom and magnanimity, that constancy and self-government which adorned the great character whose name it bears, be forever held in veneration! Here, and throughout our country, may simple manners, pure morals, and true religion flourish forever!"

Glory to God in the highest, world without end. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, following the time for the two leaders today, there will a period for morning business not to extend beyond 1:30 p.m. with Senators permitted to speak therein for up to 5 minutes each.

At 1:30, the Senate will resume consideration of the clean air bill, S. 1630. There will be no rollcall votes today. Any rollcall votes ordered relative to amendments offered today will be stacked to occur tomorrow.

The managers hope to offer a managers' package of allowance amendments tomorrow morning, with consideration of that package during tomorrow's session, as well as consideration of any other amendments which may be offered.

I again encourage Senators with listed amendments to come forward today and tomorrow to offer their amendments. The purpose of today's session is to permit any Senator who has an amendment to offer it and to permit it to be debated fully and fairly.

On tomorrow, the Senate will complete action on this bill no later than 8 p.m. It is my hope we could do so even earlier than that, but in any event not later than 8 p.m. tomorrow.

FOREIGN AID REQUEST FOR PANAMA AND NICARAGUA

Mr. MITCHELL. Mr. President, the President has asked the Congress to approve $800 million in emergency aid for Panama and Nicaragua. In response to that request the Foreign Relations Committee has moved quickly to report out an authorization bill which substantially fulfills the President's request. I hope that the Senate can proceed immediately to consideration of the authorization bill.

We recognize the need to assist the newly elected democratic Governments of Panama and Nicaragua. But we want to do it in the right way.

In the request for emergency aid for Panama and Nicaragua the administration is asking Congress to put together a jigsaw puzzle without any overall picture and without all the pieces.

By approaching foreign aid on a country by country basis and in one-shot increments, the administration has provided no overall or long-term view of how all the pieces can and should fit together. They have provided no rationale as to how this request relates to other parts of the budget—to other foreign aid spending, to defense or domestic spending, or to the deficit.

The administration asks that we approve a one-shot infusion to Panama and Nicaragua by cutting the defense budget. But they provide no information for the long-term needs in Panama and Nicaragua. And what about Eastern Europe? What about other parts of the world? What are the offsets for any other increases? Are they "zero-sum" within the foreign aid accounts, or do they require increases in the deficit or additional cuts in domestic or defense spending?

The administration does not have a 5-year plan or a 3-year or a 2-year plan for foreign aid; indeed they offer no plan at all. They have not explained how any plan would be affordable in relation to their other spending plans; they have not outlined the relationship of any plan to our national security objectives.

For example, to pay for the aid to Panama and Nicaragua, the administration now supports using defense offsets which were originally planned to be used to avoid layoffs of military personnel. Is foreign aid now more important to the administration than keeping our men and women in uniform? If so, they should say so.

I intend to have the Senate deal as quickly as possible with the genuine emergency needs for Panama and Nicaragua. But I do not believe we should appropriate the full amount requested until the administration submits a meaningful long-term foreign aid plan, relates it to the rest of the budget, and explains how it is justified in terms of our overall goals and requirements for emerging democracies as well as other nations throughout the world.

It makes little sense for the Congress to continue to lurch from country to country on piecemeal emergency foreign aid requests for different parts of the world without some kind of an overall long-term plan which spells out our Nation's overall foreign policy requirements and objectives and relates those to the budget process.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time, and I reserve all the time of the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection the time of the two

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

leaders that has not yet been used will be reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. Under the order, there will now be a period for the transaction of morning business until the hour of 1:30 p.m., with Senators permitted to speak therein for not to exceed 5 minutes each.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE REPUBLICAN LEADER

The PRESIDENT pro tempore. The Republican leader is recognized under the order, his time having been fully reserved by unanimous consent at the request of the majority leader.

MISSING THE APRIL 1 BUDGET DEADLINE

Mr. DOLE. Mr. President, it is no April Fools' Day joke: The April 1 deadline for reporting a budget resolution has come and gone without the Budget Committee scheduling a single mark up session. But, apparently no one has noticed.

How can this be? If my memory serves me correctly, the Budget Committee in January refused to give the President an extension on his budget deadline. They claimed that the, "budget could have been produced on time if—Darman—had really wanted to produce it on time."

As usual, it is always easy to criticize. But now the shoe is on the other foot and the committee is strangely silent.

It is going to be harder to put together a viable budget resolution this year than other years. That is because we have so far to go to meet the Gramm-Rudman-Hollings target. Depending on who you believe, anywhere from $37 billion to almost $50 billion to, some say, $100 billion is needed to prevent a sequester. I, personally, think we will need somewhere around the $50 billion figure.

If you remember last year we spent 10 months and over 60 percent of our rollcall votes in the Senate to reduce the deficit by only $16 billion.

To find this year's required deficit reduction amount, we will need more than time. We will need leadership which, up to now, has been in short supply. Yes, there are some tough choices we have to face up to like how to handle the Social Security trust funds, the Rostenkowski proposal, child care, long-term care, helping new democracies in Europe and Latin America, drugs and the S&L crisis. But it is not going to get any easier, from the way I look at it, if we continue to put everything off.

So I suggest that on a bipartisan basis we get down to work and not put off the markup another day. The American people, if they fully understood the ramifications of the budget process and fully understood that we have had to increase the debt ceiling to over $3 trillion—that is trillion dollar with a T—they would understand the need for action and action now on the budget.

Earlier this morning, I had the opportunity to speak with about 200 high school seniors from around the country. Their topic was the budget and the budget process. It seems to me we have, in effect, said that these young people will have less opportunity and more responsibility if those of us who are here today do not fulfill our responsibilities in acting on the budget and the budget deficit.

Mr. President, I suggest it is always difficult to put together a budget. I know when the Republicans were in control of the Senate, we had difficulty meeting the deadlines, but the deadlines are there. They are targets. I hope we can work together in meeting the deadlines so we can send a strong signal to the American people and the financial markets that we are serious about the budget and the deficit and its impact on the American and international economy.

Mr. President, I ask unanimous consent that a copy of the budget process timetable be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APPENDIX VII—BUDGET PROCESS TIMETABLE: FISCAL YEARS 1989-93

January 1: Date from which deficit reduction is measured.

First Monday after January: President submits budget to Congress.

February 15: CBO issues annual report to Budget Committees.

February 25: Committees submit views and estimates to Budget Committees.

April 1: Senate Budget Committee reports budget resolution.

April 15: Congress completes budget resolution.

May 15: Appropriations bills may be considered in the House.

June 10: House Appropriations Committee reports last annual appropriation bill.

June 15: Congress completes reconciliation.

June 30: House completes action on annual appropriation bills.

July 15: President submits mid-session budget report.

August 15: OMB and CBO estimate deficit for upcoming fiscal year. Presidential notification regarding military personnel.

August 20: CBO issues its initial report to OMB and Congress.

August 25: OMB issues its initial report to President and Congress. President issues initial sequester order.

September 6: Deadline for President's explanatory message on initial order.

October 1: Fiscal year begins.

October 10: CBO submits revised report to OMB and Congress.

October 15: OMB issues its revised report to President and Congress. President issues final sequester order, effective immediately.

October 25: Congressional alternative to presidential order, if any, developed and adopted.

October 30: Deadline for President's explanatory message on final order.

November 15: Comptroller General compliance report issued.

NOMINATION OF TIMOTHY RYAN, JR.

Mr. DOLE. Mr. President, I hope the nomination of Timothy Ryan to be head of the OTS can be acted upon this week. I only briefly visited with the majority leader, but it is critical, with next week being the Easter recess week, that we take action as quickly as possible. It is an important nomination.

In my view, the nominee will be confirmed. I think the question largely will be on whether or not he has the experience. He has been in the Labor Department, a labor lawyer, a good background. He gets good marks wherever he has worked in public life. The question is whether he has the experience to deal with financial institutions. That is certainly a legitimate question.

Let me also suggest that many of us—probably all of us—have taken actions and voted to take certain actions with reference to savings and loans and financial institutions. I think if anyone looks at the record, we have demonstrated that even though there is a lot of experience in this Chamber, mistakes can be made. We do have the S&L crisis and certainly if that is the kind of experience we are looking for, I hope we do not find it. Now we are told the S&L crisis may cost the taxpayers as much as $300 billion.

So I hope we move quickly on the Ryan nomination and do that after we complete action on the clean air bill tomorrow on or before 8 p.m.

Mr. President, I reserve the remainder of my time.

The PRESIDENT pro tempore. Without objection, the time of the two leaders that remains to them under the standing order will be reserved.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BREAUX. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

VANDERBILT COMMODORES WIN NATIONAL INVITATION TOURNAMENT

Mr. SASSER. Mr. President, I am pleased to take this opportunity to recognize the men's basketball team of my alma mater, Vanderbilt University.

Last Wednesday night in New York City, the Vanderbilt Commodores won the National Invitation Tournament with a victory over St. Louis University. This win represents more than just a trophy or an award for the school. Vanderbilt's exciting string of five victories—after being eliminated from the Southeastern Conference Tournament—is an example of the perseverance, faith, and determination of each and every member of the team and their coaches.

In his first year as the head coach for Vanderbilt, Eddie Fogler has continued the winning tradition of former coach C.M. Newton, who led the Commodores to the NCAA Tournament the past 2 years—advancing all the way to the Sweet Sixteen in 1988. Coach Fogler proved his reputation as an excellent motivator and leader of men by taking a team of players whose season appeared to be over in February and molding them into a championship unit still playing at the end of March. In addition to winning the championship, Vanderbilt placed two players—Scott Draud and Todd Milholland—on the All Tournament Team, with Draud being named as the tournament's "Most Valuable Player."

Mr. President, I share the joy and pride of the 3,000 to 4,000 Vanderbilt fans who greeted the team at the Nashville Airport last Thursday and celebrated the team's first postseason tournament title. I join with them in hoping that this is the first of many championships to come.

REPEAL OF EMPLOYER SANCTIONS

Mr. CRANSTON. Mr. President, several days ago I joined the Senator from Massachusetts [Mr. KENNEDY], the Senator from Utah [Mr. HATCH], and the Senator from Arizona [Mr. DECONCINI], in introducing Senate Joint Resolution 280, a joint resolution which would approve the finding of a recent General Accounting Office [GAO] report regarding the employer sanctions provisions of the Immigration Reform and Control Act of 1986 [IRCA].

Mr. President, the GAO report does not mince words. It confirms what many of us feared—that the use of employer sanctions, that is the imposition of civil and criminal penalties on employers who hire persons without legal authority to work in this country, results in widespread discrimination against those who are perceived as being "foreign." In other words, because of employer sanctions men and women who are U.S. citizens, permanent residents, or have legal authority to work in this country are being denied employment or are having the law selectively enforced against them.

Mr. President, we must control our borders, but this is not the way. Hundreds of thousands of employers, fearing sanctions, are refusing to hire Hispanics, Asians, and other minorities for employment because they "look foreign" or "sound foreign." No less insidious is the practice of requiring work authorization documents from only those persons who are perceived to be foreign. In my view, the human indignity and economic hardship that are the direct results of this so-called deterrent to illegal immigration are simply too great a price to pay. The cost in terms of damage to our fundamental constitutional and moral commitment to freedom from bigotry and discrimination is unconscionable. I urge my colleagues to reject this failed experiment by supporting Senate Joint Resolution 280, which provides us with the mechanism to sunset these sanction provisions.

Mr. President, while I have always been vehemently opposed to the employer sanction provisions of IRCA, GAO's recent findings exceeded my worst expectations. According to GAO estimates, which by its own admission are conservative, a staggering 891,000, or 19 percent of the 4.6 million employers in the survey population nationwide, are reported as "beginning discriminatory practices because of the law." An estimated 461,000 employers, or 10 percent of the survey population, are discriminating on the basis of national origin, and 430,000 employers, or 9 percent of the survey population, are discriminating on the basis of citizenship status. I was especially dismayed but not surprised to learn that the percentages are even higher in cities with large Hispanic and Asian populations. In Los Angeles an estimated 29 percent of the employers practiced some form of discrimination as a direct result of sanctions.

This is an intolerable situation that must be put to a stop. Since the GAO issued this report last week there have been calls to stay the course with employer sanctions, but to perhaps fine-tune the legislation and its enforcement. If the fine-tuning refers to the strengthening of the antidiscrimination provisions of IRCA, I applaud the intent, but I am not at all confident that the discrimination will dissipate as a result. National origin discrimination is on the rise in this country because of employer sanctions, and it is simply not fair for us to ask the victims of this discrimination to continue to endure it while we try to devise a way to prevent it. An absolute repeal of the sanctions is the only right thing to do.

I am also alarmed by the call of some of my colleagues to fine-tune the verification requirements of the sanctions program by mandating some form of national identity card for citizens and aliens alike. Given that much of the discrimination caused by sanctions is occurring well before employers ask for proof of work authorization, I fail to see how these cards would stem the discrimination. Further, the specter of a mandated identity card is something I believe most Americans, including myself, could not support. An America where each and every one of us is required to carry a national identity card is incompatible with the practice of freedom we currently enjoy in our society. A system of national identity cards is decidedly not the path we should be considering.

Mr. President, the sanction provisions have proven unworkable. It is time to cut our losses and repeal them. By adopting the findings of the GAO report we have an opportunity to sunset these provisions once and for all. I look forward to working closely with my friend from Massachusetts [Mr. KENNEDY] in getting the joint resolution passed. I urge my colleagues to join me in supporting Senate Joint Resolution 280.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,843d day that Terry Anderson has been held in captivity in Beirut.

HONORING THE SPRINGFIELD, SD, DWIGHT WOOD AMERICAN LEGION POST AUXILIARY UNIT NO. 132

Mr. PRESSLER. Mr. President, I recently received a very heartwarming letter from Evelyn Tjeerdsma of Springfield, SD, describing some of the activities conducted by the Dwight Wood American Legion Post Auxiliary Unit No. 132. She described some of the many projects undertaken by her local American Legion auxiliary. These projects are just a few examples of the extensive community involvement by members of the American Legion and Auxiliary throughout South Dakota and the Nation. The good deeds done by these patriotic Americans should not go unsung and this is a good opportunity to spread some good news. Mrs. Tjeerdsma lists

a variety of projects including donations to the Special Olympics, the Make a Wish Foundation, and promotion of local blood drives. The members of the American Legion and Auxiliary deserve our heartfelt gratitude for their daily contributions to the betterment of our local communities. I ask unanimous consent that Mrs. Tjeerdsma's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SPRINGFIELD, SD,
March 26, 1990.

HON. SENATOR LARRY PRESSLER: Our American Legion Auxiliary Unit #132 of Springfield, S. Dak. are proud to tell you of our accomplishments as a Unit.

Our donating of money includes for the Special Olympics, Four Chaplains, emergency Aux. fund & collect broken glasses for the needy.

The latest project is collecting "pull tabs" from any pop or beverage & these tabs in turn are sold & the money sent to "Make A Wish Foundation" in which children who are terminally ill make wishes & we help them come true, if at all possible. Their wishes may be to go to Disney Land or see a famous person who means a lot to them.

Last fall our unit became involved with the "blood doner" project in which our community are called individually by our unit & asked to give blood & when any one is in need they do not have to replace it, but we as a unit are credited for the many pints of blood given & the response was a tremendous turnout. We intend to do this again next month.

EVELYN TJEERDSMA,
Dwight Wood Post #132.

MORALITY AND RELIGION: CORNERSTONES OF EDUCATION FOR A FREE SOCIETY

Mr. HELMS. Mr. President, ever so often all of us run across young people who are especially impressive and who demonstrate an innate ability to perceive vital truths about the history and hopes of mankind.

Some weeks ago, I met a 15-year-old young man from Vienna, VA, David Chandler Seng, a ninth grader who is a student at Fairfax Christian School in Vienna. David is the kind of youngster whom one instinctively likes. During a visit to my office, David mentioned that he had written a paper which had been entered in an essay contest sponsored by the Foundation for Economic Education. I told David's mother, after reading the text of her son's paper, that in my book he is a sure winner—perhaps not in this particular contest, but certainly in the context of living a constructive and meaningful life.

Mr. President, I believe Senators will be interested in reading the essay written by David Seng. I therefore ask unanimous consent that the paper be printed in the RECORD at the conclusion of my remarks.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

MORALITY AND RELIGION: CORNERSTONES OF EDUCATION FOR A FREE SOCIETY

(By David Chandler Seng)

Education for a free society must have a moral and religious basis. John Adams once remarked, "Our Constitution was made only for a moral and religious people, and is wholly inadequate to the government of any other."[1] He also made the point that, "A patriot must be a religious man."[2] James Madison said, "The belief in a God, all powerful, wise, and good, is essential to the moral order of the world . . ."[3]

The concept of freedom (liberty) is so important in the education for a free society that it cannot be overlooked. Freedom, as commonly understood, is the idea of not being under another's unreasonable control (i.e. the power to do and think without being unduly coerced or forced). One of our founding Fathers, Thomas Jefferson, said, "Can the liberties of nations be thought secure when we have removed their only firm basis, a conviction in the minds of the people, that these liberties are . . . the gift of God?"[4]

Western morality, as held by the Founding Fathers, was the treasure and protectorate of Christianity. Christians have always held that intellectual education must not be separated from moral and religious instruction. Education is the provision for suitable instruction to fit a child for the duties of adult life. This all-encompassing education is primarily the right and duty of the parents. How can it thus be part of the normal function of the state to teach? The state should not hamper the reasonable liberty of parents in a choice of schooling and education for their children; nor may the state interfere with parental responsibility, especially in the teaching of morality and religion.

Morality may be defined as human conduct to the extent that it is freely subordinated to the ideal of what is right and fitting. Christianity has customarily held that morality and religion are essentially connected and that without religion the observance of the moral law is impossible. For this reason Christianity has long held that certain conditions are required for the growth and development of morality in the individual and society, namely: (a) a right education of the young; (b) a healthy public opinion, and (c) sound legislation.

According to Christianity, right education for the young includes early training in the home. The family is the true school of morality and its good effects will remain for a whole lifetime. It is in the home that the child learns obedience, truthfulness, purity, self-restraint, and the other primary virtues. Christianity traditionally requires that the best scholastic education is the one that is given in a moral and religious atmosphere. Morality and religion go hand in hand. Both are an integral part of the education freely chosen by parents for their children. One hundred years ago Mark Hopkins, a great American educator, college president for almost forty years, and professor of intellectual and moral philosophy, once remarked that "everywhere the tendency has been to separate religion from morality, to set them in opposition even. But religion without morality is a superstition and a curse; and anything like adequate and complete morality without religion is impossible."[5]

Religion as a basis for morality is essential for good living. Carl Jung, the psychiatrist, said, "Among all my patients, there has not been one whose problem in the last resort was not that of finding a religious outlook on life. It is safe to say that everyone of them fell ill because he had lost that which the living religion of every age has given to its followers, and none of them have been really healed who did not regain his religious outlook."[6] Religion nourishes the soul of people so they can live active, healthy and happy lives in a free society. Education must include the teaching of right conduct, which is morality in human actions, so that a free society is possible. Religion, as the guardian and promoter of morality, is a free society's strongest ally.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. The hour of 1:30 p.m. having arrived, under the order, morning business is closed.

CLEAN AIR ACT AMENDMENTS OF 1989

The PRESIDENT pro tempore. The Senate will resume consideration of the pending business, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

The Senate resumed consideration of the bill.

Pending

Mitchell amendment No. 1293, in the nature of a substitute.

Baucus amendment No. 1307 (to amendment No. 1293), to grant Administrator authority to authorize limited production of halons after the year 2000 if necessary for aviation safety purposes.

The PRESIDENT pro tempore. The pending question before the Senate is the Baucus amendment No. 1307 to amend 1293, the committee reported substitute.

Mr. BREAUX. I object to the proceedings on the ground a quorum is not present.

The PRESIDENT pro tempore. A point of no quorum having been raised, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BREAUX). Without objection, it is so ordered.

Mr. PRESSLER. Mr. President, I ask unanimous consent to lay aside the Baucus amendment for consideration of the amendment I am about to present at the desk.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

AMENDMENT NO. 1426 TO AMENDMENT NO. 1293

(Purpose: To provide flexibility to Federal Power Marketing Agencies and others to use fossil fuels during periods of inadequate hydroelectric power generation)

Mr. PRESSLER. Mr. President, I send an amendment to the desk for Mr. ARMSTRONG, myself, and Mr. BREAUX, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER], for himself, Mr. ARMSTRONG, and Mr. BREAUX, proposes an amendment numbered 1426 to amendment No. 1293.

At the appropriate place insert the following new section: Any person who enters into a contract under which such person receives hydroelectric energy in return for the provision of electric energy by such person shall use allowances held by such person as necessary to satisfy such person's obligations under such contract.

A Federal Power Marketing Administration shall not be subject to the provisions and requirements of this title with respect to electric energy generated by hydroelectric facilities and marketed by such Power Marketing Administration. Any person who sells or provides electric energy to a Federal Power Marketing Administration shall comply with the provisions and requirements of this title.

Mr. PRESSLER. Mr. President, it is my understanding that this amendment has the proper clearances on both sides. It is a simple amendment dealing with Federal hydropower. I shall not take long in explaining it since we have worked on this for several days.

I offer this amendment for myself, Mr. ARMSTRONG, and Mr. BREAUX. This amendment addresses a potential problem facing hydropower generators. Because this power resource is generated by falling water, it is seasonal and intermittent in nature. Too little water in the river can require a Federal Power Marketing Administration to purchase power to meet its contractual commitments. Too much water flowing down the river, can affect generation as well since water may have to be stored in the reservoirs to avoid flooding downstream.

The disadvantages of the intermitten seasonal nature of river flows and hydroelectricity they generate are often set by the renewable nature of the resource as well as the lack of emissions. Because of this, the Federal Power Marketing Administration and other hydropower units have entered into agreements with neighboring utilities for the scheduling, firming, and delivering of project output.

Thus, hydropower can be used in a thermal system to help meet peak demand periods and a thermal system can restore energy to the hydropower system during base load periods. These arrangements take place in the short run such as several times in a given day or in the long run such as during drought years when hydropower generation capabilities are down below the river water levels.

Similarly, when water is available for generation, the Federal Power Marketing Administration can connect that hydropower, banking it with other utilities, reducing the need to generate from thermal sources.

Our amendment simply clarifies that if a thermal unit enters into this type of agreement with a hydropower generator or a Federal Power Marketing Administration, the allowances earned are saved from utilizing hydropower which has no emissions rather than thermal which shall be applied when the thermal units are generating electric energy to pay back the hydropower. Hydropower has no emissions and therefore has no allowances. So we simply want to ensure that they are not required to buy allowances simply to get back what they owed.

Mr. JOHNSTON. Mr. President, this amendment does not change the result that would occur under general provisions of contract law and enactment of the pending substitute without this amendment. In the context of Clean Air Act changes, this amendment merely provides clarity concerning relationships between sellers and purchasers of hydroelectric energy.

Mr. PRESSLER. Mr. President, I thank the managers of the bill, and the chairman and ranking member of the Energy Committee for their assistance.

Mr. President, I know of no opposition to this amendment. I urge its adoption.

Mr. MITCHELL. Mr. President, the amendment is acceptable.

Mr. CHAFEE. Mr. President, I want to commend the Senator from South Dakota for this amendment. This takes care of a situation that involves the Federal marketing authorities when they have a situation where the hydroelectric power is not adequate and they have to rely on steam. Those steam generators cannot add the cost to whatever allowances they might be involved in. They cannot include those costs for the allowances in the rate base.

I think it is a fine amendment, and I want to congratulate the Senator from South Dakota for his thoughtfulness.

The PRESIDING OFFICER. Is there further debate?

The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 1426) was agreed to.

Mr. PRESSLER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, as I have on several previous occasions, I encourage those Senators who have amendments to present them for consideration and disposition today. As all Senators know, this bill will be voted on finally not later than 8 p.m. tomorrow. There are a large number of listed amendments. The Senate was in session Friday for the purpose of receiving amendments, and it is in session today for the purpose of receiving amendments. I encourage all Senators to come forward so as not to be backed up against the time deadline tomorrow.

Mr. President, I yield the floor.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

AMENDMENT NO. 1427 TO AMENDMENT NO. 1293

Mr. CHAFEE. Mr. President, on behalf of Senators HATCH, GARN, SYMMS, REID, MCCLURE, SIMPSON, BURNS, BRYAN, ARMSTRONG, and WALLOP, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to set aside the pending amendment?

Mr. CHAFEE. I do.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for Mr. HATCH (for himself), Mr. GARN, Mr. SYMMS, Mr. REID, Mr. MCCLURE, Mr. SIMPSON, Mr. BURNS, Mr. BRYAN, Mr. ARMSTRONG, and Mr. WALLOP proposes an amendment numbered 1427.

Mr. CHAFEE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 135 after line 22 add the following new subsection:

(d) Section 163(c) of the Clean Air Act is amended by—

(1) replacing the comma and "and" at the end of subparagraph (D) with a period;

(2) replacing the period at the end of subparagraph (E) with a comma and "and" and

(3) adding a new subparagraph (F) to read as follows:

"(F) except for purposes of determining compliance with the maximum allowable increases in ambient concentrations in any area designated as class I under this part, concentrations of particulate matter attributable to the increase in fugitive emissions

resulting directly or indirectly from hardrock and noncoal mining."

Mr. CHAFEE. This is an amendment almost identical to a previously accepted amendment regarding fugitive emissions resulting directly or indirectly from surface coal mines. This amendment would simply give the same consideration to the fugitive emissions from hardrock mines. It would exempt fugitive dust from surface mines from consideration in prevention of significant deterioration, so-called PSD, increment consumption determinations. There is no question that fugitive dust from surface mines can exceed PSD participate increments even after application of best available control technology.

So, Mr. President, this particularly applies to those mines which are located in sparsely populated areas. It would allow the Governor of a State to exempt hardrock mine fugitive dust emissions from measurements of increment consumption under PSD reviews except in class 1 areas.

Mr. HATCH. Mr. President, the amendment I am offering today is almost identical to a previously accepted amendment regarding fugitive emissions resulting directly or indirectly from surface coal mines. My amendment would simply give the same considerations to the fugitive emissions from hardrock mines.

This amendment would exempt fugitive dust from surface mines from consideration in prevention of significant deterioration [PSD] increment consumption determinations. There is no question that fugitive dust from surface mines can exceed PSD particulate increments even after application of best available control technology. If such dust is considered in determining compliance with the increments, it would nearly be impossible to permit new or expanded mines, which generally are located in sparsely populated areas.

This amendment would simply allow the Governor of a State to exempt hardrock mine fugitive dust emissions from measurements of increment consumption under PSD reviews, except in class 1 areas.

Mr. GARN. Mr. President, I rise to support the amendment by Senator HATCH to exempt hardrock mining activities from the so-called fugitive dust requirements of the bill which are harmful to the interests of mining operations throughout the Western United States.

Like Senator SIMPSON's amendment which was accepted by the Senate last Thursday, this amendment would disallow the inclusion of fugitive dust from increment consumption counts under the prevention of significant deteriorated [PSD] section of the Clean Air Act. As Senator SIMPSON said, "EPA and many States have determined that for purposes of increment consumption it is not necessary to count fugitive dust emissions."

The EPA readily admits it is unable to accurately conduct modeling on these legitimate mining activities. Continuing America's standard of living is directly proportionate to allowing mining activities to continue unfettered by the Clean Air Act or other regulatory restrictions which are detrimental to mining.

I believe it is high time the people who scream the loudest for clean air understand the importance of a balanced approach which this amendment by my colleague from Utah will accomplish. Air quality will not be harmed in any significant way. So, I urge its adoption by the Senate.

Mr. President, I ask unanimous consent that this information from the Bureau of Mines be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows.

IMPORTANCE OF THE MINERAL INDUSTRY OF UTAH IN 1989

The value of nonfuel mineral production in 1989 exceeded $1.2 billion, a record for Utah. Preliminary figures indicate that the total value of production increased 22% over that of 1988. Mine output in the State placed it in eighth place among all states in nonfuel mineral production.

Most of the increase in production was due to the strong rise in output of Utah's metal mines, especially the extraction of copper, gold, magnesium, molybdenum, and silver. The metals sector contributed more than $1 billion, or 83%, of the total value of nonfuel minerals produced in the State. Metal production in Utah ranked fourth nationally. Important quantities of industrial minerals produced in the State included cement, lime, phosphate, potash, salt, sand and gravel, and stone.

TABLE 1.—NONFUEL MINERAL PRODUCTION IN UTAH [1]

Mineral	1987		1988		1989[p]	
	Quantity	Value (thousands)	Quantity	Value (thousands)	Quantity	Value (thousands)
Beryllium concentrates (metric tons)	5,499	$6	5,308	$6	W	W
Cement (portland, thousand short tons)	935	50,565	772	39,664	W	W
Clays (short tons)	315,154	1,959	340,156	2,469	337,048	$1,872
Gem stones	NA	105	NA	370	NA	370
Lime (thousand short tons)	562	17,894	365	17,252	343	16,464
Salt (thousand short tons)	1,108	34,264	1,006	35,294	1,358	36,525
Sand and gravel:						
Construction (thousand short tons)	* 21,000	* 56,700	17,843	49,796	14,300	41,500
Industrial (thousand short tons)	6	11	3	60	5	50
Stone:						
Crushed (thousand short tons)	7,989	23,606	* 7,300	* 20,600	6,000	19,500
Dimension (short tons)	2,004	93	* 2,004	* 93	W	W
Combined value of cement (masonry), copper, gold, iron ore, magnesium compounds, magnesium metal, mercury (1987–88), molybdenum, phosphate rock, potassium salts, silver, sodium sulfate (natural, 1988–89), vanadium, and values indicated by symbol W	XX	514,661	XX	849,243	XX	1,125,203
Total	XX	699,864	XX	1,014,847	XX	1,241,484

[1] Production as measured by mine shipments, sales, or marketable production (including consumption by producers).

Note.—* Estimated. [p] Preliminary. NA Not available. W Withheld to avoid disclosing company proprietary data; value included with "Combined value" figure. XX Not applicable.

Exploration: Generally, the search for nonfuel minerals was concentrated on locating precious-metal deposits; there was a great deal of exploration activity for gold and silver in the mining districts of the Tintic area south of Salt Lake City. There was also increased interest in exploration for additional reserves of gallium and germanium in the area surrounding the Apex Mine in southwestern Utah.

Environment: Several environmental concerns were addressed by mineral producers during the year. AMAX Magnesium reported that it was installing pollution-control equipment in the firm's plant on the west side of the Great Salt Lake to reduce chlorine emissions by approximately 50%. Geneva Steel announced a plan to modernize its plant in Utah County and reduce air and water pollution; when completed, the facility was expected to control 96% of its particulate emissions compared to about 92% before the improvements.

Legislation and Government Programs: The control of hazardous waste was a major goal of the legislature in 1989. House bill 37 established a Hazardous Substances Mitigation Fund, which empowered the Health Department to take remedial action to address releases of hazardous wastes. Senate bill 95 established rules of liability whenever an emergency involving hazardous materials occurs. In addition, the Governor established the Clean Air Commission to address air-quality problems along the Wasatch Front.

The U.S. Bureau of Mines and the United States Geological Survey published "Mineral Summaries-Bureau of Land Management Wilderness Study Areas in Utah." The summaries covered approximately 3 million acres of public land currently under consideration for federal wilderness status in Utah. Joint studies were conducted on 66 of the 91 proposed wilderness areas. According

to the report, nearly 80% of the areas studied have identified mineral resources; 92% have moderate or high potential for mineral resources.

Review by Nonfuel Mineral Commodities: Dedicated in late 1988, the modernized facility at the Bingham Canyon Mine increased production of copper and byproduct metals substantially during 1989. The mine was the second largest producer of copper in the Nation. This operation and other assets were sold by the British Petroleum Co., plc, to the RTC Corp., plc, in May. The purchase price was $4.27 billion and the Utah-based company (BP Minerals America) was renamed the Kennecott Corp. The Bingham Canyon operation maintained its role as the only producer of copper and molybdenum in Utah, and the State's largest producer of gold and silver.

North of Bingham, Kennecott completed development of the Barney's Canyon gold mine. The surface mine and heap-leach operation produced its first gold in late September. Production was projected for about 10 years at an average annual rate of 2,500 kilograms (80,000 troy ounces).

Another new gold mine brought into production during the year was Tenneco Minerals' Goldstrike Mine in Washington County. Annual production from this open-pit, heap-leach operation was expected to be 1,250 kilograms (40,000 troy ounces) of gold and a similar quantity of silver for approximately five years.

Barrick's Mercur Mine in Tooele County, the largest producer of primary gold in Utah, continued to operate at full capacity. In 1989, the company announced that the mine, which began operations in 1983, had minable reserves sufficient for 14 years.

Geneva Steel continued to receive shipments of iron ore from its properties west of Cedar City. Modernization of the company's integrated steel facility near Orem was announced during the year. Management anticipated the $400-million modernization program would require 3 to 5 years to complete. The first step in the program was to install a coil box in the rolling mill for about $12 million. Late in the year, Geneva reported the second phase of the modernization would include replacement of the open hearth furnaces with basic oxygen process furnaces, installation of a catalytic system for sulfur removal, and construction of a waste water treatment plant. The two-year project was expected to cost $70 million. In October, Geneva reduced steel production by 25% because of a nationwide decline in demand.

Magnesium metal production at Rowley was up during the year since AMAX Magnesium completed a new evaporation and precipitation pond system in 1988. The operation was purchased for an undisclosed amount by the Renco Group, Inc. The new operating company was named Magnesium Corporation of America, or Magcorp.

Utah continued to lead the Nation as the principal domestic source of beryllium. In 1989, Brush Wellman celebrated its 20th year of operations in the State. Production and sales were down slightly during the year, however, because of reduced demand in the defense, computer and semiconductor markets.

Although mine production of vanadium in southeastern Utah surged briefly in response to a temporary price increase during the year, total output for the year declined from previous years. At Blanding, Umetco continued to operate its White Mesa Mill, the only facility in the Nation that can recover vanadium from uranium-vanadium ores.

In March, Hecla acquired the Apex Mine in Washington County for $5.5 million from the St. George Mining Corp. The underground mine was the only primary source of gallium and germanium in the U.S. during 1986 and 1987. During 1989, Hecla dismantled the germanium refinery and began producing sodium germanate for sale as a concentrate to other refineries. The company expected production of gallium metal and cathode copper to commence in 1990.

The value of industrial mineral production in Utah in 1989 was about $211 million. Portland cement, followed closely by construction sand and gravel and salt, was the largest component of the output. Lime, phosphate, potash, and crushed stone were other important contributors. In addition, Utah was one of the few States in the Nation which had mines that supplied magnesium compounds and sodium sulfate.

In early 1989, the Great Salt Lake Minerals and Chemical Co. (GSLM&C) resumed processing the firm's potash as a specialty fertilizer. Collection of potash had begun in late 1987 after the company's solar evaporation ponds were repaired. GSLM&C was purchased for about $34.5 million, in March 1989, by the GSL Acquisition Corp.

In February, Morton-Thiokol Inc., announced that it would spin off its subsidiary, the Morton Salt Co. Morton Salt would continue to operate its salt harvesting facility in Salt Lake County.

STATE RANKING AND PERCENT OF U.S. TOTAL 1989 (PRELIMINARY DATA)

State	Value (millions)	Rank [1]	Percent of U.S. total
Alabama	483	21	1.52

The PRESIDING OFFICER. Is there further debate?

Mr. MITCHELL. The amendment is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (No. 1427) was agreed to.

Mr. CHAFEE. I move to reconsider the vote.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. I have noted the amendment which was adopted Wednesday to section 415(d)(3)(B) of the bill. I understand that the purpose of this amendment was to ensure that, "any other utility unit pollution control project, including but not limited to alterations that allow the use of natural gas as a fuel," which meets certain qualifications, would not be considered a major modification and thus would be excluded from the new source review requirements of section 111 and parts C and D of title I of the Clean Air Act.

Mr. BAUCUS. That is my understanding.

Mr. LUGAR. I have some questions concerning the provisions in the original section 415(d)(3)(B) dealing with presumptions about the project not resulting in an increase in capacity utilization of the source. Could the Senator please explain what those provisions and the other qualifications mean?

Mr. BAUCUS. I have reviewed two letters from the EPA to Timothy J. Method, Assistant Commissioner, Office of Air Management, Indiana Department of Environmental Management, dated January 30, 1990, and March 8, 1990. These letters reflect EPA's analysis of the issue to which the Senator from Indiana refers.

These letters, when read together, make it clear that future regulations or a future interpretative ruling will contain the following terms: "will not be treated as a new or modified source for purposes of said New Source Review Standards if:

(1) The source will continue to meet all current requirements and standards applicable to existing sources under the Act. This includes meeting applicable NAAQS, permit conditions, PSD increments and state implementation plan (SIP) limitations.

(2) There is no environmental harm resulting from the proposed activities. This includes conditions that the proposed activities would not *cause* the source to: (emphasis added)

(a) increase the maximum hourly actual emissions rate of any individual pollutant regulated under the Act;

(b) increase the annual emission of any pollutant regulated under the Act;

(c) adversely impact an air quality related value (e.g., visibility) in a Class I area; or

(d) allow an increase in emissions of toxic pollutants not regulated by the Act which would cause an adverse health or welfare impact.

Changes which are expected to increase emissions to the atmosphere, such as changes which increase a source's hourly operating capacity (e.g. eliminating a bottleneck), hourly emissions rate (e.g., one pollutant decreases but another increases), or utilization rate (e.g., an anticipated increase in hours of operating *resulting* from the installation of controls) would not be affected by this interpretation and could continue to be potentially subject to NSR and NSPS. The EPA will presume, however, that the addition of a control device will not, *by itself, result* in an increase in capacity utilization. However, this presumption will be overcome if there is a *clear likelihood* that operating hours or production rates will increase *because* of the installation of the control device. (Emphasis added).

In assessing whether any net increase in actual emissions of any pollutant, over representative actual emission rates, is likely to occur as a *result* of addition of controls, the reviewing agency should consider the *economic incentive* to increase production rates or hours of operations associated with the installation and use of the control device. Where increased emissions due to increased utilization of the facility are *clearly* a *likely result* from the addition of the device the change should not be considered environmentally beneficial. (Emphasis added.)

Mr. LUGAR. In other words, these letters state that increased capacity utilization would have to be caused by installation of the device?

Mr. BAUCUS. Yes.

This causation would have to be established by the Environmental Protection Agency, to overcome the presumption of no increased utilization, by means of clear evidence which the agency derives from the information submitted by the device owner or operator. The EPA must have clear evidence that the investment in the pollution control device in and of itself provides the owner or operator with an economic incentive to increase hours of operation or power production rate. Simple incremental load growth, et cetera, increased demand for power or economic dispatch of power by a power pool causing increased hours of operation or power production rates would not overcome the presumption referred to in section 415(d)(3)(B) and would not result in new source review. An owner or operator could demonstrate that increases in hours of operation, et cetera, are the result of increased load growth by analysis or computer simulation.

Mr. LUGAR. I am pleased with what the Senator has just said. Does he then believe that it is the sense of the Senate, in enacting this particular measure, that EPA, when it issues the regulations or interpretative ruling referred to in section 415(d)(3)(B) of this bill regarding presumptions, should incorporate the terms you have just recited into said regulations or interpretative ruling?

Mr. BAUCUS. Yes.

Mr. LUGAR. It is also my understanding that under a proper interpretation of the letters from EPA being put into the CONGRESSIONAL RECORD today, if installation of sorbent injection equipment is used to reduce SO_2 and causes increased PM-10 emissions, then installation of an upgraded precipitator to handle PM-10 with the sorbent injection equipment would also not trigger new source review.

Mr. BAUCUS. That is correct.

Mr. CHAFEE. Mr. President, I concur with Senator BAUCUS and Senator LUGAR'S understanding of these letters and ask unanimous consent that these two letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

ENVIRONMENTAL PROTECTION AGENCY,
Chicago, IL, March 8, 1990.

Mr. TIMOTHY J. METHOD,
Assistant Commissioner, Office of Air Management, Indiana Department of Environmental Management, Indianapolis, IN.

DEAR MR. METHOD: Please be advised that my January 30, 1990, letter to you regarding the Clean Coal Technology (CCT) project at Northern Indiana Public Service Company's (NIPSCO) Bailly Generating Station, should be modified. While the Environmental Protection Agency (EPA) continues to agree with the State that Clean Air Act (CAA) provisions for new source performance standards (NSPS) and new source review (NSR) do not apply if the conditions outlined in my January 30, 1990, letter are met, some revisions are necessary.

On Page 8, the section on "Conditions for Permanent Controls or Devices to Be Considered Not Less Environmentally Beneficial" should be changed as follows:

In first paragraph, second sentence (change underlined)—

"At this time, EPA anticipates that it ruling will include a presumption that such pollution controls will not result in an environmental harm, with respect to permanent controls, if the source demonstrates that:"

In the second condition (change underlined)—

"2. There will be no environmental harm resulting from the proposed activities. This includes conditions that the proposed change would not be itself:

(a) * * * (no change) * * *;

(b) increase the annual emissions of any pollutant regulated under the CAA;" (delete the phrase "as a result of increased capacity utilization rate).

Insert new paragraph after condition 2d—

"Changes which are expected to increase emissions to the atmosphere, such as changes which increase a source's hourly operating capacity (e.g., eliminating a bottleneck, hourly emissions rate (e.g., on pollutant decreases but another increases), or utilization rate (e.g., an anticipated increase in hours of operation resulting from the installation of controls) would not be affected by this interpretation and would continue to be potentially subject to NSR and NSPS. The EPA will presume, however, that the addition of a control device will not, by itself, result in an increase in capacity utilization. However, this presumption will be overcome if there is a clear likelihood that operating hours of production rates will increase because of the installation of the device.

On page 10, a corresponding change should also be made to amend the first full paragraph as follows (change underlined):

"The EPA anticipates that its interpretative ruling will . . . In assessing whether any net increase in actual emissions of any pollutant, over representative actual emission rates, is likely to occur as a result of the addition of controls, the reviewing agency should consider the economic incentives to increase production rates or hours of operations associated with the installation and use of the control device. Where increased emissions due to increased utilization of the facility are clearly a likely result from addition of the device, the change should not be considered environmentally beneficial." (Delete last sentence of paragraph starting with "The authority . . .).

If you have any further questions, please contact Mr. Ron Van Mersbergen at (312) 886-6056.

Sincerely yours.

DAVID KEE,
Director, Air and Radiation Division.

ENVIRONMENTAL PROTECTION AGENCY,
Chicago, IL, January 30, 1990.

Mr. TIMOTHY J. METHOD,
Assistant Commissioner, Office of Air Management, Indiana Department of Environmental Management, Indianapolis, IN.

DEAR MR. METHOD: The purpose of this letter is to comment on the permit proposed by the Indiana Department of Environmental Management (IDEM) for Northern Indiana Public Service Company's (NIPSCO) Bailly generating station. The permit provides for the construction of an air pollution control device and directly related improvements under the Clean Coal Technology (CCT) program. The Environmental Protection Agency (EPA) agrees with the determination by IDEM that the State and EPA rules for prevention of significant deterioration (PSD) and new source performance standards (NSPS) are not intended to apply to the CCT project at Bailly. In other words, the project should not be considered a "major modification" under new source review (NSR) or a "modification" as set forth under NSPS provided certain requirements are met. In a separate but related

issue, EPA also agrees with the determination by IDEM that the addition of a diesel generator as a backup power supply to the scrubber to be installed at Bailly is not a major modification if the limits on operating the generator agreed to by NIPSCO are federally enforceable.

INTRODUCTION

For NSPS purposes, a modification is defined as any physical change in, or change in the method of operation of, a stationary source which increases (in terms of hourly emissions capacity) the amount of any air pollutant regulated under the Clean Air Act (Act) which is emitted by such source, or which results in the emission of any air pollutant not previously emitted. For NSR purposes, a major modification is a modification which results in a significant net emissions increase (in terms of actual annual emissions).

The EPA has become aware that these definitions can be interpreted in such a manner as to subject to NSR or NSPS, or both, certain environmentally desirable activities at existing stationary sources which neither Congress nor EPA intended to be covered by the Act's new source requirements. Moreover, NSR or NSPS coverage would, in some instances, have the effect of discouraging such activities. The EPA believes that such activities, including CCT demonstration projects, are not physical changes or changes in the method of operation, so long as they meet certain criteria discussed herein and EPA issues an applicability exclusion. Hence, such activities are not "modifications" for NSPS purposes, or "major modifications" for NSR purposes.

Over the past several months, EPA has held numerous internal meetings to discuss the Clean Air Act regulatory issues raised by the CCT program. As a result of these discussions, the EPA has decided to issue an interpretative ruling as soon as possible to provide guidance on the definition of a physical or operational change as it applies to new source requirements. In a letter dated January 5, 1990, EPA advised NIPSCO of this intention.

Essentially, this ruling would clarify that if a source solely adds or enhances systems or devices whose primary functions are the reduction of air pollution, and that are determined to be not less environmentally beneficial (as determined by the Administrator) than any emission control system or device it replaces, if any, such activities would not constitute a physical or operational change triggering new source requirements. Consequently, NSPS and PSD and nonattainment new source review would not apply to these types of activities. This interpretative ruling would include permanent, as well as temporary projects under the CCT program. However, it would not extend to projects that primarily are intended to extend the life of a plant or increase capacity. In addition, any changes, permanent or temporary, which are expected to significantly increase emissions to the atmosphere, such as changes which increase a source's hourly operating capacity (e.g., eliminating a bottleneck), hourly emissions rate (e.g., one pollutant decreases but another increases), or utilization rate (e.g., an anticipated increase in hours per year of operating resulting from the installation of controls) would still be subject to NSR and NSPS.

Based on our review of the draft permit, we believe that the Bailly project is consistent with the provisions EPA is developing for its interpretative ruling. On this basis, we have reached the conclusion that this project in particular is not subject to NSPS or major NSR requirements, so long as it continues to meet the criteria herein.

The balance of our comments outlines the grounds for EPA's conclusion and contains a discussion of the anticipated terms of EPA's upcoming interpretative rule. The EPA is still deliberating the specific terms and provisions of its interpretative ruling. While today's comments reflect EPA's current expectations of what will be contained in that document, the actual terms of the ruling may differ from those discussed herein.

BACKGROUND

A. The NSR and NSPS Provisions of the Clean Air Act

The NSR and NSPS provisions of the Act apply to wholly new facilities, and to modifications at existing facilities, when certain conditions are met. The rules governing the applicability of NSR and NSPS to modifications at existing facilities are described in detail in the EPA regulations (see 40 CFR 51.165 and Appendix S, 52.21 and 60.15). In general, the modifications that would trigger these new source requirements are those involving physical or operational changes which increase emissions over baseline levels. (In addition, for NSPS purposes under EPA regulations, a reconstruction occurs and a source is considered "new" if the physical or operational change costs more than 50 percent of the replacement cost of the affected facility, regardless of whether an emissions increase occurs). The term "physical or operational change" is construed broadly and may include the installation, use, or dismantling of pollution control equipment.

1. Background of the NSPS and NSR Modification Provisions:

The 1970 Amendments to the Act required EPA to promulgate technology-based new source performance standards applicable to the construction or modification of stationary sources that cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. 42 U.S.C. 7411(b)(1)(A). Congress decreed that, in addition to wholly raw sources, NSPS would apply to the modification of an existing source, defined broadly as: any physical change in, or change in the method of operation of, a stationary source which increases the amount of any air pollutant emitted by such source or which results in the emission of any air pollutant not previously emitted. Clean Air Act section 111(a)(4), 42 U.S.C. 7411(a)(4).

The NSPS provisions were "designed to prevent new [air] pollution problems" by regulating both newly constructed sources of pollution and existing sources that increase their emissions. *National Asphalt Pavement Assoc. v. Train*, 539 F.2d 775, 783 (D.C. Cir. 1976) [*see also* H.R. Rep. No. 1146, 91st Cong., 2d Sess. 3, *reprinted in* 1970 U.S. Code Cong. & Admin. News 5356, 5358]. The effect of including modified sources as well as newly-constructed sources under the provisions of section 111 was to establish a current level of emissions above which an existing source may not pollute without becoming subject to the NSPS. In August 1977, Congress adopted further extensive changes to the Act (Pub. L. 95-95). These included review-and-permitting programs for new and modified sources combining the technology-based approach of NSPS with specific measures to insure that ambient air quality goals under the Act are met. Congress intended NSR to apply "Where industrial changes might increase pollution in an area." *Alabama Power Co. v. Costle*, 636 F.2d 323, 400 (D.C. Cir. 1979). Part D applies to areas which have not met national ambient air quality standards (NAAQS) under section 109. To receive a permit in such areas, major new and modified sources must (among other things) obtain emissions offsets that assure reasonable progress toward attainment of the NAAQS and must comply with the "lowest achievable emission rate," which can be no less stringent than an applicable NSPS (see sections 171-173). The 1977 amendments also added a new Part C to the Act including, in sections 160-169, an NSR program for the prevention of significant deterioration of air quality (the "PSD" program) in areas which have attained the NAAQS. To receive a PSD permit, a prospective major new or modified source must (among other things) show that it will not exceed the available air quality "increment" (designed to prevent pollutant concentrations from deteriorating beyond certain levels), and will use the "best available control technology", which must be at least as stringent as any applicable NSPS. Both the Part D NSR program applicable to nonattainment areas and the Part C NSR program applicable to attainment areas adopted the NSPS definition of "modification," but not all the exclusions to that definition [see sections 171(4) and 169(2)(C)].

It is evident from the structure of the NSR and NSPS programs that Congress sought to focus air pollution control efforts at an efficient and logical point: the making of substantial capital investments in, or other long-term decisions regarding, pollution-generating facilities. In adopting NSR measures in particular, Congress sought to reconcile the legislative goal of environmental protection with a concurrent desire for continued economic growth [see sections 160(1)-(4)]. Consequently, a key theme of the NSR program is the careful evaluation of, and public participation in, "any decision to permit increased air pollution" [see section 160(5)]. As discussed below, the current regulations implementing NSPS and NSR were designated to apply these programs in a manner consistent with their respective statutory purposes. Today's comments represent our interpretation of these existing regulations under the facts presented by the Bailly project. The EPA expects that its upcoming interpretative ruling will further focus EPA's position on the basis legislative intent of these important programs.

2. The Two-Step Test for Modifications:

The modification provisions of the NSPS and NSR programs grow from a single statutory trunk, the very broad definition of "modification" in section 111(a)(4). Under both respective programs, EPA developed a two-step test for determining whether activities at an existing facility constitute a modification subject to new source requirements. In the first step, which is largely the same for NSPS and NSR, EPA determines whether a physical or operational charge has occurred. If so, EPA proceeds in the second step to determine whether the physical or operational change will result in an emissions increase over baseline levels. In this second step, the applicable rules branch apart, reflecting the fundamental distinctions between the technology-based programs of NSPS and the technology and air quality concerns of NSR. Briefly, the NSPS program is concerned with *hourly* emissions rates, expressed in kilograms or pounds per hour. [An hourly emissions rate is the product of the instantaneous emissions rate, i.e., the amount of pollution emitted by a

source, after control, per unit of fuel combusted or material processed, (such as pounds of sulfur dioxide emitted per ton of coal burned) times the production rate (such as tons of coal burned per hour)]. Emissions increases for NSPS purposes are determined by changes in the hourly emissions rates at maximum capacity. The NSR is concerned with total annual emissions to the atmosphere, expressed in tons per year. (Annual emissions are the product of the hourly emissions rate, which is the sole concern of NSPS, times the utilization rate, expressed as hours of operation per year). Emissions increases under NSR are determined by changes in *annual emissions* to the atmosphere.

3. Physical or Operational Change:

The very broad definition of physical or operational change in section 111(a)(4) could, standing alone, encompass the most mundane activities at an industrial facility—even the repair or replacement of a single leaky pipe or a change in the way that pipe is utilized. The definition certainly is broad enough to encompass the addition or enhancement of pollution control equipment. However, EPA has always recognized that Congress obviously did not intend to require every activity to be potentially subject to new source requirements, and that it would be administratively impracticable to do so. Accordingly, EPA has substantially narrowed this term in its NSPS and NSR regulatory definitions through the adoption of common-sense exclusions. For example, both sets of regulations contain similar exclusions for routine maintenance, repair, and replacement; for certain increases in the hours of operation or in the production rates; and for certain types of fuel switches [see 40 CFR 60.14(e); see also, e.g., 40 CFR 52.21(b)(2)(iii)]. In addition, with respect to pollution control equipment, the NSPS regulations contain an exclusion for;

"The addition or use of any system or device whose primary function is the reduction of air pollutants, except when an emission control system is removed or is replaced by a system which the Administrator determines to be less environmentally beneficial [40 CFR 60.14(a)(5)]."

The EPA has held that this exclusion does not apply to a source which, upon original construction, employed wet scrubbers, but later (upon relaxation of a State plan under section 111(d)) desired to remove the control equipment, which would have resulted in much higher levels of pollution than the plant had ever emitted [*National Softwire Aluminum Co. v. EPA*, 838 F.2d 835 (6th Cir.), *cert. denied*, 109 S.Ct. 390(1988), herein after *National Southwire*]. In the past, EPA has taken various views as to whether the exclusion in section 60.14(e)(5) should apply for NSR purposes. As noted earlier, the NSR statutory definitions of modification simply adopt the NSPS definition in section 111(A)(4). In addition, the legislative history reflects that, as a general matter, Congress intended to conform the meaning of "modification" for PSD purpose to usage under NSPS [see 123 Cong. Rec. H11957 (Nov. 1, 1977)]. For this reason, EPA initially ruled that the NSPS exclusion for addition of control devices applied automatically to PSD (Memorandum from Edward E. Reich, OAQPS, and William F. Pedersen, OGC, to EPA Region VI, April 21, 1983). The EPA reversed course in a 1986 applicability determination issued for both PSD and nonattainment NSR purposes, noting that the NSPS exclusion was highly qualitative, and failed to give due account to either the air quality management component or the largely quantitative orientation of the NSR applicability regulations. (Memorandum from Gerald A. Emison, Director, OAQPS, to Regional Air Division Directors, July 7, 1986).

COMMENTS ON NSPS APPLICABILITY

An NSPS modification is any "physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies" (40 CFR 60.2). Under NSPS, emissions increases, for applicability purposes, are calculated by comparing the hourly emission rate immediately before and after the physical or operational change. All operating parameters which may affect emissions must by the same to the maximum feasible degree for the before and after testing, and tests must be conducted under representative conditions. Absent the exclusions from modifications specified at 40 CFR 60.14(e), any increase in emissions to the atmosphere over the previous emissions rate will subject the modification to NSPS [see section 60.14(a) and (b)]. In addition, modifications which would cost 50 percent or more of the cost of a comparable new facility are classified as reconstruction (see 40 CFR 60.15) and are subject to NSPS as a new source even if there is no emissions increase.

Thus, unless the reconstruction provisions come into play, it is clear that under the existing regulations NSPS would not apply to the installation or improvement of emission control equipment which reduces hourly emissions rates. If the reconstruction provisions do apply, then such changes would trigger NSPS.

Based on NIPSCO's permit application and representations made by NIPSCO's September 14, 1989 and December 4, 1989 information submittals to EPA, NSPS, would not apply to the Bailly Station if the new scrubber is not removed (i.e., if it is a permanent demonstration) because hourly emission rates will not increase as a result of the addition of these CCT controls. As a permanent CCT demonstration project, it would satisfy the requirements of the exemption contained in 40 CFR 60.14(e)(5) for the addition or use of any control system or device whose primary function is the reduction of air pollution. (The definition of "modification" for NSPS is found at 40 CFR 60.14). In addition, the Bailly project would not qualify as a reconstruction under 40 CFR 60.15.

However, the NSPS provisions could also apply to major facilities with temporary CCT demonstration projects at the end of the demonstration when the control equipment is removed and emissions rise back to the level that existed before the demonstration. Thus, while the placement of CCT controls at Bailly will reduce the hourly sulfur dioxide (SO_2) emissions rate, if NIPSCO later dismantles the CCT controls, this would result in an increase in hourly SO_2 emissions up to pre-demonstration levels and the source could be considered subject to NSPS.

Today's comments reflect EPA's position that the Bailly plant would not be subject to NSPS at the conclusion of the project, if NIPSCO decides to make it only temporary, as the result of an increase in emissions rates back up to the levels which existed before the changes were made to accommodate the temporary demonstration project. The EPA expects that its forthcoming interpretative rule will take this position with respect to all temporary CCT and similar demonstration projects which reduce emission rates. Unlike the situation presented in *National Southwire*, it is clear that the addition of pollution control in a temporary CCT demonstration was never intended to result in permanent emissions reductions. In addition, removal of temporary controls will not result in a level of emissions higher than that experienced in the past. (Reconstruction provisions, however, could subject both temporary and permanent CCT demonstration projects, and certain other emission control system installations or improvements, to NSPS. Still, as indicated by the Bailly project, the reconstruction provisions of the Act should rarely, if ever, apply to the type of activity which would be considered for exclusion from the definition of a physical change or a change in the method of operation. Thus, the triggering of the reconstruction provisions is an indication that the proposed activities are more extensive than just the addition, or replacement, of an emission control system or device, and so are not appropriate for exclusion.)

COMMENTS ON NSR APPLICABILITY

Modified sources are subject to NSR if the modification is "major." Major modifications must consist of a physical change or change in the method of operation of a major stationary source [40 CFR 52.21(b)(1)] which results in a net emissions increase of any pollutant subject to regulation under the Act that is significant. Significance levels are expressed in tons per year and differ for each pollutant [40 CFR 52.21(b)(23)]. Net emissions increases are determined [40 CFR 52.21(b)(3)] by summing all contemporaneous creditable actual emissions increases and decreases. The definition of "actual emissions" is such that generally the comparison is between actual emissions before the physical or operational change in question and the potential to emit of the facility afterwards [40 CFR 52.21(b)(21)]. If the source has not been operating near full capacity, even the addition of a control device could be considered a significant net emissions increase when comparing historic actual emissions with a new potential to emit, even though there may be a substantial reduction from historic actual emissions.

Specifically, actual emissions before the change at a facility are generally determined by averaging the emissions for the 2 years prior to submittal of the permit application (or some other period if the last 2 years are not representative of normal unit operation) [see, e.g., section 52.21(b)(2)(ii)]. Since the emissions rate after a physical or operational change cannot be predicted in advance, EPA regulations assume that a source's actual emissions will equal its maximum "potential to emit", which is based on constant full loads operation for an entire year (unless restricted by federally enforceable limitations) [see, e.g., sections 52.21(b)(21)(iv); 52.21(b)(4)]. Thus, a physical or operational change will trigger NSR if the annual potential to emit of the source is significantly greater after the change than its representative actual annual emissions before the change, unless the company agrees to federally enforceable operational restrictions which limit its potential to emit to levels not significantly greater than its actual emissions before the change. This actual-to-potential methodology applies to physical or operational changes at new or "modified" (i.e., altered or changed) emissions units [see 45 FR 52676, 52677, 52718 (1980)].

As explained below, EPA believes that this methodology generally serves the purposes of NSR because it subjects to review projects that might lead to an increase in actual pollution. However, the NSR provisions in the existing regulations could be interpreted to apply to major facilities simply installing or improving control equipment, including CCT demonstration projects, under circumstances where a permanent increase in pollution is highly unlikely.

Under EPA's prospective interpretative ruling, existing sources which would otherwise become subject to NSR only because they decide to install or improve emission controls, or participate in the CCT program or similar demonstration projects approved by EPA, would instead be excluded from NSR coverage, so long as certain criteria intended to ensure that permanent increases in actual emissions do not occur are met.

With respect to the Bailly project in particular, it appears that the plant has been operated at a rather high level of approximately 60 percent of capacity, reflecting baseload utilization of the plant. There is no indication that NIPSCO intends to increase this level of usage at any time following installation of the CCT controls. In addition, it appears that the Bailly project will meet the criteria EPA expects to set forth in its interpretative ruling for both temporary and permanent projects.

The EPA now believes it is appropriate to devise and apply such criteria both for the Bailly project and for the upcoming interpretative ruling. The EPA has recommended the position taken in its 1986 memorandum, discussed earlier, regarding use of the NSPS exclusion in 40 CFR 60.14(e)(5). While EPA continues to believe that this exclusion does not apply automatically for NSR purposes, the criteria discussed herein provide due consideration of air quality management concerns and the need for quantative analyses.

CONDITIONS FOR PERMANENT CONTROLS OR DEVICES TO BE CONSIDERED NOT LESS ENVIRONMENTALLY BENEFICIAL

As noted above, EPA is preparing an interpretative ruling which will clarify that if a source solely adds or enhances systems or devices whose primary functions are the reduction of air pollution, and which are determined to be not less environmentally beneficial, such activities would not constitute a physical or operational change triggering new source requirements. At this time, EPA anticipates that its ruling will provide that such pollution controls will be considered not less environmentally beneficial with respect to permanent controls, if they meet at least the following criteria:

(1) The source will continue to meet all current requirements and standards applicable to existing sources under the Act. This includes meeting applicable NAAQS, PSD increments, permit conditions, and State implementation plan (SIP) limitations.

(2) There is no environmental harm resulting from the proposed activities. This includes conditions that the proposed activities would not cause the source to;

(a) Increase the maximum hourly actual emissions rate of any pollutant regulated under the Act;

(b) Increase the annual emissions of any pollutant regulated under the Act as a result of an increase in capacity utilization rate;

(c) Adversely impact an air quality related value (e.g., visibility) in any Class I area; or

(d) Allow an increase in emissions of toxic pollutants not regulated by the Act which would cause an adverse health or welfare impact.

Based on the information provided by NIPSCO, it appears at this time that the Bailly project, if it is made permanent, will meet the above criteria. Accordingly, as to the Bailly project in particular, EPA believes that major NSR requirements clearly will not apply if the project is made permanent, so long as these criteria are in fact met.

TEMPORARY CCT CHANGES

In its upcoming interpretative ruling, EPA expects to follow criteria for "temporary" CCT projects which are somewhat different from those for permanent projects. The EPA likely will consider a project to be temporary if it lasts less than 5 years from the date the project commences construction. However, the ruling probably will provide that the Administrator would consider an additional period of time, up to 5 additional years, in certain cases. At the end of a temporary project, the facility would be returned to pre-demonstration conditions and hourly emission rates (or lower). It is not clear if the proposed Bailly station permit is for a permanent or temporary CCT project. It is our understanding that NIPSCO considers the first 3 years of the CCT demonstration project to be "temporary" and will view the changes as "permanent" for the following 17 years if they are continued after the 3-year period.

The EPA expects that its interpretative ruling will provide that for temporary demonstration projects, the conditions relating to actual emissions increases and hours of operation criteria under 2a, b and d above would not apply to minor, temporary variations from nominal operating conditions. Temporary increases may occur due to testing procedures or some failure in unique but unproven equipment, but should not willfully contribute to adverse health or welfare impacts. The EPA believes that the benefits inherent in CCT and other similar technology demonstration projects counterbalance the limited, temporary impacts that may occur during these temporary projects. Under the ruling, temporary demonstration project applications likely would have to meet all of the other criteria applicable to the permanent projects discussed above. This interpretation would provide the flexibility to encourage temporary demonstration projects which are considered to be environmentally beneficial overall, despite unpredictable, temporary increases in emissions of some pollutants or in the hours of operation that may occur during the course of a demonstration.

The EPA expects the ruling to state that temporary changes would become permanent in any time during or at the end of a demonstration period if the owner/operator seeks a revised applicability determination addressing all criteria applicable to permanent air pollution control system improvements. In submitting these comments, EPA is applying the above criteria in its review of the Bailly project. If NIPSCO ultimately decides that the Bailly CCT project is to become a permanent CCT demonstration, the project should meet all the criteria discussed earlier for permanent projects at the time the project is to be converted to permanent status (i.e., after 3 years).

PROCEDURES FOR ENVIRONMENTALLY BENEFICIAL EXCLUSIONS FROM APPLICABILITY

The EPA expects that under its forthcoming interpretative rule, an owner or operator proposing to make an environmentally beneficial change in an air pollution control system will be called upon to request an applicability determination from the appropriate NSR/NSPS permit authority. The request should include a general description of the facility and the proposed activity, information on the current and projected use of the facility, and sufficient information to justify a nonapplicability determination. For any air pollution control system improvement, the request should include a rationale for why the emission control system or device should be considered equal to or more efficient than existing control technology at the source.

The EPA also anticipates that its interpretative ruling will state that in providing information to the reviewing authority, an owner or operator should submit sufficient modeling to demonstrate that any new or increased emissions of unregulated toxic pollutants resulting from the change in control equipment will not cause or contribute to adverse health or welfare inpacts. The owner or operator should also demonstrate that the source will not operate at greater hourly emissions rates, or for more hours, than it has been during the most recent 2 years (or some other period, if the last 2 years are not representative of normal operation). In assessing whether actual emission increases of any pollutant are likely to occur, the reviewing agency should consider the economic incentives to increase production rates or hours of operation associated with the change. Any change which could reasonably result in increased emissions due to possible increased utilization of the facility as a result of the changes should not be considered environmentally beneficial. The authority reviewing the proposed change should explicitly determine, based on consideration of these and other relevant criteria, that the net effect will not be one of environmental harm.

OPERATING LIMITS ON NEW DIESEL GENERATOR

The EPA considers the addition of a backup diesel generator at Bailly not to be an integal part of the CCT demonstration, in that the generator could serve multiple functions once installed. In general, EPA views changes to be subject to NSR and NSPS if such changes are not strictly related to the addition of the improved air pollution control system and the changes have any possible additional application. However, EPA agrees with IDEM that the addition of a new diesel generator does not constitute a "major modification" if the State's limits on the generator's hours of operation, preventing concomitant increase in emissions from exceeding significance levels, are federally enforceable.

In closing, EPA agrees with the State that NSPS and NSR do not apply if the conditions outlined in this letter are met. If you have any further questions, please contact Mr. Ron Van Mersbergen at, (312) 886-6056 or Mr. Dom Abella at, (312) 886-6543.

Sincerely yours,

DAVID KEE,
Director, Air and Radiation Division.

Mr. CHAFEE. Mr. President, I want to mention to my colleagues and all who might be listening that the technical amendments to title I, which is the stationary source nonattainment, title II, mobile sources, and title VII, CFC's are available at the Environment and Public Works Committee, which is room 410 in the Dirksen Building, and in the respective cloak-

rooms; so if anybody wishes to inspect or review those technical amendments, they can do so in room 410 of the Dirksen Building or in either of the cloakrooms.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I further ask unanimous consent that I might be permitted to speak as though in morning business for 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator is recognized as if in morning business for a period of 3 minutes.

RETIREMENT OF REPRESENTATIVE BILL FRENZEL

Mr. DURENBERGER. Mr. President, on midday last Friday, many of us here and in Minnesota were shocked to learn that the dean of our Minnesota congressional delegation, Congressman BILL FRENZEL, had decided to end that portion of his public service career which has for 20 years featured service to his district, his State, and his country as a Representative of the Third Congressional District of Minnesota.

I have known BILL FRENZEL all of my public life of 30 years. He came to the Minnesota Legislature in 1962 when Republicans were giving some life to politics in the State of Minnesota. But he gave it more than political life; he brought with him in that period of 8 years of service in the Minnesota Legislature some of the most creative approaches to both public policymaking and public policy enactment that any of us had ever seen.

So in 1970, when the Third District's Congressman Clark MacGregor decided to do the impossible, that is, to take on Hubert Humphrey for the U.S. Senate, BILL FRENZEL was chosen to represent the Third District, and he has represented it so well since then that it is hard to believe he can be replaced.

There will be as always many people seeking to do that, but none who can. All of us who have enjoyed BILL FRENZEL, and we enjoy him more with each passing year, will acknowledge the great debt that we owe him for the years that he spent both here in Washington and in Minnesota. He has been a friend to everybody in politics, a role model to all of us who have been in elected office.

He is very plain-spoken. He just says what is on his mind. He is confused sometimes as a conservative, sometimes as a Republican, sometimes as a Democrat, as a liberal, whatever it is. But that is kind of nice in this day and age where people cannot be readily categorized, and so you have to end up accepting BILL FRENZEL for what he really is. He is a very great influence today.

Unfortunately, he was never in the majority in the House of Representatives. I suggest if he were, not only would he be in a position of much greater influence than he has been as to date, but obviously he would have been selected by many for the kinds of positions, platforms, chairs, if you will, that go only with the majority status.

BILL was in the right place at the right time, but never achieved anything he wanted to achieve. But for those of us who lived with him, served with him, and loved him throughout the period of his service, I hope he knows the unique role he played in our lives and in the progress of this institution.

A lot has been written over the weekend about Congressman FRENZEL, enough to keep him going for the next 9 months or whatever he has remaining in his term, and I ask unanimous consent that the material I have been able to pick up so far be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REPRESENTATIVE FRENZEL WILL RETIRE AFTER 20 YEARS

(By Craig Winneker)

Rep. Bill Frenzel (R-Minn), the ranking member of the House Budget Committee and a senior member of the Ways and Means Committee, announced Friday he will retire at the end of the 101st Congress.

In a news conference at the state capitol in St. Paul, Frenzel said, "It is not easy to break the habit patterns of 20 years, but it is now time to move on. Every Member of Congress knows when the time has come not to run again. For me, it is now."

Now in his eighth term, Frenzel, 61, was a state legislator and warehouse company president before coming to Congress in 1970. He won a seat on Ways and Means and made his mark as a strong advocate of free trade and low tax rates. Before becoming the top Republican on the Budget Committee, he was the ranking member of the House Administration Committee.

"I have no specific plans for the future," Frenzel said. "I expect to be useful in some way, but I am not looking for any more 80-hour-a-week jobs."

Frenzel also said his campaign committee, which reported a cash-on-hand balance of $389,945 on June 30, 1989, would return contributions received after Dec. 31, 1988, and would be dissolved by the end of the year. He has said that he will not convert any campaign funds to personal use.

His district comprises the Minneapolis suburbs of Bloomington and St. Louis Park, as well as other growing communities. Local political sources say the top Independent-Republican candidate to replace Frenzel would be state Sen. Jim Ramstad.

On the Democratic-Farmer-Labor party side, a growing list of possible candidates is being floated by state officials, including: former state House Speaker Harry Sieben; former state Attorney General Warren Spannaus; attorney Vance Oppermann; state Treasurer Mike McGrath; Ted Mondale, son of former Sen. Walter, and state Sen. Ember Reichgott.

Frenzel becomes the tenth sitting House Member to announce a retirement at the end of this Congress; six are Republicans and four are Democrats.

FRENZEL RETIRING AFTER 20 YEARS IN THE HOUSE

(By Tom Kenworthy)

Rep. Bill Frenzel (R-Minn.), a 20-year veteran of the House and a leading voice on fiscal issues in Congress, announced yesterday that he will not seek reelection this year.

Frenzel, the House Budget Committee's senior Republican and a ranking minority member of the Ways and Means Committee, announced his decision at a news conference in St. Paul.

"Every member of Congress knows when the time has come not to run again," said Frenzel, who is 61 and was first elected in 1970. "For me, it is now."

Regarded as bright, hard-working and acerbic, Frenzel frequently has been influential on economic issues. Although more moderate than many in his party on social questions, he is a strong fiscal conservative and has been a tenacious fighter for free-market principles, particularly on trade and taxes.

In recent years, Frenzel has grown increasingly partisan in response to what he regarded as a tyrannical Democratic majority. This attitude was reflected in his support last year of conservative Rep. Newt Gingrich (R-Ga.) for Republican whip.

Calling Frenzel "one of the giants of this institution," House Budget Committee Chairman Leon E. Panetta (D-Calif.) said that despite their disagreements. "I can think of no one who has approached the work of the Congress, both substance and politics, with more intelligence, seriousness, commitment and integrity."

House Minority Leader Robert H. Michel (R-Ill.) said he was "devastated" by Frenzel's decision. He called the Minnesotan "the GOP's most eloquent and intelligent spokesman on budget and tax issues."

Frenzel's retirement opens up a Republican seat that is expected to be difficult for Democrats to capture. The suburban Minneapolis congressional district is the most Republican and affluent area in Minnesota.

Frenzel said at his news conference that he has no particular plans for retirement. "You ought to go out when you're hitting .300, rather than deteriorating," he said.

[From the Star Tribune, Mar. 31, 1990]

FRENZEL TO RETIRE

(By Betty Wilson and Norman Draper)

U.S. Rep. Bill Frenzel, the dean of Minnesota's congressional delegation, announced Friday that he will not run for an 11th term.

Frenzel's surprise announcement stunned the state's political establishment and

prompted a flurry of speculation about who might succeed him. The announcement comes only one month before political parties are scheduled to endorse candidates for the Third District congressional seat.

"Every member of Congress knows when the time has come not to run again," Frenzel, a 61-year-old Republican, said at a news conference at the state Capitol in St. Paul. "For me, it is now." Friends and members of the congressman's staff, many with tears in their eyes, crowded the room to hear the announcement.

Frenzel said he has no specific plans.

"I expect to be useful in some way, but I am not looking for any more 80-hour-a-week jobs," he said.

For the time being, he and his wife, Ruth, will stay in Washington, D.C., he said. Frenzel, a friend of President Bush, said he has not been offered and isn't looking for a job in the administration.

In an interview, Frenzel said he "absolutely" would rule out running for governor. He disclosed that U.S. Sen. Rudy Boschwitz as late as Thursday night had urged him to get into the gubernatorial race. Although there are six IR candidates, none has broken out of the pack.

Boschwitz said yesterday afternoon that he hadn't heard a "Shermanesque" statement of refusal from Frenzel, and that he still hopes he'll consider running for governor. A Boschwitz-Frenzel ticket this fall would be a strong one, he suggested.

Frenzel said his political committee will return contributions received since Dec. 31, 1988, and will dissolve by the end of the year. He reported a cash balance of $358,347 in his campaign kitty at the end of last year. Frenzel said he will not take any cash for personal use from his campaign funds, which he is allowed to do under federal law. Those leftover funds will be used for severance pay for employees and contributions to other candidates, he said. Federal law does not permit him to give more than $1,000 to whomever may be endorsed by the Independent-Republican Party to succeed him, Frenzel said.

At some point he will endorse a successor, but he'll wait until prospective candidates make their announcements, he said.

Frenzel was elected to the U.S. House in 1970 by a narrow margin from the sprawling suburban Third District, and by majorities as high as 70 percent ever since. The district is considered Republican territory. It includes western and southern Minneapolis suburbs, Carver County, most of Scott County, western and southern Dakota County, and a township in Goodhue County.

He is the fourth-ranking Republican on the House Ways and Means Committee and the senior Republican congressman on the Budget Committee.

Frenzel is considered a fiscal conservative and a moderate on many social issues. Although he considered running for the U.S. Senate in 1978, he would have had difficulty winning the IR endorsement because of his positions favoring abortion rights and a proposed Equal Rights Amendment.

He used a baseball analogy to explain why he's decided to step down at this time.

"You ought to go out when you're hitting .300, rather than deteriorating," he said.

At least some Democrats saw the Republican stranglehold on the district loosening with Frenzel's announcement.

"It's not a Republican lake," said Bob Coombs, Third District DFL Party chairman. "Its a pretty independent district. . . . There's a good chunk of independent voters that can go either way."

Coombs said that, before Frenzel's announcement, the party had searched with little success to find a DFL candidate for the seat. He said 12 people had been contacted through February about running against Frenzel.

"Quite frankly, we got some, 'Yeah, it might be a good idea' responses, but people weren't really interested until Bill Frenzel left."

But state Sen. Michael Freeman, DFL-Richfield, and an announced candidate for Hennepin County attorney, noted that even without Frenzel the Third is "a real tough, tough seat for a Democrat."

Freeman, who lost to Frenzel in 1978, said that although he is "very interested in being Hennepin County Attorney," he has not discounted the possibility of taking another shot at the Third District seat.

State IR Chairwoman Barbara Sykora said the field is wide open for candidates for Frenzel's seat. The Third District IR convention meets May 5 and is expected to endorse a party candidate. The district DFL convention meets April 28.

State Sen. Jim Ramstad of Minnetonka, who was at Frenzel's news conference, said he's considering running. Other names mentioned on the IR side include Hennepin County Commissioner Randy Johnson; former state Rep. Charles Halberg of Burnsville, who is running for the state Senate, and Doug Kelley of Bloomington, a candidate for governor.

A number of IR legislators also are on the list of potential candidates, including state Reps. John Himle, Bloomington; Connie Morrison, Burnsville; Sally Olsen, St. Louis Park; Kathleen Blatz, Bloomington; Dennis Ozment, Rosemount, and K.J. McDonald, Watertown.

Of those reached for comment, Blatz expressed interest and Johnson said he would take "a good, hard look" at running for the seat. Kelley said he'll stay true to his gubernatorial ambitions. Himle said he would "take a look at it," but that "the signals probably aren't right at this time."

On the DFL side, names being mentioned include Attorney General Hubert Humphrey III: state Sens. Ember Reichgott of New Hope and Freeman; state DFL Chair Ruth Stanoch, Bloomington; former House Senator Harry Sieben, Hastings; former state Sen. Emily Staples, Plymouth; former Attorney General Warren Spannaus, Bloomington, and Michael Hatch of Burnsville, a candidate for governor.

"I do live in the Third," said Reichgott. "But I think my thoughts right now are to focus on the last 10 days of the (legislative) session and complete what I have to do here. It's an idea I would like to discuss with some other people."

Sieben said he'd "have to think about it for some period of time," and Spannaus denied any interest in the seat.

Hatch said that he intended to continue his bid to unseat DFL Gov. Rudy Perpich, despite the Third District opening.

Q & A/It Was a "Hard Decision" After 20 Years

(By Betty Wilson)

U.S. Rep. Bill Frenzel talked Friday about why he's retiring after 20 years in Congress, and reflected on his years in office and the state of political affairs in the nation and in Minnesota.

Here are excerpts from an interview:

Q. When did you decide to step down?

A. Ruthie and I decided last week. I've been thinking about it a couple of years. It was a hard decision. I almost came down on the other side. It was a close one. . . . I guess there will be 30 or 40 candidates for my seat. It's going to upset the fruit basket for a while. I had to worry about that a little bit. I had to worry a little bit about other people on the ticket . . . worry about projects I am working for in the Congress and those I'm working against. I guess I think it's not a good thing for Ted Williams to be playing right field when he's 50 years old. It's not that I'm forced by some event. It's just that I think it's appropriate to do it.

Q. How has the political process changed in recent years? Has it changed for the better or worse?

A. In a nutshell, we have become a little more polarized. We have seen the decline of the political parties. When I was elected, the parties were strong and could elect candidates. They seem not only in Minnesota but elsewhere to be pretty weak. While people claim allegiance to one party or another, they are unlikely to want to work for them, less likely to want to contribute to them. Now we are in the age of the candidate and the single issue. I also believe, and this is highly subjective, that we are not getting the same caliber of person in the Congress as we were putting 20 or 30 years ago, and I am not sure whether it's better or worse, but it is a different kind of person.

Q. In the past you were almost denied endorsement by your party. Have the changes in the IR Party been part of this decision?

A. I would say it has made life less pleasant. When I ran for this I had a very strong, active party and one I could count on for help in campaigns, people to put on the streets, peddle literature, get the mail out. That's all changed. Parties have become rather more debating societies, probably less positive and more negative. But that's simply an item of personal comfort. It hasn't bothered my job at all. I don't have any war with the party in the Third District. Where we can do it together, we do it happily. Sometimes we part company. We do that happily as well. But just from a standpoint of 20 years, the party thing has made life a little more difficult for candidates. In some ways it's made it better because candidates now run the show. The party does not.

There's a whole different kind of campaigning now. In the old days we put much more reliance on volunteer resources. We rely much more on dollar resources now. So whoever comes behind me will have a different problem. The party will be much less relevant. . . . Frankly the party is not very reliable.

Q. Are you concerned about single interests?

A. I'm concerned about it. I don't want to write a law against it. However people choose to participate, by broad umbrella group or narrow unbrella group. . . . It's their own business. It's a little more difficult for candidates and officeholders to deal with the situation when single-interest groups are working the problem hard. I think, however, the American people are essentially broad-gauged. While they have intense interest in certain issues, abortion, school busing . . . ultimately 98 percent of the people judge a candidate on his own good judgment rather than those single issues.

Q. What were the high points during your career?

A. Well, I'll tell you, every day has been exciting. I remember being sworn in and just absolutely awestricken, overcome by the process. And nearly every day that I go to work in the Capitol I get goosebumps coming by the statues of the titans of the republic who have made our laws. It has been a kind of awesome experience to be down there.

I have had a few personal victories. I had good luck with the election laws in '72 when we created the Federal Elections Commission. I thought I had a personal hand in that; at least I claimed some credit for it. Some of the tax laws of the '70s, I thought I had a big hand in. In the last 10 years I have converted over to being a budgeteer. I have tried to exercise a restraining hand on what I think is the profligacy of the Senate. Every now and then we sustain a veto or beat a bill or chop a little piece off a bill and those have been the high points. Other than that it has been the privilege of serving this term with a president who is a personal friend, whom I like, whose policies I generally like. That has been a great thrill.

Q. Have you been frustrated at not being in the majority?

A. No question about it. The minority is a good noble role in our system, but it's a crummy one to have to play every day. Luckily, when I was in the Minnesota House, Republicans were in the majority each of those sessions, so that was a little more pleasant. You play the hand you are dealt.

Q. Critics say Congress isn't doing anything to effect change, that nothing is moving out there.

A. If so, I've been more successful than I've thought. The federal government in my judgment had much too heavy a hand in the lives of its citizens. I have tried to remove the federal government and where possible to transfer not only the obligations but the resources to the state. As dippy as I think the Minnesota Legislature is . . . I mean leadership. . . . I really think the citizens are better served closer to home with people who are there every day and are called to task. It isn't fair to say Congress is not accountable, but we are very heavily insulated against electoral accountability. Members of the House of Representatives have been reelected over the time I've been in Congress with a little better than a 96 percent success ratio. That's too much. At least in Minnesota occasionally we throw one of the rascals out. So I would prefer to see the federal government doing less. I would prefer to see federal programs scaled down. I would prefer to see states carrying more responsibility. If . . . that's happening, I would declare a victory.

Q. Is this a happy time, a sad time?

A. It's bittersweet. I have enjoyed the career. I have loved it. There are some great memories. I will miss some wonderful things. I would hope there are some wonderful things in the future, too.

Q. Are you independently wealthy so you won't have to look for another job?

A. Actually no. I have a modest amount of assets. But I will have to do something.

FRENZEL DROPS A BOMB: WON'T SEEK 11TH TERM

(By Bruce Orwall)

Rep. Bill Frenzel, one of the most powerful Republicans in Congress, dropped a bombshell Friday by announcing that he will not seek re-election in Minnesota's 3rd Congressional District this fall.

With 20 years of service, Frenzel, 61, is the senior member of Minnesota's congressional delegation. But his decision, based on his notion that it is time to move on, caught everyone, from his staff to political gossip mavens, off guard.

It will also touch off an intense free-for-all in pursuit of his seat, particularly among Independent-Republicans who have been waiting behind Frenzel for a long time. Within moments of Frenzel's announcement at the State Office Building in St. Paul, more than a dozen names were being touted as possible successors.

"It is an exciting and fulfilling and fun kind of life," Frenzel said. "However, there comes for everyone a time to do something else, and that time has come for me.

"It is not a good thing for Ted Williams to be playing right field when he's 50 years old," Frenzel added.

He did not speculate on his future plans. In the past, Frenzel, a good friend of President Bush, has been considered a logical selection for a post in the Bush administration, and was considered for the post of U.S. trade representative when Bush was elected. Frenzel said Friday he has no offers from Bush, and won't consider any until he has completed his term.

U.S. Sen. Rudy Boschwitz had an idea for Frenzel, though. He has spent the last two months attempting to persuade Frenzel to run for governor in Minnesota.

"I don't want to denigrate our other candidates," Boschwitz said, "but Frenzel would be a sensational candidate."

Frenzel says that he may seek elected office again in the future, but he does not want to run for governor in 1990.

At the Capitol, Frenzel's decision caught potential successors from both parties flat-footed. And he admitted that the timing of his decision gave candidates in the south metropolitan district very little time to gear up for the endorsing conventions that will be held May 5.

"I recognize that that may put some strain on the endorsement procedures," Frenzel said. "The party may want to defer its endorsing convention. . . . It's going to upset the political fruitbasket in the area for a while."

Leading the list of potential successors on both sides of the aisle are current or former legislators.

Among Independent-Republicans, Sen. Jim Ramstad of Minnesota has made no secret of his desire to run for Congress, but there are many others named as possibilities. They include state Reps. Sally Olsen, St. Louis Park; Dennis Ozment, Rosemount; Connie Morrison, Burnsville; K.J. McDonald, Watertown; former Rep. Chuck Halberg; Hennepin County Commissioner Randy Johnson; and two IR gubernatorial candidates who live in the district, Doug Kelley and David Printy.

Whoever emerges, observers at the Capitol speculated that a Republican favoring abortion rights, like Frenzel, would be the party's best bet to hang onto the seat.

On the DFL side, some of the people who have shown interest in the past are already pursuing other offices in 1990. The long list of DFLers includes state Sen. Mike Freeman, Richfield, who is running for Hennepin County attorney; Minneapolis attorney Vance Opperman, Gov. Rudy Perpich's former campaign chairman; former House Speaker Harry Sieben (or his brothers, Bill and Mike); Attorney General Hubert H. Humphrey III, who is seeking re-election; former Commerce Commissioner Mike Hatch, who is running for governor; state Sen. Ember Reichgott, New Hope; and DFL state Chairwoman Ruth Stanoch.

Hatch, however, for one, said Friday he isn't interested in the job and wants to focus on his challenge to Perpich.

Frenzel is the ranking Republican on the House Budget Committee and the fourth-ranking Republican on the House Ways and Means Committee. Both are influential posts, but Frenzel indicated he is weary of laboring in the Republican minority.

"The minority is a good, noble role in our system," Frenzel said, "but it's a crummy one to have to play every day. . . . But you play the hand you're dealt."

Frenzel said he won't walk away with any of his $300,000-plus campaign warchest, which would be legal under federal election laws until after the 1992 election—a change in federal law that is expected to provoke a lot of congressional retirements in 1992.

The Frenzel campaign will refund 1989 and 1990 contributions, pay its bills and staff and close its office, he added.

"I do not intend to take any large cash donation from my volunteer committee," Frenzel said. "If they want to buy me an ice cream cone or hamburger as a going away present, I'll let them.

When Frenzel was first elected to Congress in 1970, he said he would only serve three to five terms before hanging it up. He has introduced legislation 10 times that would limit congressional service but said Friday he has only attracted two co-sponsors in all those years.

Frenzel counts among his greatest achievements the creation of the Federal Elections Commission in the 1970s, passage of a variety of tax laws and his work on budget issues during the last 10 years, when he has tried to provide a "restraining hand" on the Democrat-controlled House.

FELLOW HOUSE MEMBERS PRAISE FRENZEL FOR EXPERTISE, INTEGRITY

(By Steven Thomma)

WASHINGTON.—The business writers sat on their hands while a stream of congressmen made their pitch on some now-forgotten trade legislation.

But when the veteran Republican lawmaker from Minnesota walked up to the microphone, they pulled out their pens and started talking notes.

"Now, we'll get some real insight," said one.

For nearly 20 years, Rep. Bill Frenzel, 61, has been one of the voices that people listened to on Capitol Hill.

They may not always have accepted what he said. He was, after all, in the minority. But they listened.

"Bill has been one of the giants of this institution," said Rep. Leon Panetta, D-Calif., the chairman of the House Budget Committee, where Frenzel had worked his way up to become the senior Republican.

"I can think of no one who has approached the work of the Congress—both substance and politics—with more intelligence, seriousness, commitment and integrity," Panetta said.

Rep. Dan Rostenskowsi, D-Ill., the chairman of the House Ways and Means Committee, of which Frenzel also was a member, called Frenzel "an able legislator, competent and conscientious . . . I hope he'll . . . somehow continue to be involved in the creation of good public policy."

The acclaim has grown in recent years as Frenzel's seniority and his expertise on tax

and trade issues have turned into plum assignments, most notably as the top Republican on the Budget Committee and as a member of the 12-person presidential commission on the budget deficit.

But many times, the brass ring of real, direct power has eluded him.

Frenzel was born in St. Paul. He received a bachelor's degree from Dartmouth in 1950 and a master's in business adminstration in 1951. He ran the family business, the Minneapolis Terminal Warehouse Co., and served in the Minnesota House from 1963 to 1970.

After winning his congressional seat in 1970 by a close 51-49 percent, he increased his hold on his suburban district. He won handily every two years after that.

In 1976 Frenzel was elected chairman of the Republican Research Committee, the first step on the ladder of the House Republican leadership.

But when he tried to move up the ladder in 1978, running for the chairmanship of the Republican Policy Committee, he was defeated by the more conservative Rep. Bud Shuster of Pennsylvania. He would never try again.

Also in 1978, he decided—after some agonzing—not to risk his House seat and run for the Senate. Two relatively unknown Republican newcomers—Dave Durenberger and Rudy Boschwitz—ran and won.

In 1988, he was widely rumored to be a possible choice for a spot in President Bush's new Cabinet, either as trade representative or secretary of commerce. He was not asked.

He said at the time that he was not disappointed, that he was happy to be staying in the House. But those around him knew he was tiring of his permanent status in the minority party.

"Years in the minority party have taken their toll on him, leading him increasingly often into the role of nay-saying curmudgeon, preoccupied as much with the indignities visited upon Republicans by the majority as with the legislation at hand," said Politics in America, a respected book on Congress.

But at least one colleague, Rep. Tim Penny, D-New Richland, said he thought Frenzel's influence on budget matters was on the rise again.

"I thought that in his current role, he was helping to make some headway," said Penny, a fellow fiscal conservative. "I would have thought that would have been very satisfying for him."

House Minority Leader Robert Michel, R-Ill., said Friday that Frenzel's counsel on fiscal issues will be missed.

"I was devastated to hear about Bill Frenzel's decision not to seek another term," Michel said. "He's been the GOP's most eloquent and intelligent spokesman on budget and tax issues for many years and has served a valuable place in the house Republican leadership.

"On a personal note, I know that this decision could not have been an easy one for him. While I regret that a man of such high caliber of personal integrity and intelligence has decided to leave public service, I wish him and his family great success and happiness in private life."

Mr. DURENBERGER. Mr. President, I conclude with a tribute to the people, 509,499 of them at last census count, who made up the Third Congressional District, who had the good judgment over the years, despite the differences with political philosophy from time to time, to keep returning him to the Congress by a very, very substantial margin.

I know that same good judgment will enable them to select a worthy successor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island [Mr. CHAFEE].

Mr. CHAFEE. Mr. President, I was not aware that BILL FRENZEL had announced he was going to retire. I am very, very sorry to hear that. He has been a tower of strength, judiciousness, thoughtfulness, and common sense in the House of Representatives.

I have had the privilege of dealing with BILL FRENZEL rather frequently, particularly in connection with Ways and Means matters, where he has been on the conference committees, several times.

He is going to be very, very difficult to replace. There are certain Representatives over there who have been major players in ways and means matters. I can remember when Barber Conable was of such importance on the Ways and Means Committee. BILL FRENZEL has been a very, very strong voice, particularly for free trade matters. I think he and SAM GIBBONS, of Florida have been probably the two strongest voices for free and open trade.

To have BILL leave is sad, I must say. Obviously, he has his own reasons. He served for a long time in public life. I suppose anybody can say enough is enough at some point. But to have BILL FRENZEL leave is regrettable.

I wish to him and his family all the very, very best in their coming retirement. The good side is he will be around for the remainder of this year.

The PRESIDING OFFICER. Does any other Senator seek recognition?

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

Mr. STEVENS. Mr. President, is there a pending amendment.

The PRESIDING OFFICER. There is pending the Baucus amendment to the clean air bill.

AMENDMENT NO. 1428 TO AMENDMENT NO. 1293

Mr. STEVENS. Mr. President, I ask unanimous consent that that amendment be set aside temporarily so I may offer an amendment for myself and Senator MURKOWSKI.

The PRESIDING OFFICER. Without objection, it is so ordered.

The pending amendments are set aside.

The clerk will report the amendment offered by the Senator from Alaska.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for himself and Mr. MURKOWSKI, proposes an amendment numbered 1428 to amendment No. 1293.

Amendment 1293 is amended by inserting the following new sentence at the end of line 13 on page 529:

"For the purposes of this section, the phrase 'national security interests of the United States' shall be deemed to include domestic production of crude oil and natural gas energy supplies on the North Slope of Alaska.".

Mr. STEVENS. Mr. President, the amendment has been read. It is very simple, really.

I think the Senate realizes that the North Slope oil fields currently produce about 25 percent of our domestic oil production. The large oil and gas facilities that are there—and gas is produced with the oil, but it is currently reinjected into the ground; there is no transportation system for the gas—those facilities use halon explosion and fire protection systems. I am told these are the only means available to protect these facilities and the people that operate the great Prudhoe Bay oil fields. The phaseout of halons that is proposed by this bill would jeopardize the productive capacity of this extremely large producing field.

My amendment would make it possible for the President to issue orders to allow the continued use of halons for fire and explosion prevention systems if there is nothing that can be developed to take their place.

The systems that are used in the North Slope are enclosed in very large nodules. They are necessary to protect both the equipment and the personnel that would operate the fire suppression systems from the extreme climatic conditions that exist on the North Slope. I am sure the Senate realizes that this is an area of extreme violent temperatures, from 100 above in the summertime to 60 or 70 below in the wintertime.

Of the alternatives to halon that are available, none can be used under the circumstances of the North Slope. CO_2 cannot be used because the lethal dose is a 10-percent concentration and a 35- to 40-percent concentration is necessary for fire suppression in the circumstances that exist on the North Slope.

Water cannot be used. Obviously in the winter it is not available in large enough supplies and, besides that, water spreads hydrocarbon fires and is not an adequate substitute.

Dry chemicals cannot be used. I am told they are effective locally on fires and facility operators can use them for small fires within the North Slope in buildings, but they would be ineffective on the comprehensive transportation system for oil and the reinjection facilities for gas.

I am informed that the companies are trying to find alternatives that would be as safe and as effective as halon. EPA is working with a Government working group that is cooperating with the Halon Alternatives Research Corp., which is a nonprofit company that has been funded to work on finding halon substitutes. The Arctic oil and gas producers are helping to finance that research. But the problem is that unless there is a breakthrough in that research, this bill would phase out the use of halon before this oilfield will complete its production.

So my amendment would ensure that production and use exemption if the President finds that the continued production from the North Slope is necessary in the interests of national security.

Alaska State law requires operators to provide automatic fire extinguishing systems. It is our State law that has the requirement that a system be in place, which I think is only reasonable in view of the number of people that are involved here, and the tremendous amount of oil and gas that is produced daily. The only effective system that is available now and in the foreseeable futute is, in fact, the halon system that is there now. So I am hopeful the managers of the bill will accept this amendment.

It is a discretionary amendment and requires a finding of national security interest in order to continue the use of halon beyond the phaseout date in my State, if that is absolutely necessary to protect the people and the facilities that are so essential to continue development of the North Slope oil and gas production.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island [Mr. CHAFEE].

Mr. CHAFEE. Mr. President, this is a good amendment and is acceptable by this side. I commend the Senator from Alaska for this amendment.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Dakota [Mr. BURDICK].

Mr. BURDICK. The amendment is acceptable to us.

Mr. STEVENS. I urge the adoption of the amendment, Mr. President.

The PRESIDING OFFICER. Is there a further debate date? If there be no further debate, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 1428) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I shall send an amendment to the desk shortly, but first I would like to take my place among other Members of this body in recognizing the great contribution made by the managers of the bill, the majority and minority leaders of the Senate, and innumerable staff persons toward passage of this piece of legislation. I have had the privilege of working on this bill with all of these individuals at odd hours and way into the night. Within the Environment and Public Works Committee, on which I am privileged to serve, I wish to recognize the distinguished leadership of the chairman, who is present on the floor today, and the ranking member, Mr. CHAFEE, who has given us brilliant leadership, I think on both sides of the aisle.

Mr. President, I also will take this occasion to express my appreciation to Ms. Claudia McMurray, on my staff, who has worked tirelessly on this legislation from its very inception, and has given valuable counsel, not only to this Senator but to many others, and has worked very harmoniously with staff on both sides.

The PRESIDING OFFICER. The Chair reminds the Senator from Virginia, there is a pending amendment.

Without objection, the amendment is set aside.

AMENDMENT NO. 1429 TO AMENDMENT NO. 1293

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for himself, Mr. NUNN, Mr. EXON, and Mr. BREAUX, proposes an amendment numbered 1429 to amendment No. 1293.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add a new subpart (f) to section 173 of the Act (as amended by the Mitchell-Dole compromise):

(f) The permitting authority of a State or political subdivision shall allow a source to offset by alternative or innovative means emission increases from rocket engine and motor firing, and cleaning related to such firing, at an existing or modified major source that tests rocket engines or motors under the following conditions:

(1) any modification proposed is solely for the purpose of expanding the testing of rocket engines or motors at an existing source that is currently permitted to test such engines;

(2) the source demonstrates to the satisfaction of the permitting authority of the State or political subdivision that it has used all reasonable means to obtain offsets, as beyond permitted levels, that all available offsets are being used, and that sufficient offsets are not available to the source;

(3) the source has obtained a finding from the Department of Defense, Department of Transportation, National Aeronautics and Space Administration or other appropriate federal agency, that the testing of rocket motors or engines at the facility is required for a program essential to the national interest; and

(4) the source will comply with an alternative measure, imposed by the permitting authority, designed to offset any emission increases beyond permitted levels not directly offset by the source. In lieu of imposing any alternative offset measures, the permitting authority may impose an emissions fee, which shall be an amount no greater than 1.5 times the average cost of stationary source control measures adopted in that area during the previous three years. The permitting authority shall utilize the fees in a manner that maximizes the emissions reductions in that area.

Mr. WARNER. Mr. President, I would like to have the record reflect that the distinguished Senator from Nebraska [Mr. EXON], the distinguished Senator from Georgia [Mr. NUNN], and the distinguished Senator from Louisiana [Mr. BREAUX] are cosponsors of the amendment.

The PRESIDING OFFICER. Without objection the record will reflect those names added as cosponsors.

Mr. WARNER. Mr. President, I am today offering an amendment dealing with the testing of rocket engines and motors. Although the amendment has been a moving target, I believe it has been cleared by the managers on both sides, and is supported by the administration.

I think at this point I would ask the managers to indicate to the Senator from Virginia whether the amendment is indeed cleared on both sides.

The PRESIDING OFFICER. The Senator from Rhode Island [Mr. CHAFEE].

Mr. CHAFEE. Yes, the Senator from Virginia is quite correct, this amendment has been cleared on this side. It is an amendment that deals with the testing of rocket engines under certain conditions. The powers in this amendment will only have to be invoked on—I do not want to say rare occasions, but it is certainly not going to occur constantly. Therefore, we believe it is a good amendment.

The PRESIDING OFFICER. The Senator from North Dakota [Mr. BURDICK].

Mr. BURDICK. Mr. President, I suggest the absence of a quorum so that we may discuss this matter.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, it is quite understandable to the Senator from Virginia that the majority side still has to check with one Senator. While that is being done, I will proceed to state my reasons for adoption of this amendment and then, if we have not received word from that Senator, I shall, as a courtesy to both sides, reinstitute the quorum call.

Mr. President, my amendment will ensure the continued testing of rocket engines and motors, an activity of paramount importance to our national defense. These rocket engines and motors will propel space launch vehicles and missiles which, in turn, support vital civilian and military missions. Specifically, these testing activities support such space and defense programs as the space shuttle, space station, Titan, Delta, and Atlas launch vehicles, as well as the small ICBM, Trident, and Peacekeeper missiles. In addition, overhead reconnaissance for intelligence purposes is in many ways dependent on our ability to test rocket engines and motors for launches and, again, to perform that testing within the continental limits of the United States.

The pending revision to the Clean Air Act, if enacted in its current form, could have an impact on these programs and, thus, have an impact on America's abililty to remain competitive in the space and defense fields. Under the proposed bill now before the Senate, testing facilities could well, and I underline "could well," be required to move from one State to another—depending on each State's level of air quality—or to move offshore or close completely.

Mr. President, I am confident that my colleagues in the Senate will consider such a result—that is, of moving offshore or closing down—to be contrary to the interest of the Nation.

Further, I think my colleagues would find it undesirable for one State to be pitted against another in determining which State, based on air quality, might be able to accept this type of testing activity.

Mr. President, for these reasons, I am confident that my colleagues will understand this amendment and consider it in the interest of the United States.

The States that have accepted the responsibility of supporting rocket engine and motor testing facilities have also accepted the benefits of the employment opportunities that these facilities bring, as well as national recognition attached to this activity. These types of engines and motors have been on the very forefront of America's technology. We must continue to move those perimeters forward if we are to stay competitive in the world. I am hopeful particularly that, at some point, we will also become more competitive in civilian launching of certain satellite systems.

Those States, therefore, that have provided support for and accepted the benefit of this activity for many years should not be allowed, in my judgment, to close testing facilities or send them offshore without making at least some attempt to find alternative measures that would allow these facilities to continue to operate.

Mr. President, my amendment is a very simple one. It would require that private and public companies operating rocket engine and motor testing facilities find offsetting reductions in emissions equal to the amount of the limited, short-term additional emissions associated with the installation of new or modified equipment on these facilities. I should point out to my colleagues that this amendment requires that testing facilities be subjected to the same offset requirement as all other major stationary sources must meet.

Under the amendment, State and local permitting authorities would be authorized to find offsets for emissions increases through alternative means only, and I repeat, only if the following criteria are met:

First, any modification proposed is for the purpose of expanding testing facilities;

Second, the source is unable to obtain offsets after all reasonable efforts have been used to obtain them;

Third, the source has obtained a finding from the appropriate Federal agency or department that testing at the facility is required for a program essential to our national interest; and

Lastly, the source has complied with an alternative measure designed to provide offsetting emissions reductions, imposed by the permitting authority of the State or local government.

Mr. President, I would like to address a point that may be of concern to some of my colleagues. Rocket engine and motor testing does not contribute in a significant way to current emissions levels. Testing of these sources is not a continuous process. It is quite sporadic. Generally, tests only last several seconds, with one or two tests per day per site being performed at fewer than 20 sites nationally.

Therefore, Mr. President, this is an extremely fair solution, I believe, to a most difficult and pressing problem. Clearly, rocket engine and motor testing must continue for our own national interest. And, just as clearly, we must take all necessary steps to improve this Nation's air quality. Consequently, this amendment seeks to strike a reasonable balance between those important goals by allowing local air quality authorities flexibility in fashioning alternative emissions controls.

I urge my colleagues to support this amendment, and I thank both managers for their cooperation for a number of days during which this amendment has been worked and reworked to try and meet the legitimate concerns of those Senators primarily from the States in which the testing is now being undertaken.

Mr. NUNN. Mr. President, I am pleased to cosponsor the amendment of my friend from Virginia, Senator WARNER, the distinguished ranking member of the Armed Services Committee.

He has correctly pointed out that it is essential to the national interest that we maintain, and as necessary expand or modify, our ability to test engines and motors for rockets and missiles. These engines and motors propel the space launch vehicles and missiles which support our country's vital civilian and military communications satellites, space research, and national defense. Proper testing of these engines and motors is essential to ensure launch reliability and safety.

At this time, there is no known control technology for effectively reducing rocket engine and motor emissions. At the same time, offsets for modified or expanded test facilities in nonattainment areas may not be available. Senator WARNER's amendment provides a way out of this potential impasse.

The amendment would ensure that testing requirements and environmental concerns can be met. Under appropriate safeguards, testing could proceed, and the safeguards also provide the flexibility and incentives for private industry and government officials to develop control technology or alternative offsets to preserve air quality.

State and local permitting authorities would be authorized to allow a source to offset by alternative or innovative means emissions increases from expanded testing, but only if the testing source demonstrates that sufficient direct offsets cannot reasonably be obtained and that the testing activity is essential to the national interest. The possible alternative offset means include emissions fees, which in turn shall be utilized for maximizing air quality in the affected area. These safeguards protect the public interest

and the rights and responsibilities of the permitting authorities.

I applaud Senator WARNER for this innovative resolution of an important issue. I thank the Environment Committee and the Senators from the affected States for their cooperation. Finally, I urge my colleagues to support this amendment.

Mr. DOLE. Mr. President, I am pleased to support the amendment offered by the distinguished ranking Republican on the Senate Armed Services Committee, Senator WARNER.

This amendment will ensure that the provisions of the Clean Air Act will not restrict the vital activities associated with many national security programs that rely on the continued testing of rocket engines and motors.

It does so, however, without attempting to circumvent emissions reductions. The amendment requires that launch and test facilities be subject to the same offset requirements as all other major stationary sources.

My colleague from Virginia points out that rocket and motor testing do not contribute in a significant way to current emissions levels. Nevertheless, the provisions of this amendment do not exempt these rocket launch and test facilities.

Instead, this amendment recognizes that national defense and clean air are high priorities and it manages to protect and promote both—to the benefit of U.S. national interest.

Mr. CHAFEE. Recognizing that the other side may still have problems, I just want to say on this side it has been cleared. This is a good amendment. I extend thanks to the distinguished Senator from Virginia for his thoughtfulness in bringing forth this amendment because I think it is important to our national security.

Mr. BURDICK. Mr. President, there is no objection from this side.

The PRESIDING OFFICER. Is there additional debate?

Mr. WARNER. Mr. President, I thank the managers again for their cooperation. My good friend, Senator CHAFEE, mentioned national security. If I may say, I think it is broader. It is in the national interest, security well as civilian. I am hopeful America can become more competitive in certain backup systems that are desperately needed in civilian areas. So I thank the managers of the bill.

I thank the Chair.

Mr. CHAFEE. Mr. President, I thank the Senator from Virginia for amplifying the scope. I indicated it was defense. He is quite right; it goes beyond that. It helps our international competitive position in this field that, hopefully, is going to be increasingly used as a market for American technology.

Mr. WARNER. Mr. President, I would like the record to reflect the appreciation of the Senator from Virginia to the distinguished chairman of the Environment and Public Works Committee, Mr. BURDICK. It is a privilege to serve on that committee.

Mr. INOUYE. Will the distinguished managers of the bill, the Senator from Montana and the Senator from Rhode Island, confirm for this Senator the intent of the new source permitting procedure under the substitute bill to end the existing confusion and inefficient administration under the Clean Air Act. This Senator has in mind a specific situation where the current law has resulted in a costly administrative standoff between a State and the U.S. Environmental Protection Agency. It is this Senator's understanding that the substitute bill would preclude such an administrative loggerhead through a simplified and expedited procedure for approval of State implementation plans [SIP], permitting programs, and individual permit reviews.

The current Clean Air Act created a framework for attaining and maintaining national air quality standards. The legislation relies on the States to administer and enforce the law. It provides that each State has the primary responsibility for assuring air quality in its jurisdiction. Each State has the responsibility of promulgating a State implementation plan to carry out the legislation. Under current law, EPA must approve a SIP when it determines that the plan was adopted after proper notice and hearing and provides sufficient mechanisms by which air quality requirements can be attained. The State of Hawaii established its SIP under this procedure.

Each SIP must contain a permit program to regulate the modification, construction, and operation of any major stationary source. In regions already meeting national air quality standards, no major emitting facility may be constructed without a "prevention of significant deterioration of air quality" [PSD] permit. A major emitting facility must incorporate the best available control technology for each regulated pollutant. This provision enables the permitting authority to determine the maximum achievable reduction in emissions taking into account energy, environmental, and economic considerations. And the permitting authority can then impose such limits on the proposed facility.

In 1978, EPA published notice in the Federal Register that Hawaii's SIP did not include a permit program for prevention of significant deterioration [PSD] of air quality. Under those circumstances the act mandates that EPA promulgate a Federal permitting program. Accordingly, to correct this SIP deficiency, EPA incorporated the Federal rules into the Hawaii SIP. As envisioned by the Clean Air Act, EPA urged the State to explicitly adopt State PSD rules in the SIP to supplant the Federal rules and Federal administration of the PSD permit program in Hawaii. To this date this worthwhile objective has not yet been achieved.

In response to EPA's notice, Hawaii's Department of Health began to draft a PSD permit program. As an interim measure, EPA in November 1983 partially delegated authority to the Hawaii Department of Health for the implementation and enforcement of a PSD program until the State finalized its regulations. The interim procedure provided for concurrent sharing of permitting authority by the State of Hawaii Department of Health and by the Federal EPA.

After public hearings and advisory committee review, the Governor of Hawaii approved prevention of significant deterioration regulations for the State. On April 28, 1986, Hawaii's Director of Health submitted the regulations to EPA's Region IX Administrator in San Francisco, CA, for approval and incorporation into the Hawaii State implementation program. The transmittal letter stated that approval of the prosposed revision would have the beneficial effect of allowing the State of Hawaii's Department of Health to issue permits without duplicative submissions for both State and EPA review in each instance.

On October 23, 1987, EPA's Region IX informed Hawaii's Department of Health that the State's proposed PSD rules did not comply with Federal requirements published in 1985 for stack heights nor with revised requirements for suspended particulates published in July 1, 1987. With regard to the stack height requirements, the letter noted that EPA intended to publish a notice to impose uniform rules which would cure Hawaii's SIP omission. But since the notice had not yet been approved for publication, Hawaii's proposed rules were deficient and EPA therefore returned the submission without approval.

However, rather than have the State and Hawaii revise its proposed regulations, EPA's Region IX urged that Hawaii continue to administer the PSD permit program under partial delegation. The State of Hawaii felt that another revision would be time consuming and costly; in a letter dated November 4, 1987, the State agreed to this arrangement.

It is important to note that under this arrangement, EPA retains final responsibility for permit reviews. To secure a permit, a company must explain its request to EPA as well as the State of Hawaii. The Clean Air Act, however, envisioned the States ultimately having primary responsibility.

A division of responsibilities between EPA and the State of Hawaii would work better if both employed the same judgment in applying the Clean Air Act to specific situations. This has

been difficult in Hawaii due to the island conditions pertinent to the emitting source. EPA and the State of Hawaii have had judgment perspectives which are not always consistent.

The permitting system can cause difficulty. In February 1987 a small electric utility applied for a PSD permit for two generation units to meet growing consumer demand. For a variety of reasons, the utility did not receive the permit until nearly 3 years later. According to the utility, the delay increased the threat of power outages to utility customers.

The substitute bill establishes an operating permit system for better enforcement of State implementation plan requirements. This system is streamlined to avoid the problems I have mentioned. Furthermore, as this Senator understands it, the bill managers intend the operating permit system to allow the States and EPA to take into account special conditions that may affect any particular source. This is a laudable recognition that the new operating permit system must be flexible enough to factor in local conditions in evaluating an application.

Chief responsibility for operating permits rests with the States, and EPA must approve State implementation plans unless the plans are in variance with the Clean Air Act. Furthermore, EPA should assist the States in overcoming obstacles that may stand in the way of a State's management of its own permit program. After a State implementation plan and permit plan are established, EPA will have explicit authority to review permits proposed by the States. To avoid an administrative logjam, the bill gives EPA 90 days to object. It EPA fails to object within that period and no other participant objects, the State is free to issue the permit. Since EPA can veto any permit to which it objects as being inconsistent with the requirements of the act, it should not be reluctant to transfer permit issuance authority to the States.

Is this understanding correct? Is this Senator accurate that the new permitting procedure in the substitute bill seeks to preclude the administrative deadlock regarding new source permitting that I have cited from arising with respect to operating permits and is this Senator also correct that the permitting system will take into account local conditions?

Mr. BAUCUS. Mr. President, the senior Seantor from Hawaii is correct in his understanding that the substituta bill will preclude the administrative gridlock and turf fight. EPA must work with the States to facilitate each State's administration of its own permit program. The new operating permit system would also allow flexibility for special conditions, such as conditions which may be unique to sources in the Senator's State to be taken into account. However, I do want to note that the operating permit program contained in title V of the substitute would not affect permitting under the nonattainment or prevention of significant deterioration requirements for new or modified major sources. Each State must continue to meeet the requirements or part C and D of the act which are not affected by the amendment.

Mr. CHAFEE. This Senator is in accord with the understanding of the senior Senator from Hawaii.

Mr. INOUYE. This Senator thanks the distinguished managers of the bill for their clarification and for confirmation of the bill's intent.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia.

The amendment (No. 1429) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1430 TO AMENDMENT NO. 1293

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] proposes an amendment numbered 1430 to amendment No. 1293.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

URBAN BUSES

On page 143, at the last line of the table, strike:

"Heavy duty buses.....1991 and after..... 0.1 gbh."

and insert in lieu thereof:

"Heavy duty buses.....1992 and after..... 0.1 gbh.".

On page 218, line 13, insert "(1)" after "(e)".

On page 218, line 20, strike "1994" and insert in lieu thereof "1997".

On page 218, line 26, strike "paragraph" and insert in lieu thereof "subsection".

On page 219, line 1, strike "1994" and insert in lieu thereof "1997".

On page 219, line 1, after "as follows" insert the following: "(A) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of one million five hundred thousand persons or more,".

On page 219, line 7, after "later model years" insert the following: "; and (B) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of less than one million five hundred thousand persons but more than one million persons, 10 per centum of new urban buses purchased or placed into service in model year 1993; 25 per centum of new urban buses purchased or placed into service in model year 1995; 60 per centum of new urban buses purchased or placed into service in 1996; and 100 per centum of new urban buses purchased or placed into service in 1997 and later model years".

On page 219, line 9, strike "paragraph" and insert in lieu thereof "subsection".

On page 219, after line 10, insert the following:

"(2) Not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations requiring that, beginning January 1, 1992, any urban bus operating in any area specified in paragraph (1) shall, at the time of any major engine overhaul, be retrofitted so as to comply with the emissions standards under section 202(a) applicable for model years 1992 and after to new urban buses.".

Mr. DURENBERGER. Mr. President, the amendment which is before us now modifies the provisions of the bill relating to urban buses. The bill currently has two requirements for urban transit buses. One requirement imposes a new particulate standard in 1991, and the second provision requires new urban buses to begin using alternative fuels in 1994.

The purpose of this amendment is to modestly delay each of these requirements so that bus manufacturers and transit companies have more time to meet these new standards. The tailpipe particulate standard is delayed until model year 1992 from 1991, and the alternative fuel requirement for medium-sized cities, those between 1 million and 1.5 million persons, will have until 1997 to completely phase in the alternative fuels requirement.

A third provision in this bill requires that buses, when retrofitted, meet the new particulate standards. This can be done using particulate trap technology which is just now coming to the market.

Diesel particulate emissions from buses and trucks are estimated to cause 800 cases of cancer per year. Most of the cases are attributable to urban buses, and this provision will assure that each of the 7,000 buses overhauled each year will be upgraded to dramatically reduce these emissions.

The provision was suggested to us by the State of California, and the so-called California-New York alternative buses program.

Mr. President, when we say dirty air, to most Americans, I bet most people think of that as soot that comes from a truck or bus that starts up or shifts gears right when we happen to get behind the bus. The provisions that I have outlined solve that problem. By the end of the decade we will see the end of those black clouds on all of our city streets.

Mr. President, I urge adoption of this amendment.

Mr. CHAFEE. Mr. President, just a couple of questions to the sponsor of the amendment. I notice that it is for a fairly restricted group of cities. In other words, as I read the amendment, it is for those cities that are between 1 million and 1.5 million. Is the Senator covering many cities when he limits it to those metropolitan areas? It seems to me there must be a lot of cities that are a little less than 1 million or a lot of cities that are just over 1.5 million. I was curious why he chose that group of cities.

Mr. DURENBERGER. Mr. President, the provision in the bill begins at 1 million. It does not apply to cities under 1 million. And the amendment provides an exception only for what we call medium-sized cities, those cities between 1 million and 1.5 million. All others, the larger cities over a million and a half, will comply with the requirements in the original bill.

Mr. CHAFEE. Does the original bill require a trap on those buses?

Mr. DURENBERGER. Mr. President, the original bill requires alternative fuels by the deadlines set up in the law, originally 1991, now 1992. That is an alternative fuel requirement in the original bill.

Mr. CHAFEE. I guess we could safely say then for all cities over 1 million, they are either covered by this provision which is the trap to capture the diesel emissions or they go into the alternative fuels program; that is for those over 1.5 million.

Mr. DURENBERGER. Yes. Mr. President, it is safe to say all cities over 1 million will have to comply with the alternative fuel requirement. There is only introduced here an exception for a brief period of time for the medium-sized cities between 1 million and 1.5 million but by 1997 they have to comply with the alternative fuels requirement as well.

Mr. CHAFEE. Mr. President, the amendment is acceptable on this side. I want to commend the Senator from Minnesota. He has given a lot of thought to these matters, particularly the urban mass transit problems. This is further evidence of his thoughtfulness.

Mr. BURDICK. Mr. President, there is no objection to the amendment on this side.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (No. 1430) was agreed to.

Mr. DURENBERGER. Mr. President, I move to consider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I was pleased to work closely with the distinguished Senator from Minnesota [Mr. DURENBERGER] on the amendment he offered pertaining to urban buses.

The Senator from Minnesota was well aware of my concerns that the urban bus provision coming out of committee could have a disastrous effect on the marketing of buses by the TMC bus company in Roswell, NM.

TMC almost exclusively manufactures diesel buses and it constructs about 33 percent of all buses made in this country. The combination of a phasein of clean fuel buses in urban areas over 1 million people starting in 1991, along with the imposition of a 0.1 particulate standard in model year 1991, guaranteed that TMC would not be selling any buses for several years.

The amendment offered by Senator DURENBERGER will help the situation. His amendment delays imposition of the 0.1 standard until the 1992 model year. In addition, it contains a different phasein schedule for cities between 1 million and 1.5 million people—phasing in the clean fuel requirement between 1994 and 1997.

Mr. President, this amendment does not deal with all of TMC's problems, but it is significantly better than what was contained in the committee bill. I thank the Senator for working with me on this amendment, and I look forward to continuing a dialog with him as this legislation moves forward.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

Mr. COCHRAN. Mr. President, will the Senator withhold the request for the absence of a quorum?

Mr. DURENBERGER. Yes.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the quorum call be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, I thank the Chair.

Mr. President, I would like to ask the managers of the bill, if no one is seeking to offer an amendment at this time, if they have any objection to my seeking unanimous consent to proceed as if in morning business for a minute or two.

Mr. CHAFEE. Mr. President, that is perfectly suitable to this side. Frankly, just before the Senator starts, if I could make a public plea to anybody who is listening who has an amendment, either one that will be accepted or one that will not be accepted, now is the time to bring those amendments over, that amendment, or any others; either debate it, or if the managers agree to have it accepted so we can dispense with some matters that otherwise would delay us until tomorrow. How much time would he like?

Mr. COCHRAN. Two minutes.

Mr. CHAFEE. Fine.

Mr. BURDICK. We have no objection.

The PRESIDING OFFICER. Without objection, the pending matter will be temporarily set aside.

The Chair recognizes the Senator from Mississippi [Mr. COCHRAN].

Mr. COCHRAN. I thank the managers of the bill very much.

ABUSES UNDER THE COPYRIGHT DOCTRINE

Mr. COCHRAN. Mr. President, a recent article in a publication entitled "News, Inc." confirms that legislation is still needed to prevent abuses under the copyright doctrine of work made for hire.

I introduced legislation several years ago to redefine and give effect to the rights that freelance writers, photographers, artists, and graphic artists have in the works they create as freelance artists.

A doctrine has developed under the 1976 Copyright Act that permits publishers to cut off the rights that creators have in their works of art by requiring them to sign away those rights through language on the back of a check, providing that by endorsing the check the payee waives any rights under the copyright law to the work of art for which the check is compensation.

The effect is that when a freelance artist tries to sell a photograph to a newspaper or an article to a magazine he is often confronted with an ultimatum, in effect. If he wants to get paid, he must sign away all his rights in that work of art under the Copyright Act of 1976, legislation which was written to protect the rights of artists and other creators of works of art. This part of the law needs to be corrected and addressed by the Senate.

The Judiciary Committee held hearings last year that were very helpful and that illustrated that there is a hiatus in the law that needs to be dealt with. We hope that Senators will urge the committee to report out a remedy, if not the bill I offered several years ago, then some other legislation

to ensure that the effect of the copyright law is to protect artists' rights and creators' rights, rather than to provide an opportunity for publishers to cut off those rights as originally protected in the 1976 Copyright Act.

A recent article in News Inc., confirms that legislation is needed to prevent abuses under the copyright doctrine of "work made for hire." In an article entitled "Possession Is Still Nine-Tenths of the Law," author Sheryl Fragin discusses the impact on the newpaper industry of the recent Supreme Court decision in Community for Creative Non-Violence versus Reid. While the Court's ruling makes it more difficult for newspaper publishers to argue that they own the copyrights in freelancers' work because the freelancers are newspaper employees, the writer concludes that in practice freelancers still find it difficult to protect and enforce their rights. One example of this is the contractual practice of some publishers to require freelancers to sign work-for-hire agreements stamped on the backs of checks.

I introduced legislation last year to bar these practices and to give creators a more meaningful opportunity to benefit from the copyright protection Congress intended in the 1976 Copyright Act. The Fragin article describes difficulties that creators encounter when publishers either assume they own all copyright rights without buying them from authors or force authors to sign after-the-fact work-for-hire agreements vesting all rights in the publisher. While my bill, S. 1253, would not eliminate all difficulties, it would forbid some of the egregious practices that deprive authors of their rights without negotiation or fair compensation.

In one respect, however, the News Inc. article misses the point of my bill. In suggesting that S. 1253 has "no teeth," the author fails to understand that, rather than seeking to enlarge existing remedies, my bill seeks to restore the ability of creators to claim rights that Congress thought it guaranteed in the 1976 law. My purpose is not to supplement the copyright law with greater civil penalties, but to protect the rights of authors and artists of all types and to ensure that all of us continue to enjoy the fruits of their creativity.

Mr. President, I ask unanimous consent to have the News Inc. article printed in the RECORD, and I urge all those wishing to preserve American creative leadership to read it and to join me in seeking prompt enactment of S. 1253.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the News Inc., January 1990]

WORK-FOR-HIRE RULING—POSSESSION IS STILL NINE-TENTHS OF THE LAW

(By Sheryl Fragin)

Ever since June, when the Supreme Court refused to grant an advocacy group the copyright to an artwork it had commissioned, lawyers have been scrambling to assess how the ruling will shake out for publishers. The uncomfortable truth: Newspapers regularly violate copyright law—and probably can continue to do so with impunity.

Almost every newspaper, large or small, depends upon outside writers and photographers, whether for high school football copy or car crash photos. Under the 1976 copyright law, those freelancers hold the rights to their own work unless there is a written work-for-hire contract reassigning rights. Typically, editors don't bother with such paperwork—which is fine—while assuming they can reuse the work however they like—which is not fine.

What the Supreme Court did was make it tougher for them to skirt the law with arguments that freelancers are de facto employees whose work is owned, copyright and all, by the newspaper. It's a rationale that some lower courts have swallowed—and it wasn't entirely dismissed in June. In fact, the Supreme Court specifically refused to limit the definition of employee to formal, salaried workers. Instead, it ticked off a 12-point laundry list of qualifications. But the list, including such minutiae as who supplies the freelancer's "instrumentalities and tools," is sufficiently tangled and obscure to make it nearly impossible for publishers to satisfy.

"The way I read the decision, and the way most copyright attorneys see it, is that under those factors, most freelancers will not be employees," says Charles Ossola, a Washington, D.C., copyright lawyer who represents the Copyright Justice Coalition, an amalgam of over 50 freelancers' groups.

Nevertheless, some papers still blithely assume all rights, when no such prerogative exists. "In the main, freelance pieces are ours to syndicate," says Ruth Walker, assistant managing editor at the Christian Science Monitor. The Monitor doesn't offer picture or story contracts "It's a little more informal than that"—but routinely puts both on the Los Angeles Times/Washington Post wire. "What you do every time you sign a check from them" says freelancer Chris Norton, a regular contributor from El Salvador, "is endorse their stamp on the back saying that they have all rights." The practice, according to Bill Patry, policy planning advisor at the U.S. copyright office, is an abuse of the law.

But—and this is a big but—neither Norton nor any of their other freelancers are ever likely to complain, no less sue. With first-run story payment at $150 or less, many writers say they won't risk alienating their clients over some nominal reprint fee. In fact, they probably won't even know that their piece has been reprinted.

Sally Chew, publications director for the Committee to Protect Journalists, has done several op-eds for the L.A. Times in the past year, all of which may have been picked up over the Times wire. "I only know of one that was used," she says, "in the Wichita Eagle-Beacon—but that's because someone clipped it for me." And Chew, like others interviewed, has conflicting feelings about the practice. "From my perspective, sure I'd like to get paid, but I also like the idea of getting published in obscure parts of the country."

Even if a writer or photographer were to sue for copyright infringement, there are no prescribed fines involved unless the work has been registered with the copyright office—a highly unlikely prospect, according to the government's Patry. So most freelancers could only collect on whatever damages they could prove. More important, the law specifies that if they haven't registered, they can't recover legal fees (which would generally far outweigh what they win).

Legislation now pending in the Senate might change the status quo a bit, though scarcely raise the stakes. Proposed by Mississippi Republican Thad Cochran, it would define employee literally, and would require papers to sign freelance contracts before work is started, if they hope to reprint it. But, says one industry source, "nobody's bent out of shape about this bill," expecially not editors, who can simply rewrite rather than worry about contracts and reprint rights. The bill also has no teeth. It doesn't propose any civil penalties beyond those in the current law—meaning freelancers will still need to register their work with Washington. "The senator's bill is just to clarify the original intent of the copyright act," says Cochran's legislative assistant, Linda Roach.

The paper that would perhaps be most affected by Cochran's bill is USA Today, which often relies on freelance for its roundups and briefs. "We send a letter out every February to all our freelancers that ask them to give us the rights to their work," says Wanda Lloyd, senior editor for administration. The stories are then available to all of Gannett, free of charge. Not photos, though, according to a terse letter from USA Today managing editor Richard Curtis to Photo District News in 1988. It seems the freelancer letter had been "mistakenly" mailed to photographers—a foulup that was quickly corrected because USA Today and Gannett "have always treated freelance photographers fairly and equitably," Curtis wrote, never asking them to do work for hire. Whatever the implications for the paper's freelance writers, Cochran's bill would make the issue moot; blanket contracts are unacceptable.

Freelancers, of course, would love to see the whole concept tossed. "We oppose work for hire on more than just practical grounds; we oppose it on moral grounds," says Richard Weisgrau, executive director of the American Society of Magazine Photographers. "We're the guys who get shot in the trenches; let's at least get the credit line."

The ethics of the arrangement are actually getting a good deal of play these days, as Congress shows growing interest in "moral rights." A French concept, it would give authors—freelance or staff—the inalienable right to approve any word change or references to their work. "We're much more concerned about the application of moral rights than Cochran's bill," says ANPA lawyer René Milam. Though nothing is pending at the moment, according to Milam, Senator Dennis DeConcini (D-Arizona) held hearings on the subject in September and "wants to get it out on the table." Considering that Cochran's infinitely tamer bill has been shot down every year since 1982—not to mention that DeConcini is somewhat preoccupied with an ethics probe into his relationship with Lincoln Savings & Loan—moral rights proponents faces an uphill battle.

For some, however, the morality of the copyright issues is plain and simple. Says

National Writers Union president Alec Dubro: "You might call it copyright infringement; I call it theft. If I used your car without permission, you'd call the police."

CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER (Mr. LIEBERMAN). Who seeks recognition?

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Idaho [Mr. McCLURE].

AMENDMENT NO. 1431 TO AMENDMENT NO. 1293

(Purpose: Comparable controls on Canadian Electricity Imports)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

I ask unanimous consent the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. McCLURE] proposes an amendment numbered 1431 to amendment No. 1293.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 449, after line 19, insert the following new section:

"CERTIFICATION OF EQUIVALENT ACID RAIN CONTROLS

"SEC. 416. (a) IMPORTS OF ELECTRICITY.—Except for imports of electricity pursuant to contracts entered into prior to the effective date of the Clean Air Act Amendments of 1990, after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision, after notice and opportunity for public comment, certifying, in accordance with to subsection (b) that the nation from which such electricity is imported has established and is implementing a national program of emission requirements and controls on existing and new steam-electric utility units on a schedule and in a manner that is at least as stringent as the compliance schedules for and limitations on emissions under this Act and the Clean Air Act for similar utility units in the United States, except for imports of electricity under subsection (c).

"(b) CERTIFICATION OF NATIONAL PROGRAM.—The Administrator shall not cerfify any national program or utility unit under subsection (a) unless it is determined that—

"(1) the nation has adopted legislation or regulations which give the emissions reductions and control schedules for each pollutant the force of law and is implementing such program; and

"(2) the legislation or regulations include performance standards, reporting requirements and enforcement provisions no less stringent than those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(c) CERTIFICATION OF UTILITY FACILITIES.—Unless imports of electricity are from a nation certified under subsection (b), after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision after notice and opportunity for public comment, certifying that—

"(1) the electricity to be imported is exclusively from an identified utility unit that converts nuclear fuel or renewable energy resources to electricity; or

"(2)(A) the utility unit is subject to emissions limitations at least as stringent as those specified under this Act and the Clean Air Act; and

"(B) the utility unit will meet emissions monitoring, inspection and reporting requirements at least as stringent as those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(d) REVOCATION.—At least biennially, the Administrator, in consultation with the Secretary and the Secretary of Energy, shall review each certification made under this section and shall revoke the certification, after notice and opportunity for public comment, unless it is determined that the conditions of this section remain satisfied and for a national program under subsection (b), that the emissions reductions for each pollutant are occurring substantially on schedule in such nation. Revocation shall take effect one hundred eighty days after notice of the revocation has been published.

"(e) SUPPLEMENTARY REPORT.—The reports required by the Administrator pursuant to section (see amendment 1303, adopted March 6) shall include an analysis by the Administrator, in consultation with the Secretary and the Secretary of Energy, of the differences in emission control levels of sulfur dioxide and nitrogen oxides between Canada and the United States. The report shall include a (1) detailed analysis of the actual or projected variable costs and fixed costs associated with United States and Canadian acid rain controls among fossil-fired generation units within interconnected and competitive regions and (2) an examination, with relevant supporting cost data, of the effect of differences in such controls on energy trade.

"(f) As used in this section the term—

"(1) "Administrator" means the Administrator of the Environmental Protection Agency;

"(2) "fossil fuel" means a naturally occurring organic fuel, including coal, crude oil, and natural gas or fuel derived therefrom;

"(3) "import" means to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs or trade laws of the United States:

"(4) "person" means an individual, corporation (including a government corporation), partnership, firm, joint stock company, trust, association, or any other entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof (including any interstate body), or of any foreign government (including any international instrumentality);

"(5) "renewable energy resources" means primary sources of energy that are essentially inexaustible including biomass, geothermal, wind, falling water, and solar radiation; and

"(6) "Secretary" means the Secretary of State.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

The acid rain control provisions in the legislation before us will stipulate increases in imports of electricity.

Mr. CHAFEE. I wonder if I can interrupt with a quick question, Mr. President. This amendment would be subject to the 1-hour time limitation, equally divided, would it not?

The PRESIDING OFFICER. The Senator from Rhode Island is correct.

Mr. CHAFEE. I will be controlling the time on this side in opposition to the amendment.

Mr. McCLURE. The amendment I offer addresses inequities between Canada and the United States regarding the effect of differences in acid rain controls on future imports of electricity. It does so by seeking to achieve comparable atmospheric emission controls in Canada to those in the United States under Clean Air Act amendments currently pending before the Senate.

The amendment does four things: First, the amendment restricts future increases in the importation of electricity generated by fossil fuel-fired electric power plants that are subject to environmental control programs that are not equivalent to the programs provided for by the Clean Air Act, or atmospheric emission controls that are as stringent as the emissions control imposed on similar facilities in the United States under the Clean Air Act.

Second, the amendment establishes procedures by which the EPA Administrator can certify the equivalence of such program or emission limitations. The earlier amendment of Senator McCONNELL provides the information necessary for this certification.

Third, if certification of an equivalent program or emission limitations is not possible, a mechanism is provided for the imports of electricity from non-fossil generation facilities, such as hydroelectric or nuclear facilities, or renewable resource conversion facilities.

And, fourth, the amendment provides for a study of trade and other inequities created by differences between the acid rain controls in the United States and Canada.

This amendment addresses only future imports. The amendment does not affect current imports of electricity, nor does the amendment apply to future imports of electricity from non-fossil fuel-fired generating units, such as hydro or nuclear generation and renewable energy sources.

What we are seeking here, Mr. President, is a matter of future equity in our energy trade regarding fossil fuel derived electricity. From this perspec-

tive I would like to discuss several differences between the United States and Canada with respect to acid rain control, electricity imports and exports and their industrial and trade implications for all Americans.

BACKGROUND

The focus of the debate on the acid rain provisions has centered on the Eastern United States. However, acid rain is a continental problem—not simply a problem for the Northeast region. Yet, substantial regional differences do exist that cannot be taken lightly.

At stake are thousands of jobs, competition between producers of high- and low-sulfur coal, the possible investment of billions of dollars in pollution control equipment; the competitive position of energy-intensive industries in world markets; and additional importation of energy intensive materials, goods and services, as well as natural gas and electric power from Canada.

I have long been a supporter of greater free trade. And one of commodities that the United States imports in significant quantities is many different forms of energy. But, more importantly, where Canada and Mexico are concerned, energy supplies imported into the United States are often accompanied by atmospheric pollution because of differences in pollution control requirements between countries. In other instances, this difference in control requirements is undertaken consciously so as to subsidize energy and other resources intended for export into the United States.

For example, electricity is one of the principal forms of energy which is freely traded by the United States across international boundaries with Canada and Mexico.

U.S. ACID RAIN CONTROLS

The legislation before us establishes a national, market-based approach for the reduction of acid rain precursors in the amount of 10 million tons of sulfur oxides annually from fossil-fueled electricity generation facilities. For this industry, this is a 50-percent reduction for actual 1980 emission levels. In the first phase of reductions under this proposal, intrastate and intrautility emission trading would be allowed. In the second phase, full interstate trading would be allowed. Without question, even under the market-based approach in this legislation, these reductions in acid rain precursors do not lend themselves to painless solutions. Most of the large sources in the United States are coal-fired powerplants located in the East and Midwest. In many areas, such as the Southwest and along our northern border, in States as far apart as New Mexico and North Dakota, relatively new powerplants have already installed scrubbers even though they burn low-sulfur coal. In fact, most of the new powerplants built in the past 10 years across the northern Great Plains are among the cleanest in the world. Often the required pollution equipment has amounted to nearly one-third of the total cost of these new coal-fired powerplants.

CANADA'S APPROACH TO ACID RAIN

Because acid rain is a North American problem, not just our problem, the obvious question is what approach is being taken by Canada to control atmospheric pollution and acid rain precursors. It is clear that, just as regional differences have plagued the development of the acid rain program in the United States, regional differences also exist in Canada. Correction of this disparity between western and eastern Canada would go a long way to demonstrate to Western Americans the resolve of all Canadians to fashion a comprehensive solution to acid rain.

The Western provinces of Canada, including Saskatchewan, Alberta, and British Columbia, are not presently a part of the Canadian acid rain control program. By comparison, the approach being taken by the seven Eastern provinces is to impose a cap on aggregate sulfur oxide emissions. All aspects of the program being undertaken by the seven Eastern provinces is ahead of schedule. Emissions of sulfur oxides have been reduced by 40 percent below 1980 levels, and the flow of sulfur oxides from eastern Canada into the United States has been reduced by one-third.

There are significant differences in approach to Canadian and United States acid rain controls, however. While the cap on acid gases in Eastern Canada calls for a 35-percent reduction, over 80 percent of the reductions required in eastern Canada may be accomplished through retrofits of nonerrous smelter and iron sintering facilities which are economic or produce a positive return on investment. This is because 60 percent of eastern Canada's emissions of sulfur oxides are from nonferrous smelters and about 15 percent from thermal powerplants. By comparison about 70 percent of the U.S. emissions come from thermal powerplants.

But the principal difference is one of Canada's unwillingness to fashion a comparable program to that in the United States, particularly in western Canada where there effectively are no controls. The failure of Canada to impose comparable restrictions to those in the United States simply transfers production of electricity across the border to British Columbia, Alberta, Saskatchewan, New Brunswick, and Nova Scotia, where little or no emissions controls exist, yet emissions occur, and electricity is imported along with toxic emissions and acid rain.

As I will discuss later in my remarks, the bill before us and the administration's acid rain proposals are national in scope. By comparison, Canada's acid rain program does not affect fossil-fueled generation in the Western Canadian provinces of Saskatchewan, Alberta, and British Columbia. In other words, Canada's cap on sulfur-oxide emissions has a major hole in the Western United States.

Yet, under the legislation before us similar generation facilities in the United States will be subjected to the high costs associated with our quest for clean air. And due to the resultant increase in electricity imports, there will be an additional negative trade balance that will continue to grow, approaching $1 billion.

ELECTRICITY IMPORTS

There is a growing dependence in the Northeast United States on imports of electricity from Canada. A 1989 GAO report indicates that there has been an increase in the number of firm power agreements with Canada since 1985, and imports of electricity from Canada are expected to increase 79 percent between 1988 and 2000 from 40 twh to 73 twh.

Imports of electricity from Canada into New England are projected to increase from 13 percent of consumption in 1987 to 15.2 percent in 1995 and 17.8 percent by the year 2000. In order to meet this increased demand, the New Brunswick Electric Power Commission plans 1,100 megawatts of additional coal-fired capacity by 1997, of which 900 megawatts would burn 1 percent sulfur coal without scrubbers and 200 megawatts will be fluidized bed combustion of 6 to 8 percent coal. Likewise, the Nova Scotia Power Corp. plans 900 megawatts of new coal-fired capacity by the year 2000 without scrubbers.

The majority of electricity imports from Canada is generated from hydroelectric facilities, and these hydroelectric facilities are supported by thermal sources: nuclear, coal, oil, and gas. Many of these facilities are located in Western Canada, such as the Boundary Dam and Coronach powerplants in Saskatchewan. And not only do many of these facilities burn low-sulfur coal, but they have not been required to add scrubbers. Admittedly, emissions from these Western Canadian plants make up a small part of the total North American pollution. Nevertheless, many Amercians along the border in such States as North Dakota can see the pollution plume from these plants from miles away.

In the electric sector, over the next 10 years, because of planned additions of 4,000 megawatts of coal-fired capacity, utility atmospheric emissions may actually increase in British Columbia, Alberta, Saskatchewan, New Brunswick, and Nova Scotia. Only 680 megawatts of planned additions are

expected to use clean coal or scrubber technology.

The intention of Canada to seek electricity markets in the United States is supported by British Columbia's announcement of its intention to create an export agency to market electricity in the United States. This agency would serve as a single source to market firm power and energy produced by public or privately owned companies in British Columbia. Among the energy supplies to be marketed by this agency may be coal-generated electricity from Alberta.

British Columbia alone anticipates a total of about 900 megawatts of firm electricity exports to utilities in the Northwestern United States beginning in the mid-1990's. To serve this market British Columbia plans to construct a 400-megawatt hydro unit at an existing plant and a 600-megawatt coal-fired plant dedicated to the export market. Under the current policy direction taken by British Columbia, it is anticipated that this coal-fired plant would be a private sector venture.

This is just one example of the expectation of Canadian utilities to avail themselves of an opportunity to build fossil-fired generation to support electricity sales to the United States. But, importantly, these facilities will be built with little or no emissions controls. The obvious question is, how serious are Canadians about controlling acid rain?

ELECTRICITY EXPORTS

On another front, the November 9, 1989, issue of Energy Daily reports that Ontario Hydro, the large Canadian electric utility, has been buying up to 2,000 megawatts of United States power since last April in an effort to reduce sulfur dioxide emissions in certain regions of Canada due to new tough acid rain controls.

Ironically, most of the power is being generated by the American Electric Power system's high-sulfur coal-fired units in the Midwest and is being wheeled to Canada through Michigan. This situation was not discovered until last summer when Allegheny Power system atmospheric monitors registered unexpectedly high levels of sulfur oxides.

In this instance, the United States must deal with the atmospheric emissions produced in this country that are associated with satisfying Canadian electric demand. Under the pending legislation, all Americans are being asked to subsidize the environmental cleanup of these facilities through a system of allowances. The practical effect is that all Americans will be subsidizing the generation of electricity for Canadian consumption.

Meanwhile, studies are underway regarding an integrated power grid for North America. The obvious question is, is there going to be comparability in acid rain controls, should such a grid be established?

FOSSIL FUEL IMPORTS

While my amendment only deals with electricity imports, acid rain legislation before us also will increase demand for imports of other fossil fuels such as natural gas for electricity generation. As imports rise there will be an accompanying increase in emissions from natural gas extraction, processing, and transportation along U.S. borders. Unless comparable emissions controls are imposed on Canada's and Mexico's production of these fossil fuels to those in the United States, we will be not only importing their fuels but the environmental impacts and atmospheric emissions associated with their production. In addition, our negative trade balance will grow.

DOE also projects that between 1988 and 2000 total U.S. natual gas consumption will increase from 18.1 to 21.0 trillion cubic feet [Tcf]. In part, because of environmental concerns, consumption just for electricity generation is expected to increase from 3.2 to 6.2 Tcf. Natural gas imports will increase from 6 to 12 percent of energy consumption in this country. At the same time, United States natural gas imports from Canada are expected to increase from 1.2 to 1.9 trillion cubic feet—from 6 to 9 percent of consumption.

TRADE IMPLICATIONS

Apparently, while the administration believes that its acid rain proposal will increase utility costs in major industrial areas in the United States, it also believes that trade in energy between the United States and Canada should not be significantly affected. In testimony before the House Subcommittee on Energy and Commerce last October, EPA Assistant Administrator Rosenberg stated that the administration's acid rain proposal is not expected to result in a significant increase in Canadian electricity imports—above future projected levels—of any type, including imports of power generated at Canadian coal-fired powerplants.

The report is frequently cited in the ICF's October 1989 preliminary draft entitled, "Review of U.S. Trade Issues in the Context of the Administration's Acid Rain Proposal." The ICF Trade Report attempts to project the effect of the administration's acid rain proposal on energy intensive industries and electricity, coal, and natural gas trade between the United States and Canada. The ICF Trade Report then goes on to state that "the administration bill will not cause a large increase in Canadian electricity imports."

Well, I disagree. Not only do the projected import levels represent significant increases over current levels, but the legislation before us is going to exacerbate the situation.

Neither the administration nor its consultants, principally a firm called ICF, have supplied historical data to support their statements. Moreover, neither of them have provided a comparison of actual or projected variable costs or fixed costs between Canada or the United States fossil fired generation units within even interconnected and competitive regions, never mind nationally. Similarly, there has not been an examination, with relevant supporting cost data, of the effect of current environmental law on energy trade between the United States and Canada.

By comparison, the 1989 report of the Canadian National Energy Board entitled, "Canadian Energy, Supply, and Demand 1987-2005," describes the present nature of energy trade between the United States and Canada and projections for the future. As I noted earlier, due to the resultant increase in electricity imports, there will be an additional negative trade balance that will continue to grow, approaching $1 billion.

And, as I also noted earlier, neither ICF nor Mr. Rosenberg mention that the Administration's proposal is national in scope, while the Canadian program does not affect fossil-fueled generation in the western Canadian Provinces of Saskatchewan, Alberta, and British Columbia. In other words, the administration ignores the fact that Canada's cap on sulfur oxide emissions has a major hole in the Western United States. This condition will likely drive mining jobs and the generation of uncontrolled emissions of toxics, sulfur oxides, and nitrogen oxides west and north of the border, while Americans purchase Canadian power and receive their emissions.

INDUSTRIAL IMPLICATIONS

Because electricity costs can be a determining factor in the worldwide competitive position of American industry, this disparity in emission controls has major trade implications for energy intensive industries.

We are all familiar with the plight of the American aluminum industry. In 1987, there were 23 aluminum smelters in the United States, employing 17,000 employees. These smelters, located in the Pacific Northwest, the Ohio Valley, North and South Carolina, Texas, and New York, accounted for 6.3 percent of all electricity consumed in industrial applications in the United States. About one-half of these supplies came from coal-burning utilities.

Since 1980 high costs of energy have contributed to the decline in our domestic aluminum industry. The costs of the measure before us may contribute further to this decline. But, more importantly, disparities in environmental controls will contribute even further to this decline.

Some countries have offered low power rates to attract new smelter ca-

pacity. For example, owners of a new smelter in Quebec recently negotiated a 25-year contract with Hydro Quebec that provided 50 to 60 percent discounts in electric power rates for the first 5 years of operations. According to the United States Bureau of Mines, one United States company, Alumax, after canceling plans to build a new smelter in Umatilla, OR bought into the Canadian Becanour smelter, because of lower electric power rates there.

FERTILIZER PLANT IN SASKATCHEWAN

Then there is another matter of very grave concern to me. The Canadian Province of Saskatchewan is committed to expanding its industrial base, but unfortunately has historically ignored commercial realities in attempting to accomplish this political goal. Its newest industrial expansion project, announced on February 7, 1990, is a world-scale nitrogen fertilizer plant. This project, like others before it, will be an ill-conceived, quasi-governmental enterprise that can survive only by reason of subsidies and preferential treatment.

This project, known as Saferco, is of major concern to many of us who wrote the U.S. Trade Representative on March 8. The disparity in the treatment of environmental concerns is a cogent example of the indirect subsidization of industrial development for export markets in the United States. Saskatchewan has approved construction of this plant and has waived a requirement for a Provincial environmental review. By waiving such a review, the plant will be built without the benefit of objective scientific review or public hearings to consider critical environmental issues.

Given Canada's commitment to address environmental issues such as acid rain and ozone depletion, and the historic criticism by Canada of the United States on these issues, I am dismayed by Saskatchewan's decision to essentially ignore sensitive environmental concerns in its haste to construct his huge chemical plant. Its failure to assess the environmental impact of the plant raises concerns not only about this impact, but also about the competitive advantage that the Province appears to be intentionally creating for its venture by "exempting" it from an environmental impact statement.

SUBSIDY STUDY

The negotiators of the recent Canada-United States Free Trade Agreement recognized the potential for distortions in bilateral energy trade and provided three dispute resolution mechanisms applicable to energy trade. In addition, the Free Trade Agreement calls for negotiations during the next 5 to 7 years of more effective rules and discipline concerning the use of government subsidies.

By their vary nature, environmental controls create disparities, for environmental controls and regulations are but one means for the internationalization of environmental costs. And differences in environmental regulation can only be considered subsidies.

Neither the administration nor its consultant, ICF, have undertaken a detailed analysis of the actual or projected variable costs or fixed costs associated with United States and Canadian acid rain controls among fossil-fired generation units within interconnected and competitive regions. Neither has there been an examination, with relevant supporting cost data, of the effect of current environmental law on energy trade between the United States and Canada. It is important that such an analysis be performed.

SUMMARY OF AMENDMENT

Mr. President, the amendment I offer addresses equities between Canada and the United States regarding the effect of differences in acid rain controls on future imports of electricity. It does so by seeking to achieve comparable atmospheric emission controls in Canada to those in the United States under Clean Air Act amendments currently pending before the Senate.

As I stated at the beginning of my remarks, this amendment does four things: First, the amendment provides for a study of the differences between acid rain controls in the United States and Canada and the extent to which those differences create energy and natural resources trade inequities.

Second, the amendment restricts future increases in the importation of electricity generated by fossil-fuelfired electric powerplants that are subject to environmental control programs that are not equivalent to the programs provided for by the Clean Air Act, or atmospheric emission controls that are as stringent as the emission controls imposed on similar facilities in the United States under the Clean Air Act.

Third, the amendment establishes procedures by which the EPA Administrator can certify the equivalence of such program or emission limitations.

And, fourth, if certification of an equivalent program or emission limitations is not possible, a mechanism is provide for the imports of electricity from nonfossil generation facilities, such as hydroelectric or nuclear facilities, or renewable resource conversion facilities.

What we are seeking here, Mr. President, is equitable treatment regarding the generation of electricity, equity that is not assured under the measure before us. My amendment corrects this situation, and I urge its adoption.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who seeks recognition?

The Chair recognizes the Senator from Rhode Island [Mr. CHAFEE].

Mr. CHAFEE. Mr. President, what this amendment does is, it would prohibit the importation of electricity generated from foreign fossil fuel utilities unless the Administrator of EPA is satisfied that the Nation, principally Canada, from which electricity was imported has established and implemented emission controls standards equal to those of the United States.

In other words, it seems to have a nice ring to it that we are cleaning up, we are imposing these requirements on our plants, 2.5 pounds of sulfur dioxide; no more than that can be emitted per million Btu by January 1, 1995. Why should not the others who are sending electricity into our country be subject to the same requirements. If EPA cannot certify that those nations have the same requirements, then that electricity cannot be imported into this country.

That has a nice ring to it, but I would like to point out the following flaws: First of all, this is clearly a violation of the General Agreement on Tariffs and Trade. One can say we do not care about that. That is what the United States is currently trying to get the rest of the nations in the world to agree to in the so-called Uruguay Round. This is extremely important to us. We are a fundamental underpinning of the General Agreement on Tariffs and Trade, the GATT. For us, as one of the prime pushers for GATT, which means so much for the future of our trade, not only in the items that are currently covered by that, we are trying to get those extended, but we are trying to move into new fields such as goods and services, such as financial services, banks, insurance, items that currently are not covered. We are pressing for that through GATT at the Uruguay Round. For us, of all people, to violate GATT would be a great mistake.

Furthermore, in connection with Canada, just in January of last year, a little over a year ago, there went into effect the United States and Canada Free-Trade Agreement, something that this Nation and Canada had worked extremely hard for, which passed this body overwhelmingly. I can remember the vote. If the opposition got more than 10 votes, I would be surprised, maybe 15 votes. The Canadian Free-Trade Agreement overwhelmingly passed.

That free-trade agreement specifically prohibits implementation of new import restrictions. It says it right there.

So this provision by the distinguished senior Senator from Idaho would violate that free-trade agreement.

What does the free-trade agreement do? It has a mechanism. As it says, no disputes will ever arise between us and Canada. Of course not. If we expect disputes to arise, that could possibly be one of them. But that free-trade agreement has a provision for handling these disputes. It has in it a dispute settlement panel. What one does is submit this complaint to the dispute settlement panel for them to come up with a determination. What is the dispute settlement panel? It is a panel that the United States has some members on, and Canada has some members on. They consider the matters that are brought before it and render a decision. That is the way to proceed under this particular amendment, not just violate the agreement flat out.

Also, it seems to me that this amendment raises broader issues than solely GATT or solely the Canadian Free-Trade Agreement. It raises the issue of whether one nation should unilaterally, that is, by itself—in other words, the United States alone—pass a law that imposes restrictions against other countries that we believe do not meet our air pollution control standards.

What happens if a country has standards that are tighter than ours? This has all kinds of possibilities.

First of all, this is a rather vague area. You cannot always tell whose standards are the tighter. Suppose somebody has a less tight standard that goes into effect earlier? That is, a tighter standard or a less stringent standard? It is clear that in many instances the Scandinavian countries have tighter air pollution control standards than we do on their books now. Are we going to say to the Scandinavian countries, it is all right, it is a free market now, it is a free playing field, if Scandinavian countries want to impose import restrictions on U.S. products, that is fine by them.

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. CHAFEE. I wonder if I might finish, then I will be glad to take any questions. I will not be long.

This has all kinds of possibilities. What if the Canadians were to unilaterally decide to impose import restrictions on United States potatoes from Idaho farms because those farmers use fertilizers that the Canadians have decided are harmful? That is an environmental matter. Clearly, fertilizers have to do with the environment.

If that amendment were adopted by the Canadians, they can say, "That is perfectly fair. Look; you adopted an amendment that says if we do not meet your air pollution control standards, you can restrict your importation of our electricity. So what is good for the goose is good for the gander, perfectly fair."

So, Mr. President, if an amendment violates GATT, it is against the Canadian Free-Trade Agreement, both very, very serious matters. I do not think we should slough off the Canadian Free-Trade Agreement. There is more trade between the United States and Canada than between any two nations in the world. People talk about our trade with Japan. That is dwarfed in size by our trade with Canada. So when we are talking about the Canadian Free-Trade Agreement, we are talking about a major factor in United States exports, probably the most important single agreement that we have in connection with our exports to a nation. Overall, of course, the undergirding law that deals with our trade relationships with the rest of the world is through GATT, which would be violated by this amendment.

Third, we get into a very broad trade issue of one nation, in this case the United States, unilaterally imposing restrictions against other countries based on pollution control standards.

Mr. President, I think this amendment could lead to all kinds of difficulties, and it is for those reasons that I oppose it.

Mr. President, at this time I ask unanimous consent to have printed in the RECORD a letter to me from the Canadian Ambassador dated today.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CANADIAN EMBASSY,
Washington, DC, April 2, 1990.

Hon. JOHN H. CHAFEE,
U.S. Senate, Senate Dirksen Office Building, Washington, DC.

DEAR SENATOR CHAFEE: I understand that this afternoon Senator McClure intends to propose an amendment concerning the importation of Canadian electricity to the Clean Air bill currently under consideration by the Senate. This amendment would restrict exports of electricity from Canada to the United States unless the steam-fired power plants generating the electricity meet the same regulatory requirements as those set out in the proposed legislation now before the Senate.

Such an amendment is not required to protect either the American or Canadian environment. The current weighted average sulphur dioxide emission rate for western Canadian coal-fired power plants is approximately 0.96 lbs/MBTUs. The emission rate for new power plants in western Canada will be 0.6 lbs/MBTUs. These rates compare very favourably with comparable requirements in current, and the proposed, clean air legislation. This amendment also runs counter to the open-border objective of the Canada-United States Free Trade Agreement regarding trade in energy. It would also impose an unnecessary barrier to trade by distorting market-based competition in the supply and trade of electricity.

I hope that you will make every effort to prevent passage of the amendment.

Yours sincerely,

D.H. BURNEY,
Ambassador.

Mr. CHAFEE. Mr. President, the Ambassador, in his letter, first of all points out that it is not necessary, that the western plants of Canada are considerably below what we are emitting here, and concludes that this amendment runs counter to the open-border objective in the Canada-United States Free-Trade Agreement regarding trade in energy. That agreement specifically deals with energy, I might say. It would also impose an unnecessary barrier to trade by distorting market-based competition in the supply and trade of electricity.

Mr. CHAFEE. I would point out, Mr. President, that the distinguished junior Senator from Oregon [Mr. PACKWOOD] who is the senior Republican on the Finance Committee, is very much opposed on this amendment and would speak against it if he were here.

Mr. McCLURE. Will the Senator yield for a question?

Mr. CHAFEE. Yes.

Mr. President, how are we going to handle this time? Is it possible for his question to be on his time and my answer to be on my time?

The PRESIDING OFFICER. Senator MCCLURE certainly may be recognized in his own right.

Mr. McCLURE. Mr. President, then I will ask a rhetorical question—I will not ask you to answer it—on my own time.

Mr. President, the Senator from Rhode Island in opposition to the amendment makes some comment about Scandinavian countries having tighter controls than we have on air pollution. The question that I would ask is how much electricity do we propose to import from Scandinavian countries?

Certainly, the Senator makes a point that this is a violation of GATT. I would point out that we already have all kind of restrictions. Certainly, again, a rhetorical question which the Senator may answer on his own time if he wishes, do I understand the Senator is opposed to having pesticide regulations that deal with the importation of food and products from foreign countries? We have that in present law.

Is it suggested that the FDA cannot establish standards upon the production of medicines that are imported into this country from other countries? Certainly not. We have such restrictions at the present time.

Are there suggestions that we have no right to talk about the safety and purity of the food that is imported from other countries? I would hope not. As a matter of fact, we have such restrictions at the present time.

What I am suggesting is that GATT is not in question here. We have a right to protect the air in this country by saying if we are going to require the producers in this country to clean up the air emissions from their plant, we have a right to expect the Canadians to do the same. We are not going to set up a system in this country that says to our producers, sorry you

cannot do it but the fellows right across the line can do it. I do not think that is what we are trying to do here.

For those of our friends who are in the Northern United States, who are concerned about acid rain deposition throughout the Northern United States, they certainly cannot ignore the fact that pollution crosses the line from Canada into the United States. We have an interchange of air across the Northern United States. For us to say you cannot do it in this country but it is fine for them to do it across the line in Canada seems to be ludicrous.

With respect to the Canadian Free Trade Agreement, certainly there is a dispute resolution clause in that treaty. But without a policy on our side, there is no dispute to resolve. Unless we pass this bill we have no standing to say anything to them about the pollution from their electricity-producing plants in Canada.

I am trying to create a mechanism by which we can at least raise a question with them. And if, indeed, it goes through the dispute resolution process, then indeed this provision might be struck down. But you cannot even raise the question unless we have a provision in our statute or in our regulation.

I hope that, not only in a position of fairness for our own industries but in terms of the clarity of the air, the effectiveness of our policy, we do not just transfer the pollution to our country from Canada and say, what you do is fine to us, because certainly it is not. The whole thrust of this amendment is to say we want to clean up the air and we want to clean up the air as it is affected by generating facilities. We do not want the Canadians, just because we close them down here, to think there is an invitation to them to build on their side of the line and then transport their pollution back across the line to us.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields.

Mr. CHAFEE. Mr. President, I would point out, in connection with the Canadian Free-Trade Agreement, that you do not go to the dispute settlement mechanism by passing a law that says you cannot import electricity from Canada from any plants that do not meet the standards that we have. That is not the way you go to the disputes settlement. Regardless of what the disputes settlement comes up with, it is over and done with when we pass a law here. That is what this bill does.

Maybe the distinguished Senator who is proposing the amendment can show me the disputes settlements language in here.

Mr. McCLURE. Will the Senator yield on my time?

Mr. CHAFEE. Yes.

Mr. McCLURE. I will not take from your time.

Mr. CHAFEE. Fine.

Mr. McCLURE. Certainly the Senator understands that, under the U.S. Constitution, treaties are the supreme law of the land, and we cannot pass a law that is in contravention of the treaty provisions. That is precisely the way you set up a dispute to be settled.

If, as a matter of fact, this were judged to be a violation of the treaty, this provision would fall. I hope that that is not the result, but that is precisely the way you raise a question under that treaty.

Mr. CHAFEE. Mr. President, I would differ from the Senator's view. This is not precisely the way you raise something that goes to the disputes settlement mechanism.

Mr. McCLURE. Will the Senator yield?

Mr. CHAFEE. Could I finish, please?

Mr. McCLURE. Certainly.

Mr. CHAFEE. Under the disputes settlement mechanism all kinds of matters come in. They may come in connection with fish or potatoes or shoes or lumber. Any number of provisions. There is a dispute. "You Canadians, you are subsidizing our timber exports or you are subsidizing the financing of your fishing vessels and therefore the fish that you are sending into this country is coming at a lower price and thus violate the free trade agreement." And under that you go to the disputes settlement mechanism. You do not get to the disputes settlement mechanism by passing a law that says Canada should not be permitted to send any fish into this Nation that is caught in a vessel that is funded under interest free loans from the Canadian Government. That is not the way you proceed to the disputes settlement mechanism.

Mr. McCLURE. Mr. President, on my time, two comments. We are not talking about fish and we are not talking about lumber. We are talking about air pollution. That is what this bill is about. How do we clean up the air over the Eastern United States? Do you clean it up by allowing the Canadians to pollute? That, on its face, is silly.

Second, if the Senator from Rhode Island does not like raising the issue this way, can the Senator tell me how else it would be raised? Upon what grounds or what possible basis would we say to the Canadians, "Clean up your own plants?" That is what this says. It does not say we are going to export our electricity production business to Canada so they can pollute and send it back to this country.

We are trying to clean up the air. I thought that was what this whole bill was about. If the Senator from Rhode Island can tell me another way to raise this issue with them under the treaty or otherwise, I would invite that kind of a response.

Mr. CHAFEE. Mr. President, first of all, I point out to the Senator that the Canadian Free-Trade Agreement is not a treaty. It is not a treaty. It is an agreement. It just did not come to the Senate for approval. It went to both bodies. It was an agreement.

Second, if the Senator has a dispute with Canada over this, the method for this is to go through the disputes settlement process just as I outlined before. We object. We object. That is the way you get there.

Mr. McCLURE. We object to what?

Mr. CHAFEE. The Senator says we object to what. We object to this electricity coming in from a plant that does not meet our standards.

This is not the way to proceed. This is in direct violation of the Canadian Free-Trade Agreement.

Mr. McCLURE. Mr. President, again on my time. The Senator from Rhode Island's opposition fails on the face of it. Saying we object to what you are doing up in your country based upon nothing, that is like kissing your sister. That just simply cannot stand.

The PRESIDING OFFICER. Who yields time? If no one yields time, time will be subtracted equally from both sides.

Who yields time? The Senator from Rhode Island is recognized.

Mr. CHAFEE. Mr. President, I think we better review the bidding on how things get to the dispute settlement process. It is not remotely related to kissing one's sister.

If you have a dispute, a problem, you ask for the formation of a dispute settlement panel. That is the way it works.

The Senator says, how do you get there? Whoever wishes to complain—it could be the government of Idaho. It could be a plant in Idaho that sees their electricity is being undercut by Canadians who are selling at a lower rate. It could be those who find objection to the acid precipitation that is coming into their State. It could be my State. We are on the receiving end, we are downwind—the State of Rhode Island. It is perfectly possible for the State of Rhode Island to do so through either its Governor or through any elected official—through a request from the State legislature, however. There are all kinds of varied ways, some of which I have pointed out.

We do not have to have a law. I am rather astonished at the suggestion that we pass a law as though it is some kind of a Supreme Court. It is not for testing of a law that one goes before the dispute settlement panel. It is to resolve a dispute, not to interpret some law. If a group wishes to go there, go there; request the formation of a panel. But this particular act in

my judgment would override the agreement.

The agreement was something we passed. It was not a treaty, it was passed by both branches of the legislature and here follow on with something that is later and, I think the Senator would agree, thus takes precedence over the Canadian Free-Trade Agreement.

Mr. BENTSEN. Mr. President, the amendment offered by the Senator from Idaho would ban imports of electricity from any country or from any utility that has not adopted emission control laws equal to those being adopted by the Clean Act Act before the Senate today.

Basically, this amendment is aimed at Canada. Canada is the only country that exports electricity to the United States.

Just about 2½ years ago, the United States signed a free-trade agreement [FTA] with Canada. The FTA only took effect in January 1989, so our two countries have barely begun to realize its benefits. But the hope is that, by eliminating all barriers to trade, both countries will gain. Studies done before the FTA was implemented showed that FTA-related economic gains in annual U.S. welfare would range from $1 billion to $3.5 billion.

This amendment clearly violates the FTA. Chapter 9 of the FTA categorizes electricity as a good for the purposes of the FTA. The FTA specifically prohibits either country from restricting imports of energy from the other. If the Senate passes the amendment offered by the Senator from Idaho, it is legislating a violation of the FTA.

This amendment suggests that the United States should discriminate against imports from Canada based on the way those imports are made. I would ask the Senator from Idaho how he would react to a Canadian ban on United States products that are made in a way that does not comply with Canadian environmental standards. Canada has regularly complained about United States acid rain. Should Canada ban United States exports that contribute to this problem? Canada has more generous social welfare programs than ours. Should they be able to ban our exports because our employers pay less? I for one do not believe this is the course that we want the FTA to go.

If what the Senator from Idaho seeks is clean air for Canada as well as the United States, a more fruitful, avenue would be through consulation with Canada, our largest trading partner. The FTA provides us a better forum for those discussions.

Therefore, I urge my colleagues to defeat the amendment.

Mr. MITCHELL. Mr. President, the statement of the Senator will speak for itself. Senator BENTSEN opposes the amendment on many of the grounds previously stated by Senator CHAFEE, including the fact that it would violate the free-trade agreement between the United States and Canada.

I would like to address that subject myself, Mr. President, if I might, briefly.

Mr. President, I voted against the United States-Canada Free-Trade Agreement. There were very few Senators who did so. I was among the small minority and I opposed it for what I felt were good and sufficient reasons. But in its wisdom the Senate approved it. It is now in force and, therefore, those of us involved in United States-Canada matters must do our best to make it work.

This amendment appears to me inconsistent with the free-trade agreement. There is a full chapter in that agreement on energy. It establishes a process for considering export measures and regulatory and other measures. And I think all of us have an obligation to make that treaty work, even those of us who opposed the treaty as I did.

Mr. President, this amendment, while I think it is well intentioned in terms of clean air—which the Senator from Idaho has made clear is his intention—misses the mark in two respects. First off, unlike the United States, in which the principal source of sulfur dioxide emissions is from utilities, in Canada the principal source has been from smelters. So attempting to apply an American program to Canada is not the best way to accomplish the common objective because the source of the problem is different in its principal aspect there than it is here.

Second, Canada has an aggressive acid rain program but it is based on a different approach than ours. In the United States we, in this law and other pollution laws, base our regulatory requirements on emissions, that is on what can be emitted from a source of pollution. In Canada, they have a deposition standard, that is what can or cannot be placed upon the earth, or upon bodies of water. So they have a different source and a different remedy. I think, trying to take our mechanism and, in effect, impose it upon them, is the wrong approach. Just as it would be in reverse.

I must say there is a certain irony in this discussion because in 1980 the United States and Canada entered into a memorandum of understanding in which the two nations committed themselves to negotiate an agreement to reduce the emissions of those materials which cause acid rain. But, in 1981 the United States effectively withdrew from those negotiations.

For 10 years the Canadians have been pressing us to go forward on a program of reaching agreement for mutual reductions and the United States has been unwilling to participate in that. It was not, of course, until President Bush was elected and reversed the position of the previous administration in that regard that discussions have resumed between the United States and Canada. In the interim, Canada has set forth a much more ambitious and aggressive program to deal with pollution emissions than has the United States. As we all know the bill we are about to vote on tomorrow contains for the first time controls on the emissions of the precursors of acid rain. Meanwhile, the Canadians have been doing something about it.

So I think in fairness to our friends and neighbors across the border, they have been pressing for action while the United States has not. They have acted while the United States has not. And what we should be doing is concentrating on our own efforts so that we can match our own rhetoric and Canadian deeds rather than taking actions which violate the agreement with Canada and also, as my distinguished colleague from Rhode Island has pointed out, violate the General Agreement on Tariffs and Trade.

Finally, Mr. President, I would say that the principal source of emissions of sulfur dioxide in this continent is the United States. If we want to do something about the problem, we should concentrate on passing this bill. The most effective way to reduce acid rain in North America is to reduce the emissions in the United States which cause acid rain. It is true there are substantial emissions in Canada but they are far less than those in the United States. And so I think we are better off if we, in effect, clean up our own house and that is the most effective thing we can do to control acid rain, both in the United States and in Canada.

For all of these reasons, and acknowledging the ultimate objective of this amendment is to have clean air in North America, it is my suggestion that the amendment be defeated and that we proceed to pass the bill as the most effective thing we can do.

Mr. President, I wonder if I might ask my colleague from Idaho and the distinguished Republican manager whether or not we could discuss the timing of the vote on this tomorrow? It seems to me we want to provide the maximum convenience for our colleagues, give them the most notice. We all understood we were not going to have any votes today, and I would like to have an agreement.

Does the Senator from Idaho have another amendment that he intends to offer tomorrow or that he may offer tomorrow?

Mr. McCLURE. If the Senator would yield, yes, I do. I think I have reserved

time for that in the morning. On a different subject.

Mr. CHAFEE. If I might ask the majority leader a question, I wonder if we might, if we have it, for each side reserve 5 minutes for debate tomorrow? It will not delay things and at least will bring people up to date about what we are talking about.

Mr. MITCHELL. Does the Senator from Idaho object to that?

Mr. McCLURE. I have no objection to that. I support that request.

Mr. CHAFEE. He may have more time. The proponents may have more time. Probably all we have is 5 minutes.

The PRESIDING OFFICER. The Senator from Idaho has 15 minutes 30 seconds; the Senator from Rhode Island has 8 minutes 51 seconds.

Mr. MITCHELL. Might I inquire further, do I understand there will be another amendment offered and debated today that will require a vote tomorrow?

Mr. CHAFEE. That was the thought. The Senator from Alaska has one. The junior Senator from Alaska I believe is bringing one over to be debated. Yes; we see this one and one more on the horizon for tomorrow.

Mr. MITCHELL. Mr. President, might I then suggest to the distinguished Senator from Idaho and the Senator from Rhode Island, perhaps, what we can do is come in tomorrow and be on the bill at 10, take 15 minutes tomorrow, 7½ minutes to a side for wrapup arguments by the Senator from Idaho and the Senator from Rhode Island, have the vote at 10:15, and then repeat the process immediately thereafter with whatever additional amendments may be offered and then go to the amendment of the Senator from Idaho that may yet to be offered on another subject.

Mr. McCLURE. Mr. President, I ask unanimous consent this colloquy not be charged to either side on the amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. McCLURE. I thank the Chair.

I have no objection to that. I am informed we might want to check with our cloakroom before setting the exact time for the vote, but it sounds reasonable to me, and I hope upon the check we can agree to that.

In that connection, then, if we could at this time at least reserve 15 minutes for the time on the amendment, 7½ minutes on each side to be set by agreement at a later time.

Mr. MITCHELL. I believe that would mean all of the time left for the distinguished Senator from Rhode Island and a portion of the time for the Senator from Idaho, if that is agreeable.

Mr. President, as soon as I have the opportunity to discuss it further with the Republican leaders, following checking with the Republican Senators, I will have an announcement in that regard later, if that is agreeable to the Senator.

Mr. McCLURE. If the Senator will yield, that is certainly agreeable with the Senator. I wonder, Because my understanding was that it was contemplated the other amendment which I will offer tomorrow was to be offered first thing tomorrow morning, if indeed we do finish this debate and vote on this amendment, that I be recognized upon the disposition of this amendment to offer another amendment.

Mr. MITCHELL. Mr. President, I will be pleased to organize it tomorrow in whatever way is most convenient to the Senator from Idaho.

Mr. McCLURE. I thank the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I will take a moment to respond. I do not mean to prolong the debate. Obviously, not everybody is hanging on the debate this afternoon. I hope more people are monitoring floor activity than those present in the Chamber and those not doing either may have the opportunity to review the RECORD.

I am very mindful of the fact that, indeed, we have a free-trade agreement with Canada and that we wish to make that free-trade agreement work. I ultimately voted for that agreement simply upon the basis that you cannot make it work with our neighbors to the north in Canada, we cannot make free trade work anywhere if we are not willing to undertake risk and problems in that regard. I detailed in my statement some of the arguments about why the free-trade agreement should not be a bar to this amendment.

Mr. President, I am not trying to raise the broader issue of competitiveness. I think we, by actions on this floor, have already decided that issue. We are going to clean up the atmosphere of this country regardless of what it does to competitiveness. That is how I read the debate at this time.

While we may give lipservice to the question of competitiveness, our focus at this moment on this legislation is environmental air control rather than competitiveness or jobs.

So I am not trying to raise that issue in the broad sense again. I am trying to look at this issue with the aspects of competitiveness, certainly in the background. But the primary reason I do it is to avoid the inevitable consequences of exporting our electricity capability to our neighbor who will be permitted, under their law, to cause greater pollution than they would if it was done in this country. Where is the sense in that? Where is the sense in trade policy? Where is the sense in competitiveness? But above all, in this bill, where is the sense environmentally in saying we will not let ours but we will let yours? We are going to say, build your plants, build them dirty, export your pollution to us, that is all right; we are making great strides here, we say, with respect to the environmental pollution in our own country but, we are saying, Canada, you are different, go ahead and make it dirty; it is all right with us; go ahead and make it dirty. What kind of environmental policy is that? It just does not make any sense to me.

For those who look at today's market for electricity, look at the figures we placed in the RECORD as to how much they are going to do and they are already planning to do. The utilities in New Brunswick and Nova Scotia are planning the construction of 2,000 megawatts of coal-fired plants in the next 10 years.

New England electricity imports from Canada are expected to increase 73 percent, even before we pass this bill—73 percent under current laws, regulations, and expectations. During the same period, New York and New Jersey electricity imports from Canada are expected to increase 72 percent over the same period of time, and we are saying that does not matter? Increase that percentage of importation into this country and do it with dirty plants; it is OK with us. I had expected different actions from the Environment and Public Works Committee and the managers of the bill when their concern about the environment changed to concern about being nice to Canadians. I want to be nice to Canadians, too, but I want them to act responsibly.

Mr. President, it is not responsible for either them or us to say go ahead and build all the coal-fired plants you want to and make them as dirty as you want to and we will buy your electricity. That, to me, is foolish policy. I hope the position of the managers of the bill, which has been so consistently in favor of cleaning up the environment, should not now be permitted to say go ahead and make it dirty; it is irrelevant to us.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

The Senator from Idaho has 11 minutes 4 seconds remaining. The second Senator from Rhode Island has 8 minutes remaining.

Mr. CHAFEE. I am taking 30 seconds, if I might.

I am curious, has the Senator directed his comments toward Mexico in here? Is he equally discriminatory? Could he just briefly answer that question? He mentions Canada. Has he mentioned Mexico? I do not find it.

Mr. McCLURE. Mr. President, the amendment refers to the imports regardless of where they come from.

The current problem, however, is with respect to Canadian generating plants.

Mr. CHAFEE. I see Canada mentioned in here regarding the report

Mr. President, I reserve the remainder of my 7½ minutes for tomorrow.

Mr. McCLURE. Has the time of the Senator from Rhode Island expired?

The PRESIDING OFFICER. It has.

Mr. McCLURE. How much time does the Senator from Idaho have?

The PRESIDING OFFICER. 11 minutes 4 seconds.

Mr. McCLURE. Of which 7½ minutes will be reserved for tomorrow.

The PRESIDING OFFICER. Assuming there is a unanimous-consent agreement.

Mr. McCLURE. Mr. President, I ask unanimous consent that Senator CONRAD be added as original cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. To further answer the Senator from Rhode Island, the amendment deals only with imports of electricity. It does not deal specifically or solely with Canada. As I said a moment ago, we are not importing any electricity from the Scandinavian countries, to the best of my knowledge, nor does anyone propose we should. I think the primary problem that I did address, as I did in my remarks, is the imports from Canada and the great increase we foresee from that source.

We have had some experience with our friends to the south in Mexico with respect to other air pollution which was exported along with the jobs and came back to our country as the jobs did not. But that is not currently the major problem. As acid deposition is in the main a problem with respect to the northeastern United States, it seems appropriate that most of our concerns should be focused upon that region and the sources of pollution that are deposited in that region.

Mr. McCLURE. Mr. President, I am prepared to yield back the remainder of my time save the 7½ minutes, and I do so.

The PRESIDING OFFICER. Who seeks recognition?

Who yields time?

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. McCLURE. Mr. President, will the Senator reserve that for a moment.

The PRESIDING OFFICER. Does the Senator withhold?

Mr. CHAFEE. Yes.

The PRESIDING OFFICER. The Senator from Rhode Island does withhold.

Mr. McCLURE. I wonder if we might ask if the time in the quorum not be charged against the 7½ minutes remaining on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I ask unanimous consent that regardless of what time this McClure amendment comes up tomorrow, there be 15 minutes equally divided for debate prior to the vote.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. CHAFEE. Mr. President, parliamentary inquiry. Does that take care of any concerns about time running on this McClure amendment in the future?

The PRESIDING OFFICER. There is still 15 minutes remaining, 7½ minutes on each side, and pending any further action by the body, that would be the situation when we return to this matter tomorrow.

Mr. CHAFEE. Mr. President, regardless of what happens today, are we going to have 15 minutes equally divided tomorrow morning prior to the vote on the McClure amendment?

The PRESIDING OFFICER. The Senator is correct. There will be 15 minutes.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KOHL). Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I may yield 5 minutes or whatever time is necessary to the Senator from Alabama, and that the time not be charged against my amendment. I am doing this in order to accommodate my colleague's schedule.

The PRESIDING OFFICER. Hearing no objection, it is so ordered.

Mr. HEFLIN. Mr. President, I thank the distinguished Senator from Alaska for allowing me a few minutes to make a speech on the passage of the overall bill. I realize that he was just beginning on an amendment which I understand will be debated at length. So I do appreciate this. This does accommodate my schedule and I deeply appreciate it.

Mr. President, I rise today in anticipation of the Senate passing the Clean Air Act Amendments of 1989 tomorrow evening. I hope and predict that this bill will pass at that time by an overwhelming majority.

As all of the Members know, we did not arrive at this point in the clean air debates easily. Many members of the Environment and Public Works Committee have labored over a reauthorization of the Clean Air Act for the past decade. And this year in addition to the lengthy floor consideration of this bill—which probably is a record in regards to the lengthy floor consideration of any bill that has been before the Senate, at least during my service, and perhaps maybe even during the entire history of the Senate—the majority leader spent a great deal of time working with various Members and administration officials in order to construct a compromsie which would be filibuster-proof and veto-proof.

I want to congratulate my friend the majority leader, the Senator from Maine, for his leadership with regard to the negotiation of that compromise, and commend both the majority leader and the minority leader for their preservation of that compromise despite tremendous pressures from all sides to change the agreement.

In my opinion, as in theirs, we would not have been able to survive the many obstacles to a bill's passage such as filibusters, an excessive number of amendments, or veto threats had there not been a firm agreement between the Senate leaders and the White House on this legislation, and, I might say also, an agreement with a great number of the environmental Senators.

With respect to the substance of this agreement, I would like to mention five of the provisions in the bill which will, I believe, result in real air quality benefits for all Americans.

No. 1, this bill requires permanent, substantial reductions in emissions believed to cause acid rain, ultimately reducing sulfur dioxide [SO_2] emissions by 10 million tons per year below 1980 levels.

No. 2, this bill requires substantial reductions in tailpipe emissions for cars and light trucks beginning with model year 1994, with an even more stringent round of tailpipe controls mandated if air quality goals are not met in a sufficient number of cities.

No. 3, for the first time, this bill adopts a broad program to require the use of cleaner fuels in America's most polluted cities and in federally owned and centrally fueled fleets.

No. 4, the bill requires the use of Maximum Achievable Control Technology [MACT] to reduce 75 to 90 percent of air toxics emissions in the next 10 years and to limit any remaining risk after the application of this technology.

No. 5, the bill establishes ambitious annual ozone reduction requirements

to guarantee, for the first time, measurable progress toward meeting the ozone standards, bringing the majority of American cities into attainment with ozone standards by the end of the century.

Mr. President, as even these five points illustrate, this bill is a dramatic strengthening of current law. It is not a perfect bill by anyone's estimation. But I believe it is a bill which will pass the Senate, a bill which can hold up in conference with the House, a bill which will be signed by the President and a bill which will ultimately become the law of the land.

It is a bill which will go a long ways toward having cleaner air in America. It will go a long ways towards bringing about better health for all Americans.

I commend all of my colleagues on the Environment and Public Works Committee—Senators BURDICK, CHAFEE, MOYNIHAN, SIMPSON, MITCHELL, DURENBERGER, LAUTENBERG, BREAUX, WARNER, BAUCUS, SYMMS, REID, JEFFORDS, GRAHAM, LIEBERMAN, and HUMPHREY—for their untiring efforts with respect to this bill, and for the fine work of their staffs on this bill.

I would like, again, to commend the majority and the minority leaders, as well as the floor managers, particularly Senators BAUCUS and CHAFEE, for their skill in guiding this bill through the legislative process on the Senate floor.

I would like to again thank all of the staff members who worked so hard on this bill, and particularly Elizabeth Gardner, of my staff, whose intelligence, hard work, and vision has been superb in this endeavor.

I look forward to the opportunity to vote in favor of this landmark piece of legislation tomorrow evening.

Mr. MURKOWSKI. I thank my friend, the Senator from Alabama.

AMENDMENT NO. 1432 TO AMENDMENT NO. 1293

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is temporarily laid aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 1432 to amendment No. 1293.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 390, line 7, after "boiler" insert "or feedstock".

On page 390, line 12, after "other" insert "combustion, precombustion, or post combustion".

On page 391, line 25, strike "of" and insert in lieu thereof "providing".

On page 392, lines 2 and 3, strike "use of fuels" and insert in lieu thereof "fuels used at the time of submission of a proposal pursuant to section 404(d)(2)".

Mr. MURKOWSKI. Mr. President, we have before us a very significant piece of legislation, the clean air bill. But there are certain aspects of it that I think I need to share with my colleagues.

Mr. President, I would add the cosponsorship of Senator CONRAD and Senator WALLOP to the amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, the purpose of this legislation should be to achieve the lowest possible emission levels and not specifically the amount of reduction. The problem we have here is in the clean coal portion. We have picked out certain technologies and left out others. This amendment provides utilities with the maximum degree of flexibility to achieve clean air standards. This bill promotes the use of clean coal technology with incentives, but it unnecessarily restricts the technologies that qualify.

Those technologies, Mr. President, primarily, are scrubbers. My amendment removes those unnecessary restrictions but it does not reduce or change the strict emission reduction requirements that a technology must achieve to qualify. It does not favor one technology over another. It does not favor one type of coal over another. My amendment simply gives all clean coal technologies an equal opportunity to compete in the marketplace. The results of this competition will be cleaner air at a lower cost.

That sounds, perhaps, like a panacea, but let me explain how the amendment works in phase I. The phase I part of my amendment makes two changes to the definition of qualifying phase I technology.

First, it broadens the scope of technologies that will qualify for incentives. This would allow utilities to use clean coal technologies in conjunction with another clean coal technology, or in conjunction with the new feedstock coal to meet the so-called 90-percent test.

Second, it sets a fixed baseline from which the 90-percent reduction is to be measured. That baseline is the emission level produced by the coal which the utility is burning at the time it submits its application for its qualifying phase I technology.

The effect of my amendment is to establish a definite process, a process that everybody can understand, for deciding whether a particular clean coal technology will qualify for the phase I incentive. The utility would apply the 90-percent test to the fixed baseline level to establish the target emissions level it must meet in order to pass the 90-percent test.

It would then, Mr. President, have the flexibility to select a single clean coal technology or a combination of technologies or a combination of clean coal technologies and a different feedstock coal to reach the target level.

One might ask why is this amendment needed? Why, in phase I, should we have this change? Well, section 402 says, "A qualifying phase I technology" must be a "technological system of continuous emission reduction" which achieves a 90-percent reduction in emissions.

The technological systems of continuous emission reduction is a term of art from the 1977 Clean Air Act. I understand it to mean a single technology, not a combination of technologies or a combination of technology and feedstock.

As such, a qualifying phase I technology is a single technology which, standing alone, can achieve the 90-percent reduction test. I believe this clearly limits the type of clean coal technologies that are capable of providing substantial emission reduction. My amendment would simply expand the definition to include clean coal technologies used in conjunction with a different feedstock coal.

Mr. President, it is also unclear what fuel is to serve as the baseline fuel from which the 90-percent reduction is measured. Section 402(r) simply requires a 90-percent reduction in emissions from the emissions that would have resulted from the use of fuels which were not subject to treatment prior to combustion. Theoretically, this could be any fuel selected by the utility.

My amendment would specify that the emissions level from the fuel being used by the utility at the time it submits its "eligible units" proposal would be the baseline emissions level from which the 90-percent reduction is measured.

How does it work? Let me give an example. Let us assume a utility unit is emitting, say 20,000 tons of sulfur dioxide at the time it submits its proposal for a qualifying phase I technology. The amendment would establish that 20,000 tons of emissions as the baseline—because we have an application of how to establish the baseline up until now—from which the 90-percent reduction is measured. The 90-percent reduction, from that baseline, would be 18,000 tons resulting in a 2,000-ton target. The unit would then have the flexibility to select any technology or combination of technologies and new feedstock coals to meet that target of 2,000 tons emissions.

How does the amendment work in phase II? Well, my amendment in phase II would modify the definition of "repowering," to ensure that precombustion technologies can qualify for the phase II incentives. These

technologies would still have to meet the criteria contained in the definition of "repowering" to qualify. They would have to: First, be capable of controlling multiple combustion emissions; second, provide improved boiler generation efficiencies; and third, achieve significantly greater solid waste reduction.

The purposes of the phase II incentive is to encourage the development of clean coal technologies. There are numerous promising precombustion precoal technologies that can meet the above criteria. It makes no sense to prevent these technologies from being eligible for the incentives in this legislation.

Why is a phase II amendment needed?

First, it may be that the precombustion clean coal technologies which treat a feedstock are covered by the definition of repowering in section 402(L). If they are not covered, they certainly should be. There is no reason to exclude them.

My amendment would modify the definition to make clear that such technologies are covered.

Last, Mr. President, the point I want to make is, this amendment promotes competition. Unlike other amendments we have debated over the last several weeks, there is absolutely no downside to this amendment. Some of those amendments have sought to relax environmental standards and thereby make it more difficult to achieve clean air. I would anticipate that the environmental community would support this amendment, Mr. President.

Others have sought to impose stricter environmental standards and, thereby, substantially increase the cost of this legislation. There have also been amendments which would have changed the programs and the process for achieving clean air standards. My amendment does none of this, Mr. President. It does not increase the cost of the legislation. It does not relax environmental standards. It does not change the manner in which the bill attempts to achieve clean air. My amendment simply promotes competition with a goal of achieving cleaner air at a lower cost for the American consumer.

A basic premise of this legislation is to allow the marketplace to determine how we will meet the clean air standards. This amendment is consistent with that premise because it allows a broad range of clean coal technology to compete. Basically, what we want is to achieve clean air. I suggest this is the best method to do it.

Mr. President, I ask unanimous consent to add Senator NICKLES as a cosponsor to the amendment. I add also, for the benefit of my colleagues, the amendment is supported by the National Coal Association and the Electric Power Research Institute.

I believe my colleague, Senator SIMPSON, is on his way to speak on the amendment as well.

Mr. President, how much time do I have remaining on the amendment?

The PRESIDING OFFICER. The Senator has 20 minutes remaining.

Mr. MURKOWSKI. I thank the Chair. Mr. President, I reserve my remaining time until we have had a determination of the parliamentary procedure in which we are going to stack these votes. So I reserve the remainder of my time.

Mr. JEFFORDS addressed the Chair.

The PRESIDING OFFICER. Senator JEFFORDS.

Mr. JEFFORDS. Mr. President, I rise in opposition to the amendment. I would like to know what the remainder of time is for the Senator from Alaska.

The PRESIDING OFFICER. Twenty-nine minutes fifty seconds.

Mr. JEFFORDS. Remaining?

The PRESIDING OFFICER. The Senator from Vermont has 29 minutes 50 seconds remaining. The Senator from Alaska has 19 minutes 50 seconds remaining.

Mr. JEFFORDS. It is my intention, Mr. President, to reserve 15 minutes of my time to be divided equally tomorrow before the vote. I ask unanimous consent to do that.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, I do not intend to try and debate the technical parts of this amendment. I have been involved in the negotiations on the clean air bill throughout the whole time it has been going on, including the period of time we spent with the administration. I do know that people who are interested especially in the high-sulfur coal area ought to pay very close attention to what this amendment does.

First of all, the provisions we are talking about have a couple of things which are really an attempt to ensure the soft coal industry that they will be able to have an opportunity hopefully to continue to mine soft coal of high-sulfur content and that over a course of time, we will not displace all of the workers we talked about this past week.

So those who do have an interest in high-sulfur coal areas ought to be very careful and examine this amendment closely.

There are two provisions which are involved here with respect to a "bennie," so to speak, for those who are trying to find better technology in order to utilize the high-sulfur coal. One of those is in the repowering section which says that if the new technology which you are going to use involves the need and necessity for a new boiler, that the period of time which you will have in order to be able to find out whether this technology works and to be able to take advantage of the other provisions, which I will mention in a minute, is extended by 4 years.

People who are concerned about delays obviously should be concerned about anything in an amendment which extends or allows this delay of 4 years to be available for other than the building of a new boiler.

So by adding to that provision feed stocks, it is clear that the intention of the amendment is to say that if you have some sort of technology which uses low-sulfur coal, that if the combination of those meet this provision, then you also would be entitled or could be entitled to a 4-year delay.

The second benefit, which was highly negotiated and highly sought after by those trying to find some way to continue to utilize high-sulfur coal was the provision which gives you a 2-for-1 trade on allowances. That should raise a red flag for those who are interested in allowance distribution, for any time you open the ability to receive the 2-for-1 allowance, those allowances are not infinite; they are well defined and the numbers are absolute. So if you are going to start doling out more 2-for-1 allowances, somebody is going to lose.

I come from a State which has no SO_2 emissions which are of any interest to this program and we, therefore, have no allowances and seek no allowances. So I am trying to be as evenhanded as I can be in trying to raise the issues and not necessarily argue the merits of them.

In summary, I point out of that this is and could be an extremely controversial amendment and one which those who are interested in high-sulfur coal ought to study extensively to see what it will do to the intentions of this bill and to the benefits that were given to that industry in hopes of being able to allow them to continue to be able to participate and furnish the coal from their mines.

Second, it should be of great interest to those, and there are many, who are concerned about the number of allowances that are available and to see where they are going to be distributed. They should also take care in examining this amendment to see how it affects their interests.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I will yield to my colleague from Wyoming who is going to make some remarks in support of the amendment. Before it do, I point out to my colleague, the floor manager, and the staff that this amendment does not

promote or favor one type of coal over another. It simply gives utilities the flexibility to use the best technologies available to meet the emissions standards.

Furthermore, the amendment does not affect allowances in any manner. It gives the utilities who would otherwise seek 2-for-1 allowances simply a greater flexibility.

I thank the Chair, and I yield to my colleague from Wyoming.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wyoming.

Mr. MURKOWSKI. I believe the Senator needs about 4 to 5 minutes.

Mr. SIMPSON. Four minutes will be all I need, Mr. President. I thank my friend from Alaska.

Mr. President, I want to address this amendment and speak in favor of it. I represent the largest coal-producing State in the United States: Wyoming. We have a lot of technologies there that are new and exciting, many of them clean coal technologies, if you will, the precombustion cycle facilities, and I think no one should believe that this amendment is going to affect the allowance distribution one way or the other. The amendment should not affect that in any way. You receive allowances if you use technology in phase I. It does not matter if it is pre or post combustion.

So I think the argument about allowance just simply is not appropriate here. I will be glad to get into a debate on that in the future. But that is just not so.

This amendment would make it clear that precombustion technologies will be acceptable technologies under the clean coal provisions of the bill. I think it is so important we have a variety of technologies available to reduce SO_2 emissions and to ensure that all types of coal will be used in the future. The clean coal program seems to be viewed by so many as the high-sulfur coal program. That is not the case. It is important for both Eastern and Western low-sulfur coal as well.

I think we have to continue to develop an entire menu of technologies which will be available to utilities as they begin to grapple with the tough and complex SO_2 reduction requirements that will be in force after date of enactment of the bill which is before us. That is the critical thing, for this acid rain portion of the clean bill is a continuing headache for us.

Finally, I think it important utilities choosing the repowering option be able to select from more than just a narrow class of technology.

This amendment will broaden the list of available technologies without favoring one technology over another. We have in the course of the debate been giving a great deal of comment and some lip service to the notion of maximum flexibility. We talk about that a great deal.

This amendment will, indeed, provide just that, flexibility, maximum flexibility. I think it is very important, and I urge adoption of the amendment.

Mr. MURKOWSKI. I thank my colleague for supporting the amendment. I would ask if his interest in cosponsoring the amendment continues.

Mr. SIMPSON. I would, Mr. President, seek that.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. I appreciate that. Might I ask the Chair how much time is remaining on this side?

The PRESIDING OFFICER. The Senator has 15 minutes remaining.

Mr. MURKOWSKI. I reserve the remainder of my time.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. JEFFORDS. Mr. President, I will comment briefly. The Senator from Wyoming did make a remark on which I should comment.

That is that there is a specific number of allowances that are set aside for utilization in developing clean coal technology.

My point was that the more that are available to be able to participate and to be able to qualify for these allowances means the fewer allowances there will be for the ones who originally were entitled to the allowances under this amendment. Therefore, there is going to be more competition for the same amount of allowances.

So thus by allowing technologies other than those intended in the agreement to be available for the high-sulfur coal areas and to broaden it by including feed stocks and other aspects of this amendment to allow low-sulfur coal people to be able to come in and take advantage of the 2-for-1 allowances is going to mean that many fewer that were agreed to to help out the high-sulfur coal industry.

Again, I do not take any particular issue on this because my State has no interest at all. But I do have a great interest in the agreement we made, and the one that was so difficult for the people who were negotiating to reach to assist in a reasonable way those who deal in the high-sulfur coal. To see this amendment go forward would raise very much the specter that this, in a sense, is a deal breaker, and I am certain it will be felt that way by those who are in the high-sulfur coal areas.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MURKOWSKI. Mr. President, if I might make a point. I would like to point out to the floor manager that it is not the number of utilities that can qualify. That number does not change. It just gives them the option of using alternative types of technology to achieve it.

So I would like the record to reflect that difference because I think it is significant and it might be misleading to my colleagues who suggest otherwise; that indeed we are not changing the number of utilities that can qualify for the 2 for 1. It gives those utilities a larger number of technologies from which to choose.

My question is, what is wrong with that? That encourages development of technology which reduces the emissions and provides cleaner air for all of us.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. Mr. President, I will ask if the Senator from Alaska will yield 2 minutes so I might respond to my friend from Vermont.

Mr. MURKOWSKI. I will yield 2 minutes.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. SIMPSON. Mr. President, I have watched the work of the Senator from Vermont, extraordinary, during the Clean Air Act, air toxics, all phases—he has done a magnificent job—mobile sources, the whole thing, a real contributor.

I do not want to mislead. I think it is very important to note that there is not some great trick afoot, and when you represent a low-sulfur coal State, they think that that is what is up. That is not the case.

We all know you get allowances for the use of technologies. In other words, a utility gets those if they choose a scrubber or clean coal technology, and this amendment should not affect the number of allowances applied for in any way, as I see it.

I hope we would engage in that debate, because that is a distortion. No one is talking about that. There is a cap. No one is going to exceed the national cap. That is important. We all hung tough for that.

But this is just another form. It does not matter. You get the allowances for choosing these particular things. How precombustion or postcombustion or anything of that nature would enter into the basic issue of what we did agree to, I cannot even discern what that might be.

Mr. MURKOWSKI. I thank my friend from Wyoming for those remarks.

I ask, how much time is remaining on this side?

The PRESIDING OFFICER. Eleven minutes, thirty-seven seconds.

Mr. MURKOWSKI. The Senator from Alaska reserves the remainder of his time.

The PRESIDING OFFICER. Who yields time?

The Senator from Vermont.

Mr. JEFFORDS. Mr. President, how much time do I have?

The PRESIDING OFFICER. Twenty-three minutes, nine seconds, of which 15 has been reserved for tomorrow.

Mr. JEFFORDS. Fifteen has been reserved?

The PRESIDING OFFICER. Yes. That leaves 8 minutes remaining for today.

Mr. JEFFORDS. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? If no one yields time, the time will be equally divided. The time is being charged against both sides.

Mr. MURKOWSKI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent at this time that my remaining time, which I think is about 11 minutes, be carried over until tomorrow.

Several of my colleagues have indicated an interest in speaking on behalf of the amendment. There is so little time remaining, I think it bears that request.

The PRESIDING OFFICER. Is there objection?

Mr. JEFFORDS. Mr. President, reserving the right to object, let me get a better feel on the time remaining. The leader is on his way over, and I want to make sure I do not preclude his opportunity from speaking before we close up.

The PRESIDING OFFICER. The opponents have 8 minutes remaining in today's debate, with 15 minutes having been reserved for tomorrow. That 15 minutes is to be equally divided, proponents-opponents.

Mr. JEFFORDS. I ask unanimous consent that we be allowed to perhaps proceed, but with the understanding that 5 minutes be allowed, of the time remaining, to be given to the majority leader, if he so desires, before the time expires.

The PRESIDING OFFICER. There is a unanimous-consent request currently pending.

Mr. JEFFORDS. I am sorry.

The PRESIDING OFFICER. The unanimous-consent request of the Senator from Alaska, which is to allow the 11 minutes, 37 seconds which he currently controls to be deferred until tomorrow.

Is there objection to that unanimous-consent request?

Mr. JEFFORDS. Reserving the right to object, I think the Senator from Alaska understands my predicament, and if he desires to amend that, or else I will object and pursue——

Mr. MURKOWSKI. If I may defer to my colleague, to the floor manager, I understand his concern is the leader is about to come to the floor and may be wishing to discuss the pending amendment.

Mr. JEFFORDS. That is correct.

Mr. MURKOWSKI. I would have no objection to—Mr. President, I ask the Senator from Vermont. Is he suggesting that the majority leader have 5 minutes? I would be willing to divide that equally if that is permissible.

Mr. JEFFORDS. Let me ask if we can amend it this way: that is, we reserve the time, ask unanimous consent that, since I do not know of any other amendments that are coming at this particular moment, we go into a quorum call and that the time not be counted against this amendment until such time as the leader arrives or until such time as waiting for him is waived.

Mr. MURKOWSKI. I think that is agreeable to the Senator from Alaska. I assume the leader would not talk and have the conversation be charged against the time remaining to the Senator from Alaska. Is that correct?

Mr. JEFFORDS. It would be charged against our time.

Mr. MURKOWSKI. So I gather that the Chair will rule that the time remaining will not be charged to either side, with the exception of the leader's time, which will be charged to their side.

The PRESIDING OFFICER. The pending business before the Senate is the unanimous-consent request stated by the Senator from Alaska. If there is to be a different unanimous-consent request prior to disposing of the Senator from Alaska——

Mr. JEFFORDS. Let me object.

The PRESIDING OFFICER. There has been an objection.

Mr. MURKOWSKI. I withdraw the pending request.

The PRESIDING OFFICER. Prior to the objection, the Senator from Alaska has withdrawn his unanimous-consent request.

The Senator from Vermont.

Mr. JEFFORDS. I ask unanimous consent that we be allowed to proceed in a quorum call until such time as the majority leader arrives here for a period not to exceed 30 minutes, and that at the time the majority leader arrives here, the period of time of 10 minutes, divided evenly, be allowed for the majority leader, and the proponent of the amendment to speak, and that the remainder of the time be reserved until tomorrow.

The PRESIDING OFFICER. I advise the Senator from Vermont that, if the Senator from Vermont wishes to hold 15 minutes for debate tomorrow, he does not have a sufficient amount of time to allocate 10 minutes for debate today since his time available is 20 minutes, 9 seconds.

Mr. JEFFORDS. I withdraw that request, ask that we go into a quorum call, and that the time not be charged against the parties at this particular time.

The PRESIDING OFFICER. Is there objection?

Mr. MURKOWSKI. I ask the Chair to restate the pending——

The PRESIDING OFFICER. The unanimous-consent request is the suggestion of an absence of a quorum, and at the termination of the quorum no time be charged against either the proponents or opponents. Is there objection?

Mr. MURKOWSKI. I would agree to that.

The PRESIDING OFFICER. Is there objection? If not, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I yield 5 minutes to myself.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, I oppose the amendment of the distinguished Senator from Alaska for several reasons: First and foremost because it directly violates the agreement negotiated with the administration on this bill.

As one who participated in the negotiations leading to the agreement, I can say to my colleagues that we explicitly and painstakingly negotiated the subjects which this amendment now seeks to change. The definition of qualifying phase I technology and the definition of repowering all were part of a lengthy discussion that dealt with these subjects during the course of negotiations.

The 2-for-1 credits that are the subject matter of this amendment were the subject of very lengthy discussions with competing points of view expressed—not just two competing points of view, several competing points of view expressed—and resolved in the negotiated agreement.

So the first point I want to make is that this amendment specifically and clearly violates the agreement that was reached with the administration with respect to this bill. And just as I have encouraged Senators to oppose other amendments which had that effect, so I urge Senators to oppose this amendment on the same grounds.

Mr. President, further, the phase I technology definition was narrowly drawn to reward the use of technology

in phase I, thus reducing the adverse economic effects in high-sulfur coal mining areas. The repowering definition first proposed by the President and adopted by the Senate Committee on the Environment and Public Works was likewise narrowly drawn to take into consideration the extra time needed when a boiler is to be refurbished. Precombustion clean coal technologies can make no similar claim and, thus, were not provided with the additional 4-year extension.

So both with respect to the subject matter of the agreement and with respect to the substance of this amendment, I believe the amendment should be defeated. And so that we can proceed to adopt this legislation, in a form that is as close to the original agreement negotiated as is possible, I urge my colleagues to join me in opposing the amendment of the Senator from Alaska.

Mr. President, I reserve the remainder of the time, and I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MURKOWSKI. Mr. President, I thank the chair. I thank my colleague, the majority leader. I ask that perhaps the staff go back and review what agreements were made, because it is my understanding that precombustion technology never came up in the negotiations.

I see that the majority leader is interrupted currently, and I want to take this opportunity to ask, specifically, if he recalls whether the precombustion issue ever came up in the actual agreement. The suggestion has been made by the distinguished majority leader that this violates the agreement, and it is my understanding—although I was not a party to the agreement—that clearly that portion was not part of the agreement. If the staff could provide come clarification on that, it would be beneficial to the Senator from Alaska, because certainly it is not the intention of the Senator from Alaska to delay this legislation in any way. We all want this bill to pass. But to suggest that we are violating an agreement here, when factually I think one would find, in examining the discussions in the record, that precombustion was never a part of the agreement.

The suggestion here is that the only thing we can utilize is scrubbers. The suggestion here is that you cannot use a combination of technology and clean coal. This is a suggestion that we step back 20 years in technology. What we are concerned with is emissions here, and to suggest that we cannot use clean coal technology and clean coal in a combination of technologies, I do not think in the spirit of the legislation before us that this is the intention by any means. I ask the distinguished majority leader for his recollection and that of the professional staff to address the issue of precombustion.

Mr. MITCHELL addressed the Chair.

Mr. MURKOWSKI. Does the leader care to speak, and I wonder if the time could not be charged to my time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, how much time do I have in the 5 minutes that I was previously allotted.

The PRESIDING OFFICER. The opponents have 17 minutes 4 seconds, of which 15 minutes have been reserved by unanimous consent for tomorrow. The proponents have 8 minutes 49 seconds.

Mr. MITCHELL. Mr. President, parliamentary inquiry. I understood that the 15 minutes reserved for tomorrow was equally divided, and 7½ minutes was to come off the opponents' time.

The PRESIDING OFFICER. The unanimous consent, as propounded by the Senator from Vermont, was that the 15 minutes would all come from the time of the opponents, but would be equally divided.

Mr. MITCHELL. Mr. President, I was not aware of that.

Mr. MURKOWSKI. I yield.

Mr. MITCHELL. I will speak briefly then and say——

The PRESIDING OFFICER. I understood that the unanimous-consent request of the Senator from Alaska was to allow the majority leader to respond to his question, charging the time of that response to the time of the Senator from Alaska; is that correct?

Mr. MURKOWSKI. The Senator withdraws that in favor of the unanimous-consent proposal of the Senator from Vermont. But I certainly feel that the distinguished majority leader should proceed.

Mr. MITCHELL. I do not wish to take much time, Mr. President. I have said all, really, that I have to say. I have checked with staff and have been advised that the subject was discussed at great length among the staff, and that the precise provision to be amended, which is subsection (r) appearing at the bottom of page 391 of the bill, this defines the term "qualifying phase I technology" as, in a manner to limit it to the use of scrubbers, and that the Senator from Alaska now seeks to define it in a way that would permit it to include other technologies. And that was, I am advised by staff, discussed in great detail at the staff level, and this was the understanding and the agreement reached.

So that based upon that information, I repeat my assertion, that this would directly and specifically violate the agreement.

I apologize to the Chair and to the Senator from Alaska. I was unaware that the unanimous-consent request had contemplated taking all of the time from the opponents and dividing it tomorrow. That being the case, I assume our time is up, and we will reserve the remainder of our time until tomorrow.

The PRESIDING OFFICER. The opponents currently control 15 minutes, 52 seconds, of which 15 minutes has, by unanimous consent been reserved for tomorrow.

Mr. MURKOWSKI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Eight minutes, forty-nine seconds.

Mr. MURKOWSKI. And then tomorrow we split the remaining time evenly.

Let me take a few more moments of my 8 minutes and remind the majority leader that I do appreciate his clarification. His clarification was that the staff discussed this issue at some length, but I question whether the Members got into the actual discussion of this being a deal-breaker.

I hate to press the point, but the Senator from Alaska does not wish to suggest by any means that this is a breaker amendment; that while precombustion logically was a matter of concern among the staff, it is the intention of the Senator from Alaska that it was never agreed upon Member-to-Member that this would be a breaker as an amendment. That is what the Senator from Alaska is referring to and would hope that that is still the position of the majority leader, as it was at the staff level. Does the majority leader care to comment?

Mr. MITCHELL. Mr. President, if I may respond in the brief time I have. I was not present during all of the negotiations. I doubt any one person was, since they stretched over hundreds of hours over 3 weeks. I can only rely upon what staff says, and it is that the 90-percent reduction was discussed among the Members, and that the whole purpose of this was to protect the high-sulfur coal producing areas. That was the whole purpose of this section, which was placed in as a result of those negotiations. And, of course, the amendment of the Senator from Alaska operates in a manner directly contrary to that purpose.

So that the answer is, it is my understanding that, yes, it was discussed at great length among the staff, and to some lesser extent by the principals, and not only as a part of but it really goes to the essence of this aspect of the agreement.

I thank the Chair.

Mr. MURKOWSKI. I thank the majority leader. I obviously was not there either, so I have to depend on staff that has advised me, as I have stated to the majority leader, and that staff discussed it.

Mr. President, I understand that the phase 1 incentives are designed to encourage utilities to burn high sulfur coal but that is basically what I disagree with. We are trying to achieve clean air here, not promote one type of coal over another.

The amendment of the Senator from Alaska simply says a combination of technologies and coal can achieve the emission requirement. It makes no sense to limit our ability or our options for achieving clean air. That is what this legislation is all about.

It is difficult to understand, as I have indicated to the majority leader, that this can be concluded as a deal breaker. All we are doing is giving the utilities that must clean up their emissions a much greater ability to meet those obligations. I ask my colleagues what is wrong with that? That is what this is all about.

The scope of the understanding fixing base lines in phase one was the intent of the committee by broadening types of technologies utilities can use, two technologies equalizing greater reduction.

Why limit it only to postcombustion? What we really want is clean air.

If we are interested in achieving clean air we should adopt this amendment. The bill before us is written in favor of certain technologies over others. It limits utilities' ability to choose technologies and thereby limits our ability to achieve clean air.

We have before us a very complex piece of legislation. It is the contention of the Senator from Alaska that unfortunately this amendment pressed within the timeframe remaining here is not going to be understood by my colleagues. Hopefully, staffs are observing the debate today and can proceed with a greater understanding as to the validity of allowing the marketplace to make the determination. And clearly that is what the responsibility of this body is, and I will conclude because I believe my time is about to expire that this amendment provides the utilities with the maximum degree of flexibility to achieve clean air standards.

The bill promotes, as I have indicated, the use of clean air technologies with incentives but, as I have objected to, it unnecessarily restricts the technologies. The majority leader said scrubbers. Why only scrubbers? Why not a combination of precombustion technologies?

There are all types of technologies being developed today to provide cleaner coal. Why not encourage those in this legislation? Why is that considered a deal breaker? Certainly the justification for anything that is negative is contrary to what we are trying to achieve here and that is clean air.

My amendment removes those unnecessary restrictions and does not reduce or change or restrict the emission reduction requirements that the technologies must achieve to qualify. My amendment does not favor one technology over another. It does not favor one type of coal over another. This is not a case of eastern coal vis-a-vis western coal. My amendment simply gives all clean coal techniques an equal opportunity to compete in the marketplace. What is wrong with the marketplace determining how they are going to achieve the emission levels?

The result of this competition will be cleaner air at a lower cost to the consumer. I would ask and I would encourage all of my colleagues, who may still question the merits of this amendment to contact this Senator. The Senator from Alaska is available outside this Chamber. Staff is available to address the specific concerns.

Mr. President, how much time is remaining for the Senator from Alaska?

The PRESIDING OFFICER. The Senator from Alaska is controlling 2 minutes and 43 seconds.

Mr. MURKOWSKI. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska reserves the remainder of his time.

The Senator from Alaska should be advised that as he alone controls time at this point that time is being charged.

Mr. MURKOWSKI. Mr. President, under the circumstances I yield the remaining time that I have, and I thank the leader.

The PRESIDING OFFICER. The Senator from Alaska yields back his remaining time. All time other than the 15 minutes which is reserved for tomorrow to be equally divided has now been yielded back.

Mr. MURKOWSKI. Mr. President, if I may make an inquiry then, we have 7½ minutes equally divided tomorrow.

The PRESIDING OFFICER. There will be 15 minutes equally divided, 7½ minutes for the proponents, and 7½ minutes for the opponents.

Mr. MURKOWSKI. I thank the Chair for the clarification. Does the Chair have any idea that this vote will be stacked with other votes tomorrow?

The PRESIDING OFFICER. The Chair has no information on the time or order of consideration of this amendment.

Mr. MURKOWSKI. But I assume if I may ask, Mr. President, that the theory is at least that we will vote on this some time tomorrow?

The PRESIDING OFFICER. I assume, as the unanimous consent provided for 15 minutes of time to be reserved on this amendment tomorrow, that at the expiration of that 15 minutes there will be a disposition.

Mr. MURKOWSKI. I thank the Chair.

The PRESIDING OFFICER. I advise the Senator from Alaska that as of this point the yeas and nays have not been ordered on this amendment.

Mr. MURKOWSKI. Mr. President, I think it is appropriate that the Senator from Alaska requests the yeas and nays and the time to be determined by the majority leader when the votes come up.

The PRESIDING OFFICER. The Senator from Alaska is requesting the yeas and nays on this amendment at such time as the amendment is mature?

Mr. MURKOWSKI. Yes.

The PRESIDENT OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MURKOWSKI. I thank the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, is there a pending amendment?

The PRESIDING OFFICER. The pending amendment is No. 1307 by Senator BAUCUS, the Senator from Montana.

Mr. STEVENS. Mr. President, I ask unanimous consent that that amendment be set aside temporarily so I may offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1433 TO AMENDMENT NO. 1293

(Purpose: To amend Amendment No. 1293)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for himself and Mr. MURKOWSKI, proposes an amendment numbered 1433.

On page 217, section 217 of amendment 1293 is amended by: (a) redesignating subsection (4) as subsection (5) and; (b) adding a new subsection (4) as follows:

"(4) The Administrator may waive in whole or in part the requirements of this subsection in any carbon monoxide nonattainment area in Alaska if the Administrator finds that prevailing temperatures in that area cause engine or fuel system malfunctions in vehicles using fuels meeting such requirements. The Administrator shall conduct a study to determine the effect of cold temperatures on fuels which meet the oxygen content requirements of this subsection and the feasibility of using such fuels during periods of sustained cold temperature."

Mr. STEVENS. Mr. President, the clean air bill before us mandates a 3.1-percent oxygen level for fuels sold in nonattainment areas during winter months. We have two major nonattainment areas in Alaska; Anchorage and Fairbanks. This level of oxygen is likely to be achieved by using an ethanol blend fuel, I am informed.

A 3.1-oxygen level may be difficult or impossible to obtain using ethanol

in some parts of my State. Ethanol blends separate from gasoline at temperatures lower than 20 to 30 below zero Fahrenheit, temperatures which are common in our State in winter months. This can create a more volatile situation in the fuel system which could potentially cause engine damage, we are informed.

In addition, ethanol fuels attract water, a higher ethanol content attracting more water. In a cold climate this poses a significant problem. The risk of fuel line freezeup or other engine problems associated with that is extremely dangerous at these subzero temperatures. Engine or fuel system malfunctions could leave motorists stranded in isolated areas in remote portions of my State in very difficult times.

This amendment has two functions. One, it gives the Administrator the flexibility, it is entirely discretionary, to waive the oxygenated requirements of section 217, if fuel required to be used under the section would cause engine or fuel system malfunctions. As I said that waiver is not automatic. It is purely discretionary. It is motivated by the safety considerations which have been brought about by a study conducted in my State.

We do not have the real esoteric capability of the Administrator and for that reason the second portion of this amendment will require the Administrator to perform a study to determine the feasibility of using higher oxygen content fuels in cold temperatures such as persist in Alaska in the winter months.

The study will allow us to determine which oxygenates can be safely used in Alaska or other States that have similar cold temperatures. I think ours have the lowest, persistent temperatures in the country.

Again, Mr. President, this is offered in full support of the concept of the ethanol blend fuels, but with the understanding that if we are required to have ethanol blend fuels sent to Anchorage and Fairbanks—those are the two major fuel storage centers for the whole State. That would be the fuels that would be distributed out into the west coast and up in the Arctic. We believe that some determination should be made as to whether the study that has been made in my State really is going to be the outcome of using fuels of this type. Notwithstanding the fact that we do have nonattainment levels we must meet in other fashions, we are not able to use this methanol fuel.

I would urge the managers of the bill to accept this amendment. It has been modified to meet their objections of prior language that we intended to offer.

Mr. DURENBERGER. Mr. President, until Alaska came into the Union and my colleague came into the U.S. Senate, I believe I had the right to stand here and say I represented the coldest State in the Union. There are times when in International Falls, MI, we claim to be the coldest place in the United States.

But the Senator from Alaska has a right to lay claim to the most difficult State in which to do the kinds of things that we propose to do with oxygenated fuels. He has supported the concept, as he has indicated here on the floor, on several votes that we have had. The amendment which he has proposed which requires the Administrator to make a specific finding relative to prevailing temperatures and requires the Administrator to conduct a study to determine the effect of cold temperatures on fuels, I think will benefit not only the State of Alaska but will have a benefit for some of the rest of us.

So I am authorized, on behalf of both the majority and minority managers, to say we strongly endorse the adoption of the Senator's amendment.

Mr. STEVENS. Mr. President, I ask that the amendment be agreed to.

The PRESIDING OFFICER. Is there further debate?

The question is on agreeing to the amendment of the Senator from Alaska [Mr. STEVENS].

The amendment (No. 1433) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I thank the Chair and I thank the distinguished Senator from Minnesota.

I might say to my colleagues, Mr. President, that the two Alaska Senators are on the floor at the present time. We also claim some very high temperatures in our State, temperatures in excess of 100 degrees in the summertime. But it is the cold country that we represent that demands amendments like this. I am pleased the Senate recognizes our problems.

AMENDMENT NO. 1434 TO AMENDMENT NO. 1293

(Purpose: To provide for economic incentives and disincentives in ozone extreme areas)

Mr. DURENBERGER. Mr. President, I now send to the desk on behalf of Senator WILSON an amendment that I believe has been approved by the Democratic manager of the bill and has approval on this side as well.

The PRESIDING OFFICER. The Senator from Minnesota is advised that the pending business is the amendment by the Senator from Montana and it will be necessary to seek unanimous consent to set aside that amendment prior to consideration of the amendment which he wishes to offer.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that we set aside the amendment which is currently pending.

The PRESIDING OFFICER. Without objection, it is so ordered.

With that having been agreed to, the clerk will report the amendment as submitted by the Senator from Minnesota.

The legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] for Mr. WILSON, proposes an amendment numbered 1434 to amendment No. 1293.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 81 of the amendment, between lines 17 and 18, insert the following new paragraph:

"(3) An implementation plan for an extreme area revised in compliance with this section may include measures providing economic incentives and disincentives, such as differential emission fees, marketable permits, road use and congestion fees, and emission charges, in combination with or as a supplement to regulatory requirements.

Mr. DURENBERGER. Mr. President, the amendment would allow the south coast region of California—the Los Angeles area—which is the only extreme ozone nonattainment areas in the Nation, to incorporate economic incentives in its implementation plan. These measures will be in addition to regulatory requirements. The incentives might include emission fees, road use and congestion fees and emissions charges, among other measures.

Mr. WILSON. Mr. President, this amendment will provide for economic incentives and disincentives in ozone extreme nonattainment areas.

The amendment would allow air quality regulatory authorities to use economic measures, such as incentives or disincentives, together with the standard regulatory process.

These economic tools are an important supplement to air regulatory districts because they allow them to apply additional devices to deal with intractable air quality problems.

The amendment I offer today provides that market-based incentives may be part of the weapons of the air district arsenal to attain clean air in our worst air pollution area, the "extreme nonattainment area." This amendment was developed by the executive committee of the Southern California Association of Governments [SCAG], in consultation with the South Coast Air Quality Management District [SCAQMD], the Environmental Defense Fund, the Sierra Club, and affected industries.

It is a permissive device which is not designed to replace tough air pollution

laws, but to supplement them with an additional air pollution strategy.

It would be extremely helpful to SCAG, SCAQMD and the other clean air interests in southern California if the provision for developing revised implementation plans for extreme areas explicitly recognized the role of economic incentives and disincentives.

In southern California, the problem is so serious that an ambitious, broad range of air pollution control activities will be required. All tools should be available. With the greater degree of specificity in the planning requirements for extreme areas, it is important to clarify that market-based tools are also available. The amendment I offer does not establish a mandatory requirement, but is a recognition of economic incentive and disincentive measures as a legitimate part of an implementation plan for extreme areas.

Market-based approaches can be effective in guiding individual decisions that affect air quality, because the market approach builds into these decisions the additional costs and benefits associated with these individual actions. Such economic incentives and disincentives are road use fees and congestion fees, or differential emission fees, can raise revenues to support other air quality/transportation actions, while discouraging pollution-causing activities.

In addition to SCAG, SCAQMD, Environmental Defense Fund, and National Resources Defense Council, this amendment is supported by the city and county of Los Angeles, the Los Angeles Chamber of Commerce and many elected officials in southern California. I have received many letters of support for this amendment from the city councils of many cities, such as Alhambra, Bell, Buena Park, Claremont, Long Beach, and Rialto. This is a partial list.

This amendment has been reviewed by the managers of the bill, and it has been accepted.

The amendment is not controversial, and I therefore urge its adoption.

Mr. President, I ask unanimous consent that a letter to me from the executive officer of SCAQMD be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT,
El Monte, CA, March 22, 1990.

Hon. PETE WILSON,
U.S. Senate,
Senate Hart Office Building,
Washington, DC.

DEAR SENATOR WILSON: We have reviewed the proposed amendment to S. 1630 by the Southern California Association of Governments. We support the amendment as a useful additional authorization of tools which will be useful to achieve our air quality objectives.

The amendment would authorize the District to use economic measures in combination with or as a supplement to our regulatory requirements. We believe economic measures including incentives and disincentives to be a useful element of a multi-faceted environmental regulatory program. It is important, however, that the use of these tools be discretionary rather than mandatory, so that we can maintain the flexibility necessary to select the best possible alternatives to achieve cost effective pollution control. It would be important if this amendment is adopted by the Senate that it not be changed in the legislative process to limit our flexibility to adopt the most effective control measures whether they are the result of the application of economic tools or direct emission reduction requirements.

The District continues to appreciate your support for its efforts to achieve healthy air for the citizens of Southern California.

Sincerely,

JAMES M. LENTS,
Executive Officer.

Mr. DURENBERGER. As I indicated, Mr. President, I understand this has been approved also by the Democratic manager, and I ask that the amendment be agreed to.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment.

The amendment (No. 1434) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1435 TO AMENDMENT NO. 1293

(Purpose: to provide uniform criteria with respect to transportation project conformity determinations)

Mr. DURENBERGER. Mr. President, I send a second amendment to the desk on behalf of the Senator from California.

The PRESIDING OFFICER. The pending amendment must be set aside before the Senator may offer another amendment.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that we set aside the pending amendment so that I may offer another amendment on behalf of the Senator from California.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER], for Mr. WILSON, proposes an amendment numbered 1435 to amendment No. 1293.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 57 of the amendment, between lines 19 and 20, insert the following new sentence:

"With regard to subparagraphs (A), (B), and (C) of paragraph (2), the requirements of such subparagraphs shall comprise the statutory criteria for making transportation project conformity determinations under this Act.".

Mr. DURENBERGER. Mr. President, this second amendment on behalf of Senator WILSON, I believe, is technical in nature. I know it is acceptable both to the Democratic and Republican managers. It simply makes clear that criteria in the bill for determining the conformity of a transportation project with an implementation plan are intended to constitute the statutory criteria applicable to any individual transportation project. If that is not technical, I do not know what is.

Mr. President, I ask that the amendment be agreed to.

Mr. WILSON. Mr. President, this amendment provides uniform criteria with respect to transportation project conformity determinations in the Clean Air Act.

The language in this amendment permits a clearer interpretation of the Clean Air Act with regards to transportation projects. Without this amendment, confusion could result with the interpretation of existing law in the area of fulfilling statutory requirements for transportation projects.

The impacted air district, the South Coast Air Quality Management District, has been consulted and has no objection with the clarifying amendment.

Mr. President, this amendment has been reviewed by both managers of the bill, and has been accepted.

The amendment is not considered controversial, and I urge its adoption.

The PRESIDING OFFICER. Is there any further debate?

If not, the question is on agreeing to the amendment.

The amendment (No. 1435) was agreed to.

Mr. DURENBERGER. I move to reconsider the vote by which the amendment was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KERREY). Without objection, it is so ordered.

THE RYAN NOMINATION

Mr. WARNER. Mr. President, at this time I would like to make some remarks about the pending nomination of Timothy Ryan, who has been nominated by the President to be the Director of the Office of Thrift Supervision and whose nomination was reported out by the Banking Committee on Friday.

The report, I understand, has been filed, and I would presume it is the intention of the leadership to schedule the debate and, hopefully, the vote prior to the Senate's going on recess. In the judgment of this Senator, there are some imperative reasons why we should address this nomination very promptly.

Mr. President, I say to the managers of the bill, while I have a considerable amount of material I would like to cover this evening, should they seek recognition at any time, I will be happy to yield the floor. Mr. President, I will make now a unanimous-consent request that I might supplement the remarks that I am about to commence for the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I have known Mr. Ryan for nearly 14 years, and in the course of that rather lengthy association where he has rendered me professional advice in the capacity of a lawyer, he has been a very close friend, together with his lovely wife Judy. I watched their adoption of children. I came to know them as a family that really in so many ways stands out as the model of the generation now coming into major responsibility in the governmental sectors of America, State and Federal, and in the private sector.

It has been a remarkable, wonderful husband-wife team, and Tim Ryan, together with the support of his wife and family, has put together a splendid career. He has within his practice of law risen to the top ranks of his law firm, a major international law firm of considerable size, and in that period of time he has gained, in my judgment, extensive experience which certainly lends itself to the challenging tasks of the Office of Thrift Supervision.

When we have the heavy responsibility of advise and consent, the Senate should look for characteristics in each individual. Each individual should be examined on their own merits to determine, first, are they persons of intelligence. Have they been able to compete in their selected, chosen professions, compete in a way that they have gained recognition and have worked their way into positions of responsibility?

From my examination of the record before the Banking Committee, my knowledge of Tim Ryan, and also in the view of many other individuals who are now coming forward to give their own personal perspectives of this nominee to the Senate, Tim Ryan excelled in the law profession. He took on many, many cases and represented many clients with extremely complex problems.

So I do not think the question of his intelligence and his ability as a lawyer is at issue.

The next characteristic is personal. Is this individual one of moral character, one of integirty and indeed, one of honesty? This is a position of public trust. Considering the millions upon millions and millions of small savers all over America, the question of being honest and forthright, it seems to me, is as important as any in public service. Here again Mr. Ryan, when approached by the President's staff, gave them his entire background factually. He disclosed certain facts which now have been brought out in the press, but up front, and in an honest way he gave all that information to the FBI which was preparing his dossier for the purpose of the President and staff reviewing this nominee's background. Then, once the President had made the decision to send his name forward to the Senate, that information was made available to all members of the Banking Committee. So far as I know, each of them had full knowledge of the contents of the FBI report during the course of their deliberations on Friday. So I do not think there is any question of the man's honesty or his integrity.

The question of his specific experience is one that I can understand is of concern, first, to the members of the committee and now, as the remainder of the Senate undertakes its responsibilities to study this case, they, too, will carefully examine the specific cases and responsibilities he has handled as a lawyer. Each of us will have to make a decision on the question: Is this man, taking into consideration all of his attributes, qualified to receive the advice and consent of the Senate? In a sense, then, is the Senate to confirm the President's judgment that he be given the position of Director, Office of Thrift Supervision?

The Secretary of the Treasury, Secretary Brady, has taken a very active role in this nomination. The position for which Tim Ryan has been selected is one that is under his cognizance. He has spent extensive time with Tim Ryan. He went deeply into his background. He discussed it throughout all levels of the White House. And then, largely on the recommendation of Secretary Brady, this nomination came forward to the Senate.

Secretary Brady served as a member of the U.S. Senate. Fortunately, he knows many here personally. I think a great deal of weight should be accorded his judgment. I talked to him several times over the weekend. Together we made calls to our colleagues. Today we discussed the nomination at some length, and we in particular took into consideration the viewpoints of others who thus far have not had the opportunity to be heard from here in the Senate and outside the Senate.

At this time, Mr. President, I would like to read one letter. It is one of a number that I will put in the RECORD this evening, which I think will be of great help to those Senators who are going to, I am certain and confident, look at this nomination fairly and objectively, and determine for themselves whether or not Mr. Ryan has the character, the intelligence, and the experience to undertake this position.

This letter is dated April 2, 1990. It is addressed to the leadership of the Senate. I might add that the letter is signed both by Frank Carlucci, former Secretary of Defense, and his wife.

DEAR SENATORS DOLE AND MITCHELL: We write in support of the confirmation of Timothy Ryan to be director of the Office of Thrift Supervision.

Tim's lack of experience in the financial services industry is certainly a valid consideration. The question the Senate must face is whether Tim's strength of character and general ability outweigh that lack of experience. As those who have known him well for twenty years, we believe they do. As those who have also been involved in the public policy area for many years, we believe that in this type of crisis the ability of manage with discipline and the ability to generate public confidence are far more important than professional experience. Indeed, it seems that some of the most experienced and best known professionals are responsible for many of the problems of the financial services industry.

Financial services is not some occult science. Frank has been able to learn it after thirty years of little other than government experience. The key ingredient is judgment, a quality that seems to have been lacking in some of the most talented professionals. For all his lack of experience, Tim Ryan has judgment.

Frank would observe that he was criticized for lack of experience during confirmation hearings for, among other positions, Director of OEO, Deputy Secretary of Defense, and Under Secretary of HEW. Yet, he was able to learn his responsibilities quickly as a result of his general background in government. Tim Ryan has such a background.

We have full confidence that the Senate will sort out important considerations from sensationalized minor indiscretions committed years ago, but as those who know him well, we would like to go on record as endorsing Tim's strong moral character. He and his wife, Judy, are devoted family people who adhere to the ethical values we all hold dear. Our faith in Tim is such that for the past ten years, he has been the Executor of our estate, should we both die simultaneously. We have three children.

We have full confidence that the Congress will find Tim Ryan a forthcoming and straightforward partner. He is not a game player. On the contrary, he will give it to you as he sees it. That is a quality I know you are seeking.

Our argument is not based on fariness to an individual. Rather, it is premised on

what is best for the country. Certainly, you can find someone with more experience. But you will have to search long and hard for someone with Tim's integrity and total commitment to excellance in government.

His prompt confirmation is the best solution to a critical and time-sensitive problem. We strongly urge it.

Mr. President, I see the leader. Is it the desire of the leader to address the Senate at this time? I would be happy to yield the floor.

Mr. President, I had asked for unanimous consent which I have now received to put in other letters. I shall do that and yield the floor at this time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HOLLAND & KNIGHT,
Miami, FL, March 20, 1990.

Senator SAM NUNN,
U.S. Senate,
Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR NUNN: As you are probably aware Timothy Ryan has been nominated for appointment as the Director of the Office of Thrift Supervision by the Bush Administration. This appointment is subject to Senate confirmation.

Tim is an old and close friend in whom I have a great deal of trust and confidence. Tim was the Solicitor of Labor who used his considerable legal skills and powers of persuasion to obtain a significant and binding agreement from the Teamsters Central States Pension Fund in response to your Permanent Subcommittee on Investigations hearings. I worked closely with Tim during that difficult time and I admired his intelligence, judgment, integrity, and forcefulness. In my opinion, second to your efforts with PSI, Tim had a significant impact with respect to cleaning up the Central States Pension and Health and Welfare Funds. I have followed Tim's career through the years and I have been impressed with his many accomplishments and with his significant ability and outstanding legal talents.

Obviously, the thrift industry is in a critical period of restructuring and requires an individual with strong leadership and extraordinary judgment and wisdom. Tim clearly possesses these qualities. I feel comfortable in asking you to review Tim's record and to support this nomination based solely on his exceptional qualifications.

I would be pleased to discuss Tim's qualifications with you. I believe Tim will welcome the opportunity to meet with you to discuss your thoughts, concerns and recommendations regarding the thrift industry. I have enclosed his resume for your review. If I can be of further assistance or if you have any questions or comments concerning Tim, please do not hesitate to contact me. I look forward to seeing you soon in Washington.

Sincerely,

HOLLAND & KNIGHT,
MARTY STEINBERG.

W. HARRISON WELLFORD,
Washington, DC, April 2, 1990.

Hon. GEORGE J. MITCHELL,
U.S. Senate, Russell Senate Office Building,
Washington, DC.

DEAR SENATOR MITCHELL: I understand that the full Senate will vote on Tim Ryan's nomination to be Director of the Office of Thrift Supervision later this week. I have known Tim Ryan for ten years, since we worked together on the Carter-Reagan transition. He handled a number of delicate problems during that sensitive period with a spirit of bi-partisan cooperation and good will.

I know him to be a hard-working, honest, intelligent person, with a strong sense of public service. He will be a strong enforcer and a breath of fresh air in the savings and loan industry. Based on my experience, I predict that he will adopt a pragmatic approach to problem solving; he is definitely not an ideologue.

Given the mess that the so-called experts have made of the savings and loan issue, an enforcement-minded pragmatist is probably a better choice than someone who has spent years in the industry. I hope you will keep these thoughts in mind when you cast your vote on Wednesday.

Sincerely,

W. HARRISON WELLFORD.

MAIN STREET PRODUCTION CO.
April 2, 1990.

Hon. GEORGE MITCHELL,
Majority Leader, U.S. Senate, Washington, DC.

DEAR GEORGE: I have known Tim Ryan for 15 years, as a fellow official in The American Council of Young Political Leaders and as a personal friend. We differ markedly on politics, obviously. But I can attest categorically to his integrity, character and commitment to public service.

I cannot pretend to know everything the job of Director of the Office of Thrift Supervision requires, but I know that if intelligence and drive are as central to it as they are to most tasks, Tim Ryan is a fine choice.

Sincerely,

HODDING CARTER III,
President.

REED SMITH SHAW & MCCLAY,
Washington, DC, April 2, 1990.

Hon. GEORGE J. MITCHELL,
Majority Leader, U.S. Senate, U.S. Capitol, Washington, DC.

Hon. ROBERT J. DOLE,
Minority Leader, U.S. Senate, U.S. Capitol, room Washington, DC.

DEAR SENATORS MITCHELL AND DOLE: At the Senate Banking Committee hearings on the nomination of Timothy Ryan to the Director of the Office of Thrift Supervision, some senators expressed concern about Mr. Ryan's general ability to handle this job, as well as his experience in the financial services area. The purpose of this letter is to briefly respond to those concerns.

I have worked closely with Tim Ryan for the past six years. During that time, we have represented investment banking and real estate firms on difficult investment and real estate transactions involving pension plan assets. Although he has no direct Thrift Industry experience, Tim has considerable financial services experience which well qualify him for this job.

Tim is exactly the type person the country needs to address the Thrift Industry problems. He's honest, direct and not tied to any of the various constituencies interested in the S&L situation. Quite frankly, we are lucky to have a man of his quality willing to consider this job.

If I can be of any further assistance, please do not hesitate to call me.

Very truly yours,

WILLIAM B. SAXBE.

Mr. WARNER. Mr. President, I suggest the absence of a quorum.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I had yielded the floor thinking the majority leader was going to seek recognition. I now am informed that he will be back shortly and therefore I would like to take some additional time with which to continue my remarks on behalf of Timothy Ryan. I will promptly yield the floor should the majority leader return and desire to seek the floor.

Mr. President, I should now like to read from a letter from the chairman of the board of Booz, Allen & Hamilton, internationally recognized management firm, dated April 2. It is also addressed to the leadership of the Senate.

DEAR SENATORS DOLE AND MITCHELL: For more than 75 years, Booz, Allen & Hamilton has been in the business of advising its clients—major Fortune 500 corporations worldwide—on leadership and strategy. Through our work with Boards of Directors, Boards of Management, CEOs and foreign governments in organizational planning and restructuring, privatization, executive evaluation and strategy development, we've often focused on the issue of how one selects the right leader to effect change and achieve success. It is in this context that I am writing to you about Timothy Ryan, now being considered for the post of director of the Office of Thrift Supervision.

We believe that there are certain key qualities which are required in a senior executive, qualities which transcend specific industry experience and which, frankly, are far more crucial.

Vision and a clearly-defined sense of purpose. An ability to put the management of the organization in proper perspective, to set the strategy and remain focused while making necessary tactical decisions.

Personal strength and conviction. Having the guts to see the process through to completion.

Intelligence, imagination and sound judgment. An ability to grasp issues and the environment in which the organizaton is operating quickly and effectively, to focus on priorities, seek and accept counsel, frame a balanced course of action.

Tough-minded and action-oriented. An ability to get things in motion, make tough decisions, stay the course, but flexible enough to adjust/adapt to significant changes and new developments.

Self-confidence and commitment to success. The courage to withstand inevitable criticisms and confidence that one knows what needs to be done.

Management Skills. The ability to manage an organization and manage a problem through to resolution and effectiveness.

Communications skills and political sensitivity. The ability to represent the organization publicly, to communicate an understanding and create acceptance of its purpose/actions, together with an understanding of political realities and their impact.

Personal integrity. This, it seems to me, needs no further explanation.

I first met Tim Ryan 15 years ago when, as a young attorney, he worked successfully on some extremely complex legal matters for Booz, Allen. His effectiveness in this role resulted in our entrusting him and his firm with some of our most sensitive and difficult issues. Our association has continued over that period and I have watched his career develop and flourish.

I can say without hesitation that he meets these criteria fully and completely, as an attorney, as a manager of sizeable organizations, as a public servant of consummate effectiveness. I endorse his nomination without reservation and with considerable enthusiasm.

On a personal note, I want to echo the comments of Senator Riegle in deploring the exposure of highly confidential information regarding Tim Ryan. When highly-qualified Americans offer themselves for public service they should not be subjected to such counterproductive and inappropriate activity.

Mr. President, this I think is representative of a dozen or more letters which have come forward, largely unsolicited, to try and help the Senate in its collective and individual evaluation of this man in a very fair manner.

Taking into consideration that he was forthright in acknowledging that about 17 years ago he made a mistake, and he experimented with a controlled substance. Controlled substances now are the cause for a nationwide war. All of us are joined in trying to rid our society of drugs. He admitted it, and he also assured me, as he did the administration, that it was a limited experiment, just one or two times, and never thereafter, ever again, did he use any controlled substance.

Mr. President, that was 15 to 17 years ago. I remember that period very well, as I was then in the service of our Government in the Department of the Navy and had under my responsibility literally hundreds of thousands of young persons serving in the Navy and the Marine Corps. I lived with that generation, their stresses and strains, both in Vietnam and here in the United States.

For the United States of America today to, in a blanket way, say that if you touched a controlled substance one or two times in that period of time, you are not qualified now to move on and accept major responsibilities in the private or the public sector that would be a terrible mistake in the judgment of this Senator. No matter how serious the mistake was.

It seems to me that that generation was subjected to a most unusual period of history, and as such, we should examine each case individually today and not write many of them off simply because they made a mistake. This is particularly true when an individual who made the mistake, up front, voluntarily discloses it as a part of the process, which the executive branch now requires. It is an important part of the process necessary to examine closely the young people who are stepping forward to take positions of responsibility.

Mr. President, I close these remarks urging Senators to look at the material that I will provide for the RECORD tonight and tomorrow. We will be joined by the minority member of the Banking Committee, Mr. GARN, who is currently in travel; otherwise, he would be with me this evening. He will put in the RECORD and make available to Senators other letters as they come in.

I think these letters will be very helpful to the Senate, reaching what I know will be a fair, objective consideration of this young American, who is willing to step forward, and take on a challenge of incalculable proportions.

Mr. President, I, once again, urge my colleagues to think carefully about this nomination sent forward by the President, with the full support of one of our former members, Mr. Brady, Secretary of the Treasury.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1437 TO AMENDMENT NO. 1293

(Purpose: To make technical changes)

Mr. MITCHELL. Mr. President, on behalf of Senators DECONCINI and MCCAIN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment will be set aside. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL], for Mr. DECONCINI (for himself and Mr. MCCAIN), proposes an amendment numbered 1437 to amendment No. 1293.

Mr. MITCHELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27 of the amendment, strike lines 1 through 6 and insert the following:

"(e) PLAN REVISIONS.—Each revision to an implementation plan submitted by a State under this Act shall be adopted by the State after reasonable notice and public hearing. The Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement of this Act.

"(2)(A) Except as provided in subparagraph (B), each State that contains a nonattainment area shall fully implement all provisions of any implementation plan for such area that has been approved by the Administrator, in accordance with the schedules contained in the plan.

"(B) The State shall not relax a provision or schedule described in subparagraph (A) unless the Administrator has approved an alternative control measure pursuant to paragraph (3) of this subsection relating to such provision or schedule.

"(3) Nothing in this Act shall prohibit a State that contains a nonattainment area from revising the implementation plan of such State for such area to substitute an alternative control measure for a control measure in effect at the time of such revision (hereinafter referred to as an 'existing control measure'), if the State convincingly demonstrates, to the satisfaction of the Administrator, that the existing control measure is not otherwise required under this Act or under guidelines or regulations issued or promulgated by the Administrator and the alternative control measure—

(A) is not included in the implementation plan to be revised;

(B) is not otherwise required by this Act;

(C) will provide a degree of emissions control that is equal to or greater than the degree of emissions control that the full implementation of the existing control measure would provide; and

(D) will provide such degree of emissions control as expeditiously as would the full implementation of the existing control measure.

"(4) If the Administrator determines, after reasonable notice and public comment, that—

"(A) the State described in paragraph (3) has made a convincing demonstration required under such paragraph; and

"(B) the proposed revision to the implementation plan of the State meets the requirements of paragraph (1), the Administrator shall approve such revision.

Mr. DECONCINI. Mr. President, I am offering an amendment that builds upon the mandate in S. 1630, and the substitute offered by the majority leader for tough, new clean air measures coupled with additional time for attainment of standards. This in my opinion represents a sound approach.

However, in allowing this additional time for attainment, we must ensure that air quality gains made to date are not lost.

When Congress passed the 1977 Clean Air Act Amendments, many States took advantage of the new attainment deadlines in that law to postpone compliance schedules or the implementation of control measures that were already in their State plans.

EPA even consented to the relaxation of compliance deadlines in court-approved consent decrees. As a result, reductions in dangerous air pollutants were needlessly delayed.

I believe that air quality benefits that would be obtained from clean air strategies already on the books should not be postponed because Congress gives the cities more time to develop additional strategies.

Therefore, I am proposing an amendment to prohibit the relaxation of emission reduction requirements and schedules already required as part of State implementation plans [SIPS] adopted to meet the current deadlines.

In my own State of Arizona, we have made great strides toward attacking the problem of urban air pollution. We have adopted a tough auto emissions

testing program, and a mandatory oxygenated fuels program for our major metropolitan areas. These measures are the products of painstaking legislative efforts, driven largely by the mandates of the Clean Air Act. According to EPA, they should be adequate to produce attainment in Phoenix and Tucson by as early as 1991.

But without a clear signal from Congress, the opponents of these measures may seek to scuttle them, citing the additional time allowed for attainment under the legislation currently in the committee bill and the Mitchell substitute. My amendment would make abundantly clear that this legislation is intended to build upon existing control strategies, not undercut them. It requires that until an area demonstrates actual attainment of standards, new implementation plans must contain provisions at least as stringent and comprehensive as those included in the previous implementation plan.

The amendment does not impose any new burdens on State or local governments: It simply requires that they stick with control strategies that have already been adopted.

In the vast majority of cases, these are strategies that have been developed by the States themselves after thorough public debate and discussion.

My amendment does not prohibit States from modifying existing control measures to make them more efficient or effective. Modifications are prohibited only where they would make the control strategy less stringent or would relax existing deadlines.

We have made significant changes in the amendment so that it does not violate the bipartisan agreement.

I appreciate the assistance of the floor managers and their staffs in working with me on this amendment.

Also, I want to thank David Baron, assistant director of the Arizona Center for Law in the Public Interest, for his help. For over the last 6 years, the center, a nonprofit public interest law firm, has been on the frontlines in Arizona's fight for clean air.

In conclusion, these amendments to the Clean Air Act that we are considering should not be viewed as condoning delay in important clean air measures.

My amendment ensures that new steps will be taken without undermining the progress that has been made to date.

Mr. MITCHELL. Mr. President, I am advised by staff and the managers that this amendment has been cleared on both sides of the aisle.

Accordingly, I am prepared for adoption of the amendment, if there is no further debate.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Maine.

The amendment (No. 1437) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. I would like to ask my colleague from Montana a few questions with regard to the Outer Continental Shelf provision in the legislation.

Mr. BAUCUS. I would be happy to respond to any questions from the senior Senator from California.

Mr. CRANSTON. Would the Senator clarify the purpose of the Project Emission Reduction Fund called for in the section on Outer Continental Shelf air pollution requirements.

Mr. BAUCUS. The Project Emission Reduction Fund is intended to provide additional means whereby the oil companies can obtain offsets. Each project obtaining their offsets through this fund will have to meet the exact same offset requirements which would apply, if they had obtained their offsets directly from an offset provider. If a company chooses to obtain their offsets through the fund, a specific set of offsets from the fund will be identified for that project, and those offsets must remain in place for the entire period that the project emits air pollution.

Mr. CRANSTON. I would also like to ask the Senator to clarify the offset provisions of section 327.

Mr. BAUCUS. During the exploration, development, and production phases, the OCS project must provide sufficient offsets to meet the offset requirements associated with the project's emissions. During construction, due to the unique circumstances of OCS facilities whose construction can result in a very large amount of emissions for a short period of time, a special method of offsetting construction is provided. By way of example, if construction of an OCS project results in 300 tons of emissions in 1 year, and the peak annual operation emissions are only 100 tons, the project operator can choose to offset construction at a rate as low as 100 tons per year for 3 consecutive years. These construction offsets are in addition to the development and production offset requirements. It is intended that both the project emissions and corresponding offsets be specified in the permit issued by the Interior Department. If an OCS operator chooses to use an onshore source of offsets for an OCS project, it is intended that the Interior Secretary will have established through regulations a procedure whereby the onshore district can enforce the offsets occurring within their jurisdiction.

Mr. CRANSTON. I thank the Senator for his explanation. This resolves many of my concerns about this section of the amendment. I ask unanimous consent to have printed in the RECORD at this point a statement of intent regarding section 327.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OUTER CONTINENTAL SHELF ACTIVITIES (SECTION 111)

SUMMARY

The bill adds a new section 327 to the Act that requires the Secretary of the Interior, within 180 days of enactment, to promulgate requirements applicable to sources of air pollution in the Outer Continental Shelf (OCS) offshore California. The OCS requirements must be as stringent as would be applicable if the OCS sources were located in the corresponding onshore area. Specific regulations implementing the requirements must be promulgated by the Secretary after obtaining written approval from the Administrator. Procedures are included for waiving specific pollution control technology requirements due to technical infeasibility or an unreasonable threat to health and safety. A Project Emission Reduction Fund is established to facilitate the securing of offsets. For OCS areas other than California, the Secretary of the Interior is required to complete a study, within three years of enactment of this Section, which addresses the onshore impacts of current and future OCS emissions on adjacent onshore areas.

DISCUSSION OF SPECIAL REQUIREMENTS FOR OFFSHORE CALIFORNIA

OCS activities offshore California, including exploration, construction, development, and operation activities, emit a significant amount of air pollution which can adversely impact coastal air quality. This section of the bill is intended to ensure that air pollution from these OCS activities do not significantly affect the air quality in any coastal region of California. OCS air pollution will be regulated by the Secretary to protect federal and state ambient air quality standards. These requirements are intended to include, at a minimum, the applicable federal best available emission control technology (BACT) requirements and offset requirements for all new facilities; reasonably available control technology (RACT) requirements for all existing facilities; and permitting, monitoring, testing and reporting requirements for all new, modified and existing facilities. Each approval by the Secretary of an Exploration Plan or Development and Production Plan will be accompanied by findings of compliance with this Section. To maintain stringency with onshore requirements, it is also intended that the Secretary should notify the adjacent onshore air district of such findings prior to approval of the OCS activity. The regulations adopted pursuant to this legislation should minimize differences in air pollutant regulation which currently exist between OCS sources offshore California and sources located in the adjacent offshore air district.

This legislation provides the Secretary up to 180 days to establish regulations to implement Section 327. The EPA Administrator shall prepare draft regulations to implement Section 327. The EPA Administrator shall prepare draft regulations which meet

the requirements of this Section. The Secretary must obtain written concurrence from the EPA Administrator on all regulations promulgated pursuant to Section 327 prior to adoption of the regulations. It is anticipated that the Administrator will not draft a unique set of air quality requirements for the OCS.

Section 327(a)(1) requires OCS facilities to provide a quantity and type of offsets which is as stringent as would be required if the facility was located in the onshore air district. Both the project emissions and corresponding offsets will be specified in the permit issued by the Secretary. If an OCS operator proposes to use an onshore source of offsets for an OCS project, it is intended that the Secretary will have established, through regulations, a procedure whereby the onshore district can enforce the offsets occurring within their jurisdiction. During the exploration, development, and production phases, the OCS project must provide sufficient offsets each year to meet the offset requirements associated with the project's emissions. Construction emissions (which involve a substantial amount of oxides of nitrogen pollution from construction barges and other marine vessels) will also be required to be controlled and offset consistent with the requirements of the adjacent onshore air district. Due to the unique circumstances during OCS construction, wherein a large amount of oxide of nitrogen emissions occur within a relatively short period of time, a special provision has been added to allow for some non-contemporaneous offsetting of construction emissions. The bill would provide that for an OCS source whose construction resulted in, for example, 300 tons of emissions within a single year, but whose peak annual operational emissions are 50 tons a year, the construction offsets could be provided at a rate as low as 50 tons per year for a period of 6 consecutive years. If an applicant proposes to use this partially non-contemporaneous method of offsetting construction emissions, the company would be obligated to provide some of their construction offsets at the same time as they were providing offsets to cover the first few years of their production emissions.

The EPA Administrator shall delineate geographical boundaries for OCS air districts which correspond to the adjacent onshore air districts. The boundaries of such OCS air districts shall consider wind flow patterns toward shore during ozone exceedance periods and shall initially extend a distance of 25 miles from the shoreline, and can be extended by the Administrator.

The bill provides that the Secretary, with written concurrence of the Administrator and after providing for public comment, can waive a requirement for an OCS source under specified conditions. If the Secretary waives a requirements for an OCS source, the Secretary must make written findings explaining the basis for the waiver and must impose another requirement equal to or as close in stringency to the original requirement as possible. The three conditions when a requirement can be waived are as follows. First, the Secretary can waive a pollution control technology requirement and substitute an alternative technology that achieves the same level of emission control. Second, the Secretary may waive a requirement for pollution control technology that is technically infeasible or which would cause an unreasonable threat to health and safety. The third condition when a requirement can be waived for an OCS source is when the Secretary makes the finding that a requirement imposes a greater level of emission control or greater amount of offsets then is or would be imposed if the source were located within the adjacent onshore air district. This third waiver is provided solely to ensure that onshore districts do not adopt emission control or offset requirements which are arbitary and capricious and have the effect of prohibiting OCS development.

The bill provides that OCS equipment contained in a plan of exploration or development and production plan approved by the Secretary prior to enactment of the section shall be considered existing sources, as long as that equipment is not moved to another OCS source. Existing sources will be regulated at least as stringently as existing sources in the adjacent onshore air district and new and modified sources will be regulated at least as stringently as new and modified sources in the adjacent onshore air district. It is intended that the regulations shall take effect with respect to new sources or modifications to existing sources on the date of promulgation. This process is intended to ensure that the OCS facilities carry their fair-share burden for air pollution control and prevent the need for instituting more stringent regulations onshore to compensate for unmitigated OCS emissions.

The bill provides that the authority of this section shall supersede any inconsistent authorities under this Act or the Outer Continental Shelf Lands Act (OCSLA). This provision is intended solely to impose additional responsibilities for air pollution regulation under Section 5 (a)(8) of the OCSLA and to ensure regulation of marine vessel emissions, notwithstanding Section 110(a)(5) of this Act. This provision does not repeal or modify any other federal, state or local authorities with respect to air quality, or any other responsibilities of DOI under the OCSLA. In no case shall this provision allow the violation of any National Ambient Air Quality Standard.

Subsection (a)(2) of the bill establishes a Project Emission Reduction Fund (PERF). The requirements for the quantity and type of offsets must be as stringent as would apply if the OCS facility was located in the adjacent onshore air district. Specific offsets must be identified for each project, and those offsets must remain in place for the entire period that the project emits air pollution. The Secretary may, with the consent of the Administrator, allow the Fund to be used to pay for an early implementation of emission control measures planned for the future under the applicable implementation plan or other relevant laws or regulations. In the event of such early implementation of emission control measures, the reductions shall be credited as offsets against OCS emissions only for the period for which the reductions are not otherwise required under the applicable implementation plan or other relevant law or regulation in effect at the time the emission control measures are credited to a specific OCS project. The above requirements shall apply whether the PERF fees are deposited into the fund or when the Secretary approves a direct transfer of PERF fees from the OCS operator to the entity implementing the offset project.

DISCUSSION OF SPECIAL REQUIREMENTS FOR OTHER OFFSHORE AREAS

This subsection requires, for areas other than offshore California, the Secretary to coordinate air pollution control requirements for OCS emissions and emissions in the adjacent onshore areas. This subsection also requires the Secretary to complete a study of the impacts of current and future OCS emission sources on the adjacent onshore areas. It is intended that the Secretary consult with the Administrator on the scope and content of the study and on any recommended actions which are found to be necessary, based on the study results, to address significant effects on onshore non-attainment areas.

GORE AMENDMENT TO CLEAN AIR LEGISLATION

Mr. SANFORD. Mr. President, I rise today to voice my support of Senator GORE's amendment accepted on Friday that would have a proenvironmental and prohealth effect. The amendment strikes provisions that would allow plants to buy the properties of individuals living next to the plants in order to reduce the health risks of toxic emissions instead of meeting tighter emissions standards.

These provisions have been characterized as "dead zone" provisions, since they would essentially allow facilities to create new areas where no one could live or work without being exposed to health risks greater than those allowed by this bill. In these circumstances, a facility that was exposing people to a cancer risk of greater than 1 in 10,000 or 1 in a million could simply move the people, rather than reduce toxic emissions, when a compliance deadline was imminent.

While such provisions might achieve the same health goals as emission reductions in some circumstances, there are two reasons why this approach cannot be accepted. First, this is not the type of ethic we should be endorsing as Earth Day approaches. My constituents have made it clear that they believe the burden of meeting health standards for air pollutants should fall on the facility that is emitting pollutants, not those who happen to live near a plant—meaning that compliance plans should figure out how to reduce emissions, rather than how to convince people to move away from the plant. I would also point out that a mitigation strategy that would ensure that no person is exposed to a risk of greater than 1 in 10,000 could still result in unacceptable health effects, if enough people were exposed even to low risk levels.

Second, the mitigation approach would not help guard against environmental effects. Some pollutants can begin to cause environmental damage at levels lower than those which pose unacceptable health risks. Pollutants can be transported long distances, and can accumulate in the environment or act in concert with other pollutants to harm the environment. While the EPA will try to account for such effects, Senator GORE's amendment will provide an additional margin of safety for the environment by encouraging additional emissions reductions, rather than making it very difficult for EPA to take action if it is suspected that a

mitigation strategy might still allow environmental damage to result.

Mr. President, the purpose of the clean air legislation before us is to clean up our Nation's air and to reduce the health risks from toxic emissions. Senator GORE's amendment will do just that.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDING THE RAZORBACKS AND LADY RAZORBACKS FOR A GREAT JOB IN NCAA TOURNAMENTS

Mr. BUMPERS. Mr. President, on behalf of myself and my colleague Senator PRYOR, I want to commend the University of Arkansas Razorbacks for the great job they did in the NCAA semifinals on Saturday.

David and I had an Arkansas turkey riding on the game, and unfortunately, we are going to have to deliver that turkey to Senator SANFORD of North Carolina. As we all know, he is a former president of Duke University and just as proud as a peacock today.

But we in Arkansas are equally proud of our team. Every player was superb in one or more games—and it would be unfair to pick any single player out for recognition. It was all a great team effort, and they have made this one of the most memorable years in Razorback sport history. We watched every minute of every game—except 5 minutes of the North Carolina game when CBS in Washington switched to the Clemson-Connecticut matchup.

I also want to pay special tribute today to head coach Nolan Richardson. After his first two seasons at Arkansas, when the Razorbacks were 31-30, he took a lot of criticism from many quarters. But he stood his ground, coaching as he thought best, and 3 years later the Razorbacks were in the Final Four for just the fourth time in history. They end the year as champions of the Southwest Conference, the Southwest Conference Tournament, and the NCAA Midwest Regional.

Despite the final results of their last matchup, the future looks especially bright. Coach Richardson has assembled a young team, with outstanding juniors and sophomores who will be even better next year.

I also want to recognize the achievement of the Lady Razorbacks, who had their most successful season in the history of Arkansas' women's basketball program. They not only advanced to the Elite Eight for the first time, they also won their first Southwest Conference crown. In all, they did a magnificent job.

Now I just want to know what the "Big O" said to that guy Dudek in the Texas game.

Mr. PRYOR. Mr. President, I would like to second the comments of my colleague Senator BUMPERS. We are both alumni of the University of Arkansas, and like many others in our State followed the Razorbacks closely during a truly exciting season. In our book, they are champions.

In addition to our outstanding seniors Lenzie Howell and Mario Credit, the Razorbacks have several younger players who will continue to make great contributions. Three outstanding sophomores will be back next year: Todd Day, Lee Mayberry, and Oliver Miller. Day led the Hogs in scoring this year, Mayberry was next, and the "Big O" set a new University of Arkansas record for blocked shots.

Another sophomore, Darrell Hawkins, figures to play a bigger role next season, as do juniors Ron Huery and Arlyn Bowers. But each member of the team made a big contribution that we will not soon forget.

Senator BUMPERS and I also want to pay tribute today to the Lady Razorbacks and their coach John Sutherland. Before a sold-out crowd of 7,500 at Maple Pavilion in California, the Lady Razorbacks played in their first ever NCAA Women's West Regional Championship.

During that game, the Lady Razorbacks shot better than 56 percent from the field, and were outrebounded by only 37 to 35. Their center, Delmonica DeHorney, scored a career-high 39 points and had 8 rebounds.

Despite the final score against Stanford, the Lady Razorbacks deserve a lot of credit for completing the best season in school history with a record of 25-5. They were listed in the AP top 25 for the first time, and Delmonica DeHorney was named the Southwest Conference's Player of the Year.

Delmonica, Juliet Jackson, Amber Nicholas, Blair Savage, Christ Willson, Kendall Mago, Wendy Scholtens, and the rest of the team deserve our thanks for an outstanding effort. We are very, very proud of their achievement, and wish them all the best in the seasons ahead.

ON CIGARETTE SMOKING

Mr. KERREY. Mr. President, I ask unanimous consent to have printed in the RECORD two letters that I received this week from Nebraska. The first letter is from a group of four cigarette manufacturers—the American Tobacco Co., Lorillard Tobacco Co., Philip Morris, USA, and R.J. Reynolds Tobacco Co.—to a Nebraska resident, Ms. Mae Thomsen.

In this letter to Ms. Thomsen the companies warn her of the potential of being singled out as a smoker for discriminatory tax treatment. They urge her to write her Representative to object. The letter is dated March 19, 1990.

The second letter is from Mr. Gregory P. Drew, attorney at law, Blair, NE. His letter is one line:

Mae Thompsen died of lung cancer on January 29, 1990.

Mr. President, I need say no more, and I yield the floor.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE AMERICAN TOBACCO CO., LORILLARD TOBACCO CO., PHILIP MORRIS U.S.A., R.J. REYNOLDS TOBACCO CO.,

March 19, 1990.

MS. MAE THOMSEN,
113 North 14th Street,
Blair, NE.

DEAR MS. THOMSEN: Are you tired of being singled out for unfair tax increases?

If you're like most smokers we know, you've had your fill of this kind of discriminatory treatment.

That's why we're writing to warn you about the proposals now pending in Congress . . . proposals that threaten your rights *and* your pocketbook.

Several of these proposals aim to double the amount of federal cigarette tax you're paying now. One proposal aims to almost triple it.

Think of it. You and your fellow smokers already pay about $10 billion per year in local, state, and federal cigarette taxes. But that's not enough to satisfy some members of Congress. They want you to pay even more!

There's only one way to stop this outrageous tax threat. You must write and call Washington now.

As American cigarette manufacturers, we care about all our customers. And we want to do all we can to help you in the battle against unfair taxes and discrimination. That's why we've joined together to alert you to this latest threat.

But there's only so much we can do. The rest is up to you. Your elected officials in Washington do care about what people back home think. But they must hear from you. If you want to head off a federal excise tax increase, you must contact Washington today.

It's easier than you think. Here's how to do it:

1. Write short, personal letters to your Federal officials.

Tell them you're fed up with unfair tax increases. Let them know you're tired of being treated like a second-class citizen!

Urge them to find other ways to reduce the deficit. Tell them loud and clear: "Don't balance the budget on the backs of smokers!"

Point out that smokers already pay far more than their fair share in excise taxes—nearly $10 billion a year!

Tell them smokers shouldn't have to foot the whole bill for programs that are everyone's concern.

ATTORNEY AT LAW,
Blair, NE, March 26, 1990.
Hon. J. ROBERT KERREY,
U.S. Senate,
Washington, DC.

DEAR SIR: Mae Thomsen died of lung cancer on Jan. 29, 1990.

Sincerely,

GREGORY P. DREW.

AMENDMENT TO INTERNATIONAL REGULATIONS FOR PREVENTION OF COLLISIONS AT SEA—MESSAGE FROM THE PRESIDENT RECEIVED DURING RECESS—PM-106

Under the authority of the order of the Senate of Janaury 3, 1989, the Secretary of the Senate, on March 30, 1990, during the recess of the Senate, received the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

Consistent with the International Navigational Rules Act of 1977 (Public Law 95-75; 33 U.S.C. 1602), I transmit herewith an amendment to the International Regulations for Preventing Collisions at Sea, 1972, as amended, which was adopted at London, October 19, 1989. The Convention on the International Regulations for Preventing Collisions at Sea (72 COLREGS) was adopted at London, October 20, 1972, to replace the 1960 Collision Regulations. The 72 COLREGS entered into force July 15, 1977, and there are currently over 100 countries party to the convention. The 72 COLREGS were previously amended in November 1981 and in November 1987 to clarify technical language in the existing regulations.

This amendment modifies the language of rule 10(d) that governs the conduct of vessels in an inshore traffice zone of a traffic separation scheme adopted by the International Maritime Organization. The amendment was designed to remove the ambiguity inherent in the words "normal" and "through traffic" as used in the existing text. This ambiguity lent itself to different interpretations by coastal states anxious to limit traffic in inshore traffic zones in order to reduce the risk of pollution from collision or stranding. The new language for rule 10(d) is phrased so that the mariner should have a better understanding of his duties and obligations with regard to the use of inshore traffic zones by ships.

Consistent with section 5 of the Inland Navigational Rules Act of 1980 (section 5 of Public Law 96-591; 33 U.S.C. 2073), this proposed amendment has been considered by the Rules of the Road Advisory Council, which has given its concurrence to the amendment.

In the absence of a duly enacted law to the contrary, I will proclaim that the amendment will enter into force for the United States of America on April 19, 1991, unless by April 19, 1990, more than one-third of the Contracting Parties have notified the International Maritime Organization of their objection to the amendment.

GEORGE BUSH.

THE WHITE HOUSE, *March 30, 1990.*

MESSAGE FROM THE HOUSE RECEIVED DURING RECESS

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Under the authority of the order of the Senate of January 3, 1990, the Secretary of the Senate, on today, April 2, 1990, during the recess of the Senate, received a message from the House of Representatives announcing that the Speaker has signed the following bill and joint resolution:

S. 388. An act to provide for 5-year, staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes; and

H.J. Res. 500. Joint resolution to designate April 6, 1990, as "Earth Day, U.S.C."

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. BYRD].

MESSAGES FROM THE HOUSE

At 1:04 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3. An act to authorize appropriations to expand Head Start programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services, and for other purposes;

H.R. 2209. An act to enable producers of soybeans to develop, finance, and carry out a nationally coordinated program, for soybean promotion, research, and consumer information, and for other purposes; and

H.R. 3847. An act to redesignate the Environmental Protection Agency as the Department of Environmental Protection, and for other purposes.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2209. An act to enable producers of soybeans to develop, finance, and carry out a nationally coordinated program for soybean promotion, research, and consumer information, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 3847. An act to redesignate the Environmental Protection Agency as the Department of Environmental Protection, and for other purposes; to the Committee on Governmental Affairs.

MEASURES PLACED ON THE CALENDAR

Pursuant to section 300 of the Congressional Budget Act of 1974, as amended, the Committee on the Budget was discharged from the further consideration of the following concurrent resolution; which was placed on the calendar:

S. Con. Res. 110. Concurrent resolution setting forth the congressional budget for the U.S. Government for fiscal years 1991, 1992, and 1993.

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3. An act to authorize appropriations to expand Head Start programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, April 2, 1990, he had presented to the President of the United States the following enrolled bill:

S. 388. An act to provide for 5-year staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2696. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Immigration Reform: Employer Sanctions and the Question of Discrimination;" to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GLENN, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 2006: A bill to establish the Department of the Environment, provide for a global environmental policy of the United States, and for other purposes (Rept. No. 101-262).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. RIEGLE, from the Committee on Banking, Housing, and Urban Affairs:

Timothy Ryan, of Virginia, to be Director of the Office of Thrift Supervision for a term of five years (Exec. Rept. 101-20).

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to

appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DECONCINI:

S. 2387. A bill to amend the Internal Revenue Code of 1986 to exempt Federal law enforcement officers and firefighters from the penalty tax on early distributions from retirement plans; to the Committee on Finance.

By Mr. CRANSTON:

S. 2388. A bill to provide for the striking of medals in commemoration of the Centennial of Yosemite National Park; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. THURMOND:

S. 2389. A bill to extend until January 1, 1994, the existing temporary suspension of duty on tetraamino biphenyl; to the Committee on Finance.

By Mr. INOUYE:

S. 2390. A bill for the relief of Mark Maio Fernandez; to the Committee on the Judiciary.

By Mr. GLENN (for himself, Mr. HATFIELD, Mr. MOYNIHAN, Mr. KOHL, Mr. HEINZ, Mr. SIMON, Mr. MURKOWSKI, Mr. CONRAD, and Mr. BINGAMAN):

S. 2391. A bill to establish Summer Science Academies for talented, economically disadvantaged, minority participants, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. KASTEN:

S. 2392. A bill to foster and enhance the wise stewardship of natural resources on America's agricultural lands, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. EXON (for himself, Mr. GORE and Mr. GORTON):

S. 2393. A bill to prohibit certain food transportation practices and to provide for regulation by the Secretary of Transportation that will safeguard food and certain other products from contamination during motor of rail transportation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. CRANSTON:

S.J. Res. 283. Joint resolution to commemorate the centennial of the creation by Congress of Yosemite National Park; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI:

S. 2387. A bill to amend the Internal Revenue Code of 1986 to exempt Federal law enforcement officers and firefighters from the penalty tax on early distributions from retirement plans; to the Committee on Finance.

EXEMPTION FROM PENALTY TAX ON EARLY DISTRIBUTION OF RETIREMENT FUNDS TO FEDERAL POLICE AND FIREFIGHTERS

● Mr. DECONCINI. Mr. President, I rise today to introduce legislation which is a companion to S. 2250, the Federal Law Enforcement Pay Reform Act of 1990, that I introduced on March 9, 1990.

The only major recommendation of the National Advisory Commission on Law Enforcement that was not included in S. 2250 was a matter that concerned the tax penalty levied on Federal law enforcement officers who retire before age 55 and elect to receive the "alternative form of annuity" [AFA].

This legislation will amend the Internal Revenue Code of 1986 to exempt Federal law enforcement officers and firefighters from the 10 percent penalty on early distributions of their retirement funds.

Mr. President—if a Federal law enforcement officer retires today between age 50, when he becomes eligible, and age 55, when it becomes mandatory, he must pay a 10 percent penalty on the amount he paid into his own retirement account over the previous 20 to 30 years. These funds have already been taxed during the years they were earned. This younger age retirement eligibility for law enforcement was established specifically because of the rigors of the profession and the need for this group of Federal employees to be in excellent physical health and conditioning in order to perform their mission safely.

When it was drafted, the Internal Revenue Code of 1986 did not take into account the fact that many Federal officers are eligible for and take advantage of retirement prior to age 55. At one time, this penalty was levied on employees who retired prior to age 59½. The age was then reduced to 55 in order to accommodate Federal employees who were eligible for bona fide retirements. The Federal law enforcement retiree was overlooked during this process. Traditionally, Federal law enforcement officers have been encouraged to retire when they become eligible and this tax penalty is an unfair burden considering that other Federal, State, and local taxes are also in effect.

I request unanimous consent that the entire text of this bill be printed in the RECORD and I respectfully request that my colleagues join me in cosponsorship of this bill.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2387

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXEMPTION FROM PENALTY TAX ON EARLY DISTRIBUTIONS FROM RETIREMENT PLANS FOR FEDERAL LAW ENFORCEMENT OFFICERS AND FIREFIGHTERS.

(a) IN GENERAL.—Subparagraph (A) of section 72(t)(2) of the Internal Revenue Code of 1986 (relating to 10-percent additional tax on early distributions from qualified retirement plans) is amended by striking "or" at the end of clause (v), by striking the period at the end of clause (vi) and inserting ", or", and by adding at the end thereof the following new clause:

"(vii) made under title 5, United States Code, based on the employee's retiring from Government service under section 8335(b), 8336(c), 8412(d), or 8425(b) of such title, if retirement occurs after attainment of age 50."

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 1123(a) of the Tax Reform Act of 1986.●

By Mr. CRANSTON:

S. 2388. A bill to provide for the striking of medals in commemoration of the Centennial of Yosemite National Park; to the Committee on Banking, Housing, and Urban Affairs.

S.J. Res. 283. Joint resolution to commemorate the centennial of the creation by Congress of Yosemite National Park; to the Committee on the Judiciary.

CENTENNIAL OF YOSEMITE NATIONAL PARK

Mr. CRANSTON. Mr. President, I introduce today two measures to mark the centennial of Yosemite National Park. The first is a joint resolution to commemorate the park's centennial; the second would authorize the striking of medals honoring the beauty and historic significance of the park.

Yosemite National Park is truly a national treasure and indisputably the flagship of the American park system. Its dazzling panoramas and quiet nooks of spectacular beauty are found throughout the 760,000 acres of the park. I was particularly pleased to protect 95 percent of the park as wilderness when we passed the California Wilderness Act in 1984. In addition, the magnificent Tuolumne and Merced Rivers—designated wild and scenic rivers—both originate in Yosemite.

Yosemite is one of the most visited parks in the country, enjoyed by nearly 3½ million visitors each year. The monolithic grandeur of Half Dome, the drama of El Capitan and the majesty of Bridalveil Falls are images etched into the memories of these visitors. Yosemite's commanding peaks and valleys have been the inspiration of many. It's no wonder that my dear friend Ansel Adams returned year after year to produce some of our country's best and well known photographs which so richly capture the splendor of Yosemite.

In 1864, the Yosemite grant—including Yosemite Valley and the Mariposa Grove of Giant Sequoias—was deeded to California by the Federal Government. This was the first such grant recognizing the need to protect lands of unique natural beauty. This action provided the inspiration and model for the creation of the National Park System. Yosemite National Park was officially created on October 1, 1890, becoming the country's third national park after Yellowstone and Sequoia.

As we mark the centennial of Yosemite, we also affirm the commitment to preserve and protect this land for future generations. Proceeds from the sale of the centennial commemorative medals would be paid into a permanent endowment fund for Yosemite National Park. The interest on this fund would be used for back country trail development and the preservation of Sequoia groves within Yosemite.

Both of these measures were introduced by Congressman LEHMAN in the House where they received bipartisan support and were recently passed by unanimous consent. The commemorative medal bill also has the support of the U.S. Mint.

I ask for your support of this legislation to honor and commemorate the centennial of the Yosemite National Park—one of America's best loved parks.

Mr. President, I ask unanimous consent that the text of these measures be printed in the RECORD.

There being no objection, the bill and joint resolution were ordered to be printed in the RECORD, as follows:

S. 2388

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Yosemite National Park Centennial Medal Act".

SEC. 2. YOSEMITE NATIONAL PARK CENTENNIAL MEDALS.

(A) STRIKING AND DESIGN OF MEDALS.—In commemoration of the centennial of Yosemite National Park in 1990, the Secretary of the Treasury (hereafter in this Act referred to as the "Secretary") shall strike medals with suitable emblems, devices, and inscriptions capturing the scenic and historic significance of the park. The design of the medals shall be determined by the Secretary in consultation with the Secretary of the Interior and the Commission of Fine Arts.

(b) SALE OF MEDALS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, the medals issued under this Act shall be sold by the Secretary at a price equal to the cost of designing and issuing such medals (including labor, materials, dies, use of machinery, and overhead expenses) and the surcharge provided for in paragraph (3).

(2) BULK SALES.—The Secretary shall make bulk sales at a reasonable discount.

(3) SURCHARGES.—All sales shall include a surcharge of $2 each.

SEC. 3. DISTRIBUTION OF SURCHARGES.

All surcharges which are received by the Secretary from the sale of medals issued under this Act shall be promptly paid by the Secretary to a permanent endowment fund for the benefit of Yosemite National Park to be administered by the National Park Foundation. The net income from the fund shall be paid to the Secretary of the Interior for purposes of funding special supplemental projects relating to back country trail development and rehabilitation, and the preservation of Sequoia groves within the boundaries of Yosemite National Park.

SEC. 4. SALES OF MEDALS IN NATIONAL PARK FACILITIES.

The Secretary and the Secretary of the Interior shall enter into a memorandum of agreement to allow—

(1) the Secretary to deliver medals to the Secretary of the Interior; and

(2) the Secretary of the Interior to provide for the sale of the medals in national park facilities.

SEC. 5. METAL CONTENT AND SIZE OF MEDALS.

The medals authorized to be struck and delivered under this Act shall be struck in bronze and in the size determined by the Secretary in consultation with the Secretary of the Interior.

SEC. 6. NATIONAL MEDALS.

The medals authorized by this Act are national medals for purposes of chapter 51 of title 31, United States Code.

SEC. 7. EXAMINATION OF RECORDS.

The Comptroller General of the United States shall have the right to examine all books, documents, and other records of the National Park Foundation which are related to the medals authorized by this Act.

S.J. RES. 283

Whereas the first application of a park concept originated in Yosemite with the grant of 1864 (Federal land given to California for preservation) and since that time the park has played an important role in pioneering park management concepts;

Whereas Yosemite National Park was established for the purpose of preservation of the resources that contribute to its uniqueness and attractiveness;

Whereas the United States Congress recognized the importance of preserving this great park for future public enjoyment when it established Yosemite National Park;

Whereas Yosemite National Park is a showcase of spectacular geological features, including the greatest concentration of granite domes in the world and the largest exposed granite monolith in the world;

Whereas Yosemite National Park possesses outstanding recreational values and supreme scenic attractions, including alpine and subalpine wilderness, three groves of giant sequoia trees and thundering waterfalls that are among the world's highest;

Whereas Yosemite was the birthplace of the idea of the Sierra Club;

Whereas Yosemite plays an important role in wildlife preservation and preserving biological diversity;

Whereas Yosemite is a world heritage site which has made a significant contribution to California's cultural heritage, to the national park movement, and to Yosemite's 4,000 years of cultural heritage by Native Americans;

Whereas Yosemite provides solitude and inspiration and serves as an outdoor classroom for environmental education;

Whereas each year Yosemite National Park welcomes millions of people from around the world; and

Whereas Yosemite National Park was established on October 1, 1890, and is the Nation's third oldest national park: Now, therefore be it

Resolved by the Senate and House of Representatives in Congress assembled, That the Congress hereby recognizes and commemorates the centennial of Yosemite National Park, created by Congress in 1890. The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the centennial with appropriate ceremonies and activities.

By Mr. THURMOND:

S. 2389. A bill to extend until January 1, 1994, the existing temporary suspension of duty on tetra amino biphenyl; to the Committee on Finance.

TEMPORARY SUSPENSION OF DUTY

Mr. THURMOND. Mr. President, today I am introducing legislation to temporarily suspend the duty on the chemical tetra amino biphenyl [TAB]. This chemical is imported into the United States from West Germany. TAB is an essential raw material used in the production of a high performance fiber called "PBI."

PBI is a unique heat and chemical resistant fiber that can be used as a suitable replacement for asbestos. PBI has a wide range of thermal protective applications such as flight suits and garments for firefighters, boiler tenders, as well as refinery workers.

Mr. President, in the 98th and 100th Congresses, I introduced similar legislation to apply duty-free treatment to TAB. This bill was ultimately incorporated into the Omnibus Tariff and Trade Act of 1984 and the Omnibus Trade Act of 1988. The current duty suspension for this chemical expires December 31, 1990.

There is still no domestic producer of TAB. Thus, the temporary suspension of duty on this chemical will not cause injury to any U.S. manufacturer of the product.

There are a large number of jobs that are directly related to production of PBI, as well as additional positions resulting from research, development, and marketing of this product. These jobs hinge on the ability of the domestic manufacturer of PBI to produce this product efficiently and at a competitive price for the available markets. Temporary removal of the import duty on this principal raw material will lower the production cost for PBI fiber and enable the domestic manufacturer to establish a competitive market for products containing PBI.

Mr. President, suspending the duty on this chemical will benefit the consumer by stabilizing the costs of manufacturing the end-use products. Further, this suspension will allow domestic producers to maintain or improve their ability to compete internationally. I hope the Senate will consider this measure expeditiously.

I ask unanimous consent that the text of this bill be printed in the CONGRESSIONAL RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2389

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That heading 9902.29.27 of the Harmonized Tariff Schedule of the United States (19 U.S.C.

3007) is amended by striking out "12/31/90" and inserting "12/31/93".

SEC. 2. The amendment made by the first section of this Act applies with respect to goods entered, or withdrawn from warehouse for consumption, after December 31, 1990.

By Mr. INOUYE:

S. 2390. A bill for the relief of Mark Maio Fernandez; to the Committee on the Judiciary.

RELIEF OF MARK MAIO FERNANDEZ

● Mr. INOUYE. Mr. President, Mark Maio Fernandez was born on March 14, 1958, at Tripler Army Medical Center in Honolulu, HI. He was one of two twin boys born 6 weeks premature, weighing 2.5 pounds. According to the records, he became jaundiced sometime on his second or third day of life, and his jaundice condition was noticed on the third day and yielded a microbilirubin test result of 25.5 mg. A subsequent test yielded a result of 32.6 mg. bilirubin.

Excessive bilirubin is believed to be the cause of brain damage. Although it is alleged that a blood transfusion should have occurred when the bilirubin count reached 20 mg., no transfusion was performed until the 32.6 percent level.

Mr. Fernandez's brother, Wayne, is 6'5" and graduated from the University of Hawaii in 1981. He is normal, bright and will be a police officer with the Honolulu Police Department. Mark Fernandez is a young man with serious brain damage and a limited IQ slightly above the level of mental retardation. He suffers from deafness and spasticity in his lower limbs. At 5'5", he is a foot shorter than his twin brother.

As a result of his handicaps, he attended the Hawaii School for the Deaf and Blind. Although he can understand and utilize sign language, apparently his level of communication is elementary, and he is limited in his ability to deal with such ordinary matters such as money or caring for himself. In an attempt to assist himself, he has found employment as a janitor at a fast food restaurant, but his earning capacity is obviously severely restricted for the rest of his life.

In 1976, after reading about a similar case, his parents sought legal counsel and filed an administrative suit with the Department of the Army. His attorneys feel that his claims were and are strong, and medical experts from both Hawaii and the mainland testified about medical negligence and the relationship of this failure to administer a timely transfusion to the subsequent brain damage.

The trial court ruled that the claim was barred by the statute of limitations. The Ninth Circuit Court of Appeals affirmed, based on the theory that his parents should have known of the medical malpractice earlier since they were given a discharge report by the treating physician at Tripler Army Medical Center, from which they could have derived knowledge of the action.

However, the decision overlooks the fact that Mark's parents are not highly educated. Further, the report is technical and meaningless to one not trained in medicine. I believe that the members of the subcommittee will concur that the language used therein would not unduly alarm those without medical knowledge.

The bill provides only that the U.S. District Court for the District of Hawaii have jurisdiction to hear and try the case notwithstanding the statute of limitations, laches or any previous dismissal. It does not provide any direct relief for the claimant.

I ask the subcommittee to act favorably on this bill.●

By Mr. GLENN (for himself, Mr. HATFIELD, Mr. MOYNIHAN, Mr. KOHL, Mr. HEINZ, Mr. SIMON, Mr. MURKOWSKI, Mr. CONRAD, and Mr. BINGAMAN):

S. 2391. A bill to establish Summer Science Academies for talented, economically disadvantaged, minority participants, and for other purposes; to the Committee on Labor and Human Resources.

SUMMER SCIENCE ACADEMY ACT

● Mr. GLENN. Mr. President, today I rise to introduce the Summer Science Academy Act of 1990. This legislation is designed to address this Nation's severe shortage of minorities and women in the fields of mathematics, science, and engineering.

The United States now operates in a global market that places a high premium on technological innovation. Today, more than 70 percent of the goods manufactured in the United States now compete with merchandise made overseas. Innovation ensures that U.S. firms will be able to manufacture state-of-the-art, high-quality products that consumers both here and abroad will want to buy.

Yet this country may not produce enough scientists, engineers, and technical personnel to meet the demands of a dynamic, high-technology economy. Declining interest in scientific careers among young people and declining birthrates have shrunk the pool of potential scientists. In fact, the National Science Foundation predicts that by the year 2010, if current trends continue, America will suffer a shortfall of more than 560,000 scientists and engineers.

One way to avert this impending crisis is to educate and recruit more of our Nation's minorities and women into the fields of math, science, and engineering. Although these groups are becoming a greater percentage of our Nation's work force, they have traditionally been neglected as a human resource and underrepresented in these fields.

Today, black Americans make up 12 percent of our population, but they account for only 2 percent of this country's engineers and scientists. Meanwhile, Hispanics, America's fastest growing minority group, make up 9 percent of our population, but they too only account for 2 percent of our scientists and engineers. In my home State of Ohio, women receive one-half of all bachelors degrees, but receive only one-fourth of all the bachelors degrees in science and engineering.

This is, indeed, disturbing news considering that blacks and Hispanics—now 25 percent of our schoolchildren—will be 47 percent by the year 2000. These groups already constitute the majority in 22 of the 25 largest U.S. city school districts. Additionally, by the year 2000, 85 percent of our work force's net new entrants will be members of minority groups and women. Quite simply, unless we as a nation do a better job in encouraging these groups to enter a technical career, America's economy and its companies will suffer.

The legislation I am introducing today is a dramatic effort to recruit more women and minorities into the technical fields. The bill creates 20 geographically dispersed Residential Science Academies to provide talented, economically disadvantaged minority students instruction in the fields of mathematics, science, and engineering design. Each academy will provide 8 weeks of intensive instruction to 50 students in each of the grades 7 through 12. All students will return to the adademy each summer until completion of their 12th grade academy term. These students will be far from passive learners. They will learn science and math through innovative courses and materials. They will learn through group study and interactive, hands-on approaches.

The National Science Foundation will select academies through open, merit-based competition. At least 70 percent of the participants will be minority students from the poorest of circumstances for whom all books, food, lodging, and other costs will be provided. The remaining 30 percent will be talented students from other income categories whose families will be assessed fees according to their ability to pay. The cost to establish and run the summer science academies is a modest $2 million in fiscal year 1991. Over 5 years, costs will total $26 million.

Plain and simple, this legislation will open the door of opportunity to hundreds of talented youth who might otherwise not have the resources or guidance to pursue a technical career. Students will be exposed to the concepts of science and math and, conse-

quently, will gain both the self-confidence and training necessary to pursue scientific studies. These students will also serve as role models in their respective communities. They will communicate to their peers that science and math are worthy pursuits and that a technical career is attainable. Equally important, academy graduates who go on to become scientists and engineers will serve as desperately needed mentors.

That American industries will need more young people to fill their technical positions is reason enough to establish these summer academies. There is, however, another important reason. The barrier to high-paying technical jobs has inhibited this Nation's pursuit of equal opportunity for all its citizens. As long as minorities are denied access to decent jobs—due to prejudice and inadequate training—our commitment to an open and fluid society is hollow. These academies will help to break down these barriers.

In closing, I want to commend Dean Shirley McBay of MIT for her contrtibutions to this legislation. My staff, having heard she had an interesting proposal, approached her several months ago and asked her for assistance. Dean McBay and her staff responded, offering me a sensible, modestly priced and well throught out proposal for these summer academies.

I should point out that this proposal was endorsed by the quality education for minorities project, which Dean McBay serves as director. The QEM project's action council is chaired by my old friend, former Labor Secretary Ray Marshall, and includes such eminent Americans as Senators KENNEDY and BINGAMAN, Carnegie Corp. president David Hamburg, Albert Shanker, Hodding Carter, Marian Wright Edelman, Mary Harwood Futrell, and Paul E. Gray. The project's recent report, Education That Works: An Action Plan for the Education of Minorities, included among its recommended strategies for increasing the participation of minority college students in science, mathematics, and engineering, the establishment of these summer science academies.

I urge my colleagues to support this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2391

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Summer Science Academy Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) this Nation's universities are neither enrolling nor graduating enough American students into the fields of science or engineering, particularly students from underrepresented minority groups;

(2) the United States must reach out to minorities in order to address the Nation's future potential shortfall of scientists and engineers;

(3) innovative and creative approaches to recruiting and educating minority students in the science, mathematics, and engineering fields are sorely needed;

(4) Black Americans make up over 12 percent of the population of the United States, but account for only 2 percent of the Nation's employed engineers and scientists;

(5) Hispanic Americans are the fastest growing American minority group and comprise 9 percent of the Nation's population, but account for only 2 percent of the Nation's employed scientists and engineers; and

(6) American Indians, including Alaska natives, constitute one-half of one percent of the population of the United States, but make up only three one-thousandths of all the baccalaureate degrees awarded in engineering and science.

SEC. 3. STATEMENT OF PURPOSE.

The purposes of this Act are to—

(1) improve the enrollment and completion rates of minority individuals in science and engineering;

(2) improve the precollege preparation of minority students for whom a technical career is a viable option;

(3) strengthen participating students' mathamtical, science and communication skills which are essential to such students' success in high school, college and the work place;

(4) identify approaches to teaching that may be particularly effective with minority students;

(5) enhance participating students' sense of self-esteem and life skills to enable such students to successfully meet life's many challenges.

SEC. 4. DEFINITIONS.

For purpose of this Act—

(1) the term "Academy" means a Summer Science Academy established pursuant to the provisions of this Act;

(2) the term "eligible entities" means—

(A) institutions receiving financial assitance from the National Science Foundation to serve the education needs of minority students, including Resource Centers in Science and Engineering, Minority Research Centers, and Comprehensive Minority Centers; and

(B) other nonprofit educational organizations;

(3) the term "Foundation" means the National Science Foundation;

(4) the term "parent" includes a legal guardian or person standing in loco parentis; and

(5) the term "participant" means a student enrolled in an Academy.

SEC. 5. PROGRAM ESTABLISHED.

(a) IN GENERAL.—The National Science Foundation shall make grants to, or enter contracts or cooperative agreements with, eligible entities to establish and operate at least 20 Summer Science Academies to provide talented, economically disadvantaged, minority students instruction in the fields of mathematics, science, engineering design, and communications.

(b) SPECIAL REQUIREMETNS.—To the maximum extent possible, Academies shall be—

(1) geographically dispersed nationwide; and

(2) residential in nature.

(c) ACADEMY ENROLLMENT.—(1) Each Academy shall be ultimately responsible for serving 50 participants in each of the grades 7 through 12 for a combined annual Academy enrollment of 300 participants.

(2) In the first fiscal year in which an Academy is established, such Academy shall instruct at least 50 participants in each of the grades 7 and 8. In each succeeding fiscal year, such Academy shall instruct at least 50 participants in each of the grades taught in the preceding fiscal year and 50 participants in the next higher grade. In no event shall funds be available for instruction of participants beyond grade level 12.

(3) Participants shall continue enrollment in the Academy until successful completion of their 12th grade Academy term, at which time such participants will be considered graduates of the Academy.

(4) Enrollment slots which become available as a result of participant departures from the Academy shall be filled through criteria established by each Academy. Such criteria shall be approved by the National Science Foundation.

SEC. 6. ACADEMY SELECTION CRITERIA.

The Foundation shall establish a peer review process to select eligible entities to establish and operate Academies.

SEC. 7. PARTICIPANT SELECTION CRITERIA.

(a) IN GENERAL.—The Foundation shall establish selection criteria and procedures by which each Academy shall select and admit participants. Such selection criteria shall include—

(1) in-school academic performance and accomplishments;

(2) aptitude and expressed interest in the fields of science, mathematics, or engineering; and

(3) recommendations from potential participants, parents, church organizations, civic organizations, and other community-based or education organizations.

(b) SPECIAL RULE.—To the maximum extent possible—

(1) at least 50 percent of the participants in each grade level in each Academy shall be female; and

(2) at least 70 percent of the participants in each grade level in each Academy shall be talented, economically disadvantaged, minority students.

SEC. 8. USE OF FUNDS.

(a) IN GENERAL.—Each eligible entity receiving funds pursuant to the provisions of this Act shall use such funds to—

(1) hire and recruit permanent and visiting staff to instruct and supervise participants;

(2) provide participants and staff with lodging, food, materials, and other accommodations;

(3) provide stipends to economically disadvantaged minority participants to cover the costs of attending the Academy;

(4) assist participants in acquiring certain life skills including—

(A) respect for others;

(B) responsibilities as members of communities;

(C) conflict resolution;

(D) working with others; and

(E) basic written and verbal communication skills;

(5) provide participants with mathematics, science, engineering design, and communications experiences through—

(A) problem solving and reasoning skills development;

(B) interactive and hands-on learning; and

(C) group study and cooperative learning; and

(6) conduct such other activities as the eligible entity may determine necessary to carry out the provisions of this Act.

(b) STIPENDS.—The amount of the stipend provided pursuant to subsection (a)(3) shall be determined on the basis of the participant's or participant's parents ability to pay the cost of attending the Academy.

(c) ADMINISTRATIVE COSTS.—The Foundation may use no more than 5 percent of the funds appropriated to carry out the provisions of this Act in each fiscal year for administrative expenses.

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $2,000,000 for fiscal year 1991, $3,000,000 for fiscal year 1992, $5,000,000 for fiscal year 1993, $7,000,000 for fiscal year 1994, and $9,000,000 for fiscal year 1995 to carry out the provisions of this Act.●

● Mr. SIMON. Mr. President, I am pleased to join Senator GLENN in sponsoring the Summer Science Academy Act of 1990. Summer residential programs for young minority students will help to restore America to a world leadership position in the sciences, and will help to reverse the decline in the number of minority students attending and completing college.

This bill will also help to, in effect, extend the school year for some of the neediest students in the country. Most of these United States have a school year of 180 days. In Japan, they attend school for 243 days. In fact, in a recent comparision of the length of the school year in 22 countries, the United States came in 21st.

The 1983 report on school reform, "A Nation At Risk," recommended increasing the school year to 200 to 220 days. But the States are having a hard time increasing their school year by just a few days. For example, just last month, the Arkansas State Board of Education voted, for the second year in a row, to delay a 5-day extention of the school year.

The modest funds provided by this bill will allow some of our most educationally disadvantaged students to continue their education through the summer in a key subject area. I commend Senator GLENN for his hard work on this issue, and I look forward to working with him to implement this much-needed program.●

By Mr. KASTEN:

S. 2392. A bill to foster and enhance the wise stewardship of natural resources on America's agricultural lands, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARM STEWARDSHIP ACT OF 1990

● Mr. KASTEN. Mr. President, I rise today to introduce the Farm Stewardship Act of 1990, to continue the work the Congress began in 1985 to bring together our national agriculture policy and national conservation policy in the Food Security Act.

The 1985 farm bill was landmark legislation; it linked together, for the very first time, public financing of agriculture with conservation requirements. The highly erodible and wetlands conservation provisions—known as sodbuster and swampbuster—required producers who participate in most Federal farm programs to refrain from converting erodible lands and wetlands to crop production.

Accompanying this prohibition was an incentive, the Conservation Reserve Program, by which producers were rewarded for retiring cropland and establishing permanent cover for a 10-year contract period. Another provision was a domestic version of debt-for-nature swaps—providing relief on farm debt in exchange for conservation easements for environmentally sensitive lands.

The 1985 farm bill is a good foundation to build on, and that is precisely what we have to do with the 1990 farm bill.

We need to build on these forward-looking concepts—make some course corrections to improve how the 1985 provisions work—and take the next important steps to ensure progressive and responsible stewardship of our precious soil, water, wetland, and wildlife resources.

The concept of sustainability has come of age, not only for natural resources such as soil, water, and wildlife, but for social and economic factors as well. In all areas of social, economic and environmental policy, we must seek goals that will lead to optimum and sustainable results, not maximum production.

American wildlife is dependent on American agricultural practices. Most of the wildlife in our Nation lives, breeds, and dies on private agricultural lands. At an even more basic level, the health of both agriculture and wildlife depend in the long run on soil and water. Where the land or water is poisoned, where ground water or topsoil is being mined, where soil is being worn out, where vegetation is stripped, neither wildlife nor agricultural production can enjoy a secure future.

This legislation will recognize that farmers are the key stewards of our Nation's bounty, and that both agriculture and wildlife depend on the effective conservation of soil and water.

My bill, the Farm Stewardship Act of 1990, would improve the stewardship of natural resources on our private agricultural lands. We can only achieve this goal by providing an economic climate that encourages and rewards good stewardship, and by providing the solid information and assistance farmers need if they're going to make sound stewardship decisions about their soil, water, wetlands, and wildlife.

The first innovation of this bill is to put some real teeth into the wetland conservation provision, swampbuster. My bill proposes two crucial course corrections for the swampbuster wetlands conservation program. Swampbuster has not been implemented in a way that has made anyone satisfied and it has not served the cause of wetlands conservation or agriculture very well. According to data collected by the Soil Conservation Service as of January 1990, on about 33 percent of the farms receiving Federal program benefits, over 82,586 acres of wetlands have been converted since 1985.

If we extrapolate this number to a full 100 percent of producers' farms, which would not necessarily be fair statistically—but nonethless, if we extrapolate these results to all participating producers farms, it would mean the destruction of nearly 300,000 acres of wetlands. I am told that many of these converted wetlands are not being used for agricultural commodity crop production and therefore do not come under swampbuster.

Yet, according to a National Wildlife Federation study in the summer of 1989, only 26 producers have actually had Federal program money withheld. The numbers simply don't make sense—agricultural wetlands conversion is continuing, and enforcement of swampbuster has apparently not yet been directed at the individuals responsible.

I advocate two linked proposals to improve swampbuster:

First, violation of swampbuster should be effective upon conversion of the wetland, not upon planting of an agricultural commodity. Second, I propose a reduced penalty for first-time violators, provided that the converted wetland is restored or its conversion mitigated through an agreement between the Soil Conservation Service, the Fish and Wildlife Service, and the producer. The producer would have one year to accomplish the restoration; otherwise, the full penalty would be imposed.

Under my plan, the reduced penalty would be a one-time qualified amnesty for violators. Our purpose should not be to put farmers out of business, but to encourage compliance and the restoration of converted wetlands.

The second innovation of my legislation is the creation of the Farm Stewardship Program. The Farm Stewardship Program would be a voluntary program to permanently protect, through conservation easements, fragile resources including soil, water, wetlands, and wildlife. Unlike the CRP and other term set-aside programs, the Farm Stewardship Program would target those fragile resources where it will never be in the interest of the Nation to continue cropping.

Areas that would be eligible for the Farm Stewardship Program would include fragile or vulnerable natural resources of high value to the public. For example the Farm Stewardship Program could include cropped wetlands, former wetlands that can be feasibly restored, and water bank wetlands; sink holes, identified aquifer recharge areas or other areas that have a high potential to contaminate surface and ground water; endangered species habitats that are threatened by continued practices including application of certain agricultural chemicals; unique or rare wildlife habitats of significant ecological value. Beginning in 1995, certain areas of highly erodible lands would also be eligible.

A key feature of the Farm Stewardship Program is allowing the landowner to make economic uses of the conservation area that are compatible with protecting it—like hunting leases, periodic hay cutting, or managed timber harvest. Compatible economic uses would be strictly controlled through agreements between the U.S. Secretary of Agriculture, the easement manager, and the landowner. The bill encourages States and landowners to get involved in management of the easement areas.

I fully expect that this Farm Stewardship Program will be popular with farmers, conservationists and even budget watchdogs because it permanently protects fragile resources, shares the cost of protection of natural resources of high value with the farmers who are their stewards, and builds equity with public dollars.

Mr. President, I predict that the eligible lands that farmers will be interested in enrolling into the program will exceed the dollars we have to devote to the program. I have therefore proposed establishing State technical committees to oversee the technical aspects of the farm bill in each State including selecting lands eligible for the Farm Stewardship Program. Priority will be placed on those lands that do the most to restore wetlands, improve water quality, restore wildlife, and beginning in 1995, reduce soil erosion.

The bill would encourage the use of wetland and flood plain easements under the authority of the Small Watershed and Flood Protection Act. It would prohibit USDA from using Federal funds for conversion of wetlands. Such a provision will remove some of the mixed signals the Federal Government is sending on wetland conservation.

The wildlife title of my bill, which some have called nest buster, calls for the designation of the same land each year for set-aside land, and for the establishment of cover on all set-aside acreage. Set-aside acreage in perennial cover would be considered as planted to the program crop for deficiency payment purposes as long as the cover is maintained. This provision would turn the millions of acres of set-aside acreage into productive wildlife habitat.

It would also reduce erosion, improve water quality, and provide a forage reserve for use in emergency situations. Haying or grazing would be limited to certain periods in order to minimize negative effects on nesting.

Another provision will protect the producer's crop base on expiring Conservation Reserve Program contracts. It would establish national soil erosion goals approaching "T by 2000"—that is, by the year 2000, soil erosion rates should not exceed soil loss tolerance rates. The Conservation Reserve Program would be extended through 1995 but would be modified to accommodate the Farm Stewardship Program.

The title on water conservation provides that farm conservation plans will specify best management practices or other measures to ensure that farm operations are consistent with Federal and State water quality standards, and required by 1995 that these plans must be applied where standards are being violated. It seems unwise, from both policy and fiscal standpoints, to establish a major separate Federal water quality program under USDA when the States already operate a federally funded water quality program.

Finally, the "debt for nature" title builds on the 1985 Act to improve the ability of farmers to obtain debt relief in exchange for the granting of conservation easements. I believe that this option should be available to every financially troubled farmer early in the process of restructuring his farm debt. This approach pays double dividends by keeping farmers on the farm and protecting fragile resources.

Let me illustrate the potential of the debt-for-nature concept to resolve two problems simultaneously. According to the Department of Agriculture—January 25, 1990 testimony of Roland R. Vautour, Under Secretary for Small Community Development—the Farmers Home Administration alone is projected to have overall losses of $22 billion as a result of farm debt restructure and farm programs.

To put that figure in perspective of the resources we are trying to protect on American agricultural lands, that sum would purchase conservation easements on 44,000,000 acres (at an average of $500 per acre), nearly three times the total acreage of all farmed wetlands that are causing all the concern with swampbuster (17.1 million acres of cropped wetlands according to the Soil Conservation Service). That is almost 25 percent more acreage than is enrolled in the Conservation Reserve Program. We have a tremendous opportunity to manage Federal relief of farm debt to help the farmer and to protect our precious natural resources.

This title also calls for protecting resources held in the FmHA inventory, and for holding wetlands and other fragile areas as collateral to secure direct or federally insured or guaranteed loans.

I believe this bill is the essential next step in the struggle to preserve our natural heritage. Our country has been blessed with resources—it's up to us to be sensible in protecting them. As we approach Earth Day 1990—a truly global expression of our common commitment to environmental health—let us begin our concern and our activism right here at home.

Mr. President, I look forward to working with my colleagues in this body and with the Committee on Agriculture, Nutrition, and Forestry as we put together the 1990 farm bill. Together, we can make this conservation bill the law of the land—build a safe and healthy future for America—and set a responsible example for the whole world.●

By Mr. EXON (for himself, Mr. GORE, and Mr. GORTON):

S. 2393. A bill to prohibit certain food transportation practices and to provide for regulation by the Secretary of Transportation that will safeguard food and certain other products from contamination during motor or rail transportation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

SAFE FOOD TRANSPORTATION ACT OF 1990

● Mr. EXON. Mr. President, I rise today to introduce a bill that is designed to stop an abhorrent practice that poses a serious risk to food safety. This practice involves transporting wastes or chemicals in the same vehicles that are also used to transport food. The practice is known as backhauling.

In the absence of proper protections, backhauling can be deadly. Tank trucks carrying toxic chemicals should not also carry the apple juice served at our breakfast tables. Yet, this is exactly the type of practice that has been occurring without any specific Federal regulations to either prohibit this or mandate proper decontamination.

That backhauling is a problem has been well-documented in recent months by the media and in hearings before the House and Senate. Much of the attention that has been given to this problem arises from the testimony of whistle-blowers who have stepped forward in an attempt to stop this practice; like the truck drivers in eastern Washington State who have testified that for 2 years they were ordered to haul juices, cooking oils, and other food-grade liquids in tank trucks that also carried chemicals. These and

other accounts have alerted us to the problem.

In my view, the legislation being introduced today is necessary since this practice has not been adequately addressed by the Federal agencies with existing responsibility for food safety. I am pleased that two other members of the Surface Transportation Subcommittee, Senators GORTON and GORE, have also taken an active interest in this issue, with each having proposed legislation to restrict backhaul practices. These two bills were the subject of a Surface Transportation hearing, during which a record was established leading to many of the modifications contained in this bill. The Safe Food Transportation Act of 1990, which is cosponsored by Senators GORE and GORTON, also incorporates and builds upon many of the provisions in H.R. 3386, backhaul legislation approved by the House of Representatives on March 27, 1990.

I would also like to applaud the efforts of my colleagues in the House, Congressmen CLINGER and LUKEN, for their hard work in drafting a thoughtful piece of legislation designed to eliminate this practice.

I believe the Safe Food Transportation Act of 1990 will go a long way toward ensuring the integrity of our food supply as it travels across this Nation and I urge my colleagues to support passage of this legislation.●

● Mr. GORTON. Mr. President, I would like to commend the chairman of the Senate Commerce Committee's Subcommittee on Surface Transportation, Senator EXON, for his expeditious work in writing the Safe Food Transportation Act of 1990. I would also like to thank him for including me and my staff in the drafting of this compromise bill.

Last fall, the Seattle Post-Intelligencer ran an investigative series revealing an appalling lack of oversight over food transportation practices. James Wallace, in an award-winning series of articles, detailed the shocking practice of a tank truck which alternately carried liquid foods and harmful chemicals. Many of us were shocked to learn that this practice was legal. In October, I introduced a bill to address this practice, along with another practice of backhauling garbage in refrigerated trucks that carry food.

I would like to thank Senator EXON for holding hearings on this issue last month. We received important testimony from industry groups which will be affected by the new requirements in this legislation. I was impressed by the constructive comments and suggestions that I received both at our hearing and in many meetings with industry representatives. We have tried to shape our new bill to address the many legitimate concerns which were raised. It is very clear to me that the affected industries place food safety as their top priority, and I appreciate their positive attitude and input in this process.

Mr. President, the Senate Commerce Committee hopes to consider this bill tomorrow. I expect it to have overwhelming support and I hope it will be scheduled for floor consideration as soon as possible.●

● Mr. GORE. Mr. President, anyone who has heard the stories of truckers hauling garbage or hazardous chemicals in one direction and then loading the same trucks and tankers with food—without necessarily washing them first—has to respond with outrage and disgust. That's how I responded and that's why, several months ago, I introduced S. 1904, the Clean Food Transportation Act.

After long hours of hard work and consideration on the part of all interested parties, I am now pleased to join my colleagues, Senator EXON and Senator GORTON of the Senate Committee on Commerce, Science, and Transportation, in introducing an improved bill which I believe is a more thorough and a more targeted measure aimed at reducing the horrible practice of backhauling. Just last week, the House passed a backhauling bill with overwhelming support. I am optimistic that this bill, which includes the best of all legislative efforts, will move quickly for final passage. No one will have reason to be afraid their food is contaminated simply because our laws do not specifically prohibit practices we know will create health risks.

Members of my staff have actually spoken with truckers in Tennessee who know all about the disgusting practice of backhauling. The problem is, they're afraid to share their stories publicly, afraid their candor will cost them their jobs.

We may never know, in quantifiable terms, the full extent of this problem in our country. Fear of retribution, of lost paychecks and lost jobs, along with embarrassment shared by several of the industries involved, will prevent us from ever knowing that. But that cannot stop us from letting the American people know that Congress responded quickly and effectively to address this problem, that Congress acted to ensure that dangerous backhauling is not permitted to any extent and will not endanger any consumer.

We must examine the role deregulation has played in backhauling—considering, for example, the truckers' problem of finding return shipments after off-loading food shipments—and the need for decontamination procedures which currently are unregulated. And, we must take a close look at a broader issue: our rapidly diminishing landfills. It's because we're running out of landfill space in community after community that some unscrupulous truckers are carrying trash in vehicles meant for food and traveling to landfill space in the Midwest.

However, explanations for backhauling cannot become excuses for our inaction. There is no reason good enough to justify the contamination of the food we eat, the food we serve our families. Action must be taken that considers these issues but which focuses on solutions and on stopping the backhauling.

I am pleased that the Exon, Gore, Gorton bill, the Safe Food Transportation Act, includes the provision of my bill which would involve the participation of the Motor Carrier Safety Assistance Program inspectors in enforcing the decontamination requirements. Hopefully, these inspectors will be able to help stop drivers who falsify shipping documents by stating that the previous loads were food grade, drivers like those who testified before House Committees this summer. The bill requires DOT rulemaking to make sure drivers and shippers verify that appropriate records and markings are maintained regarding food-carrying vehicles. However, no regulations are useful if they cannot be enforced.

The Exon, Gore, Gorton bill also makes great strides to end backhauling of garbage by defining what we know as trash in a way that especially targets the problem at hand. Moreover, the bill expands the scope of backhauling legislation by including rails and dry vans in the categories of food carrying vehicles that should be regulated.

By mobilizing the forces of States and Federal officials that have been represented in the Senate committee hearing a few weeks ago and in subsequent discussions on this issue, I know we can protect consumers from the objectionable practices of backhauling.

In one news report, a trucker who listened to his conscience and was eventually fired because he revealed the backhauling practices of his company was quoted as saying, "If something ends up getting poisoned from a contaminated load, well, I've tried. It's off me now." It's on our shoulders. It's our responsibility. I am pleased that we have not let the sacrifice of this trucker be wasted.●

ADDITIONAL COSPONSORS

S. 16

At the request of Mr. CRANSTON, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 16, a bill to require the executive branch to gather and disseminate information regarding, and to promote techniques to eliminate, discriminatory wage-setting practices and discriminatory wage disparities which are based on sex, race, or national origin.

S. 567

At the request of Mr. BOREN the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 567, a bill to amend the Internal Revenue Code of 1986 to allow income from the sale of certain used automobiles to be computed on the installment sales method, and for other purposes.

S. 720

At the request of Mr. BOREN, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of S. 720, a bill to amend the Internal Revenue Code of 1986 to extend and modify the targeted jobs credit, and for other purposes.

S. 1165

At the request of Mr. GLENN, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 1165, a bill to provide for fair employment practices in the Senate and the House of Representatives.

S. 1273

At the request of Mr. BOREN, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 1273, a bill to amend the Internal Revenue Code of 1986 with respect to treatment by cooperatives of gains or losses from sale of certain assets.

S. 1349

At the request of Mr. PRYOR, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from North Carolina [Mr. HELMS], and the Senator from Wyoming [Mr. WALLOP] were added as cosponsors of S. 1349, a bill to amend the Internal Revenue Code of 1986 to exclude small transactions and to make certain clarifications relating to broker reporting requirements.

S. 1624

At the request of Mr. THURMOND, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1624, a bill to grant a Federal charter to the National Association of Women Veterans, Inc.

S. 1629

At the request of Mr. SPECTER, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1629, a bill to establish clearly a Federal right of action by aliens and U.S. citizens against persons engaging in torture or extrajudicial killings, and for other purposes.

S. 1758

At the request of Mr. GLENN, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 1758, a bill to provide for the establishment of an Office for Small Government Advocacy, and for other purposes.

S. 2039

At the request of Mr. COCHRAN, the names of the Senator from Massachusetts [Mr. KERRY], and the Senator from Wisconsin [Mr. KOHL] were added as cosponsors of S. 2039, a bill to improve the quality of student writing and learning, and the teaching of writing as a learning process in the Nation's classrooms.

S. 2048

At the request of Mr. SARBANES, the names of the Senator from South Carolina [Mr. HOLLINGS], the Senator from New York [Mr. MOYNIHAN], and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 2048, a bill to provide for cost-of-living adjustments in 1991 under certain Government retirement programs.

S. 2177

At the request of Mr. LIEBERMAN, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 2177, a bill to improve the collection and dissemination of information relating to the supply of winter heating fuels, and for other purposes.

S. 2212

At the request of Mr. ROTH, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of S. 2212, a bill to minimize the adverse effects on local communities caused by the closure of military installations.

S. 2229

At the request of Mr. DODD, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2229, a bill to reauthorize the Head Start Act for fiscal years 1991 through 1994, and for other purposes.

S. 2240

At the request of Mr. KENNEDY, the names of the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Florida [Mr. GRAHAM], the Senator from Oregon [Mr. PACKWOOD], the Senator from Colorado [Mr. WIRTH], the Senator from North Dakota [Mr. BURDICK], and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 2240, a bill to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes.

S. 2302

At the request of Mr. BOND, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 2302, a bill to amend the Food Security Act of 1985 to revise and extend conservation programs under title XII, and for other purposes.

S. 2341

At the request of Mr. WILSON, the names of the Senator from Alabama [Mr. HEFLIN], and the Senator from Kentucky [Mr. MCCONNELL] were added as cosponsors of S. 2341, a bill to amend the Food Security Act of 1985 to authorize the targeted export assistance program, and for other purposes.

S. 2342

At the request of Mr. HATCH, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 2342, a bill to amend the Public Health Service Act to authorize additional grants for home health care demonstration projects, to require that applications be submitted to the chief executive officer of the State concerned in connection with such grants, and for other purposes.

S. 2347

At the request of Mr. BINGAMAN, his name was added as a cosponsor of S. 2347, a bill to provide essential air service to small communities, and for other purposes.

S. 2362

At the request of Mr. JOHNSTON, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 2362, a bill to enhance the survivability and recovery of the Insular Areas from severe storms.

SENATE JOINT RESOLUTION 224

At the request of Mr. BYRD, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of Senate Joint Resolution 224, a joint resolution to designate the month of May 1990 as "National Trauma Awareness Month."

SENATE JOINT RESOLUTION 242

At the request of Mr. THURMOND, the names of the Senator from Georgia [Mr. FOWLER], the Senator from Virginia [Mr. ROBB], the Senator from Virginia [Mr. WARNER], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 242, a joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week."

SENATE JOINT RESOLUTION 246

At the request of Mr. BOSCHWITZ, the name of the Senator from Oregon [Mr. PACKWOOD] was added as a cosponsor of Senate Joint Resolution 246, a joint resolution calling upon the United Nations to repeal General Assembly Resolution 3379.

SENATE JOINT RESOLUTION 248

At the request of Mr. BOSCHWITZ, the names of the Senator from New Mexico [Mr. BINGAMAN] and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of Senate Joint Resolution 248, a joint resolution to designate the month of September 1990 as "International Visitor's Month."

SENATE JOINT RESOLUTION 252

At the request of Mr. BENTSEN, the names of the Senator from Mississippi

[Mr. COCHRAN] and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of Senate Joint Resolution 252, a joint resolution designating the week of April 15, 1990, through April 21, 1990, as "National Minority Cancer Awareness Week."

SENATE JOINT RESOLUTION 267

At the request of Mr. THURMOND, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Virginia [Mr. WARNER], the Senator from Alabama [Mr. SHELBY], the Senator from Indiana [Mr. COATS], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of Senate Joint Resolution 267, a joint resolution to authorize and request the President to designate May 1990 as "National Physical Fitness and Sports Month."

SENATE JOINT RESOLUTION 268

At the request of Mr. BRADLEY, the names of the Senator from Washington [Mr. ADAMS], the Senator from Texas [Mr. BENTSEN], the Senator from Delaware [Mr. BIDEN], the Senator from North Dakota [Mr. BURDICK], the Senator from North Dakota [Mr. CONRAD], the Senator from California [Mr. CRANSTON], the Senator from Arizona [Mr. DECONCINI], the Senator from Illinois [Mr. DIXON], the Senator from Connecticut [Mr. DODD], the Senator from Tennessee [Mr. GORE], the Senator from Florida [Mr. GRAHAM], the Senator from Alabama [Mr. HEFLIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Hawaii [Mr. INOUYE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Massachusetts [Mr. KERRY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Maryland [Ms. MIKULSKI], the Senator from Georgia [Mr. NUNN], the Senator from Rhode Island [Mr. PELL], the Senator from Michigan [Mr. RIEGLE], the Senator from Virginia [Mr. ROBB], the Senator from Illinois [Mr. SIMON], the Senator from Maine [Mr. MITCHELL], the Senator from Louisiana [Mr. JOHNSTON], the Senator from New York [Mr. MOYNIHAN], the Senator from Tennessee [Mr. SASSER], the Senator from Colorado [Mr. WIRTH], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Mississippi [Mr. COCHRAN], the Senator from New York [Mr. D'AMATO], the Senator from Kansas [Mr. DOLE], the Senator from Washington [Mr. GORTON], the Senator from Utah [Mr. HATCH], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Indiana [Mr. LUGAR], the Senator from Idaho [Mr. MCCLURE], the Senator from Oregon [Mr. PACKWOOD], the Senator from Delaware [Mr. ROTH], the Senator from Wyoming [Mr. SIMPSON], the Senator from Alaska [Mr. STEVENS], the Senator from South Carolina [Mr. THURMOND], the Senator from Wyoming [Mr. WALLOP], the Senator from Virginia [Mr. WARNER], the Senator from California [Mr. WILSON], and the Senator from Missouri [Mr. BOND] were added as cosponsors of Senate Joint Resolution 268, a joint resolution to designate April 6, 1990, as "National Student-Athlete Day."

SENATE JOINT RESOLUTION 276

At the request of Mr. LIEBERMAN, the names of the Senator from New Jersey [Mr. LAUTENBERG], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of Senate Joint Resolution 276, a joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week."

SENATE CONCURRENT RESOLUTION 88

At the request of Mr. GRAHAM, the names of the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of Senate Concurrent Resolution 88, a concurrent resolution expressing the sense of the Congress that a postage stamp should be issued in honor of Claude Denson Pepper.

SENATE RESOLUTION 263

At the request of Mr. LAUTENBERG, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of Senate Resolution 263, a resolution to express the sense of the Senate regarding all modes of transportation and maintaining a significant Federal role.

AMENDMENTS SUBMITTED

CLEAN AIR ACT AMENDMENTS

PRESSLER (AND OTHERS) AMENDMENT NO. 1426

Mr. PRESSLER (for himself, Mr. ARMSTRONG, and Mr. BREAUX) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, as follows:

At the appropriate place insert the following new section:

Any person who enters into a contract under which such person receives hydroelectric energy in return for the provision of electric energy by such person shall use allowances held by such person as necessary to satisfy such person's obligations under such contract.

A Federal Power Marketing Administration shall not be subject to the provisions and requirements of this title with respect to electric energy generated by hydroelectric facilities and marketed by such Power Marketing Administration shall comply with the provisions and requirements of this title.

HATCH (AND OTHERS) AMENDMENT NO. 1427

Mr. CHAFEE (for Mr. HATCH (for himself, Mr. GARN, Mr. SYMMS, Mr. REID, Mr. MCCLURE, Mr. SIMPSON, Mr. BURNS, Mr. BRYAN, Mr. ARMSTRONG, and Mr. WALLOP) proposed an amendment to Amendment No. 1293 (in the nature of a substitute) prepared by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

on page 135 after line 22 add the following new subsection:

(d) Section 163(c) of the Clean Air Act is amended by—

(1) replacing the comma and "and" at the end of subparagraph (D) with a period;

(2) replacing the period at the end of subparagraph (E) with a comma and "and" and

(3) adding a new subparagraph (F) to read as follows:

"(F) except for purposes of determining compliance with the maximum allowable increases in ambient concentrations in any area designated as class I under this part, concentrations of particulate matter attributable to the increase in fugitive emissions resulting directly or indirectly from hardrock and noncoal mining."

STEVENS (AND MURKOWSKI) AMENDMENT NO. 1428

Mr. STEVENS (for himself and Mr. MURKOWSKI) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

Amendment 1293 is amended by inserting the following new sentence at the end of line 13 on page 529:

"For the purposes of this section, the phrase 'national security interests of the United States' shall be deemed to include domestic production of crude oil and natural gas energy supplies on the North Slope of Alaska.".

WARNER (AND OTHERS) AMENDMENT NO. 1429

Mr. WARNER (for himself, Mr. NUNN, Mr. EXON, and Mr. BREAUX) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

Add a new subpart (f) to section 173 of the Act (as amended by the Mitchell-Dole compromise):

(f) The permitting authority of a State or political subdivision shall allow a source to offset by alternative or innovative means emission increases from rocket engine and motor firing, and cleaning related to such firing, at an existing or modified major source that tests rocket engines or motors under the following conditions:

(1) any modification proposed is solely for the purpose of expanding the testing of rocket engines or motors at an existing source that is currently permited to test such engines;

(2) the source demonstrates to the satisfaction of the permitting authority of the State or political subdivision that it has used all reasonable means to obtain offsets, as determined on an annual basis, for the emissions increases beyond permitted levels, that all available offsets are being used, and that sufficient offsets are not available to the source;

(3) the source has obtained a finding from the Department of Defense, Department of Transportation, National Aeronautics and Space Administration or other appropriate federal agency, that the testing of rocket motors or engines at the facility is required for a program essential to the national interest; and

(4) the source will comply with an alternative measure, imposed by the permitting authority, designed to offset any emission increases beyond permitted levels not directly offset by the source. In lieu of imposing any alternative offset measures, the permitting authority may impose an emissions fee, which shall be an amount no greater than 1.5 times the average cost of stationary source control measures adopted in that area during the previous three years. The permitting authority shall utilize the fees in a manner that maximizes the emissions reductions in that area.

DURENBERGER AMENDMENT NO. 1430

Mr. DURENBERGER proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 143, at the last line of the table, strike:

"Heavy duty buses, 1991 and after ..... 0.1 gbh."

and insert in lieu thereof:

"Heavy duty buses, 1992 and after ..... 0.1 gbh.".

On page 218, line 13, insert "(1)" after "(e)".

On page 218, line 20, strike "1994" and insert in lieu thereof "1997".

On page 218, line 26, strike "paragraph" and insert in lieu thereof "subsection".

On page 219, line 1, strike "1994" and insert in lieu thereof "1997".

On page 219, line 1, after "as follows" insert the following: "(A) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of one million five hundred thousand persons or more,".

On page 219, line 7, after "later model years" insert the following: "; and (B) for metropolitan statistical areas or consolidated metropolitan statistical areas with a population of less than one million five hundred thousand persons but more than one million persons, 10 per centum of new urban buses purchased or placed into service in model year 1993; 25 per centum of new urban buses purchased or placed into service in model year 1995; 60 per centum of new urban buses purchased or placed into service in 1996; and 100 per centum of new urban buses purchased or placed into service in 1997 and later model years".

On page 219, line 9, strike "paragraph" and insert in lieu thereof "subsection".

On page 219, line 10, insert the following:

"(2) Not later than twelve months after the date of enactment of the Clean Air Act Amendments of 1990, the Administrator shall promulgate regulations requiring that, beginning January 1, 1992, any urban bus operating in any area specified in paragraph (1) shall, at the time of any major engine overhaul, be retrofitted so as to comply with the emissions standards under section 202(a) applicable for model years 1992 and after to new urban buses.".

McCLURE (AND CONRAD) AMENDMENT NO. 1431

Mr. McCLURE (for himself and Mr. CONRAD) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 449, after line 19, insert the following new section:

"CERTIFICATION OF EQUIVALENT ACID RAIN CONTROLS

"SEC. 416. (a) IMPORTS OF ELECTRICITY.—Except for imports of electricity pursuant to contracts entered into prior to the effective date of the Clean Air Act Amendments of 1990, after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision, after notice and opportunity for public comment, certifying, in accordance with subsection (b) that the nation from which such electricity is imported has established and is implementing a national program of emission requirements and controls on existing and new steam-electric utility units on a schedule and in a manner that is at least as stringent as the compliance schedules for and limitations on emissions under this Act and the Clean Air Act for similar utility units in the United States, except for import of electricity under subsection (c).

"(b) CERTIFICATION OF NATIONAL PROGRAM.—The Administrator shall not certify any national program or utility unit under subsection (a) unless it is determined that—

"(1) the nation has adopted legislation or regulations which give the emissions reductions and control schedules for each pollutant the force of law and is implementing such program; and

"(2) the legislation or regulations include performance standards, reporting requirements and enforcement provisions no less stringent than those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(c) CERTIFICATION OF UTILITY FACILITIES.—Unless imports of electricity are from a nation certified under subsection (b), after January 1, 1994, it shall be unlawful for any person to import electricity, unless the Administrator, in consultation with the Secretary and the Secretary of Energy, has published a decision, after notice and opportunity for public comment, certifying that—

"(1) the electricity to be imported is exclusively from an identified utility unit that converts nuclear fuel or renewable energy resources to electricity; or

"(2)(A) the utility unit is subject to emissions limitations at least as stringent as those specified under this Act and the Clean Air Act; and

"(B) the utility unit will meet emissions monitoring, inspection and reporting requirements at least as stringent as those specified under this Act and the Clean Air Act, and that the information contained in such reports is available to the Administrator and the Secretary upon request.

"(d) REVOCATION.—At least biennially, the Administrator, in consultation with the Secretary and the Secretary of Energy, shall review each certification made under this section and shall revoke the certification, after notice and opportunity for public comment, unless it is determined that the conditions of this section remain satisfied and for a national program under subsections (b), that the emissions reductions for each pollutant are occurring substantially on schedule in such nation. Revocation shall take effect one hundred eighty days after notice of the revocation has been published.

"(e) SUPPLEMENTARY REPORT.—The reports required by the Administrator pursuant to section (see amendment 1303, adopted March 6th) shall include an analysis by the Administrator, in consultation with the Secretary and the Secretary of Energy, of the differences in emission control levels of sulfur dioxide and nitrogen oxides between Canada and the United States. The report shall include a (1) detailed analysis of the actual of projected variable costs and fixed coss associated with United States and Canadian acid rain controls among fossil-fired generation units within interconnected and competitive regions and (2) an examination, with relevant supporting cost data, of the effect of differences in such controls on energy trade.

"(f) As used in this section, the term—

"(1) 'Administrator'; means the Administrator of the Environmental Protection Agency;

"(2) 'fossil fuel' means a naturally occurring organic fuel, including coal, crude oil, and natural gas or fuel derived therefrom;

"(3) 'import' means to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs or trade laws of the United States:

"(4) 'person' means an individual, corporation (including a government corporation), partnership, firm, joint stock company, trust, association, or any other entity, or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof (including any interstate body), or of any foreign government (including any international instrumentality);

"(5) 'renewable energy resources' means primary sources of energy that are essentially inexhaustible including biomass, geothermal, wind, falling water, and solar radiation; and

"(6) 'Secretary' means the Secretary of State.

MURKOWSKI (AND OTHERS) AMENDMENT NO. 1432

Mr. MURKOWSKI (for himself, Mr. CONRAD, Mr. WALLOP, Mr. NICKLES, and Mr. SIMPSON) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 390, line 7, after "boiler" insert "or feedstock".

On page 390, line 12, after "other" insert "combustion, precombustion, or post combustion".

On page 391, line 25, strike "of" and insert in lieu thereof "providing".

On page 392, line 2 and 3, strike "use of fuels" and insert in lieu thereof "fuels used at the time of submission of a proposal pursuant to section 404(d)(2)".

STEVENS (AND MURKOWSKI) AMENDMENT NO. 1433

Mr. STEVENS (for himself and Mr. MURKOWSKI) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 217, section 217 of Amendment 1293 is amended by: (a) redesignating subsection (4) as subsection (5) and; (b) adding a new subseciton (4) as follows:

"(4) The Administrator may waive in whole or in part the requirements of this subsection in any carbon monoxide nonattainment area in Alaska if the Administrator finds that prevailing temperatures in that area cause engine or fuel system malfunctions in vehicles using fuels meeting such requirements. The Administrator shall conduct a study to determine the effect of cold temperatures on fuels which meet the oxygen content requirements of this subsection and the feasibility of using such fuels during periods of sustained cold temperatures."

WILSON AMENDMENT NOS. 1434 AND 1435

Mr. DURENBERGER (for Mr. WILSON) proposed two amendments to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

AMENDMENT No. 1434

On page 81 of the amendment, between lines 17 and 18, insert the following new paragraph:

"(3) An implementation plan for an extreme area revised in compliance with this section may include measures providing economic incentives and disincentives, such as differential emission fees, marketable permits, road use and congestion fees, and emission charges, in combination with or as a supplement to regulatory requirements.

AMENDMENT No. 1435

On page 57 of the amendment, between lines 19 and 20, insert the following new sentence:

"With regard to subparagraphs (A), (B), and (C) of paragraph (2), the requirements of such subparagraphs shall comprise the statutory criteria for making transportation project conformity determinations under this Act.

ARMSTRONG (AND WIRTH) AMENDMENT NO. 1436

(Ordered to lie on the table.)

Mr. ARMSTRONG (for himself and Mr. WIRTH) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 209, Add a new subsection 211(e), as follows:

(e) ESTABLISHMENT OF A HIGH-ALTITUDE RESEARCH CENTER.—Section 103 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"( ) The Administrator shall designate at least one center at high-altitude conditions to provide research on after-market emission components, dual-fueled vehicles and conversion kits, the effects of tampering on emissions equipment, testing of alternative fuels and conversion kits, and the development of curricula, training courses and materials to maximize the effectiveness of inspection and maintenance programs as they relate to promoting effective control of vehicle emissions at high-altitude elevations. Preference shall be given to existing vehicle emissions testing and research centers that have established reputations for vehicle emissions research and development and training, and that possess in-house Federal Test Procedure capacity.

DECONCINI (AND MCCAIN) AMENDMENT NO. 1437

Mr. MITCHELL (for Mr. DECONCINI, for himself, and Mr. MCCAIN) proposed an amendment to amendment No. 1293 (in the nature of a substitute) proposed by Mr. MITCHELL (and others) to the bill S. 1630, supra, as follows:

On page 27 of the amendment, strike lines 1 through 6 and insert the following:

"(e) PLAN REVISIONS.—(1) Each revision to an implementation plan submitted by a State under this Act shall be adopted by the State after reasonable notice and public hearing. The Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement of this Act.

"(2)(A) Except as provided in subparagraph (B), each State that contains a nonattainment area shall rally implement all provisions of any implementation plan for such area that has been approved by the Administrator, in accordance with the schedules contained in the plan.

"(B) The State shall not relax a provision or schedule described in subparagraph (A) unless the Administrator has approved an alternative control measure pursuant to paragraph (3) of this subsection relating to such provision or schedule.

"(3) Nothing in this Act shall prohibit a State that contains a nonattainment area from revising the implementation plan of such State for such area to substitute an alternative control measure for a control measure in effect at the time of such revision (hereinafter referred to as an 'existing control measure'), if the State convincingly demonstrates, to the satisfaction of the Administrator, that the existing control measure is not otherwise required under this Act or under guidelines or regulations issued or promulgated by the Administrator and the alternative control measure—

(A) is not included in the implementation plan to be revised;

(B) is not otherwise required by this Act:

(C) will provide a degree of emissions control that is equal to or greater than the degree of emissions control that the full implementation of the existing control measure would provide; and

(D) will provide such degree of emissions control as expeditiously as would the full implementation of the existing control measure.

"(4) If the Administrator determines, after reasonable notice and public comment, that—

"(A) the State described in paragraph (3) has made a convincing demonstration required under such paragraph; and

"(B) the proposed revision to the implementation plan of the State meets the requirements of paragraph (1), the Administrator shall approve such revision.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Monday, April 2, 1990, at 4 p.m. to hold a hearing on the nomination of Henry Cauthen (SC) and Lloyd Kaiser (PA) to be members of the Board of Directors of the Corporation for Public Broadcasting.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DEFENSE INDUSTRY AND TECHNOLOGY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Defense Industry and Technology of the Armed Services Committee be authorized to meet in open session on Monday, April 2, 1990, at 2 p.m. to receive testimony on defense manufacturing technology and quality assurance programs in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

RALPH AND RUTH MORRIS, PUBLIC SERVANTS

● Mr. DASCHLE. Mr. President, in Washington there may be many, but in South Dakota there is only one first couple of the labor movement.

Ralph and Ruth Morris have earned their informal title through 59 years of marriage, to one another and to the men and women of organized labor.

Now in his 80th year, Ralph Morris steps down as president of the Sioux Falls Trades and Labor Assembly. But, after more than a quarter century of service in that post, and a half century of untiring work for labor and for the Democratic Party, every South Dakotan knows the Morrises will never step down from caring.

I am proud to pay tribute to Ralph and Ruth Morris today. I am proud to join the city of Sioux Falls, the State of South Dakota, the NAACP, the AFL-CIO, the Sioux Falls Argus Leader, KELO-LAND TV and so many, many others who have given

Ralph and Ruth the recognition and praise they have truly earned.

Their lives are proof of the variety and richness of the tradition of public service in this Nation.

Ask them and I know they will tell you that fighting for the working families, whose hurts and needs they feel so keenly, has enriched their own lives as well.

You can see it in Ralph's feisty caring and Ruth's quiet smile. Their fight has kept them young. Their cause has kept them strong. By serving more than just themselves, by devoting two lifetimes to the well being of others, Ralph and Ruth Morris have lived a lesson we should all study well.

Instead of staring as a nation at the Trumps and billionaire tricksters of America, those who seek truly fulfilling lives ought turn their gaze on Ralph and Ruth Morris of Sioux Falls, SD. To see them clearly is to understand why serving more than just ones self is actually to serve ones self as well.

Mr. President, I am proud to call Ralph and Ruth my friends.●

THE RENAISSANCE PROGRAM: AN EXAMPLE OF PARTNERS IN EDUCATION

● Mr. DURENBERGER. Mr. President, last week, several Minnesota secondary school principals gathered to discuss the possibility of enhancing education through the use of a new program called Renaissance. The Renaissance Program is an example of how students, teachers, parents, businesses, and the community can come together to improve education.

Jostens, Inc., created the program and is the main sponsor. Jostens helps schools initiate their programs, serves as a resource for ideas and coordinates the Renaissance network so educators can learn from one another.

Renaissance is a national network of educators sharing ideas that promote and achieve excellence. It is founded on three basic principles: First, that you reward and recognize behavior you value with incentives that have value; Second, that the entire community gains when our students achieve, thus the entire community must be involved, including: parents, teachers, business leaders and students themselves; and third, that the program must be flexible enough to adapt to the differing needs of different school districts.

Schools under the Renaissance Program promote academic values by developing a program that rewards achievement. One of the most adapted ideas draws on the idea first developed in Conway, SC, that establishes a card privilege system. Students who reach a certain grade point receive special privileges like free reserved parking, free admission to athletic events, or discounts at the school bookstore. The local community can get involved by offering discounts from local merchants, free tickets to sporting or cultural events, donating T-shirts or other merchandise. Some schools have incorporated family involvement by offering family discounts like a 10-percent reduction on the phone bill. The beauty of this program is that different schools offer different privileges depending on resources and needs. Some reward "A" students, some reward "A and B" students and others offer rewards based on increases in individual GPA's.

Jostens had found that communities have an economic interest in the well-being of their schools. If a school does well, the community does well. But it also found that many businesses have not gotten involved because they either do not know how or they have not been asked. The success of the Renaissance Program is that it has gotten the entire community involved.

Jostens has sponsored over 20 State conferences, similar to the Minnesota Conference last week, and two national conferences. In the 2 years since Jostens has promoted this program over 400 schools have attended a conference, and over 200 schools have begun to incorporate Renaissance ideas into their schools. In my own State, two school districts, White Bear Lake and Alexandria, have adopted the Renaissance technique.

The success, even in this short time, has been exceptional. Dropout retention at MacArthur High School in Oklahoma reduced by 50 percent. Willow Run High School reduced its suspension rate by 54 percent. In Dardanelle High School in Arkansas the number of A and B students rose from 30 percent to 40 percent while the number of failing grades lowered from 30 to 24 percent.

If we are going to improve education in America it will take a system of cooperation between the private and public sectors. The Jostens Renaissance Program is an example of how private involvement in education can work.●

LEONARD AND WANDA SLOTKOWSKI

● Mr. DIXON. Mr. President, last Thursday, two constituents from my State left for Poland as part of the United States Agency for International Development's Volunteers in Overseas Cooperative Assistance [VOCA] Program. Leonard and Wanda Slotkowski, of Glen Ellyn, IL, who for 50 years have been making some of the best Polish sausage, liverwurst, and Polish hams you have ever tasted, are now pioneers in the United States efforts to share their expertise with the Poles.

The Slotkowski's operated Slotkowski's Sausage Co., for five decades, and recently retired. Now, as part of the VOCA's Farmer-to-Farmer Program, they will go to Poland to determine the feasibility of establishing small-scale meat processing operations, perhaps to include the participation of United States partners in a joint venture.

The business of America is business, as the saying goes. The Government and people of Poland are working hard to make that saying applicable to them, as well. Then who better to represent our system than the Slotkowski's? Leonard and Wanda are people who represent what is best about the United States. They know their industry inside and out because they started small, worked hard, made a good product, sold it at a competitive price, and paid their employees fairly.

Leonard and Wanda knew that to be successful in business, one has to work harder than the competition; get up early, stay up late, and keep a critical eye on the bottom line. They and their children worked days and nights making fine products that graced many a table in the Chicagoland area.

Their business acumen will be invaluable to the Poles. Through their efforts, Poles will learn about the free market system, about efficient distribution systems, and effective marketing systems.

The Slotkowski's will serve, in effect, as economic pioneers. As Poland seeks to wrench its economy out of the inefficient, Communist system imposed on it over 40 years ago, they need the technical and commercial assistance that people such as the Slotkowski's can provide.

Mr. President, I congratulate Leonard and Wanda Slotkowski on their upcoming mission, and thank them for their contribution to the democratization of Poland. We can be proud of the Slotkowski's and all Americans who are giving their time and expertise toward the development of the emerging democracies.

I thank my colleagues.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. HEFLIN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign

country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 for Ms. Allison Barnes, a member of the staff of Senator HEINZ, to participate in a program in Bologna, Italy, sponsored by the German Marshall Fund, from April 13 to 23, 1990.

The committee has determined that participation by Ms. Barnes in the program in Italy, at the expense of the German Marshall Fund, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Edward Edens, a member of the staff of Senator WARNER, to participate in a program in Iraq, sponsored by the NAAA Foundation, from March 14 to 19, 1990.

The committee has determined that participation by Mr. Edens in the program in Iraq, at the expense of the NAAA Foundation and the Union of Arab Historians, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Michael Zarin, a member of the staff of Senator DURENBERGER, to participate in a program in Iraq, sponsored by the NAAA Foundation—a privately supported domestic institution—and by the Union of Arab Historians—a privately supported foreign institution—from March 15 to 19, 1990.

The committee has determined that participation by Mr. Zarin in the program in Iraq, at the expense of the NAAA Foundation and the Union of Arab Historians, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Senator ROTH to participate in a program in Portugal, sponsored by the Wilson Center, the Tinker Foundation, the Calouste Gulbenkian Foundation, and the Luso-American Development Foundation, from March 24 to 26, 1990.

The committee has determined that participation by Senator ROTH in the program in Portugal, at the expense of the Wilson Center, the Tinker Foundation, the Calouste Gulbenkian Foundation, and the Luso-American Development Foundation, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for James Lee Price, a member of the staff of the Joint Economic Committee, to participate in a program in Brazil, sponsored by the Regional Council of Sao Paulo, the United States Information Agency [USIA], the Secretary of Science, Technology and Economic Development, the Secretary of Economic Planning of the State of Sao Paulo, BANESPA—Bank of the State of Sao Paulo and the United States Department of State, from March 25 to 30, 1990.

The committee has determined that participation by Ms. Murray in the program in Brazil, at the expense of United States Department of State, the Regional Economic Council of Sao Paulo, and USIA, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Wallace J. Henderson, a member of the staff of Senator BREAUX, to participate in a program in Iraq, sponsored by the NAAA Foundation, from March 14 to 30, 1990.

The committee has determined that participation by Mr. Henderson in the program in Iraq, at the expense of NAAA Foundation and the Union of Arab Historians, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Senator FOWLER and Steve Humphreys, a member of his staff, to participate in a program in Iraq, sponsored by the NAAA Foundation, from March 14 to 30, 1990.

The committee has determined that participation by Senator FOWLER and Steve HUMPHREYS in the program in Iraq, at the expense of NAAA Foundation and the Union of Arab Historians, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Timothy S. Bergreen, a member of the staff of Senator BREAUX to participate in a program in Iraq, sponsored by the NAAA Foundation, from March 14 to 30, 1990.

The committee has determined that participation by Mr. Bergreen in the program in Iraq, at the expense of NAAA Foundation and the Union of Arab Historians, is in the interest of the Senate and the United States.●

STRENGTHENED BY VICTORY—UNDAUNTED BY DEFEAT

● Mr. DURENBERGER. Mr. President, young people looking for a role model in public service need look no further than the career of Al Loehr, the former mayor of St. Cloud, MN. I am proud to pay tribute to Al before my colleagues, in recognition of his retirement from administration, policy, and politics.

Al is just a few years older than I, and grew up not too many miles from my home. He has woven a blanket of experience that stands the test of time, for today, Al has as many, if not more, friends than when he first entered the political arena, 25 years ago. It is true though that a commitment from, or compromise offered by Al Loehr, under any conditions, has always been looked on as first class.

This winter I ran across a profile of Al written up in the St. Cloud Daily Times. At this time, I ask that it be submitted to the RECORD, as recognition of a career built on earnest public policy and municipal growth, blended well with a sense of humor and gentleness we now know as a rare quality.

Though Al and I have technically always been on "different sides of the aisle" I would like to take this opportunity to compliment him on his lifelong commitment to good government, and to the people of St. Cloud and Minnesota. This winter has been a particularly mild one in Minnesota, and I am sure Al is thinking right now of the cabin on Grand Lake, the warm breezes and big fish—the pleasures that come with early retirement.

Mr. President, please insert for the RECORD the following article as it appeared in the St. Cloud Daily Times.

The article follows:

[From the St. Cloud Times, Jan. 12, 1990]

PUBLIC SERVICE HALLMARK OF LOEHR CAREER

(By Bill McAllister)

Al Loehr's quarter century in public life didn't leave him unbloodied, but it did leave him unbowed.

When he retired last week as a state Senate aide, Loehr, 62, left the state Capitol feeling he had been true to his principles of hard work, honesty, frugality and public service. He summed it all up as "a great privilege."

And he retires with the administration not only of friends, but also of many one-time adversaries.

True, there were as many defeats as victories for Loehr, a big, intense man with an authoritative voice.

He won three terms as mayor of St. Cloud, but he was unceremoniously dumped in 1980 by political newcomer Sam Huston.

He was state commander of the Veterans of Foreign Wars and state veterans affairs commissioner, but he narrowly missed a chance to head the U.S. Veterans Administration under President Jimmy Carter.

He was president of the Minnesota League of Cities. But he was soundly defeated in his two bids for the Legislature and his one race for state auditor.

"The whole magic of public office is being in the right place at the right time," he said recently.

Through it all, the call to public service kept summoning Loehr.

"He's a true person to work for the public," said Huston, who recently retired after nearly matching Loehr's 10 years as major. "I don't think there's self-interest at all."

In 1984, Rep. Dave Gruenes, IR-St. Cloud, thumped Loehr in the state House race. "I think his whole career has been one where people have been put first and service to people has been put first," Gruenes said recently. "Al was a perfect example of a public servant—In the highest sense."

Gov. Rudy Perpich declared Dec. 21 "Al Loehr Day in honor of Loehr's then-pending retirement as administrative aide to the Senate Local and Urban Affairs Committee.

Loehr grew up in the city's 3rd Ward, which in his youth was distinctly poor and blue collar. His father was a stone cutter during the period when granite was the city's predominant industry.

"I've always had a great deal of compassion for people who basically felt helpless," he said.

Loehr went into the Navy during the final year of World War II, working as a storekeeper 3rd class on the U.S.S. Calvert, a troop transport ship in the South Pacific. That experience eventually led to his political career.

He joined the American Legion after the war ended in 1945 and then the Veterans of Foreign Wars 10 years later.

"I had to be active," he said.

As he became aware of deficiencies in the veterans benefit system, he took on more and more responsibility within the VFW, finally becoming state commander in 1962.

In 1964, the St. Cloud area's young Liberal senator, Raymond Bares, was killed in a car accident, along with his wife and child. Loehr, a Liberal and Harry Truman fan who was the DFL field man in the St. Cloud area, ran for the open seat against Keith Hughes, a young Conservative attorney. But he lost his first public electoral contest. The race was before the era of partisan designation in legislative races, but Liberals were known to be DFLers and Conservatives generally were known to be Republicans.

"It was a clean race," he said. "Keith Hughes was a fine, effective, productive senator for St Cloud."

The race yielded an anecdote that is popular with some political insiders:

Loehr went to campaign at the Great Northern Railroad, where he had worked for 17 years as an electric welder after leaving the Navy.

But a foreman named Al Ringsmuth had Loehr ejected from the grounds. Ringsmuth, the Republican mayor of Waite Park, later sparred with Loehr when Loehr became mayor of St. Cloud.

Loehr said Ringsmuth, well-known for a combustible personality, was just a-rippin' an' a-snortin' " when he approached Loehr, and "I sensed it immediately—that something was going to happen."

Ringsmuth, who still is mayor, said: "He was a little bitter at the time, but I think that ironed out all right."

Ringsmuth and Loehr were classmates at Cathedral High School. Whatever public differences they later had, the two mayors got along well personally as mayors of adjoining cities, Ringsmuth said.

Loehr won an appointive post in 1965, when Gov. Karl Rolvaag chose him to be state veterans affairs commissioner.

Loehr said one of his biggest accomplishments was making state biggest accomplishments was making state benefits available to a group of veterans who "fell through the cracks"—those who served after World War II but before the Korean War.

He also designed the bonus for Vietnam-era veterans that became a state constitutional amendment in 1972, three years after he had left the commissioner's post. Voters approved the amendment by the greatest margin given a constitutional amendment, he said.

Rolvaag had been defeated by Republican Harold LeVander in 1966. After that, Loehr wasn't sure if he would be reappointed, despite encouragement by LeVander's chief of staff, Dave Durenberger. LeVander was defeated in 1970 by Wendell Anderson.

So when his term was up, Loehr accepted a job as emergency services director for Stearns County, in which he developed disaster response plans.

Meanwhile, St. Cloud Mayor Ed Henry was becoming engulfed in a fight between the city and St. Cloud Township over annexation. Loehr said.

Also controversial was the moving of the city's baseball field from the former Rox Park, now site of the ShopKo store in the Westgate Mall, to the current Municipal Arena site. Meatpacker Max Landy was having a feud with the city, urban renewal programs were under attack and some business operators were vehemently opposed to plans for a downtown mall and "ring" road.

Henry suddenly resigned and soon afterward took a college presidency in Indiana.

Loehr said he found himself being recruited by both Democrats and Republicans to run in the special election. He defeated Councilman-At-Large Dave Sauer by 568 votes to fill out the 17 months left in Henry's term.

Loehr said he was hurt by the perception of his being a "regal" mayor.

"I was very sensitive about that," he said. "To this day, I don't understand that. I had an open-door policy. Anybody and everybody could see the mayor. I had the media in every morning. I prided myself on knowing what was going on in the city."

He said he probably took things too seriously, however.

Part of the perception problem also might have been Loehr's habit of saying "we" or "Al Loehr" when he meant "I."

That was another misunderstanding because he was just trying to credit his family and his supporters for his success, he said.

"I don't like that word, 'I,' " he said. "The word 'I' sounds arrogant—like you can do everything as an individual. And you can't. At times, I think I was the most misunderstood person in the world."

Loehr went about implementing the mall and ring road, which sharply divided opinion in the city.

Today he stands by those decisions, although he said he's "really disappointed" that downtown business operators generally didn't spruce up their storefronts enough to make the mall work. He said he expected there eventually would be two-way traffic on parts of the ring road, a development that took place a few years after he left office.

Loehr's re-election campaign in 1972 was against Phyllis Janey, who he recalled as being an outspoken human rights advocate. He won by 4-1.

At this point, he felt good about the job. "We proved we could operate city government in a frugal manner," he said.

So in 1974, in the middle of his first full four-year mayoral term, he won the DFL endorsement to run for state auditor.

"I just felt I could make a good contribution to state government," he said.

It was a banner year for Democrats. With the Watergate scandal destroying Republicans and DFL Gov. Wendell Anderson touting the Minnesota good life on the cover of Time magazine, the DFL was at its peak.

But Loehr ran into a problem in the DFL primary election, with a defeat by Robert Mattson Jr., son of the former attorney general.

Mattson, a maverick who would become infamous in 1983 as a Minnesota state treasurer living in Florida, was "a jerk," Loehr recalled heatedly. Mattson hammered Loehr in the primary and went on to win the auditor's job.

Looking back, Loehr attributed his loss to Mattson's Scandinavian name, a mistake in listing himself on the ballot as "Alcuin G. Loehr" and his opposition to DFL platform planks that were tolerant of abortion and same-sex marriages.

Loehr does not have fond memories of his 1976 re-election campaign, although his margin of victory was a comfortable 1,200 votes.

His opponent, Alice Ford, accused him of unethical, dishonest conduct, charging that he had diverted city money for non-city purposes, he said. Although the news media found no substantation for the charges, the incident was painful, he said.

"I can say this: I was an honest person," Loehr said.

Ford later won a seat on the council, along with former anti-war activist George Mische. Together, they, along with public complaints about the design of a new bridge to be aligned with 10th Street South, made Loehr's last term rough.

Loehr said he wishes he hadn't run for re-election in 1980.

After 10 years as mayor, "you're bound to develop barnacles that you can't shed," he said. "As you go through your term in office, those things begin to build on you."

At first, Loehr's opposition was just Mische. But Huston, a civil engineer and motorcycle shop owner, jumped into the race at the last minute, earning the moniker "Sudden Sam." Huston defeated Mische in the primary and Loehr in the general election.

There was a contract in style when Huston took over at City Hall, Loehr said.

"I think Sam did a reasonably good job," he said. "Sam was a very personable guy, but he didn't want to be bothered with details. . . . Sam didn't have the crisis issues we had to deal with."

Huston's evaluation: "I think he had the City in pretty good shape. . . . It was great to follow a guy like Al Loehr in office." Huston agreed there was a style difference. "I think I tend to be relaxed and he tends to be—I don't want to say uptight—but much more stern."

Soon after losing the mayor's job in April 1980, Loehr was offered a job as top assistant to the head of the U.S. Veterans Administration.

Earlier in Carter's presidency, he had been considered for the administrator's post itself but the nod went to a severely injured Vietnam vet. Loehr turned down the assistant's position because of indaequate pay and also the possibility, soon realized, that Carter would lose the presidency to Ronald Reagan.

Loehr also had suppressed his desire for the state Senate seat, which was being vacated by DFLer Jack Kleinbaum. The seat was won instead by then-Rep. Jim Pehler, DFL-St. Cloud, a St. Cloud State University faculty member who Loehr said he has never been close to.

Loehr also turned down DFLers who wanted him to run for the House seat Pehler was vacating. That was won by Independent-Republican Gruenes.

Loehr's attention did turn toward the Legislature, though.

Sen. Robert Schmitz, DFL-Jordan, then chair of the Senate Veterans Affairs Committee, picked Loehr to be his administrative aide.

Sen. Joe Bertram, DFL-Paynesville, who now heads that committee, said Loehr was an unusually experienced staff member.

"He's always been able to offer advice," Bertram said. "There aren't too many times you can get an ex-mayor to serve as an administrative aide."

Loehr remained influential on veterans' issues even after Schmitz took over the chairmanship of Local and Urban Govern-

ment and gave up the Veterans Committee post, Bertram said. Loehr's behind-the-scenes persuasion might have made the difference when the Legislature recently decided to build a new veterans home in Luverne, he said.

Loehr was slow to give up the idea of actually being a member of the Legislature.

In 1982, he considered a primary challenge to Pehler. Loehr and Kleinbaum criticized Pehler when he endorsed George Mische's re-election bid to the St. Cloud City Council. Words were exchanged, but Pehler was unopposed for endorsement and won re-election handily.

Two years later, though, Loehr jumped in, picking up the DFL endorsement to challenge Gruenes. He said he got $100 from Mische for that campaign, demonstrating that the hatchet was buried there. But when Pehler talked about the good working relationship he had with Gruenes at the Legislature, that hurt Loehr's candidacy, Loehr said. Gruenes won in a landslide.

Loehr said he always intended to retire at age 62, although he didn't explain what was magic about the number. He feels good about meeting three presidents and working with six governors.

He has been flattered by all the attention the occasion has gotten.

His plans are vague—to spend time at his family's cottage on Grand Lake near Rockville, to visit friends and relatives.

He has agreed to serve on an advisory committee dealing with metropolitan airport planning, at the request of House Speaker Bob Vanasek. Bertram also is looking for Loehr's counsel on veterans issues.

Loehr said it's unlikely that he would seek public office again, although he considered a comeback for mayor last year and believes he could have won.

On the other hand . . . he could see himself replacing Stearns County Commissioner Bob Gambrino—if Gambrino were to retire.

When asked whether the public life of Al Loehr had definitely come to an end, Loehr allowed himself a coy smile.

"You never say never—never." ●

LEDERLE'S SUPRAX FAMILY HEALTH FUND

● Mr. DODD. Mr. President, as the number of homeless people in the United States continues to grow, homelessness is no longer an invisible problem. It is becoming commonplace to see homeless people huddled on street corners or crouched over steam grates, trying to get warm. It may surprise my colleagues to learn that families are the fastest-growing segment of our estimated 3 million homeless, and that one out of every four homeless is a child.

Homeless children have more serious health problems than their more fortunate contemporaries, and common childhood illnesses such as bronchitis and ear infections are widespread among them. These health problems were described last fall during hearings of the Subcommittee on Children, Family, Drugs and Alcoholism, which I chair.

Mr. President, I am delighted that one private sector organization has announced an ambitious and extensive program to help these children to better health; Lederle Laboratories, which first learned of this problem through the subcommittee hearings, recently announced the establishment of the SUPRAX Family Health Fund. The program will make available 10 million dollars worth of SUPRAX, Lederle's newest antibiotic, and will provide funding for innovative outreach programs to bring primary health care services to the homeless.

The program has been developed in conjunction with health care specialists at the Children's Health Fund and the National Association of Community Health Centers [NACHC]. Lederle will provide SUPRAX, at no cost to the patient, through NACHC centers and community and migrant health clinics. There are more than 600 NACHC centers in the United States which provide health care to homeless patients through more than 2,000 community and migrant health clinical sites. In addition to this donation, Lederle has made a $1 million grant to the Children's Health Fund to develop its outreach program, which uses mobile health units staffed by medical professionals to bring health care to homeless families and children.

Mr. President, I congratulate Lederle on this initiative. This is corporate volunteerism at its best. I hope that many other corporate citizens will step forward to help ease the serious problems faced by our Nation's homeless. ●

THREATS POSED BY CHINESE MISSILE SALES AND IRAQI MISSILE AND NUCLEAR PROGRAMS

● Mr. BINGAMAN. Mr. President, I rise today to address the dangerous implications of recent events that converge in what is now the world's most volatile region, the Middle East.

I refer first of all to reports appearing in the media that China may have resumed the sale of ballistic missiles to countries in the Middle East. The sale of such weapons, whatever their operational range and regardless of the type of warhead they may carry, is inherently destabilizing. I note that the statement issued March 24 by the State Department declares that the administration has made clear to the Chinese Government the risks inherent in the provision of any type of missile to countries in the Middle East. It is evident that the Chinese choose to pay little heed to the administration's advice, and may well proceed with sale of what are reported to be short-range missiles.

The threat posed by this prospective Chinese action is enhanced by reports carried in the March 30 edition of the New York Times that the administration has failed to obtain from the Chinese concrete assurances that China will not sell medium-range missiles in the Middle East. I ask that this article be inserted in the RECORD at the conclusion of my remarks. Vague assurances on the sale of medium-range missiles were the only benefit deriving from the once-secret visit of National Security Adviser Scowcroft to Beijing. However, with the Chinese refusal to clarify these assurances, in particular their refusal to agree to a definition of what is a medium-range missile, it is reasonable to question the value of any such assurance from the Chinese Government. Until China is willing to provide specific commitments on this issue, including being forthcoming on the definition of medium-range missiles, we can expect that the proliferation of ballistic missiles in the Middle East will continue at a rapid pace.

The second development with major implications for stability in the Middle East is the seizure in London of nuclear triggers destined for Iraq. In itself this would be a cause for serious concern, based on Iraq's previous attempts to arm itself with nuclear weaponry. My concern is heightened by the fact that Iraq is the Middle East country that has made the greatest strides in consolidating a ballistic missile launch capability. In fact, the threat posed by Iraq's missile program grows from month to month. The New York Times reported March 30 that Iraq has constructed fixed missile launch sites which enable Iraq to strike directly at Israel. The article suggests that the launchers are designed to retaliate against an Israeli preemptive strike similar to the 1981 bombing of the Osirak nuclear reactor. It is small comfort to know that these missiles are intended only to deter attacks on Iraq's nefarious nuclear and chemical warfare industries. They obviously themselves invite preemption. This too is an important article and I ask that it be inserted in the RECORD at the conclusion of my remarks.

It is also worth recalling that last December, the Iraqis launched what was reported to be a multistage ballistic missile with a range of 1,200 miles. Should the Iraqis be able to marry ballistic missile technology and nuclear weaponry, they would be able to threaten every country in the Middle East, and United States interests in the region as well, with nuclear blackmail or even nuclear destruction. Given Iraq's demonstrated disregard for international law in its use of chemical weapons against the Iranian Army and against its own defenseless Kurdish minority, no one can welcome Iraqi advances in either missile or nuclear technology.

These developments together demonstrate the dangers inherent in the continuing worldwide spread of ballistic missile technology. Combined with efforts by several nations to augment their arsenals with ever more destruc-

tive weapons—chemical, biological, nuclear—the proliferation of ballistic missiles makes the world an increasingly more dangerous place. It is clear to me that we must take stronger measures to reduce in a significant way the access of developing countries to missiles and missile technology. Several bills on this issue, including one introduced by myself, are pending before the Congress. I believe that these recent events demonstrate the urgency of this problem, and require that we complete action on these bills as soon as possible.

The articles follow:

[From the New York Times, Mar. 30, 1990]

IRAQ SAID TO BUILD LAUNCHERS FOR ITS 400-MILE MISSILES

(By Michael R. Gordon)

WASHINGTON, Mar. 29.—Iraq has constructed for the first time launchers for missiles within range of Tel Aviv and Damascus, according to classified American intelligence reports. While the weapons could be used for offensive purposes, American intelligence experts believe that the missiles are intended in part to discourage any possible Israeli attack on Iraqi nuclear or chemical weapon installations.

On Wednesday, American and British agents arrested five people and seized 40 Iraq-bound electrical devices that had been smuggled out of southern California. Experts say that the devices are well-suited for triggering nuclear bombs and may have other military applications.

Iraq's efforts to obtain the devices have heightened international concerns about its program to develop nuclear weapons. Experts say that Iraq has the largest chemical weapons program in the their world and is trying to develop biological weapons.

The construction of the missile launchers in Western Iraq, which has provoked concern among senior Administration officials, was described in a classified Central Intelligence Agency report prepared early this month. American intelligence about the Iraqi missile launchers was disclosed before the arrests in the Iraqi smuggling case.

CONSTRUCTION COMPLETED

The report says that Iraq recently completed the construction of six launchers for modified Scud missiles at its H-2 airfield, which an Administration official said was built by the British and is in western Iraq on the road between Baghdad and Jordan. Construction of the launchers began last June. The launchers are similar to launchers recently discovered in central Iraq, the intelligence report says.

According to the intelligence report, the launchers are the first stationary ones that Iraq has built within range of Tel Aviv or Damascus.

American intelligence experts say that they believe that the launchers are for Iraq's Al-Husayn surface-to-surface missile, a 400-mile version of the Soviet-designed Scud missiles, which Iraq fired at Iraq in the 1980-88 Persian Gulf war.

While Iraq has mobile launchers for the Al-Husayn missile that could be transported within range of Israel, American experts say that the fixed launchers may enable Iraq to fire the weapon with more accuracy.

SEEN AS BLUNT STATEMENT

The newly constructed launchers are also seen as a blunt statement by Iraq that it will retailate against any Israeli attack on its chemical weapons or nuclear installations, according to the intelligence report and senior Administration officials.

Israeli planes bombed and destroyed an atomic reactor near Baghdad in 1981 that Israel said was involved in the production of chemical weapons.

"By building fixed launchers, they want everybody to know that the launchers are there," said a senior Administration official.

The senior official said that Iraqi officials had signaled to foreign diplomats that the launchers would be used to retaliate against an Israeli pre-emptive attack against Iraqi military installations. Iraq, he said, has built up its air defenses and is improving its ability to communicate with the Jordanian and Saudia Arabian military.

Iraq's construction of launchers within range of Israel was described in a carefully worded White House statement as a "destabilizing development.

IF TRUE, WE ARE CONCERNED

"We do not comment on intelligence matters," a White House spokesman, Roman Popadiuk, said, when asked about the intelligence reports. "However, if true, we would be very concerned. We are concerned about the destabilizing effects of the spread of ballistic missiles and missile technology, especially in areas of tension."

[In Jerusalem, there was no immediate comment. On Wednesday, in response to the seizure of the triggering devices in Britain, a senior Israeli Defense Ministry official said simply, "There is no Defense Minister now, and so we are not dealing with this issue."]

About 190 conventionally armed Al-Husayn missiles were fired by Iraq at Iran in March and April 1988 in the gulf war, according to W. Seth Carus, an expert on missile proliferation at the Naval War College Foundation.

The Iranians said that the missiles, which are liquid fueled, were not very accurate, an assertion affirmed by some American officials. The Iraqis have recently said that they are improving the missile's guidance system.

MODIFIED VERSION OF SOVIET MISSILE

"From a technical standpoint, the missile's accuracy against specific military targets is probably not very good," Mr. Carus said. "But if all you want to do is hit Tel Aviv, it is more than accurate enough."

The weapon is an extensively modified version of Scud-B missiles originally provided to Iraq by the Soviet Union.

The missile was never used with a chemical warhead in the gulf war, and an Administration official, who asked not be identified, said the United States did not now know if Iraq currently had the capability to equip missile with a chemical warhead. But the official added that Iraq had a large program to develop chemical weapons and is believed to be developing chemical warfare.

Iraq has said that it is developing more modern missiles, including those of longer range. In December, Iraq asserted that it possessed a 2,000-kilometer-range missile called the Tammuz I.

[From the New York Times, Mar. 30, 1990]

BEIJING AVOIDS NEW MISSILE SALES ASSURANCE

(By Michael R. Gordon)

WASHINGTON, March 29.—The United States has sought but failed to obtain additional assurances from China that Beijing will not sell medium-range missiles to the Middle East, Administration officials said today.

The new assurances were sought during an unpublicized meeting last month between Reginald Bartholomew, the top State Department official for weapons proliferation, and the Chinese Ambassador to Washington.

Chinese missile sales have been a serious worry for the United States, which has sought to stop the spread of delivery systems capable of carrying chemical or nuclear warheads to the Middle East and other regions of tension.

When the national security adviser, Brent Scowcroft, visited China in December, the Chinese offered a general assurance that they would not sell medium-range missiles to the Middle East. China also stated that it would not sell its M-9 missiles to Syria, a medium-range weapon under development of particular concern to American officials.

But the Chinese never defined exactly what they meant by medium-range, American officials say.

American officials have tried repeatedly in recent years to get the Chinese to agree to an internationally agreed definition that missiles that can carry a 1,000 pound payload more than 160 miles is considered to be a medium-range weapon. That definition is contained in export guidelines agreed to by Western nations and was recently affirmed by Soviet officials when Secretary of State James A. Baker 3d visited Moscow.

Mr. Bartholomew, who reportedly called in the Chinese Ambassador for broad discussion of American proliferation concerns last month, is said to have renewed American efforts to clarify Beijing's general assurances that China will not sell medium-range missiles. But the Chinese have not responded, Administration officials said today.

Mr. Bartholomew's efforts, and new American diplomatic approaches to the Chinese in Beijing in recent days, comes against a background of intelligence reports that China may be preparing for a new round of missiles sales.

According to recent American intelligence reports, China may have agreed to provide Iran with at least 50 short-range surface-to-surface missiles called the 8610, a weapon with a range of about 80 miles.

The United States has also received unconfirmed reports that China might be planning surreptitious sales of M-9 missiles to Syria by routing them through South America. An Administration official said the United States had received no evidence to confirm that China has actually done that.

Other intelligence reports cite a possible link between China and artillery technology transferred to Libya and the possible transfer of missile technology to Pakistan.

More recently, a convoy of missiles that moved through Beijing last weekend toward the main north China port of Tianjin has stirred further concerns about possible Chinese missile sales.

Early speculation held that the missiles might be short-range missiles destined for Iran. An Administration official said that some intelligence analysts now say they believe that the reported convoy was not in fact headed toward the port of Tianjin and thus was not evidence of a missile sale.

The official said the Administration was not certain tht the convoy was carrying missiles but believed that it probably was tranporting short-range missiles.

China is already producing the 8610 short-range missile and is expected to begin production of the M-9 medium-range missile

and a slightly shorter-range M-11 missile by early summer, officials said.

State Department officials said they disagreed with the recent assessment by a senior Navy intelligence official that China was eagerly trying to sell its M-type missiles to the Middle East.

Rear Adm. Thomas A. Brooks, director of Naval Intelligence, noted in recent Congressional testimony that China's marketing efforts might lead to possible sales to Syria, Libya, Iran and Pakistan.●

CBO COST ESTIMATE FOR H.R. 987, TONGASS TIMBER REFORM ACT

● Mr. JOHNSTON. Mr. President, on March 30, the Committee on Energy and Natural Resources filed the report to accompany H.R. 987, the Tongass Timber Reform Act.

At the time this report was filed, the Congressional Budget Office had not submitted its budget estimate regarding this measure. The committee has since received this communication from the Congressional Budget Office, and I ask that it be printed in the RECORD at this point:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, DC, March 30, 1990.

Hon. J. BENNETT JOHNSTON, JR.,
Chairman, Committe on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached cost estimate for H.R. 987, the Tongass Timber Reform Act.

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

ROBERT D. REISCHAUER.
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill Number: H.R. 987

2. Bill Title: The Tongass Timber Reform Act

3. Bill Status: As ordered reported by the Senate Committee on Energy and Natural Resources, March 7, 1990.

4. Bill Purpose: Title I would repeal provisions of current law that provide permanent appropriations for the Tongass Timber Supply Fund. Instead, the act would require annual appropriations to support timber management and resource conservation in the Tongass National Forest. This title would also:

Eliminate the requirement that the Forest Service (FS) provide to the timber industry a specified amount of timber from the Tongass;

Require the FS to include the Tongass in its study of lands unsuitable for timber production; and

Require the FS to maintain commercial timber harvesting buffer zones along specified sections of certain streams in Alaska.

Title II would establish 12 areas encompassing over 670,000 acres of land in the Tongass as special management areas. These areas would be managed by the FS as Land Use Designation II (LUD II) areas as set forth in the Tongass National Forest Land Management plan.

Title III would make specific, unilateral changes to two existing long-term timber sale contracts on the Tongass. Within 90 days of enactment, the FS would be required to transmit to the Congress copies of the modified contracts. The General Accounting Office would be required to audit the contract modification process and to report to the Congress within 120 days of the bill's enactment on whether the modifications are in compliance with the requirements set forth in this act.

Title IV would amend the Haida Land Exchange Act of 1986 to allow the Haida Native Corporation one year to select specified lands in exchange for other lands or selection rights.

5. Estimated Cost to the Federal Government: The elimination of the permanent appropriation for the Tongass National Forest would result in a reduction in direct spending beginning in fiscal year 1991. This reduction may be partially or entirely offset by increased appropriations for the same purpose, but that would depend entirely on future Congressional action.

Also partially offsetting these savings would be additional costs totaling $2 million to $3 million over the next five years to carry out the land exchange authorized in Title IV and for additional timber sale preparation activities resulting from maintenance of commercial logging buffer zones in Title I and from the LUD II designations in Title II.

The federal government could incur additional costs if it is required to pay damages to the holders of the two long-term timber contracts that would be unilaterally modified as a result of this bill's passage. The magnitude of any such costs would depend on future legal action that is impossible to predict at this time. It is unlikely that court settlement would occur within the next year.

The direct spending savings resulting from enactment of this legislation are shown in the following table:

[By fiscal year, in millions of dollars]

	1991	1992	1993	1994	1995
Direct spending					
Repeal of Tongass timber:					
Supply fund:					
Estimated budget authority	−44	−44	−44	−44	−44
Estimated outlays	−28	−44	−44	−44	−44

The costs of this legislation fall within budget function 300.

BASIS OF ESTIMATE

Titles I and II.—Repeal of the permanent appropriation for the Tongass Timber Supply Fund would result in a reduction in direct spending of approximately $28 million in 1991 and about $44 million annually thereafter. These are the amounts that CBO projects would be spent under existing authority to support the preparation and sale of 300 million to 400 million board feet of timber annually from the Tongass.

Information from the FS indicates that the LUD II designations in Title II, along with the buffer zone requirements in Title I, would reduce the volume of timber currently available for sale or release by about 50 million board feet. CBO does not expect this reduction to result in a loss of receipts over the next five years because the FS has indicated that it would maintain currently projected harvest levels by offering timber for sale in other areas. Preparation of new timber sale areas would cost $1 million to $2 million over the next five years.

Title III.—The federal government could incur additional costs if the two companies holding long-term timber sale contracts sue the federal government and the courts determine that the unilateral modifications to the sale contracts as contained in Title III significantly affect the companies' profitability. The long-term contracts were negotiated in the 1940s to ensure the companies a sufficient quantity of timber—at prices negotiated every five years (known as operating periods)—in exchange for the operation of timber processing facilities in the region. Under current law, the contracts will expire in 2004 and 2011.

CBO has no basis for evaluating whether the federal government would be held liable or for estimating the magnitude of any potential compensation. Even if the United States is held liable, the potential range of court awards is very broad.

For instance, a court award would be relatively small if the court reasons that even after modification, the contract holders will continue to have access to adequate supplies of timber, albeit at a higher price. Under this scenario, damages could be limited to the difference between the contract price for timber under the unmodified contracts and the price under the terms of the modified contracts. Depending on what timeframe the courts use to calculate these additional costs (the time remaining in the current five-year operating period or the remaining life of the contracts), compensation under this scenario could be less than $20 million.

On the other hand, a court award could be greater if the courts conclude that enactment of this bill, including unilateral modifications to the contracts, would diminish the value of the mills and facilities built pursuant to the original contracts. Under this scenario, compensation for that reduction in value could also be required. While these amounts could be significant (perhaps as much as several hundred million dollars), CBO cannot estimate the magnitude of any potential compensation for the value of the mills and facilities.

Title IV.—Based on information from the FS and the Bureau of Land Management, CBO estimates that the land exchange authorized in Title IV would result in additional costs totaling about $1 million in 1991, primarily for boundary surveys. Information from the FS also indicates that the federal lands conveyed to the Haida Corporation would likely be more valuable than the lands the federal government would receive in exchange. This is probable because the exchange would be based on acreage and not on land value, and the choice of lands to be exchanged would be made by the Haida Corporation. This potential loss in land value would have no direct effect on the federal budget over the next five years.

6. Estimated cost to the State and local governments: Enactment of this legislation would not result in additional direct costs to state or local governments.

7. Estimate comparison: None.

8. Previous CBO estimate: On June 6, 1989, CBO prepared a cost estimate for H.R. 987, the Tongass Timber Reform Act, as ordered reported by the House Committee on Interior and Insular Affairs on May 31, 1989. CBO's estimate of the budget impact of that version of the bill is similar to the estimate for titles I, II, and III of this bill.

On June 23, 1989, CBO prepared a cost estimate for H.R. 987, the Tongass Timber Reform Act, as ordered by the House Committee on Agriculture on June 21, 1989. Our

estimate for that version of H.R. 987 is similar to the estimate for titles I and II of this bill.

9. Estimate prepared by: Theresa Gullo (226-2860).

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.●

TRIBUTE TO FRANK LEE AND MARGARET KRAUS

● Mr. CHAFEE. Mr. President, today I would like to recognize two outstanding citizens of the State of Rhode Island and the United States of America. Frank Lee is stepping down after a successful term as commander of the Primmer-Cordeiro Post 5385 of the Veterans of Foreign Wars of the United States. Margaret Kraus is finishing her term as president of the Primmer-Cordeiro Post 5385 Ladies Auxillary. These two individuals are two examples of President Bush's Thousand Points of Light.

Under the able leadership of Mr. Lee and Ms. Kraus, the Primmer-Cordeiro Post 5385 has continued its long history of community service in Rhode Island. Founded in 1946, this post has served the community, the veterans, and the State well throughout the years. Activities such as visiting nursing homes, working in hospitals, running safety programs, coordinating Loyalty Day, and sponsoring the Voice of Democracy contest are hallmarks of the benevolence of this group.

Mr. Lee has served as commander of Post 5385 for the past year and has a long history of community service to his credit. Ms. Kraus also has a distinguished career in the service of those around her of which she can well be proud.

I ask my colleagues in the Senate to join me in recognizing the contributions and accomplishments of these two special individuals. The commitment of Mr. Frank Lee and Ms. Margaret Kraus to community service and to the Primmer-Cordeiro Post 5385 is of note to us all.●

THE SUN OF BREMERTON WASHINGTON ENDORSES TERM LIMITATION

● Mr. HUMPHREY. Mr. President, many opponents claim that congressional term limitation will unleash the bureaucracy, which will increase its power until Congress can no longer practice its oversight of the agencies. Congressional oversight is an important function, but let us not forget that Congress often forces the Executive to do things not in the national interest, like buying $1.1 billion worth of F-14's the Navy does not want, or 2,108 10-ton trucks the Army does not want.

The travesty of our present system, is that sending pork home to the district has become more important than spending taxpayer money prudently. Mr. President, imagine the change in attitude in Congress if each Member knew from the moment he or she was sworn in, that no matter how much tax money was sent to the district or State, he or she still could not make a career of Congress. Then we would begin to see the political courage and intellectual honesty.

Mr. President, I ask that a fine editorial in support of term limitation, published in the Sun of Bremerton, WA, be printed in the RECORD immediately following my remarks. I would note to my colleagues that prior to the end of session in the Washington Legislature, resolutions petitioning Congress to adopt a term limitation amendment were introduced in both Houses.

The article follows:

MOVE TO LIMIT TERMS CONTAINS A MESSAGE

A move to limit terms for members of Congress seems to be picking up momentum.

A bipartisan group—Americans to Limit Congressional Terms (ALCT)—launched a campaign the other day in Washington to get rid of the "permanent Congress" by limiting service in the House and Senate to 12 years.

Senator Gordon Humphrey, R-N.H., recently introduced a resolution calling for a constitutional amendment to restrict terms to six in the house and two in the Senate. That probably won't go far in a legislative body where the first priority of most members is to protect their jobs.

But there is a growing sentiment in the states to limit congressional terms. The South Dakota legislature has approved a resolution calling for a constitutional amendment, and more than a dozen other states are considering it.

A Gallup Poll last month indicated that 70 percent of Americans favor a limit.

The ALCT has 33 former members of Congress on its board of directors. Said cochairman James Coyne, a former member from Pennsylvania: "Members of Congress have no idea of how frustrated people are with the institution."

Let's hope that incumbent senators and representatives soon get the message. If they don't clean up their act, voters outside the Washington Beltway may do it for them.●

HONORING SOUTH DAKOTA'S ELLSWORTH AIR FORCE BASE

● Mr. DASCHLE. Mr. President, the citizens of South Dakota are extremely proud of the men and women who serve our country with such dedication Ellsworth Air Force Base. We have always known that these men and women are among the best in the Nation. Recently, the head of the Strategic Air Command, Gen. John T. Chain, Jr., visited Ellsworth Air Force Base to present a trophy to the top aircraft maintenance unit in the Strategic Air Command. The "Best in the SAC" maintenance award for its 1989 accomplishments went to the 28th Bombardment Wing's 28th Operational Maintenance Squadron, 28th Field Maintenance Squadron, 28th Munitions Maintenance Squadron, 28th Avionics Maintenance Squadron and 28th Consolidated Aircraft Maintenance Squadron.

The "Best in the SAC" Trophy has been awarded to the Ellsworth aircraft maintenance unit for the second straight year. For the 1,950 people in the Ellsworth maintenance unit, who competed against 22 similar wings in the Strategic Air Command, this award caps a year-long effort of intense training and hard work. Because of the presence of the new Strategic Warfare Center, the Ellsworth maintenance unit is not only responsible for ensuring the highest maintenance standards on the base's B-1B's, EC-135's and KC-135's, but also is responsible for maintaining visiting B-1B's, B-52's and FB-111's.

Excellence at Ellsworth Air Force Base certainly does not stop with the 28th bombardment Wing's maintenance unit. The men and women of the 28th Bombardment Wing were also recognized for their exemplary efforts by winning the 1989 Fairchild Trophy, given to the best Strategic Air Command unit in bombing and navigation competition. Without a doubt, the men and women of Ellsworth remain the best among the best.

These awards demonstrate what we, in South Dakota, have known all along—the excellent demonstrated day in and day out by the men and women of Ellsworth is the reason Ellsworth Air Force Base will continue to have an important role in our Nation's strategic force. On behalf of the citizens of South Dakota, we extend our gratitude for their outstanding accomplishments and wish them continued success in their upcoming competition for the Phoenix Award.●

RICHARD SPRINGER

● Mr. INOUYE. Mr. President, today I speak of Richard Springer. I doubt that too many of us have heard of Richard Springer, but I believe that he is worthy of our special concern and commendation, both because of the individual he was and his professional achievements.

All of us have communicated with the General Accounting Office for assistance, and all too often we do not pause to express our thanks to those men and women who stand behind the reports that have guided us in drafting bills or in passing legislation; reports that have a profound effect on our Government; reports that have assisted us in our consideration of the budget.

Richard Springer, known as Rick to his many friends, was one of the most talented and dedicated attorneys at the GAO. On November 2, 1989, he

succumbed to AIDS after a valiant 4-year battle to overcome it. Although he is no longer with us so we cannot personally thank him, I hope that these words will bring comfort to his family and his many friends.

Richard Springer began working at the GAO in 1973 after a distinguished academic career at the University of Pennsylvania and Harvard Law School, and 4 years of private practice in his home State of Pennsylvania. He quickly impressed his supervisors with his remarkable grasp of some of the most technically and legally complex issues presented to the Office. When an attorney was needed for a particularly complicated case, more often than not he was selected.

One early example was a 231-page comprehensive report prepared in 1978 by one of GAO's audit divisions for Senator Muskie, then chairman of the Senate Subcommittee on Intergovernmental Relations. Mr. Springer provided invaluable assistance in the preparation of the report. He painstakingly prepared an inventory of the 120 Federal agencies with regulatory programs and activities, summarizing their particular responsibilities and the legal authorities for each. During this same period, he was assigned a series of legal decisions to write, concerning the proper interpretation of the Postal Reorganization Act and its application to postal ratemaking and classification.

Richard Springer was an energy law expert and provided Congress with much assistance in its consideration of energy legislation. Early in this career, he set out to master the intricate network of energy legislation and the complex Department of Energy regulations, dealing with industry cost participation in energy research and development projects.

The early 1980's found Mr. Springer constantly in demand by the GAO auditors who were venturing into the field of nuclear fuel cycle activities. He accompanied them to numerous briefings of congressional staff, assisted in preparation of testimony, and clarified numerous legal points raised at the hearings. He also interviewed attorneys and other officials of the Departments of Energy, Justice, and State, and the Federal Trade Commission, as well as foreign government legal advisers and officials.

In 1985, Mr. Springer was heavily involved in two studies of whether U.S. companies that report to the International Energy Agency [IEA] should receive antitrust and breach of contract protections for their activities during international oil supply disruptions. His work on the latter issues led Senator METZENBAUM to propose, and the Congress to enact, an amendment which extended the Energy Policy and Conservation Act of 1975.

In recognition of his consistently superior work in 1981, Richard Springer was awarded GAO's Office of General Counsel Award, the highest achievement for a GAO attorney.

Although I was not privileged to know him personally, I know from his work that he was a brilliant and dedicated lawyer. I also know from the expressions of his colleagues that he was an unusually gentle and compassionate individual who possessed an engaging sense of humor. It was a source of great admiration and comfort to his friends that during the course of his illness, he rarely lost his sense of humor or his optimism. The loss of Richard Springer is surely our loss. On behalf of this body, I extend my deepest sympathies to his family and friends.●

NATIONAL STUDENT-ATHLETE DAY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 238, designating April 6, 1990, as National Student Athlete Day, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The joint resolution will be stated.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 268), to designate April 6, 1990 as "National Student-Athlete Day."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 268), with its preamble, is as follows:

S.J. RES. 268

Whereas the student-athlete represents a role model worthy of emulation by the youth of this Nation;

Whereas the past athletic successes of many business, governmental, and educational leaders of this Nation dispel the myth that successful athletes are one-dimensional;

Whereas such worthy values and behaviors as perseverance, teamwork, self-discipline, and commitment to a goal are fostered and promoted by both academic and athletic pursuits;

Whereas participation in athletics, together with education, provides opportunities to develop valuable social and leadership skills and to gain an appreciation of different ethnic and racial groups;

Whereas in spite of all the positive aspects of sport, overemphasis on sport at the expense of education may cause serious harm to the future of an athlete;

Whereas the pursuit of victory in athletics among the schools and colleges of this Nation too often leads to exploitation and abuse of the student-athlete;

Whereas less than 1 in 100 high school athletes have the opportunity to play Division I college athletics;

Whereas although college athletes graduate at the same rate as other students, less than 30 percent of scholarship athletes in revenue producing sports graduate from college;

Whereas only 1 in 10,000 high school athletes ever realize an aspiration of a career in professional sports, and those students who become professional athletes may expect a professional sports career of less than 4 years;

Whereas thousands of the youth of this Nation sacrifice academic achievement to the dream of professional athletics;

Whereas the practice of keeping athletes eligible for participation on a team, even at the high school level, must be abandoned for a policy of ensuring a meaningful education and degree;

Whereas coaches, parents, and educators of student-athletes must express high expectations for academic performance as well as for athletic performance; and

Whereas there is a need in this Nation to reemphasize the student in the term "student-athlete": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 6, 1990, is designated as "National Student-Athlete Day" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate programs, ceremonies, and activities.

SCHEDULE

Mr. MITCHELL. Mr. President, for the information of Senators, I would like to discuss briefly the schedule for the remainder of the week. I have had the opportunity earlier today to consult with the distinguished Republican leader on these matters, and we agreed that it would be useful for all Senators if we could discuss it now so that Senators will have some idea of the schedule for the remainder of the week and following the Easter recess.

First, it is my judgment, which I believe the distinguished Republican leader shares, but with respect to which I will ask him to comment directly, that there is not sufficient time this week to take up the crime legislation along with the other matters that must be taken up, which other matters we will describe momentarily, and that we would all be better served if that matter were put over until following the Easter recess and prior to the Memorial Day recess.

Accordingly, it is not my intention to call it up at this time, but rather to do so during the next work period and probably on or about May 21, which would permit nearly a full week's consideration of it in the week immediately preceding the Memorial Day recess.

I would like to ask the distinguished Republican leader for his comment in that regard.

Mr. DOLE. Mr. President, I share that view. It seems to me we would not

be able to complete discussion or action on it, in any event. We have checked with Senator THURMOND on this side, the ranking Republican on the Judiciary Committee. He certainly has no objection to the schedule announced by the majority leader. I know of no objection on this side. In fact, I think we would prefer to have it set aside until late May, as indicated by the majority leader.

Mr. MITCHELL. I thank my colleague in that regard.

Mr. President, I say to Members of the Senate, the Senate is now scheduled to vote on final passage of the clean air bill not later than 8 p.m. tomorrow, unless there are several amendments pending and offered at that time which would first have to be disposed of. So it appears likely that we will take up all or most of the day tomorrow on the clean air bill. It remains my hope we can act prior to 8 o'clock. We will not know that until during the day tomorrow as we see what amendments are pending.

There remains for consideration this week five matters that I believe we ought to at least consider the possibility of going to. The first two relate to the President's request for emergency assistance to Panama and Nicaragua. The Foreign Relations Committee has reported out the authorization bill. It is my hope that we can deal with that promptly on Wednesday, subject to a very tight time agreement that would permit us to dispose of it in a relatively short period of time with no amendments.

The reason I am suggesting that there be no amendments is that we will sometime thereafter take up the appropriations bill, and I do not see any point in our having to go twice through the same issues that will arise on one or the other of those bills. Therefore, I am proposing we simply pass quickly the authorization bill, which I believe accords substantially with the President's request with respect to aid to Panama and Nicaragua, and then have the debate and discussion on the appropriations bill.

I am not able at this time to specify a precise date or time for the appropriation bill. That will, of course, depend upon action by the Appropriations Committtee when the matter is received from the House, which I believe will occur tomorrow. I believe the House will act on that tomorrow.

I am advised by staff that on our side, the Democratic side, we are clear on doing the authorization bill without amendments. I hope we can get similar clearance on the Republican side.

In addition to those two items, we have the Ryan nomination, which I believe should be disposed of promptly, and it is my hope that we can take up the Panama-Nicaragua authorization bill first thing Wednesday under a tight time agreement and then move to the Ryan nomination.

Then there are two other matters that deal with education and training that we hope to act on, that are important bills. One is a vocational education bill, and the other is a job training bill. If, Mr. President, we could act on all or as many of those items as possible, it is my intention that we would then complete action this week. So that if, for example, we can complete action on these by Thursday night, it would not be my intention to be in session on Friday.

I would like, Mr. President, at this time to ask the distinguished Republican leader for any comments or suggestions he has in this regard.

Mr. DOLE. Mr. President, if the majority leader will yield, based on our earlier discussion in the majority leader's office, we started the process to see, first, if we can get an agreement on the Panama-Nicaragua authorization bill without amendment. We hope to be able to come back to the majority leader shortly after the policy luncheon and advise him on our success or failure in that effort.

In addition, also to be taken up tomorrow at our policy luncheon, we have started in a preliminary way to see if we can determine how much difficulty we will have with the other measures. I know of none on the Ryan nomination. I do not know how long debate might take. I know of only one amendment so far on vocational education. I am advised on the Job Partnership Training Act that there may be some difficulty, and, on the Nicaragua-Panama appropriations bill, as the majority leader has indicated, we are not saying that will not come up. We are suggesting we are not certain. It is still a question mark. I indicated to my colleagues I talked to personally if we do complete action on these matters, or as many as we can, and the majority leader then determines we cannot complete action in the balance of the week, we could conclude business by sometime on Thursday.

ORDERS FOR TUESDAY

RECESS FROM 12:30 P.M. TO 2:15 P.M.

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its session today, it stand in recess until 9:15 a.m. tomorrow, Tuesday morning; that the time for the two leaders tomorrow be reduced to 7½ minutes each; that the majority leader be authorized to offer an allowances amendment on behalf of the two managers that will be discussed from 9:30 to 10 a.m., with the time equally divided and controlled between the two leaders or their designees, which amendment will then be called up later in the day; that at 10 a.m. Senator MCCLURE be recognized to offer his clean coal technology amendment; that following the vote on or in relation to the McClure coal amendment, the Senate return to the McClure amendment No. 1431 for the 15 minutes of debate on that amendment that have been reserved, and then vote on or in relation to that amendment; that following the disposition of the second McClure amendment, the Senate resume consideration of the Murkowski amendment, No. 1432, on which 15 minutes have been reserved for debate with a vote occurring on or in relation to the Murkowski amendment at the conclusion of the debate with no intervening action or debate.

I further ask unanimous consent that the Senate stand in recess from 12:30 p.m. to 2:15 p.m. tomorrow to accommodate the two party conference luncheon conferences.

Mr. DOLE. Mr. President, reserving the right to object, I shall not object; just so my colleagues understand there will be a vote following each amendment. They will not be stacked. They will follow each amendment.

Mr. MITCHELL. That is correct, Mr. President.

Mr. DOLE. It is clear in the consent, but I wanted to make certain they understood.

Mr. MITCHELL. Mr. President, the Senators offering the amendments asked that they have the opportunity to have the remaining debate immediately prior to the vote on each particular amendment so that Senators would have the opportunity to distinguish them and consider the various arguments.

It was a reasonable request, and it is accommodated here, as the distinguished Republican leader points out.

Then there will be a debate, there will be 1 hour on the McClure amendment, that has not yet been offered. There will be a vote on that. Then there will be 15 minutes of debate on the McClure amendment which was offered today and debated for approximately 45 minutes. Then there will be a vote on that. Then there will be 15 minutes of debate on the Murkowski amendment, which also was offered today and debated for about 45 minutes, and then a vote on that.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. I thank the distinguished Republican leader.

Does the distinguished Republican leader have anything further?

Mr. DOLE. No.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. MITCHELL. Mr. President, if no other Senator is seeking recognition, I

now ask unanimous consent that the Senate stand in recess, under the previous order, until 9:15 a.m. on Tuesday, April 3.

There being no objection, the Senate, at 7:15 p.m., recessed until Tuesday, April 3, 1990, at 9:15 a.m.

EXTENSIONS OF REMARKS

THE FINANCIAL PLANNERS DISCLOSURE AND ENFORCEMENT ACT OF 1990

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. DINGELL. Mr. Speaker, I am pleased to join my colleagues on the Energy and Commerce Committee in cosponsoring the Financial Planners Disclosure and Enforcement Act of 1990. I particularly commend Congressman BOUCHER for all the drafting and negotiating over the past year that made it possible to introduce this bill with the endorsement of the American Association of Retired Persons, the Consumer Federation of America, the Institute of Certified Financial Planners, the International Association of Financial Planners, the National Association of Personal Financial Advisors, and the North American Securities Administrators Association.

On July 31, 1989, I introduced at the request of the Securities and Exchange Commission, along with 12 of my colleagues, H.R. 3054, the Investment Adviser Self-Regulation Act, to provide for the establishment of one or more self-regulatory organizations for registered investment advisers. These SRO's would establish qualification and business practice standards, perform inspections, and enforce compliance with the law.

The legislation we are introducing today will supplement and greatly enhance the investor protections proposed in H.R. 3054. It would mandate disclosure of vital information to investors so that they can evaluate the qualifications of the financial planners they select and the recommendations the planners make. It would require persons who hold themselves out to the public as financial planners or investment advisers to register under the Investment Advisers Act of 1940. And it would create a private right of action to enable customers to sue for damages when they sustain losses due to 1940 act violations. This right cannot be taken away by any agreement relating to compulsory arbitration.

According to NASAA, which conducted a survey of fraud in the financial planning business, some 22,000 investors lost about $400 million in financial planning frauds between mid-1986 and mid-1988. Last month, the Wall Street Journal warned investors about the serious conflict of interest issues plaguing financial planning. This problem is nationwide and deserves prompt redress.

I urge the Committee's Subcommittee on Telecommunications and Finance to hold hearings on these two bills as soon as practicable. We need to work with honest financial planners along with Federal and State regulators to clean up the industry's tarnished reputation and protect consumers from those who would enrich themselves at their clients' expense.

THE FUTURE OF EUROPE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. SOLARZ. Mr. Speaker, all of us are following with keen attention the developments in Eastern Europe and the Soviet Union. Of course, the elections in the German Democratic Republic last month were part of the unfolding drama of freedom and democracy in that part of the world.

In this connection, I am pleased to call to the attention of my colleagues a most significant address delivered on March 19, 1990, by Prof. Dr. Rita Sussmuth, president of the Bundestag, Federal Republic of Germany.

Dr. Sussmuth's lecture, entitled "The Future of Europe," took place on the campus of New York University, under the cosponsorship of Deutsches Haus, a German cultural and information center at NYU, and the Institute for East-West Security Studies, an independent research institute located in New York City.

John Brademas, our former colleague in the House, is now president of New York University. Since assuming this position some years ago, he has emerged as one of the commanding figures in the world of higher education, which does not in the least surprise those of us who knew him and worked with him when he was a Member here. During his years at NYU, he has helped to establish New York University as one of the major centers of learning and dialogue not just in New York but in the Nation.

In introducing Dr. Sussmuth, Dr. Brademas noted that:

Her wide experience makes Dr. Rita Sussmuth qualified to place the extraordinary developments of recent months into perspective. She has emphasized the need for immediate economic assistance to Poland and has also observed that successful and enduring changes in East Germany would in large part depend on the continuation of the "perestroika" policies of Mikhail Gorbachev.

Dr. Sussmuth has been a member of the Deutscher Bundestag since 1987. A professor of educational sciences at Dortmund University, she served as the Federal Minister for Youth, Family Affairs, Women and Health before her election as president of the Bundestag in November 1988.

Mr. Speaker, I insert the transcript of President Sussmuth's address at this point in the RECORD:

THE FUTURE OF EUROPE

(Address by Her Excellency Prof. Dr. Rita Süssmuth)

Dr. Brademas, Excellencies, dear friends, ladies and gentlemen, first of all, let me thank you for having invited me to New York and for granting this opportunity to discuss the future of Europe with you today. And let me say in addition that it is a good practice to discuss politics within universities. Very often, we forget from where we have come. And we don't go back.

Perhaps one remark about my biography: It is difficult for women to start in politics. We have now more. And it was even more difficult to start from [the field of] education!

But I think up to now, until now, it is a very good background. And I don't deny it.

INTERDEPENDENCE OF EUROPEAN COMMUNITY

The future of Europe will be closely related to events in Germany, particularly the events that have been taking place since November and further events in the future. But it [the future of Europe] doesn't only depend on Germany. I think it is very important to recognize and to realize that it depends on deep changes within most East European countries.

And let me say at the beginning that we will be successful within all states or countries in the democratization process or none will be. So there is no isolated solution for Germany.

GERMAN/AMERICAN PARTNERSHIP

At the same time, of course, it will have a great deal to do with German/American partnership and the future relationship between the United States and Europe. Let me express our warmest regards, especially to President George Bush, and his tremendous support for German unification during the last month.

Of course, there are some experts and also political groups already discussing if the United States will still join us in the future. My clear position is that it is not the time to separate from the United States. Just the opposite is true. We need one another. And it is very important to continue our strong alliance because, for us as Germans, we know what we did to Americans after World War II and in awful systems of terrorism.

RESULTS OF THE MARCH 18, 1990, ELECTIONS

The situation in Germany today, immediately after the first free election ever to take place in the German Democratic Republic, will be a primary factor in this equation. And perhaps my impressions are very fresh and not yet very reflective. But perhaps, it is a first impression. I will give it to you, after the results of yesterday evening.

I followed the election returns yesterday and heard additional political analysis of the results of these first elections free and secret, after fifty-eight years. It's a very long time. How to comment on them?

First, the result for the Christian Democrats—41 percent—is at the same time a decision for the Federal Government of Chancellor Kohl. And that may be misleading, I realize, for the Social Democrats because they already seemed to be sure to be the

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

winners of this election. And they got the rate, the proportion, of 22 percent; the East German Communists, 16 percent; and the Liberals, 5 percent.

One thing which is amazing after forty—more than forty—years of election freedom, there are only four or five parties, as you know, from out of thirty-three groups and parties with candidates for the forthcoming of a new Parliament. And when we let aside the Alliance groups and three others—all the rest of the thirty-three have only 8 percent. So that means that very soon we will have a similar structure of parties in both countries.

VOTE FOR REUNIFICATION

Second, it is a decision in favor of a rapid process of unification. That means in terms of citizens from the GDR, a quick realization of a monetary union, of economic and social union. And I suppose that the voters gave the most votes for those they believe would better, would improve, their life conditions.

It is a vote for the accession to the Federal Republic, according to Article 23 of our Constitution. Or better, it is a vote against the preparation of a new Constitution. And it is a vote for unification but, of course—and this is very important—in accordance with the time schedule and in consultation with our European neighbors and American friends, because German unification has two perspectives, the internal one and the external one. And we don't want a quick success, but a solid success. And this can only be done with our friends and neighbors in the West and East, and not without our American friends.

Although people voted to unify as quickly as possible, they know very well that this process can only be successful when we take into account the vital interests of our partners in East and West, in West and East. And therefore, confidence is a key word in this process of unification.

IMPORTANCE OF PRUDENCE AND PATIENCE

The result of the election commits us, as Christian Democrats in the Federal Republic, to a higher level of responsibility and a careful sensitivity already expressed by Chancellor Kohl yesterday night. Because this is not the time for capital mistakes. This is the time for building up the future in Europe, peacefully and in a democratic way.

Disappointed are those intellectuals—and I mean by this, actors, poets, artists—who initiated opposition in the time of the ninth of October last year. Now they fear that in the near future, economic, financial policy might prevail. And this very moment, their critical positions are without public response. The majority of the citizens in the GDR called for liberty and wealth. And they are not willing to wait patiently for better life conditions.

This is the one problem we have to manage because we are in a process with very little patience to control emotions. Without controlling them, it can worsen.

RECENT EVENTS IN EASTERN EUROPE

Thinking back on everything that has happened in Germany and the rest of Europe since the end of last year, as I stand here before you here today at New York University, I almost have the feeling that I have seen a period of German and European history transpire in a time-lapse sequence.

We have overcome stagnation and confrontation in Europe. We have opened our borders. We have free speech, free meetings, democracy and self-determination. And finally, we now have the full abandonment of Stalinist-style communism and socialism. And I think after a long period with socialism, citizens in all East European countries and in the GDR are totally against it because they are really frustrated after such a period of being unfree.

After the emotions of a hard-fought election campaign in the GDR, we are now faced with a new situation in which the main questions are: How are things going to develop in Germany? And with the Germans? However, I would like to add the following two questions. First, has a German revolution as a part of the revolutionary process in East Europe brought about a change in Europe? And has this changed the future?

These are questions that concern all of us. The answers to them lie in three different areas. And I will attempt to give equal attention to each of them in a short way. What is involved are answers at the national level, answers at the European level, and the strength of the Atlantic relationship.

EXODUS FROM THE GERMAN DEMOCRATIC REPUBLIC

Let me begin by explaining what is involved in Germany. What concerns us most are the economic and social consequences of having opened the German/German border. Every day, about more than 2,000 people move from the GDR to the Federal Republic. The total number of transferees last year was around 340,000. Some 100,060 people have moved from the GDR to the Federal Republic thus far this year. Over 20,000 have arrived since the beginning of March.

That shows you that there is a kind of exodus from the GDR to the Federal Republic. With the political result of yesterday, there is some hope that this exodus will come to an end very soon. But we are not sure. Because people in the GDR are very impatient.

ECONOMIC UNION

The process of overcoming the division of Germany is taking place at breath-taking speed, making it difficult to manage. It is only with great difficulty that we are able to dominate this driving force. The current situation urgently requires economic and monetary union between the two German states.

Negotiation to this effect has been going on for months now. Considerable difficulty is going to be encountered in converting the GDR economy from a planned economy to a market economy, with a special system of public welfare and social guarantees. We call it, therefore, the social market economy.

Obsolete production methods in the GDR waste huge amounts of energy and create an equally huge amount of pollution. The level of productivity in the GDR is only about half what it is in the plants are generally in run-down condition. There are no efficient transport systems. There is an enormous need for renovation and renewal.

This also applies to the health sector, where there is an acute lack of physicians, medicines and medical facilities in general. Finally, there is an acute lack of telecommunications infrastructures.

Given this situation, the Federal Republic of Germany created an initiative for economic and monetary union, so as to make it possible to restructure economy of the GDR. Just how difficult this is going to be is illustrated by the following list of factors that are going to have to be dealt with: competition, price deregulation, private ownership of production facilities, reform of the tax system, liberalization of the capital market, and finally the formation of free labor unions.

Obviously, this is a tall order. And it is not something that can be done overnight. As such, the two parts of Germany are going to need time to grow together. There are dangers, and at the same time, big chances. More than seven hundred billion are necessary in the following years. It will take us time.

And after forty years of democracy in the Federal Republic of Germany, it seems to me most important to foster our democracy and the democracy in both Germanies.

FEARS OF A NEW GERMAN DOMINATION

I consider the fears being expressed in Europe and the United States unfounded that a kind of "Fourth Reich" might arise in Germany, and that Germany might become a dominant economic and financial power in the world, a gigantic economic steamroller.

I think it is not the historical situation to think in terms of old or new nationalism, or old or new super-powers. What we aim for in Europe is to become a community of responsible partners, responsible for Europe and the Third World. What we need is political and economic cooperation for mutual support.

IMPORTANCE OF ALLIES

The foreign and European policy problems arising from the German unification process are matters we will only be able to resolve together, with our partners and our allies within nations. This is not the time for neutralism.

The integration of our destiny and the future of Europe is a major responsibility for us and one we will not back away from. There is agreement on this between the politicians in the Federal Republic and those in the GDR. However, we have some difficulties in opening the minds of citizens in the GDR to European thinking. Too long was the time when they were separated from West European thinking.

And so it is important that we show them that there is no unification without European integration. And both have to go together. Because it is very important for our future, and I think for the future of other countries that it is done by human, European integration.

We do not seek German unity in isolation from the rest of Europe but rather in the European context and within the framework of the peace order and encompassing all of Europe.

REACTIONS OF OTHER NATIONS

And let me say there are very often a lot of irritations. Maybe we are not sensitive enough when we speak about the borders to Poland. Maybe we are not sensitive enough when we speak about our own problems. And other countries, especially in the Third World, are anxious that we are only concentrated on Germany or on Europe. And therefore, we need a lot of meetings and dialogue in order to explain our position and to plan unification and integration with our neighbors.

Let me emphasize that German unity is not an internal family affair for the Germans. Instead, the intention is to use it as a driving force for the unification of Europe and for further strengthening of the trans-Atlantic partnership.

We know we have still a long way before us, not only for internal reasons, but especially for external reasons. There are a lot of questions concerning the integration of the unified Germany we seek. But also we need a longer period of transition for that, especially when I think of all the questions concerned with security and defense.

We are just grateful to our friends and partners for the broad support they have provided in connection with overcoming the division of Germany. Twenty-two percent of the people in the United States share our wish for unification.

FORMAL ALLIANCES

We want to travel the difficult road that lies ahead of us together with you and our European partners. And we will continue to be a reliable partner in the time-tested system of Western democracy and in our joint alliances. We are members of NATO. There is no doubt that we continue our active role within NATO.

It is a question of stabilization in Europe. And so long as we have not worked out a new European peace offer, we have to fix those institutions which have proven their efficiency and their role for peace in Europe and all over the world.

Last year, President Bush encouraged us to be partners in leadership. To my way of thinking, this can only mean that we are first and foremost partners in a community based on responsibilty: responsibility for peace, for democracy and for human rights. Freedom, self-determination and respect for human rights as well as the other CSCE [Conference for Security and Cooperation in Europe] principles expressed in the Final Act prepare the way for the democratic revolution in Central, Eastern and Northeastern Europe.

Parallel to this, the Perestroika policy initiated by General Secretary Gorbachev became a driving force behind the broad, pro-democracy movement, emanating from Poland and Hungary. The smaller European countries have made major contributions to the democratic revolution in Eastern Europe. It is time for the Soviet Union to follow their example. The last decision concerning Article Six of the Soviet Constitution may be a good sign.

We, however, in Germany will never forget the courage of Hungarians in opening the borders to German free settlers. They open the door for freedom without asking what would be the disadvantage of doing so.

IMPORTANCE OF THE CSCE

The treaties we have concluded in the established state of trans-Atlantic relations provide us with firm ties. The same applies to the CSCE process which has now assumed an unexpected measure of vitality and importance.

The CSCE process that has developed since the Helsinki Final Act in 1975 is the best forum in which to negotiate on the future architecture for Europe as a whole. All the CSCE states—and this includes the United States, Canada and the Soviet Union—are interested in dynamic partnership and the conditions of stability and on the basis of cooperative responsibility.

I think that this will constitute the major test for the CSCE, and intensifying the CSCE process will create the potential needed to combine the restructure of Europe with the restructuring of Germany.

Today, the first CSCE conference on economic issues was opened in Bonn. The main problem in Europe is economic instability. It has threatened peace planning from Helsinki. In the future, we have to solve the different economic levels in Eastern Europe.

Therefore, it is not reasonable, perhaps even not helpful, to look for isolated solutions for the GDR.

The CSCE process has to form a framework for economic stability in Europe. The same position is expressed by the European Community in the last document. However, the way before us is still long and full of difficulties. We have to convince those who prefer to maintain existing reservations and restrictions in East/West cooperation.

UPCOMING INITIATIVES

But the timetable for all of this is already fixed. The two German states will necessarily be strong advocates of holding a special CSCE summit on the architecture of Europe as a whole before the end of this year.

The steps leading to a special summit of this kind are laid out in the "two plus four" talks agreed on in October. In the wake of yesterday's election in the GDR, joint talks will be conducted intensively between the two German governments and the four powers. These talks have already been initiated.

Parallel to this, there will be a special European Community summit at the end of April. The CSCE conference, this Fall, will be dedicated to the general structures of a European peace and security order. The conference must be a summit dedicated to stability.

POLISH BORDERS

Let me make it clear that we Germans do not want any borders shifted or any other border-related changes made in Europe. This applies first and foremost to Poland. As such, one of the first things the two German states will be doing after yesterday's election in the GDR will be to issue a joint political statement formulated by the two parliaments, the Bundestag and the People's Chamber, making it clear that the borders of the Polish nation will be secure and that we, too, consider the border permanent and inviolable.

And I proposed this already at the end of the year. And I was criticized. But I am very glad that now it is decided. The German Bundestag, of which I am Speaker, decided this definitely in March, on the eighth of March. Only a few days ago we reaffirmed in a joint statement with France that Poland is to be involved in the "two plus four" talks with the question of Poland's Western border is discussed.

In addition to this declaration, both governments, of the Federal Republic of the GDR, will prepare a treaty concerning a unified Germany and Poland. This [treaty] is without, or besides, their international guarantees. I think it is a bilateral act. It is necessary to give security and good understanding because all that we do for better understanding and even to build up friendships between our citizens and Polish citizens has no foundation when the question of borders is not clear.

Of course, we know that there is the problem of those who have lost their homes after World War II. But I think we have to be clear on this point. We started the Second World War. And we lost it. And a lot of bad things were endured by Polish people and other nations.

It is also the time to go forward, but not to forget what has been in the past.

ELEMENTS OF UNIFICATION

Let me repeat very clearly here in New York that a united Germany will only include the two German states and Berlin.

Let me say in the spirit of the CSCE Final Act that we Germans have no territorial claims against anyone. We want Germany unity together with our neighbors, with Europe, and with America. We want German unity to be a factor in European unity.

What we want is a common future for all Europeans, both in Eastern and Western Europe, in which the United States presence in Europe and European friendship with the United States would have a firm place. This is the clear German position.

For this reason, it is in our joint interest that the reforms in Eastern Europe are successful. Again, for this reason, they have a need to move ahead rapidly with a process of economic and political integration within the European Community. A united Germany will have more economic weight within a united Europe than the Federal Republic of Germany.

However, this economic strength will remain linked to the common economic and political objectives of the European Community as it develops toward European union.

1992 ECONOMIC ALLIANCE

As you are aware, an intergovernmental conference will be taking place at the end of this year on economic and monetary union within the European Community. The Germans are promoters of Europe. And they will be contributing their power to the future design of Europe at this conference.

SUMMATION

Ladies and gentlemen, one of the questions I asked at the beginning of this lecture was whether or not the process of German unification and the process of democratization in Eastern Europe have changed the prospects for the future of Europe. Europe changed. And its future will change, too.

Europe is no longer divided. The two blocs don't exist any longer. We can freely move from country to country. Europe is no longer separated into West and East Europe. The Soviet Union as a part of East Europe as well as the United States will play its important role in Europe.

It is not a good perspective to separate Europe from the United States. We need broader networks, not to return to past models of thinking and acting. Europe is open to freedom and democracy, no longer communism or socialism. Europe is open to all kinds of cooperation—economic, scientific, cultural, technical—instead of confrontation. It is open to a new security system.

Europe is changing, changing. But change needs stability. We must maintain a good defense of Western values, personal freedom, initiative and responsibility, peace, protection of nature, social justice and work for solidarity with those who are asking our help.

Stability is guaranteed by the European networks, by the institutions created after World War II, the Council of Europe, NATO, the European Community. Each of these institutions has its conscience, working together for human rights, security and economic development, for an open market. And there, we have to work carefully, without promising that very soon it is possible to open it for new members because we have, even there, to go step by step.

But we have a lot of means to have conferences and treaties in order to work together. We Germans are moving ahead towards the future of Europe with prudence, commitment and consistency. We are working towards the unity of Germany, together with our fellow Germans in the GDR, in the basis of an orderly process of gradual integration. And I think it is your concern to help us to have a good process.

Parallel to this process, we want to continue to strengthen our partnership with our American friends as well as to strengthen our integration within the European Community and in the context of our growing European peace order.

I appeal to you, our American friends, to travel this road together with us in the spirit of partnership, keep in mind our common values and our common responsibilities.

The British magazine, *The Economist,* asked at the end of the 1970s whether the Germans might be wunderkind or problem child. My answer: we learned our lessons of democracy. We are a normal nation, as others are, with good and bad attributes.

Last year, we were confronted with the radicalism on the right wing, the so-called "Republicans." Only one year later, we can say Republicans are a very small minority. Perhaps one of the best messages of the local elections in Bavaria yesterday is that they are very weak now. And they can't enter most of the parliaments. The last poll said one percent for the Republicans, and I think that is the success of democracy and, therefore, I think, it is a good message for Germany. But it is a good message for our friends.

And let us go always together.

THE ROCKY MOUNTAIN FOREST AND RANGE EXPERIMENT STATION

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. RICHARDSON. Mr. Speaker, I rise today to express my strong support for the vital work done by the Rocky Mountain Forest and Range Experiment Station.

The Rocky Mountain Forest and Range Experiment Station was established July 1, 1935, and included the States of Colorado, Wyoming—east of the Continental Divide—South Dakota, Nebraska and Kansas. They began by focusing on timber, range and watershed management.

Over the years, their work has grown to encompass nearly one-fourth of the Nation's land area—550 million acres in 10 States. Laboratories are located in three distinct geographic regions, each with contrasting research and management needs: the rugged mountains of the central and southern Rockies, the broad expanse of the Great Plains, and the deserts and forested plateaus of the Southwest.

Station scientists and cooperating colleges, universities and other agencies across the area, are seeking ways to improve the production of renewable resources, while protecting and enhancing environmental quality. Along with their cooperators, they are working to make the most efficient use of available skills and equipment, and solving a wide range of natural resource problems.

I believe the work being accomplished by the Rocky Mountain Forest and Range Experiment Station is vital to the continuing protection of our natural resources. I also believe that we should continue to be supportive of the station and to work with them in any way we can to ensure the longevity of our land and its resources.

I would like to take this opportunity to share with my colleagues the following statement made by Dr. Ed Wicker, the assistant director of the Rocky Mountain Forest and Range Experiment Station:

MANAGING CULTURAL RESOURCES

(Ed F. Wicker)

The material relics representing the cultures and land use of past civilizations are non-renewable resources that must be managed if they are to be available for the enjoyment and use of future generations. This resource base represents the major record of ancient mankind and linkage to present civilization. Understanding the history and prehistory of the nation depends to a large extent on our ability to interpret this record.

But reconstruction of the past is an inexact and time-consuming process. If we are to maintain the opportunity to improve understanding of our cultural past, it is imperative that we protect this resource from exploitation until scientists can evaluate and interpret its significance and value to reconstruction of the nation's heritage. One way to maintain this opportunity is through a positive, proactive cultural resources management program.

In the formative years of the Forest Service, the prevailing philosophy relating to cultural resources was one of preservation through protection. the Antiquities Act (1906) testifies to this position. Unfortunately, preservation through protection was perceived by most as synonymous with management. However, time proved this to be a false perception. As additional legislation dealing with cultural resources has evolved, we have seen a concurrent evolution of the philosophy to preservation of cultural resources through compliance with legislation. While progress is being made, we still have a way to go, and a concerned public is growing more impatient with Federal agencies entrusted with the responsibility to manage our heritage.

Although the concept of preservation still prevails, there are some current indications that the conservation concept is gaining momentum. Some of us believe that mere compliance with legislated mandates is inadequate to ensure conservation of our cultural resources for enjoyment and use by future generations. Thus, a positive, proactive concept is being advocated that will provide for the conservation of our cultural resources by integrating their management with other land use and resource management. The Forest Service is committed to this concept, but the knowledge, methodologies, and technologies for implementing the concept are not adequate.

To be successful in implementing this broader philosophy, some compromising is needed. Attitudes need to move more in the direction of conservation, and archeologists will need to assume a more active role in proactive management of these resources. Monitoring compliance to legislated mandates in itself is not sufficient.

Cultural resources are non-renewable resources of such value to warrant management. The Rocky Mountain Station is committed to this philosophy and support a strong, positive, proactive cultural resources management program. We perceive our role in this commitment as providing the information and technologies needed to implement and maintain a successful proactive management program. Also, we encourage natural resource management agencies to grasp the initiative for such protective management, and not be content with a reactive status.

TRIBUTE TO MRS. SELMA EULAU

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. RANGEL. Mr. Speaker, I rise today to pay tribute to Mrs. Selma Eulau, an esteemed constituent in my congressional district, who on the 13th day of February 1990, celebrated her 80th birthday, and who has rendered invaluable volunteer service throughout her life.

I commend Mrs. Eulau for her tireless and unselfish service, and for her sterling achievements, which should serve as a beacon of hope and inspiration to people everywhere.

Therefore, I wish to have entered into the RECORD the following resolution:

TRIBUTE TO HONOR MRS. SELMA EULAU ON THE OCCASION OF HER 80TH BIRTHDAY

(Resolution by Charles B. Rangel)

Whereas, Mrs. Selma Eulau is an esteemed constituent in my Congressional District in New York, who on February 13, 1990 celebrated her eightieth birthday;

Whereas, despite her length of years, Mrs. Eulau continues to actively serve in volunteer capacities throughout the community by visiting senior citizens housed in nursing homes, by working with the elderly who participate in activities at senior citizen centers, and by working at the Inwood YW-YMHA;

Whereas, Selma Eulau has been a lifelong volunteer in the Federation of Jewish Philanthropies of Greater New York;

Whereas, her volunteer activity represents the kind of tireless, unselfish and dedicated service that is needed in communities throughout this nation; and,

Whereas, her spirit of giving has so pervaded the fabric of her family and community that her service and achievements should not go without recognition: Now, therefore, be it

Resolved, That, to commemorate the eightieth birthday of and the outstanding service of Mrs. Selma Eulau, this resolution be entered into the Congressional Record.

THE BUSH ADMINISTRATION'S PLO COVERUP

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. GREEN. Mr. Speaker, as the following piece points out, "Refusal to criticize the PLO

has now become a cornerstone of Bush administration policy."

The State Department's refusal to hold the PLO accountable for its many acts of violence and inflammatory rhetoric is outrageous and clearly in violation of the terms established for the dialog the United States has entered into with the PLO. Such as approach greatly reduces incentives for the PLO to take meaningful steps toward a nonviolent resolution of the conflict, and erodes the development of trust and confidence which is essential to progress in the peace talks.

I commend the following piece from the Wall Street Journal to my colleagues, and I urge the administration to cease this senseless policy of blindly protecting the PLO from criticism or accountability.

Steven Emerson, formerly a senior editor for U.S. News and World Report, was awarded the Investigative Reports and Editors Award in 1988. Mr. Emerson specializes in national security and intelligence affairs, and is coauthor of the forthcoming book, "The Fall of Pan Am 103: Inside the Lockerbie Investigation."

[From the Wall Street Journal, Mar. 22, 1990]

THE BUSH ADMINISTRATION'S PLO COVER-UP

(By Steven Emerson)

A month ago, terrorists opened fire on a bus of Israeli tourists near Cario. Nine Israelis were machine-gunned to death. When the Palestine Liberation Organization issued a statement that appeared to justify the attack, the Egyptian government made its fury known to the PLO and the world media. And what was the official American reaction to the PLO statement? Nothing. Not a word.

Refusal to criticize the PLO has now become a cornerstone of Bush administration policy. The latest manifestation of this disposition to white-wash the Palestinian group is the report the State Department presented to Congress on Monday, as required by the PLO Commitments Compliance Act enacted last month.

In December 1988, Yasser Arafat told the world that he "renounced" terrorism and "recognized" the state of Israel. By uttering those magic words, Mr. Arafat immediately gained the recognition of the U.S. But Mr. Arafat has a long history of saying one thing and doing another. In fact, just one month before, Mr. Arafat had been denied a visa to the U.S. by the Reagan State Department because it found that, despite his claims that he had abandoned terror, he was directing terrorist acts through such front groups as Force 17 and the Hawari Organization.

CONDEMN TERROR

At the first meeting between U.S. and PLO representatives in December 1988, the Americans told the PLO—according to a list of "taking points" recently published by the Israeli government—that the dialogue would be broken off if the PLO resumed terrorism: "No American administration can sustain the dialogue if terrorism continues by the PLO or any of its factions." In addition, the U.S. required the PLO to "publicly disassociate" itself from "terrorism by any Palestinian groups operating anywhere." Finally, the U.S. said that it expected the PLO to condemm any terrorist act carried out by "any element of the PLO" and to expel that element from the PLO.

The Bush administration maintains that the PLO has met those conditions. Monday's State Department report says, "the PLO has adhered to its commitment undertaken in 1988 to renounce terrorism."

But what about the numerous terrorist attacks on Israel since December 1988? The State Department report reluctantly acknowledges that nine "border attacks"—the new diplomatic euphemism for terrorist attacks—against Israel have been-launched by "constituent groups of the PLO" over the past 14 months. Those incidents do not invalidate the report's conclusion, the report says, because "the intended target of the attack in which the report concedes that "civilians appeared to be the target." But the three attacks directed at civilians were, the report insists, neither authorized nor approved by Mr. Arafat or the PLO Executive Committee.

All of this is dangerously misleading or positively untrue. The State Department report omits any mention of the multiple terrorist attacks carried out by groups that sit on the PLO Executive Committee, including raids by Mr. Arafat's Fatah group. Constituent groups of the PLO have openly taken credit for more than 18 attempted terrorist attacks on Israel from Lebanon, Egypt, Jordan and the Mediterranean over the past 14 months. In the West Bank and Gaza, many Palestinians have been murdered at the explicit—and documented—direction of the PLO and Fatah.

As for the nine PLO that the State Department report does acknowledge, it is not true that there is no evidence about their targets. There is clear and compelling evidence that the intended target of each one of them was civilian.

To take just one example: On Jan. 26, three guerrillas armed with machine guns, grenades and explosives attempted to penetrate the northern Israeli border from Lebanon. Intercepted by Israeli soldiers, the squad was killed in a shootout. In the terrorists' possession, besides weapons, was a man revealing one—and only one—target: a kibbutz called Misgav Am. The group that claimed responsibility for the abortive Misgav Am attack—as well as five others that were equally unsuccessful—is the Democratic Front for the Liberation of Palestine, which sits on the PLO Executive Committee. One of the DFLP's senior officials, Yasser abd al-Rabbu, is the head of the PLO delegation to the U.S.-PLO dialogue in Tunis.

Confronted with this accumulation of evidence, State Department spokesman Adam Shub averred: "None of the cross-border attacks has succeeded, so we don't know what the targets would have been. Therefore we can't call them terrorist. We don't know what they were planning." The State Department dismisses the written evidence from the Misgav Am raid as "inconclusive." When offered transcripts of the confessions of captured terrorists by the Israeli government, the State Department said that the interrogations were not "reliable." When offered an opportunity to interview the captured guerrillas firsthand, the U.S. refused.

When the Bush administration finds itself unable to deny that an attack occurred, it blames some rogue Palestinian element, never the PLO itself. As Monday's report puts it, "We have no evidence in those cases or any others that the actions were authorized or approved by the PLO Executive Committee."

But this is to misunderstand how the PLO works. The PLO is an umbrella organization, and its central committees do not attempt to control the operations of its member groups. The issue is not, what does the PLO Executive Committee order or authorize; the issue is, are the groups that constitute the PLO complying with the commitment they collectively made to the U.S. in December 1988? As State Department spokesman Charles Redman said in March 1989, "If the PLO cannot or will not exercise such control, it raises questions concerning the commitment undertaken in the name of the PLO—indeed, questions about the PLO's ability to carry out its commitments."

The Bush administration is particularly at pains to avoid criticism of Mr. Arafat's own Fatah wing of the PLO. On Dec. 5, five guerrillas infiltrated the Israeli Negev from the Egyptian Sinai. They carried no identification and the labels in their clothes have been cut out—all they had were Kalashnikov rifles, explosives and 51 grenades. Israeli soldiers intercepted them.

Faced with incontestable documentation that the five were affiliated with Fatah, John Kelly, assistant secretary of state for Near East and South Asian Affairs argued before Congress three weeks ago that while "there may have been Fatah members involved," they were "operating without sanctions from their leadership." In private conversation, though, State Department officials have admitted Fatah sponsorship of the attack. It is highly unlikely that Mr. Arafat, a man who insists on approving the smallest actions of his Fatah organization, down to the purchase of its fax machines, could have been unaware of it. The attack is not mentioned in the State Department report.

The contortions the Bush administration goes through to protect the PLO can verge on the grotesque. Last August, a Palestinian fundamentalist from Gaza wrenched the steering wheel of an Israeli bus away from the driver. The bus plunged into a ravine; 15 Israelis and one American were killed. The terrorist act was captured on television, and within six hours of the incident, the Israeli government had provided a detailed accounting of the attack.

The usual unnamed State Department official termed the event "senseless" and "tragic"—but categorically refused to label it an act of terrorism.

WHY THE DELAY?

Only after two days had elapsed—and after a bitter Israeli protest that the Bush administration's failure to condemn the murder gave a "license to kill to every Palestinian individual or organization"—did the State Department see fit to label it a terrorist attack. Why the two day delay? A State Department spokesman said at the time that the U.S. had only belatedly acquired the necessary information. But in fact, according to a senior U.S. official, the real reason was that the Bush administration was afraid that the mass slaying had been a PLO operation. Only when PLO responsibility was ruled out did the administration feel free to call it a terrorist operation.

Last summer, the Israelis dispatched Yigal Carmon, the Israeli government's adviser on counter-terrorism, to Washington with proof—maps, documents, leaflets—that, despite the American "talking points," PLO groups had not ceased their terrorist raids. He also brought tapes of speeches in Arabic by Mr. Arafat in which he condoned terrorist attacks.

State Department officials at first refused to meet with Mr. Carmon, before finally agreeing to a perfunctory meeting. But the Bush administration apparently did not feel confident that others would find Mr. Carmon's documents quite so uninteresting—so he was instructed not to speak to Congress and the media.

On March 1, Secretary of State James Baker testified before Congress, ". . . we have not received or seen evidence of complicity or encouragement or acquiescence by [Mr. Arafat] of terrorist activity." If Mr. Baker has not seen the evidence, it is because he has ordered his underlings not to collect it.

UTILITY WORKERS UNION OF AMERICA, LOCAL 1-2, CELEBRATES ITS 50TH ANNIVERSARY

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. MANTON. Mr. Speaker, on April 4, 1990, the Utility Workers Union of America, Local 1-2 of New York, will celebrate its 50th anniversary. The utility workers of local 1-2 have a long history of dedicated service in New York and play a vitally important role in the economic health of New York City. Every day, utility workers make certain the energy demands are met for New York's businesses, private residences, schools, hospitals, and transportation system.

Local 1-2 has fought tirelessly to improve health and pension benefits for its workers. Over the past 50 years, the union also has worked to strengthen safety standards in the utility industry. Despite this outstanding effort, utility workers continue to face many hazards on the job. Last summer, two dedicated utility workers, Joseph Malfatti and Steven Walsh, lost their lives after a mechanical failure caused a steam pipe to explode. A fire at the Hell Gate Powerplant in the Bronx this winter took the life of Luciano Seminerio. These deaths make it tragically clear that working in the utility industry will never be without risk. However, I know that local 1-2 will continue the fight to make certain safety standards and regulations provide the greatest possible protections for utility workers.

Mr. Speaker, I urge my colleagues to join me in congratulating the Utility Workers Union of America, Local 1-2 on 50 years of outstanding service in New York.

A TRIBUTE TO LT. RALPH H. FUSSNER

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. McEWEN. Mr. Speaker, as public servants, we have the frequent opportunity to meet and work with scores of dedicated individuals who play a critical role in the functions of the communities in our home States. They are our counterparts in State, local and city government who hold and faithfully execute the responsibilities for making, interpreting and enforcing the law at the local and statewide level.

Occasionally, among those many devoted State and local officials, we find an individual of such unusual distinction and accomplishment that his work requires special notice. That is my purpose in rising today.

It is with great pride and pleasure that I ask you to join me in recognizing Lt. Ralph H. Fussner (Ret.) upon his retirement from the Ohio State Highway Patrol. Upon becoming acquainted with Ralph Fussner's career, I am confident that our colleagues will be anxious to join the officers of the Ohio State Highway Patrol along with Lieutenant Fussner's family and friends in saluting his contributions to law enforcement, safety and to civic responsibility.

Lieutenant Fussner's 29-year career with the highway patrol began in August 1961 as a dispatcher at the Hamilton Post. In November 1961, he entered the patrol academy as a member of the 58th academy class, and graduated in July 1962. Following successful stints as a patrolman stationed in the Portsmouth and Georgetown posts, and was promoted to sergeant in the Hamilton post in 1968. Finally, his ascension through the ranks of the highway patrol culminated in his promotion to the rank of lieutenant on June 7, 1976, and his assuming leadership of the Xenia post. Lieutenant Fussner guided the Xenia post until his retirement on January 12, 1990.

But to fully understand and appreciate Ralph Fussner, one must look beyond his life on the job. While dutifully performing his job as a peace officer, Mr. Fussner has been an active member of the Full Gospel Business Administration. He has also served as president of the Greene County Law Enforcement Association. Ralph and his wife Marjorie have three children, including a son who has followed in his footsteps and is presently a member of the Dayton post of the highway patrol.

Ralph Fussner is one of those special people who, in addition to giving so much to their professional responsibilities, make generous use of their spare time to the added benefit of all our lives. It is difficult to place an exact value on the many contributions Ralph has made to life in Ohio, as a patrolman and as an involved citizen. It would be still harder to try to imagine what life in Ohio would have been like if we had never known Ralph Fussner. But Ohio has been fortunate, Mr. Speaker, very fortunate.

Mr. Speaker, the Ohio State Highway Patrol protects the lives and property of the citizens of Ohio every day. Through tireless effort and dedication to the duties of the highway patrol, Lieutenant Fussner earned the gratitude and respect of all whom he served. I urge my colleagues to join me today in commending Lt. Ralph Fussner for his years of honorable service as an exemplary member of the Ohio State Highway Patrol and, equally important, as a caring friend and neighbor.

Our best wishes should rightfully go to Ralph, Marjorie, and their family as they enjoy the fruits of a well-earned retirement. I know that Ralph will remain dedicated to his lifelong pursuit of an ideal: active and continuing good citizenship. It is an honor to have had Ralph's friendship for these many years. I know that his good health and faithful service will give him many years of joy ahead.

JEFF WICE: MAKING SENSE OF THE CENSUS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. SOLARZ. Mr. Speaker, yesterday, April 1, was census day. It was the day for all residents of the United States to stand up and be counted. It was the pivotal day in the most comprehensive and complicated census that our Nation has ever undertaken.

I am sure I do not have to remind my colleagues of the critical importance of a fair and accurate census. The 1990 census will determine the amount of representation each State will have in the House, and will also define the makeup of the State legislatures. The data generated by the census will greatly impact on the levels of Federal and State aid that will flow to our constitutents over the next decade.

Mr. Speaker, the census is a terribly complicated matter. But few individuals can make sense of the census like Jeffrey M. Wice, a Washington attorney who is recognized as one of the Nation's leading experts. I have known and worked with Jeff since the late 1970's when he began his tenure as the Washington representative of the New York State Assembly. Ten years ago, Jeff worked valiantly to try to prevent an undercount in New York, and this year, he is again taking a lead role in the fight to ensure a fair and accurate census.

I would like to commend to my colleagues the following profile of Jeff Wice that was written in the prestigious National Journal:

WATCHING FOR UNDERCOUNT IN 1990 NATIONAL CENSUS

(By Dick Kirschten)

April 1 is Census Day, and for most Americans, it is a wholly apolitical occasion that occurs but once every 10 years. For Washington Lawyer Jeffery M. Wice, nothing could be further from the case.

The 37-year-old Wice, who runs marathons for diversion, has been tracking the census process virtually full-time for the past dozen years. The reasons for his long-running preoccupation with the population count are purely politicial.

Wice has become something of a one-person repository of information about redistricting and reapportionment. Reporters frequently cite him as an "expert source" on court rulings and other legal intricacies that will guide next year's reallocation of political power and economic benefits.

Mostly, however, his expertise will be brought to bear on behalf of the Democratic Party. His two biggest clients are New York state's Democratic Assembly Speaker, Melvin H. Miller, and the Democratic State Legislative Leaders Association.

Wice, in an interview, said his employers share a "concern that a bad census will hurt Democrats because the populations that will be undercounted are urban and minority populations, and that is the basic strength of the Democratic Party."

At the Census Bureau, such statements rankle. A senior official who asked not to be named charged that Wice seems less interested in avoiding an undercount in 1990 than in publicizing the one that occurred in 1980. The official charged that New York City is doing less than other major cities, particularly Los Angeles, to help assure a complete count.

The official speculated that New York politicians want to discredit the census in hopes of staving off reapportionment for another 10 years, as happened following the 1920 census. New York has good reason not to welcome census results, having lost seven congressional seats since 1970 and facing an expected loss of three more next year.

But Marshall L. Turner Jr., the Census Bureau's liaison to state legislative leaders, said that Wice, whom he has known since 1978, is "well regarded on both sides of the political aisle as a legal technician" on districting matters. Turner added that during his 26 years with the bureau, he has never seen so much support from state officials, including New York's, in "trying to get a good count."

Wice, who averages one day a week in New York, worked with Assembly leaders to form a tax-exempt, not-for-profit corporation, New York Counts, that hopes to raise $100,000 for census promotion activities. In Albany, he has helped film public-service announcements about the census and has encouraged legislators to use their district offices as census community-assistance centers.

Such activities, Wice said, demonstrate that "as Democrats, we believe in a full and complete count." He says he believes, however, that undercounting inevitably will occur this year because of increases in homelessness and in non-English-speaking and immigrant populations. "It is not the bureau's fault that the fabric of America has changed so much since 1980," he said.

Wice has been immersed in politics since childhood. His father was Republican committeeman on Long Island. In high school, however, Wice became a follower of Robert F. Kennedy and has labored for Democratic causes and candidates ever since.

While attending Antioch Law School from 1978-82, Wice directed the New York Assembly's Washington office. In preparation for the 1980 census, the Assembly's Democratic leadership asked Wice "to find out what the census and redistricting are all about." At that point, he said, "the Democrats had never controlled the Assembly during a redistricting year."

Since his first visit to the Census Bureau's headquarters in 1978, Wice has concentrated on learning how to help legislative leaders and staff make use of census data and the various laws that affect the drawing of congressional and legislative district lines. His initial experience, when New York lost five House seats after the 1980 census, was a rough one. "I was the messenger who had to tell three [Democratic] Members they didn't have seats to go back to," Wice recalled.

Of all his political mentors, Wice cites the late Allard Lowenstein as the most special. A part of that legacy that motivates his current activity, he noted, is the recollection that Lowenstein "was gerrymandered out of his House seat in 1971 by Republican leaders in the Legislature."

Now affiliated with O'Connor & Hannan, a Minneapolis-based firm, Wice described his work "as a continuation of what Al Lowenstein believed in and worked for: civil rights and voter empowerment."

INTRODUCTION OF LEGISLATION TO REPEAL THE EMPLOYER SANCTIONS PROVISIONS OF THE IMMIGRATION REFORM AND CONTROL ACT

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. RICHARDSON. Mr. Speaker, last Thursday the General Accounting Office released its third and final report on employer sanctions and the question of discrimination. Under the Immigration Reform and Control Act [IRCA], if the GAO reaches the conclusion that employer sanctions are causing a "widespread pattern of discrimination," expedited procedures are triggered to consider a joint resolution repealing these onerous provisions. I am today introducing a joint resolution to this very effect.

The GAO's conclusion is unambiguous; it states clearly that nearly 20 percent of employers are presently practicing discrimination against "foreign appearing" individuals seeking work. Furthermore, the GAO states "the discrimination GAO found is serous and requires the immediate attention of both Congress and the administration.

Mr. Speaker, despite my belief that employer sanctions would lead to discrimination, I supported the Immigration Reform and Control Act in 1986. However, my support was contingent on the understanding should the GAO find widespread discrimination, the employer sanctions provisions would be repealed. I believe a great many of my colleagues based their support on this same understanding.

I encourage the House to act on this measure quickly. To delay would only continue the injustice which has been suffered by thousands of U.S. citizens and legal residents who wish to work and build a better life. I look forward to working with all my colleagues and interested parties to assure the employer sanctions are repealed. The Congress should promote policy and legislation which removes barriers, not creates them. Let us work to remove this injustice, this barrier to opportunity.

IN SUPPORT OF H.R. 4328

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. DE LA GARZA. Mr. Speaker, I want to rise in support of H.R. 4328, a bill combining authorizations of appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal years 1991 and 1992. The package also contains miscellaneous customs and trade law provisions.

My foremost concern is the operation of the Customs Service. This is quite important to my area, the 15th District of south Texas.

The administration's request would have reduced Customs staffing positions and that is something I just do not feel we can allow to happen. I hear daily about the ever-increasing Customs workload and must say that if anything I feel more positions are needed. That is why I am happy to see that the Ways and Means Committee rejected the administration's request and authorized an increase of 694 positions over the existing appropriated level. I am also happy to see that the authorization provides for program increases requested by Customs in areas such as improvements in internal controls and money laundering enforcement, as well as increased inspectors along the southwest border.

There are many reasons this increased funding is significant, but I feel it is important to highlight that as we wage the war on drugs it is only with such funding as this that Customs will be able to effectively function.

In the years to come there is no question that the workload these agencies face will be more and more demanding. This exacting workload must be met. Our country's trade policy objectives must be met. The trade and customs laws of our Nation must be enforced. The budgets we are authorizing today will ensure that for the next 2 years they are.

CHERRY BLOSSOM PRINCESS AMY K. SULLIVAN

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize Rhode Island's representative in this year's National Cherry Blossom Festival.

Amy K. Sullivan, of Narragansett, RI, has been selected as Rhode Island's princess for the 1990 Cherry Blossom Festival. She currently attends Georgetown University here in Washington, DC, majoring in economics.

Since 1927, our Nation has celebrated the planting of the cherry trees along the banks of the Potomac. The Cherry Blossom Festival has become a symbol of friendship and cooperation between the United States and Japan. The Festival has also become an annual occasion for celebrating the beginning of spring. The festival has grown into week-long series of events and ceremonies in the Washington area, including the celebrated Cherry Blossom Festival parade.

I would like to congratulate Amy for her selection as Rhode Island's cherry blossom princess. I wish her the very best during this year, especially during the Cherry Blossom Festival week.

CONEMAUGH VALLEY CHAPTER OF GOODWILL INDUSTRIES SALUTES VOLUNTEERS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. MURTHA. Mr. Speaker, I would like to take a moment to salute the Conemaugh Vallely Chaper of the Goodwill Industries and

Goodwill volunteers as Goodwill Week 1990 approaches.

Goodwill Week will take place this year from May 6–12. I hope that we will all take a moment that week to reflect upon the work that the Goodwill Industries and the Goodwill volunteers do year round for the people in our communities all across the country who are in desperate need of assistance. Goodwill volunteers are quietly finding food and clothing for families who are struggling to make ends meet. They are selflessly taking time out of their busy lives to help those in need, and as we reflect on the services these individuals are providing for our communities, I hope we can take the time to say thank you to them for their efforts.

I would like to say a special thank you to the individuals in the Johnstown, PA, community who make Goodwill Industries such an important organization for the people in our area who are in need of assistance. The Conemaugh Valley Chapter of Goodwill Industries will be saluting these volunteers who give so much of their time during Goodwill Week. I want to join in this salute to these special people, and wish them well in their continuing efforts to provide help to the Johnstown community.

SALUTE TO TAKOMA PARK, MD

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mrs. MORELLA. Mr. Speaker, I rise today to salute the city of Takoma Park, MD. On Tuesday, April 3, 1990, Takoma Park celebrates the 100th anniversary of its incorporation as an independent municipality.

Takoma Park is a very special place. One of the oldest suburbs of Washington, DC, it was founded in 1883 by B.F. Gilbert, who served as the city's first mayor. Because of its architectural heritage—its Victorian and early 20th-century homes—one-third of the city is listed on the National Register of Historic Places.

Each spring, people from all over metropolitan Washington come to Takoma Park to see its magnificent azaleas in both public and private gardens. Many of the town's early residents were Department of Agriculture botanists who left an enduring tradition of beauty to the town.

First-time visitors to Takoma Park always notice the towering oaks, maples, elms, and other trees that line the city's streets and add grace and beauty to its homes. Several years ago, the city council, mindful of the aesthetic and environmental importance of the city's trees, passed an ordinance that prohibits the arbitrary cutting down of healthy trees.

Takoma Park's concern for the environment is also reflected in the city's successful recycling program. The first jurisdiction in Maryland to establish a mandatory recyling program for newspapers, aluminum, and glass, Takoma Park now serves as a national model for small cities.

At the heart of Takoma Park's uniqueness are its citizens who give the town its sense of community and its reputation as an energetic and progressive city. United by a common bond of concern for the special place in which they live, the people of Takoma Park are an enviable mixture of all ages, all nationalities and races, all religions, all income groups, all occupations, and all opinions.

I am proud to represent this historic, public-spirited city in the U.S. Congress.

TRIBUTE TO FIRE CHIEF LOUIS A. SHEA, JR.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 2, 1990

Mr. CONTE. Mr. Speaker, I rise today to pay tribute to Fire Chief Louis A. Shea, Jr., on his retirement from the Fall River Fire Department after 42 years of dedicated service.

I first met Chief Shea through his son, Tim, who is a member of my Appropriations Committee staff. Chief Shea's reputation among the fire chiefs of Massachusetts is outstanding and well known. Throughout the Commonwealth, Chief Shea is recognized for his expertise in fire department management, his professionalism and his advocacy for first-class training programs and facilities. Because of this experience, Governor King appointed Chief Shea to the Massachusetts Fire Training Council, and he was reappointed by Governor Dukakis. He served on the council for 6 years.

The respect for Chief Shea extends to the professional firefighters association as well. The late and great Dusty Alward, president of the union always spoke very highly of the chief. Dusty recognized the evenhanded management, and he knew that all of the chief's tough decisions were based on the best interest of his men, the city, and the people of Fall River. This recognition is truly a testament to the fair and professional approach the chief took in managing the department.

Chief Shea began his long and distinguished career in the fire service 42 years ago, when on February 2, 1948, he joined his father as a member of the Fall River Fire Department. In fact, the Shea family had a tradition of fire service long before the chief joined the department. His grandfather, Michael Shea, joined the department in 1896 as a firefighter. In 1923 he was appointed a dispatcher and served in the same building that later would house his grandson's office as chief. Michael Shea served the city of Fall River for 42 years. Louis A. Shea, Sr., the chief's father, joined the department in 1920 and served 36 years. For 94 years, from 1896 to 1990, a Shea served on the Fall River Fire Department, providing a total of 120 years of accumulated service to the people of Fall River.

This family tradition of service was only exceeded by the chief's own distinguished career. After graduation from Coyle High School in 1942, he attended Providence College for a year, commuting each day from Fall River. During World War II, from 1943 through 1946, he served in the U.S. Navy, stationed at Bethesda Naval Hospital in Washington, DC. There the chief followed a lifelong interest in medicine. He returned to Providence College with an eye toward completing his degree and moving on to medical school. However, when he was a junior at P.C. the chief joined the fire department, working his way through school. Determined to get a college education, the chief often worked the all night shifts to earn the money he needed to attend classes during the day.

Chief Shea remained on the fire department after graduation, the first firefighter in the department's history to earn an advanced degree. He rose through the ranks, competing each time for the civil service positons. He was appointed lieutenant in 1957, captain in 1969 and district chief in 1971. In 1977, after achieving the highest score on the State administered examination, he was appointed fire chief, a position he held with distinction for 13 years.

During his tenure as the department's executive officer, Chief Shea reformed and expanded the city's emergency medical services, a project for which he was commended by the city council; he built two new fire stations and launched plans for a third; he formed an arson task force to combat a rash of arson-for-profit fires that plagued the city in the late 1970's and the early 1980's; he modernized the fleet of fire service equipment; he expanded the fire prevention and education program; he launched a regular inspection program for industries and public buildings; he fought some spectacular fires, including the internationally known Notre Dame Church fire, which threatened an entire residential neighborhood and the Kerr Mill fire, which destroyed businesses and threatened homes; and he witnessed several of his men killed in the line of duty, a tragedy for everyone, but affecting firemen hardest of all.

Chief Shea's administration was surely eventful and important for the department, but there's another aspect of the chief's leadership that is not easily quantified in specific events or statistics. The leadership quality that earned the respect of his fellow chiefs around the State and the union alike was best put in a recent editorial published in the Fall River Herald News. The paper said of the chief: "In the battle against major conflagrations, the very presence of the Chief was reassuring. A quiet, dignified man, he communicated his concern for the safety of fire victims, spectators, and his own men, who returned his confidence with steady heroism. They knew he would never ask them to endure any danger he had not experienced himself."

Mr. Speaker, it's this quiet leadership by example that earned Chief Shea his reputation for honesty, hard work, even handedness, fair play, and professionalism. At the end of this long and distinguished career, I salute the chief for his years of service and wish him the best in retirement. The city of Fall River and the State is at a loss with his retirement.

For the RECORD, Mr. Speaker, I will include several newspaper and magazine articles that highlight Chief Shea's service and career, and I am sure the House joins me in wishing him the very best:

CHIEF SHEA MADE OUR LIVES SAFER

On his 42nd anniversary—to the day—of being sworn in as a firefighter, Fire Chief

Louise A. Shea, Jr. will retire from the Fall River Fire Department Feb. 2.

For all the stress and high responsibility of his job. Chief Shea appears younger than his nearly 65 years. Throughout his 13 years as Chief, he has given an example to all public servants in the ideal use of authority—even-tempered, patient, yet clear, and consistent in purpose, and compassionate to the bereaved and the homeless.

He is proud to be a third-generation member of a family of Fall River firefighters. His grandfather, Michael Shea, joined the department in 1896; his father, Louis A. Shea Sr., in 1920. The combined service of the three men amounts to 94 years.

During his studies at Providence College, younger Louis Shea worked as firefighter on the night shift. He had thought of becoming a doctor, but, as destiny ordained, he chose a vocation that would call on all his life-saving skills.

In the battle against major conflagrations, the very presence of the Chief was reassuring. A quiet, dignified man, he communicated his concern for the safety of fire victims, spectators, and his own men, who returned his confidence with steady heroism. They knew he would never ask them to endure any danger he had not experienced himself.

The first member of the city department to hold a college degree, Chief Shea shared his humanistic view by educating the public in fire prevention. He launched a regular inspection program of industries and public buildings.

He was cited by the City Council for developing the department's emergency medical service. Back in 1973, District Chief Shea was placed in charge of the new ambulance service, which had been transferred to the Fire Department from the former Hussey Hospital. A nationally registered Emergency Medical Technician, he has also been an instructor in fire science and medical care.

After four decades of guarding the city's safety, Chief Shea has earned a more leisurely schedule. Wherever he goes, in Fall River or Maine, respect and warm affection will be with him.

FIRE SAFETY RULES FOR THE FUTURE

Retiring Fire Chief Louis A. Shea forecasts that Fire Departments of the future will face a more complex and dangerous society.

Strategy and equipment must protect firefighters from deadly fumes emitted by plastics and chemicals.

Emergency medical services must be top-notch. Soon, Fall River EMTs will have defibrillators to assist victims of cardiac arrest.

Since Proposition 2½, staffing has been reduced, yet tasks have expanded. Personnel must be in top physical condition, and develop new insights through continuing education.

New fire stations, like the proposed North End station, must be built to provide quick response to areas of growing population.

In addition, everyday citizens can help by observing fire prevention rules at home and at work. It's the best way of showing appreciation for those round-the-clock heroes, our firefighters.

FIRE CHIEF SHEA RETIRING FEB. 2

(By James N. Dunbar)

FALL RIVER.—When Fire Chief Louis A. Shea Jr. winds up a 42-year-career next month, it will end three generations of the Shea family to have served the city as firefighters.

Shea will leave the department Feb. 2, the 42nd anniversary to the day of his being sworn in as a firefighter in 1948.

It marks a tenure during which he structured a department with more services yet fewer members; built new stations and acquired new apparatus; increased fire prevention programs and mill inspections; and pressed for quicker response time.

It was also an era when new plastic goods and chemicals—and the deadly fumes they emit when ignited—demanded dramatic changes in firefighting equipment and strategy surpassing potential blazes in 90 old mill buildings citywide. Shea met those demands.

He faced some of the city's biggest fires including the Kerr Mill inferno. Also one of the saddest and most dangerous fires, the loss of Notre Dame de Lourdes Church. Shea "agonized" over potential loss of life in the latter as he made the tough decision to fall back and fight from Pleasant Street.

But except for fortune itself, Shea's leadership may never have happened.

He was eyeing medical school after graduating from Providence College's pre-med program in 1949. During his senior year he worked nights as a firefighter.

After all, his father, the late Louis A. Shea, Sr., had been a fire fighter, joining the department in 1920. So had his grandfather, Michael Shea. He joined the department in 1896 and was a dispatcher when the Pine Street fire alarm headquarters opened in 1923.

Shea, who will be 65 on April 27, in an interview Wednesday recalled his career; 13 years as chief; the changes; and what lies ahead.

"I want to retire on my anniversary date," the city native who resides with his wife Jean (Kowalski) Shea at 47 Greenlawn St. said. "I have no real retirement plans. But we've bought a house in Maine."

After graduation from Coyle High School in 1942, he did a year at PC; served in the U.S. Navy from 1943 to 1946; and was a junior at PC when appointed a firefighter in 1948. "a good friend, the late Tommy Loftus, worked all my day shifts for me so I could get my education."

Shea became the first member of the department with a college degree. "That has changed. Many of the men now have college degrees," he said.

But Shea didn't get into medical school. "Competition was very keen." So he stayed on the department. He served at several stations and rose thorugh the ranks. He was appointed lieutenant in 1957, captain in 1969 and district chief in 1971. He succeeded the late Fire Chief Thomas J. Moore in 1977.

Shea cited the "tremendous changes" since he began. "We have greater responsibility now, with emergency medical services. The environment we work in, with plastics and toxic wastes has changed too. It means more time inspecting industries—in prevention programs. More emphasis on that is forthcoming. I've enlarged the fire prevention bureau. That partly, I feel, is why we have less fire runs than ever before."

He added that: "In good economic times we have less fires. In poor times we encounter more arson. In the last few years the economy has been good and we have had much fewer big fires."

Shea remembers when most of the calls were for wood stoves, oil burners chimneys, and faulty space hearters. The later have been outlawed.

"Much or everything in use today has plastic in it. When it burns it gives off poisonous fumes. It takes a toll on firefighters. That's why we require every man to wear a mask (self contained breathing apparatus) at fires. We never wore them years ago. If one did, he was considered a sissy. We had macho people who had to be smokeaters. Well, it took its toll on them."

In 1973 Shea was given command of the emergency medical service. The former Hussey ambulance and its drivers were made part of the department.

"The program now is more sophisticated. The crews are highly trained in offering a variety of emergency medical service. The public has been very complimentary of our services," said Shea.

This year, the department will purchase defibrilators and train crews in giving vital first assistance to those suffering heart attacks. "It will save more lives with quick response and transport to medical facilities."

Service expansion is in place although the department has fewer members. "When Proposition 2½ came in the late 1970s, the department lost 37 men. We now maintain a complement of 255 men." They man eight pumpers and four ladder trucks, fire rescue and two medical rescue vehicles, and some back-up apparatus.

As a new chief in 1977, he was key to building a new Niagara fire station. Last year the new Flint Station was built. And shortly the bids will be out for a new station at the Fall River Airport to handle the population explosion in the city's North End. It will have a new, economical, combination ladder and pumper vehicle Shea has requested.

He has keyed on a program to rehabilitate fire apparatus rather than purchase new ones. "We had pumps overhauled and repainted and they came back like brand new. It gives the city another 10 to 15 years more service from them. The costs are approximately $40,000 per truck as compared to $150,000 for new trucks."

"The money amounts have changed too," said Shea. "The department now has a $9.5 million budget. When I started it was only $3.5 million. As a young firefighter I received $50 a week. The salaries now are close to $500 a week. It's only right. The responsibilities warrant the pay."

Among the unhappy memories are the Beauregard Apartments on Pleasant Street in 1983 when five occupants were killed. "It was horrible. That fire was set."

One of the good memories is work by the department in rescuing 14 people from a flaming apartment house on Blackstone Street after the two entrances were blocked by smoke and flames.

While there has been a minimal loss of life among his on-duty firefighters, Shea laments their deaths. He spoke of how Lieutenant Bernard died in a smoky fire when the officer's air supply ran out; Lt. Candeis dying when trapped in a fire on Middle Street. And "Red" Dube and John Kozior dead from heart attacks.

"It takes something out of you when you lose one of your people. One of the hardest things on the job is notifying the widow. I've had to do it several times and it never gets easier."

The changing face of the department shows a younger force than when Shea came on. "It's a much younger group generally than in years gone by," said Shea, who wears Badge Number 1, the senior of all the department's employees. "There were 103 of us who came on duty the same day. I'm the last one left."

FIRE CHIEF PREPARES TO RETIRE—SHEA REFLECTS ON LESSONS LEARNED IN 42 YEARS OF BATTLING BLAZES

(By Thomas Frank)

FALL RIVER.—The year was 1958. The place was a four-story rooming house engulfed in flames.

A tall, third-generation firefighter named Louis A. Shea Jr. ventured into the house to look for a man reported missing. Shea almost didn't come out.

He did two things firefighters would never do today: He failed to wear a mask (firefighters didn't have them) and he went in alone.

Shea couldn't find the man; then he couldn't find his way out. Smoke had almost filled the corridor and he wondered whether he would get out. He dropped to his stomach and began sliding along the floor, pounding at each door hoping it would lead to the stairway. Eventually he found it and escaped uninjured—but wiser.

"I broke the rules by going into a place like that alone," Shea said yesterday. "You should be with a partner."

Shea, chief of the Fall River Fire Department for 13 years, has many alarming and fond memories as he prepares to retire on Feb. 2, 42 years after he joined the department as a premedical student at Providence College.

State law would require Shea to retire by May, shortly after he turns 65, but Shea said he chose Feb. 2 because "it's the anniversary of my appointment. Just nostalgia, I guess."

A combination of nostalgia and fate got Shea into firefighting. His grandfather, Michael, became a city firefighter in 1896 and his father, Louis Sr., joined the department in 1920 and rose to the rank of fire-prevention inspector.

"Firefighting's in your blood," said Shea, who said he dislikes publicity and hopes to retire without a party or fanfare. In 1948, when he was a junior at PC, he joined the department, working the night shift. His grades were not good enough to get him into medical school, so Shea stayed with the Fire Department.

"I love being a firefighter," Shea said. "There's something—it's hard to explain—the adrenaline gets going and there's a lot of satisfaction doing a good job. There's a great challenge to putting out a fire."

Perhaps no challenge was greater than the massive Notre Dame Church fire in 1982, which destroyed or damaged 37 buildings, many of them homes. "The fire was raging out of control and got into heavily populated neighborhoods," Shea recalled. "I didn't know how we were going to stop it. You agonize over trying to save lives, so I decided to set up a defensive line on Pleasant Street. My biggest fear was whether people were going to get burned to death."

The fire was put out eventually, and no one was injured. But Shea attributes that to fate as well as skill: the fire began at 2 p.m. "If it was 2 a.m. I'm sure we would have had some fire deaths," Shea said.

In addition to the church blaze and two major mill fires, Shea has contended with changing responsibilities, such as mandatory inspections of mills and underground gasoline tanks, and a department that has been cut from 285 to 255 people by the restraints of Proposition 2½, which limits the taxes municipalities can collect.

"The environment is different," Shea said. "There are a great number of plastics and chemicals, which create more problems. There's greater peril to firefighters today than when everything was wood and paper."

But Shea also has seen the advent of smoke detectors in every apartment, which he calls "one of the best things we've ever had."

Shea will be the third senior department head the city has lost in recent months. Albert Mercier, administrator of the Department of Assessment, retired at the end of last year and Police Chief Ronald Andrade died in November.

Shea said his successor, who has not been appointed, will oversee a move toward greater fire prevention. Shea expects to see states require sprinkler systems in new homes and perhaps eventually in old homes.

Shea said he would have continued to work past age 65, but he is philosophical about his departure: "You get to a point when you have to let new people with new ideas come in."

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, April 3, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 4

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to consider proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings on S. 1880, to revise title VI of the Communications Act of 1934 to ensure carriage on cable television of local news and other programming and to restore the right of local regulatory authorities to regulate cable television rates.
SR-253

Labor and Human Resources
Business meeting, to consider the nominations of Lynne Vincent Cheney, of Wyoming, to be Chairperson of the National Endowment for the Humanities, National Foundation on the Arts and the Humanities, and Glen L. Bower and Charles J. Chamberlain, both of Illinois, to be Members of the Railroad Retirement Board, and pending legislation.
SD-430

9:15 a.m.
Veterans' Affairs
To resume hearings on S. 1398 and S. 1332, bills to establish a Commission on the Future Structure of Veterans Health Care to make recommendations for the realignment or major mission change of certain medical facilities of the Department of Veterans Affairs.
SR-418

9:30 a.m.
Armed Services
Readiness, Sustainability and Support Subcommittee
To resume hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense, and to prescribe military personnel levels for fiscal year 1991, focusing on environmental programs.
SR-222

Armed Services
Manpower and Personnel Subcommittee
To resume hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense, and to prescribe military personnel levels for fiscal year 1991, focusing on officer procurement programs and the management and operations at Military Service Academies.
SD-628

10:00 a.m.
Appropriations
Agriculture and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Agriculture, focusing on Agricultural Stabilization and Conservation Service, Foreign Agricultural Service, General Sales Manager, and Soil Conservation Service.
SD-138

Appropriations
Energy and Water Development Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1991 for energy and water development programs.
SD-192

Banking, Housing, and Urban Affairs
To continue oversight hearings on modernizing the financial services industry.
SD-538

Foreign Relations
To hold hearings on the nominations of Nelson C. Ledsky, of Maryland, for the rank of Ambassador during his tenure of service as Special Cyprus Coordinator, Richard E. Bissell, of Virginia, to be an Assistant Administrator for Science and Technology, C. Anson Franklin, of Virginia, to be an Administrator for External Affairs, and Henrietta Hugentobler Holsman, of California, to be an Assistant Administrator for Private Enterprise, all of the Agency for International Development, and James Henry Michel, of Virginia, to be an Assistant Administrator for Latin America and the Caribbean, Agency for International Development, and to serve also as a Member of the Board of Directors of the Inter-American Foundation.
SD-419

1:30 p.m.
Foreign Relations
International Economic Policy, Trade, Oceans and Environment Subcommittee
To hold hearings to review the July 1989 Summit Declaration on the Global Environment.
SD-419

2:00 p.m.
Appropriations
Energy and Water Development Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1991 for energy and water development programs.
SD-192

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 626, to revise the Lanham Trademark Act to prohibit the importation or sale of goods manufactured outside the U.S. and bearing an identical trademark of goods manufactured within the U.S.
SD-226

Small Business
To resume hearings on the President's proposed budget request for fiscal year 1991 for the Small Business Administration.
SR-428A

2:30 p.m.
Judiciary
To hold hearings on the nominations of Joseph M. Hood, to be United States District Judge for the Eastern District of Kentucky, Raymond C. Clevenger, III, of the District of Columbia, to be United States Circuit Judge for the Federal Circuit, Robert E. Jones, to be United States District Judge for the District of Oregon, and D. Brock Hornby, to be United States District Judge for the District of Maine.
SD-430

APRIL 5

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to consider proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:30 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To resume hearings on S. 1400, to regulate interstate commerce by providing for a uniform product liability law.
SR-253

Energy and Natural Resources
To hold hearings on S. 324, to establish a national energy policy to reduce global warming and promote energy conservation and efficiency, and S. 2191, to revise the National Energy Conservation Policy Act to replace energy performance goals for Federal buildings.
SD-366

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Defense, focusing on Navy and Marine posture.
SD-192

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Highway Traffic Safety Administration and the Research and Special Programs Administration.
SD-138

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the U.S. Postal Service, and the National Archives.
SD-116

Banking, Housing, and Urban Affairs
To hold hearings on S. 2028, to revise the International Banking Act of 1978 and the Securities Exchange Act of 1934 to provide for fair trade in financial services.
SD-538

Finance
To hold hearings to examine the security of retirement annuities provided by insurance companies.
SD-215

Governmental Affairs
Business meeting, on the nomination of Richard G. Austin, of Illinois, to be Administrator of the General Services Administration, and S. 1742, to further the goals of the Paperwork Reduction Act (P.L. 96-511), and comprehensively strengthen agency responsibility and accountability of information resources management.
SD-342

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Foundation on the Arts and Humanities, focusing on the National Endowment for the Humanities.
SD-430

2:00 p.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Federal Emergency Management Agency.
SD-192

Armed Services
Strategic Forces and Nuclear Deterrence Subcommittee
To hold hearings on S. 2171, to authorize funds for fiscal year 1991 for military functions of the Department of Defense, and to prescribe military personnel levels for fiscal year 1991, focusing on chemical deterrent programs.
SR-222

Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 2117 and H.R. 2570, bills to designate certain lands as wilderness in the State of Arizona.
SD-366

Foreign Relations
To hold oversight hearings to review the state of the world's children.
SD-419

Judiciary
To hold hearings on the nominations of Lawrence M. McKenna, to be U.S. District Judge for the Southern District of New York, James F. McClure, Jr., to be U.S. District Judge for the Middle District of Pennsylvania, David H. Souter, of New Hampshire, to be U.S. Circuit Judge for the First Circuit, and Samuel A. Alito, Jr., of New Jersey, to be U.S. Circuit Judge for the Third Circuit.
SD-226

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

2:30 p.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on S. 1741, to revise the Federal Aviation Act of 1958 to increase competition among commercial air carriers at the Nation's major airports.
SR-253

APRIL 6

9:00 a.m.
Labor and Human Resources
To resume hearings to review the Bipartisan Commission Comprehensive Health Care (Pepper Commission) recommendations on universal health care issues.
SD-430

9:30 a.m.
Finance
Private Retirement Plans and Oversight of the Internal Revenue Service Subcommittee
To hold oversight hearings on the implementation of the Omnibus Taxpayer Bill of Rights (P.L. 100-647).
SD-215

Governmental Affairs
Government Information and Regulation Subcommittee
To resume hearings on the quality of U.S. health promotion statistics.
SD-342

10:00 a.m.
Appropriations
Legislative Branch Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Government Printing Office and the General Accounting Office.
SD-116

Banking, Housing, and Urban Affairs
To hold hearings on the General Accounting Office's final audit of the Federal Savings and Loan Insurance Corporation (FSLIC).
SD-538

APRIL 18

9:00 a.m.
Veterans' Affairs
To hold joint hearings with the House Committee on Veterans' Affairs to review the legislative recommendations of the AMVETS, the Vietnam Veterans of America, the Veterans of World War I, and the Non-Commissioned Officers Association.
SH-216

10:00 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the De-

partment of Housing and Urban Development.
SD-138

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Park Service, Department of the Interior, and the National Gallery of Art.
S-128, Capitol

APRIL 19

9:30 a.m.
Select on Indian Affairs
To hold hearings on S. 1289, to improve the management of forests and woodlands and the production of forest resources on Indian lands.
SR-485

10:00 a.m.
Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Small Business Administration, and the Legal Services Corporation.
S-146, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Federal Railroad Administration and the National Railroad Passenger Corporation (Amtrak).
SD-138

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of Management and Budget, and the Executive Office of the President.
SD-116

2:00 p.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on deficiency payment problems associated with barley.
SR-332

Agriculture, Nutrition, and Forestry
Conservation and Forestry Subcommittee
To hold hearings on S. 2205, to designate certain lands in the White Mountain National Forest, Maine as the Caribou-Speckled Mountain Wilderness, and as components of the National Wilderness Preservation System.
SR-485

Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance, focusing on Eastern Europe.
SD-138

Commerce, Science, and Transportation
To hold hearings on the nomination of John K. Lauber, of Maryland, to be a Member of the National Transportation Safety Board.
SR-253

2:15 p.m.
Appropriations
Energy and Water Development Subcommittee
To hold closed hearings on proposed budget estimates for fiscal year 1991 for the Department of Energy, focusing on atomic energy defense programs.
SD-116

APRIL 20

9:30 a.m.
Energy and Natural Resources
To hold hearings on the nomination of Thomas L. Sansonetti, of Wyoming, to be Solicitor, Department of the Interior.
SD-366

APRIL 23

9:30 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on the cost of production.
SH-216

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Forest Service of the Department of Agriculture.
SD-192

Select on Indian Affairs
To hold oversight hearings on the Indian Federal acknowledgement process, including S. 611 and S. 912, bills to establish administrative procedures to determine the status of certain Indian groups.
SR-485

APRIL 24

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Defense, focusing on the National Guard and Reserves.
SD-192

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Transportation Safety Board and the Federal Highway Administration.
SD-138

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's superconducting super collider program.
SD-366

2:30 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance, focusing on refugee programs.
SD-138

APRIL 25

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on the National Science Foundation and the upcoming scientific manpower crisis.
SR-253

10:00 a.m.
Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of the Attorney General.
S-146, Capitol

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Services Administration.
SD-116

2:00 p.m.
Agriculture, Nutrition, and Forestry
To hold hearings to examine the jurisdiction between the Commodity Futures Trading Commission and the Securities Exchange Commission.
SR-332

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 1981, to permit the Bell Telephone Companies to conduct research on, design, and manufacture telecommunications equipment.
SR-253

Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 370, to establish the American Heritage Trust to provide funding for the preservation of America's natural, historical, cultural, and outdoor recreational heritage.
SD-366

APRIL 26

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Transportation Safety Board.
SR-253

9:30 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Aeronautics and Space Administration.
S-126, Capitol

10:00 a.m.
Appropriations
Defense Subcommittee
To hold closed hearings on proposed budget estimates for fiscal year 1991 for defense intelligence programs.
S-407, Capitol

Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of State.
S-146, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Accounting Office.
SD-138

2:00 p.m.
Energy and Natural Resources
To resume oversight hearings on the Department of Energy's Decision Plan relating to the opening of the Waste Isolation Pilot Plant (WIPP) in Carlsbad, New Mexico, and on proposed legislation to withdraw the public lands surrounding the WIPP site.
SD-366
Governmental Affairs
Oversight of Government Management Subcommittee
To hold hearings on S. 1957, to provide for the efficient and cost effective acquisition of nondevelopmental items for federal agencies.
SD-342

APRIL 27

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1991 for the Federal Aviation Administration.
SR-253

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Foundation on the Arts and Humanities.
SD-430

APRIL 30

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for fossil energy and clean coal technology programs of the Department of Energy.
S-128, Capitol
Select on Indian Affairs
To hold oversight hearings on provisions of S. 1203, to provide tax incentives for businesses on Indian reservations, and S. 1650, to allow an Indian employment opportunity credit for qualified employment expenses of eligible employers on Indian reservations; to be followed by a business meeting to mark up S. 143, to establish the Indian Development Finance Corporation to provide development capital for Indian businesses.
SR-485

MAY 1

9:30 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's uranium enrichment program.

HOUSE OF REPRESENTATIVES—*Tuesday, April 3, 1990*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Open our eyes, O God, to see old problems with new vision. Encourage us to use the abilities You have given us, not only to work for good by doing what we have done before, but by lifting our sights to see the majesty of justice for every person, the beauty of respect and honor, and to know the joy of righteousness fulfilled. O God, may we never be content with what must be accomplished, but armed with Your free spirit, may we truly become the people You would have us be. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentlewoman from Nevada [Mrs. VUCANOVICH] please come forward and lead the House in the Pledge of Allegiance.

Mrs. VUCANOVICH led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 268. Joint resolution to designate April 6, 1990, as "National Student-Athlete Day."

THE EVOLUTION OF REPUBLICAN TAX POLICY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, in the first phase of the Reagan-Bush era, Republicans pushed tax cuts for the rich. We were told this would stimulate the economy, because the rich would spend wisely and create new jobs.

We see one of the returns this week when Donald Trump, a prime benefactor of these tax cuts, opens up the Taj Mahal, his billion-dollar casino. America needs new infrastructure and more money for education, not casinos.

Then Reagan-Bush entered another phase of tax policy. The borrow, borrow, spend, spend phase. The return for the economy? The biggest deficit in U.S. history and a bloated defense industry.

In the nineties, George Bush ushers in a new brand of Republican tax policy. He tells Governors and mayors: You tax, I'll spend.

But I am not surprised.

To George Bush, "lead" is a four-letter word.

CONGRATULATIONS TO UNIVERSITY OF NEVADA LAS VEGAS BASKETBALL TEAM, NCAA CHAMPIONS

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, I rise today to commemorate UNLV's remarkable year on and off the basketball court. Rated as one of the up-and-coming universities in U.S. News & World Report, UNLV won the NCAA basketball championship last night.

The team overcame many obstacles this year. Greg Anthony broke his jaw earlier this year, crashing to the floor of the basketball court, but he continued to compete with a wired-shut jaw. His courage, character, and tenacity enabled him to take his game to a higher level, taking his teammates with him. Greg is as intelligent, selfless, and hard working in the office as he is on the basketball court. I know this because Greg interned in my office last summer.

Not everything has been coming up roses for UNLV this year. The basketball program has been criticized yet again for recruiting junior college players. You can choose to be a purist about basketball or a purist about people—to me the choice is simple.

In many ways, UNLV is the boys town of basketball, a school which recruits many who have been orphaned by society and makes them better basketball players, better students, and better people. It is to the credit of the program that they seek this opportunity. Clearly, the images of thugs have been replaced by images of hugs—hugs between boys who have become men through adversity and victory—who know a real love and affection for each other, their school and their State. God bless each one and God bless the State of Nevada.

YOU-DO ECONOMICS

(Mr. VISCLOSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VISCLOSKY. Mr. Speaker, in 1980, then-candidate George Bush labeled candidate Reagan's economic strategy as "Voo-Doo Economics." Ten years later, in his own administration, President Bush has embraced "You-Do Economics".

The President, time after time, policy after policy, declares that there is a problem, that the Federal Government will find the solutions and that the States and localities will be responsible for funding them.

The most recent example of "You-Do Economics" is the President's newly announced transportation policy.

The President is quick to admit that our Nation's infrastructure is in disrepair. He doesn't refute that 62 percent of paved roads in the country are in need of repair, that over 240,000 of our bridges need work, or that our airports are dangerously overcrowded and that they will get worse.

The President's response, as outlined in his new initiative "moving America," is to reduce the Federal Government's financial contribution and move the burden of responsibility to the States and local governments.

For example, the President advocates that the States and municipalities raise gasoline taxes and increase fees on toll roads to meet the shortfall of Federal contributions.

To paraphrase the famous songwriter, Cole Porter, the President is telling the States: "You Do the Voo-Doo That I Won't Do."

LEGISLATION TO INCREASE EXPORT OF AGRICULTURAL PRODUCTS AND REVITALIZE GREAT LAKES MARITIME TRADE

(Mr. ROTH asked and was given permission to address the House for 1 minute.)

Mr. ROTH. Mr. Speaker, today I am introducing legislation to increase the exports of agricultural products and revitalize the Great Lakes ports and maritime trade.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Presently, because of the cargo preference regulations, Wisconsin agricultural produce used in the Food for Peace Program is shipped at taxpayers' expense by rail to ports in Texas and along the gulf coast. In my opinion, there is something fundamentally wrong with a policy that requires Wisconsin produce to be shipped over 1,000 miles at great expense to be loaded on ships in the gulf coast when that could be done in Green Bay at substantial savings.

The solution which I am proposing as legislation would be to allow more cargo to be shipped out of Green Bay and the other Great Lakes ports on whatever vessels are available. This would save the taxpayers money, keep jobs in Green Bay, help northeast Wisconsin farmers export to foreign markets, and help the Great Lakes ports.

If it is grown in northeast Wisconsin, it ought to be shipped out of northeast Wisconsin ports. I ask all of my colleagues to review this legislation.

BUSH TAX POLICY TOWARD STATES: READ MY LIPS, YOU RAISE TAXES

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, Illinois Gov. James Thompson, a member of the President's own party, summed up George Bush's tax policy toward the States quite well. Thompson calls it a "read my lips, you raise taxes" policy, and his feelings are shared by Governors and mayors across the country.

For example, the administration's long-awaited transportation and infrastructure plan puts almost all the onus of rebuilding our crumbling roads on the States, even while the administration uses the billion dollar Federal transportation surplus to mask the deficit. It's no wonder Oregon Gov. Neil Goldschmidt, a former Transportation Secretary, says Bush's policy is "lip service, not road service."

When the Nation's Governors met with the so-called education President in February, Mr. Bush was full of lofty goals, but even as they implored him, he refused to help the States improve our failing public education system. He prefers that everyone else, mayors, Governors, city councils, do the work. He just wants the credit.

Mr. Speaker, the situation has gotten so bad, the States feel so betrayed, that the minority leader of the House in my home State of Florida, Dale Patchett, a Republican, has threatened to withhold transmitting Federal tax collections for transportation and other services until the President does his fair share.

The States and localities are getting sick of taking the heat for George Bush's tax deception. It's time the President read their lips.

CONGRATULATIONS TO PAT MAHEUX ON RETIREMENT FROM HOUSE

(Mrs. MORELLA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MORELLA. Mr. Speaker, we in the House of Representatives are about to lose through retirement the services of a devoted, conscientious employee whose work has contributed greatly to the efficient operation of this institution. Her name is Pat Maheux, a bill clerk. She has served the House of Representatives for more than 30 years.

Pat was born in Johnstown, PA, and she moved to the Greater Washington area at the age of 8, and I must say I am honored to represent her as my constituent in Wheaton, MD.

Pat met her husband Rowland at a World Series in 1956, and next month she is going to be celebrating with him their 34th anniversary. They have five children and one grandson.

She began her service on Capitol Hill as a member of the staff of a Representative from Pennsylvania in February 1951. She has during her career served a number of Members of Congress, and on various committees. She has been a journal clerk and a bill clerk.

As an active member also of the Congressional Secretaries Club, the predecessor of the Congressional Staff Club, Pat gained prominence for her able performances, demonstrating her acting and dancing talent in the annual musical shows. Appearing with Pat in those shows was another prominent talent and Capitol Hill staffer of those days, the current distinguished minority leader of the House of Representatives, BOB MICHEL.

□ 1210

Pat is known by her colleagues as having a delightfully quick and dry wit which really has been the saving grace for many of us.

As a faithful and dedicated employee of the House of Representatives, she has unfailingly continued to give that same time and energy to the care of her family, her home, to her friends as well as to her church.

So I say for all of us in the House of Representatives, congratulations and thank you, Pat Maheux, and as Thoreau once said to Emerson, "I meet you at the beginning of a new adventure." May you enjoy it.

AMERICAN FARMERS THRIVE ON LESS GOVERNMENT INVOLVEMENT, NOT MORE

(Mr. DONALD E. "BUZ" LUKENS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, recent action by subcommittees of the House Agriculture Committee should concern farm State members.

Both target prices and loan rates are proposed to be increased. While this seems like a laudable action that is designed to assist the farmer, they may, in fact, wind up hurting American agriculture rather than helping it.

The 1985 farm bill is working. Farmer income is up. Stocks are down. American exports of farm goods have increased significantly. Why would we want to reverse the gains we have struggled so hard to achieve by making our farmers less competitive?

Mr. Speaker, loan rates have decreased dramatically since 1985. Increasing them over the next 5 years by the proposed 7 to 30 cents would cost an estimated $1.1 billion and would make U.S. commodity prices less competitive internationally.

While I strongly agree that a vibrant agricultural sector is the key to a strong U.S. economy, I urge the Members to carefully consider the results of such proposals. American farmers thrive on less Government involvement, not more.

ROBERT HARRIS SHOULD DIE LIKE A MAN

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, in 1978, Robert Alton Harris went on a spree. He terrorized and killed two young men.

He stopped the car of the first victim, he said, "Die like a man," and shot him in the head.

The second victim, a young boy, fled from the car. He ran through the woods. Harris caught him, and the young man, according to reports now filed, cried, "God, God, please help me." And Harris replied, "God can't help you now. You are going to die." And he shot him in the head, ladies and gentlemen.

Today the Supreme Court said that Mr. Harris is to get a reprieve, he is to get a break, he needs more tests.

What is unusual about this case is after he killed those two boys, he ate the hamburgers they left in the car and he took the car and robbed a bank in San Diego. Little did they know one of the arresting officers at the bank was the father of the boy who had pled for God's help in the woods.

Now is the time for Congress to act. It is time to protect innocent citizens and take care of the rights of victims.

We are overboard with the rights of these killers.

I say today this is not due process, this is undue madness in America. Congress should have Mr. Harris learn how to die and die like a man.

SANDINISTAS NOT READY TO GIVE UP ALL POWER AND PERKS

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, the Sandinistas do not appear to be quite ready to give up all the power and perks they have enjoyed over the past 11 years. They fought their revolution, they say, to get rid of Somoza, his corruption and the lavish life-style he and his supporters enjoyed.

The Sandinista rulers, during their years in power, seemed to be as interested in luxury and privilege as the Somozas they threw out. Who can forget Daniel Ortega's $3,000 for designer eyeglasses. Then, there are the cars and houses confiscated for the personal use and enjoyment of the Sandinista hierarchy.

Now, there is the legislation submitted by Daniel Ortega and passed by the Sandinista dominated assembly giving immunity to high-ranking Sandinista officials for any actions they may have taken during their rule.

An added little benefit thrown into the pot with this legislation, at Ortega's request, was approval of a pension for life for the President and Vice President equivalent to the salary these officials received while still in office.

Ah yes, the sacrifices Marxist revolutionaries must make to improve the life of the common people.

TIME FOR A VOTE IN PUERTO RICO

(Mr. CLARKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLARKE. Mr. Speaker, Congress should set a date for a plebiscite to enable the people of Puerto Rico to vote either for statehood, enhanced commonwealth status or independence.

Puerto Rico has a strong economy and 3½ million people. Puerto Ricans have fought in all our wars since World War I. While Puerto Ricans can elect local officials they can't vote for President. They have no U.S. Senators and one Resident Commissioner in the House. They lack other rights and privileges of full citizenship.

The biggest reason for Puerto Rico's strong economy is that U.S. industries there pay no Federal income tax. This exemption will not go on forever. If and when it is removed this would cause a substantial economic setback.

Another problem—if Puerto Rico should become a State, Social Security and other benefits would rise to the same level as on the mainland. This would be a major cost to the U.S. Treasury.

As it is now, the people of Puerto Rico, representing the three different viewpoints, tend to block each other at every turn.

After three hearings there last month and realizing the intensity of the people's feelings I feel Congress should set clear conditions and a date for a plebiscite next year. The people of Puerto Rico need to make a decision and move ahead together into the future.

DIRE EMERGENCY SUPPLEMENTAL APPROPRIATION TO THE LOW-INCOME ENERGY ASSISTANCE PROGRAM

(Ms. SNOWE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SNOWE. Mr. Speaker, I rise today to support H.R. 4404 because it provides a $50 million dire emergency supplemental appropriation to the Low-Income Home Energy Assistance Program [LIHEAP]. I would like to express my thanks to the members of the Appropriations Committee for their efforts to correct the serious shortage of funding for this vital program.

The State of Maine was particularly affected by this winter's severe weather and high oil prices. Not only did the State suffer the coldest December on record, but Mainers were also faced with oil prices that increased an average of 80 percent in the span of 1 month.

The high cost of home heat is felt most seriously by those with low-and fixed-incomes. I was very concerned about ensuring the continued availability of funds to allow the State of Maine to help low-income families with energy assistance money. That is why I introduced H.R. 3870, which would provide a $200 million supplemental appropriation to LIHEAP. While I support the supplemental funding for LIHEAP in H.R. 4404, I believe that the funding level contained in my bill may still be needed.

Maine's Home Energy Assistance Program and the Community Action Agencies that distribute energy assistance funds have been faced with an unprecedented increase in applicants. Overall, 1,900 more applications for energy assistance had been received at the end of December than at the same time a year previous. Indeed, as of February, over 51,000 families had applied for energy assistance funds.

In order to stretch their Federal funding, Maine's Community Service Office was forced to reduce the average level of benefit assistance from $293 to $246. The lower assistance level combined with the abnormally high oil prices meant that recipients received substantially less heating oil this winter.

These demands depleted Maine's Federal low-income energy assistance grants and caused the State to seek emergency funding to keep the program funded through the remainder of the winter. Federal funding for LIHEAP, which for the State of Maine has been cut by $8 million over the last 4 years, is still desperately needed.

That is why I was encouraged by the Office of Management and Budget's announcement on February 13, 1990, that they would release $1.789 million in reserve LIHEAP funds for the State of Maine. I had written to the Department of Health and Human Services and the Office of Management and Budget requesting that all additional LIHEAP funds owed to the State of Maine be released early. I am pleased that these funds are now available to the State, but more assistance may still be required. This dire emergency supplemental helps to address this need.

Mr. Speaker, it may be springtime in Washington, but the State of Maine is still experiencing winter weather. The supplemental assistance provided by H.R. 4404 for LIHEAP is needed by the State of Maine and many other States that face similar circumstances. I urge my colleagues to support H.R. 4404.

□ 1220

EARTHTECH 90

(Mr. WISE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, if you like a fair, come to Earthtech 90, which opens tomorrow.

Earthtech 90 is designed as an opportunity to explore new technologies for environmentally sustainable economic development. "Sustainable" development means meeting society's present needs without compromising the ability of future generations to meet their own needs.

The Earthtech 90 program is composed of two events. The technology fair opens tomorrow and runs through April 8 on the Mall. The international forum will be held April 5 and 6 in 216 Hart.

Earthtech 90 is sponsored by the Environmental and Energy Study Insti-

tute in cooperation with the Environmental and Energy Study Conference.

I particulary point to three of the exhibits at the technology fair. The American Electric Power and Department of Energy exhibits will feature clean coal technologies. A National Coal Association exhibit will examine the environmental compatibility of coal production and land use. It also will look at the reclamation and wetlands development of mining sites through technological advances and innovations.

Another hundred or so exhibits await us on the Mall. I encourage colleagues to join me at the fair.0

BUDGET TRUTH

(Mr. THOMAS of Wyoming asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMAS of Wyoming. Mr. Speaker, the Congress has, frankly, done an awful job fulfilling its responsibility to balance the budget and properly handle the Nation's finances.

Congress seems to treat the budget kind of like the weather—talk about it a lot but do very little.

Somehow Congress has developed the ability to wring hands about the deficit 1 minute, then pass a $30 billion child care package the next minute—and try to ignore the fact that the two are related.

Congress needs to do more than whine about the national debt.

I suggest that we begin by arranging the budget in such a way that it is exposed to the light of day—so that we, as well as everybody else who is interested, can see what is really going on. Let's get the hay down where the calves can get at it.

Senator SANFORD of North Carolina has a good idea. Divide the budget—at least for thoughtful consideration and analysis—into three sections:

First, trust funds: Keep that money where it belongs.

Second, debt service: Spotlight the debt cost.

Third, operating budget.

After having laid out the numbers so we can see them clearly, we should measure the deficit by the increase in the national debt rather than by some contrived number that shields us and our constituents from the real, tough truth.

This system won't automatically give some the will to solve the problem responsibly, but it will give us the basis to begin.

UNLV RUNNIN' REBELS WIN NCAA CHAMPIONSHIP

(Mr. BILBRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILBRAY. Mr. Speaker, I rise today to honor the University of Nevada, Las Vegas Runnin' Rebels basketball team. Last night the UNLV Runnin' Rebels defeated the Duke Blue Devils to capture the 1990 NCAA Men's Division I Basketball Championship.

UNLV began the 1989-90 basketball season ranked No. 1 in most of the country's preseason polls. After amassing an amazing 35 to 5 record over the course of the season, and after a convincing 103 to 73 victory in the championship game, there is no doubt that UNLV is the best collegiate basketball team in the country.

Mr. Speaker, as an alumnus of UNLV, I am well aware of the excitement surrounding the Runnin' Rebels basketball program. I am especially happy for the UNLV student body, who has so faithfully supported their team throughout the season. I am also happy for the citizens of Las Vegas, who in my opinion are the most devoted fans in the entire country. Most of all, though, I am happy for the Runnin' Rebels themselves.

Coach Jerry Tarkanian and his talented group of young men have proven that they are true champions. Coach Tarkanian, the winningest active coach in the NCAA basketball program, has finally captured the national championship that has so long eluded him. I congratulate him and his assistants for the excellent job they have done this year.

UNLV's starting five have shown throughout the course of the season that they can play with the best of the best. David Butler, Larry Johnson, Stacey Augmon, Anderson Hunt, and Greg Anthony have proven that they not only are talented players, but that they also have the chemistry needed to win a national championship. Similarly, Moses Scurry, Barry Young, James Jones, Stacey Cvijanovich, Travis Bice, Chris Jeter, David Rice, and Brian Emerzian have shown the depth and talent of the UNLV bench.

The Runnin' Rebels have risen above the onslaught of negative stereotypes and bad press they received throughout the season by the national media. They have shown the entire Nation that they deserve the respect afforded to past champions.

Mr. Speaker, I think UNLV star forward Larry Johnson said it best after last night's victory. He said, "You can call us bad. You can call us thugs. You can call us hoodlums. But at the end of that, please, call us national champions."

DON'T LEVY THE SOURCE TAX

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, I would like to bring to Members' attention an especially insidious little levy called the source tax.

A source tax is a levy imposed on income earned within a State. After a person moves and changes residence to another State, they are still required to pay this tax. It is unfair that these people are being taxed by States where they receive no benefits, and they cannot vote. Retirees who had their income taxed the first time around while they earned it, should not be taxed a second time around.

I urge Members to cosponsor legislation introduced by my distinguished colleague, the gentlewoman from Nevada [Mrs. VUCANOVICH]. Her bill, H.R. 1227, will prohibit States from taxing the pensions of out-of-State residents. This measure would no longer allow States to impose an income tax on pensions that retirees earn before moving to another State.

Mr. Speaker, we fought a revolution in this country over taxation without representation, and these people should not be taxed by States where they receive no benefits and cannot vote.

IN MEMORY OF MARYLAND STATE POLICE CPL. THEODORE WOLF

(Mr. McMILLEN of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLEN of Maryland. Mr. Speaker, Anne Arundel County and the State of Maryland suffered a tragedy last Thursday with the death of Maryland State Police Cpl. Theodore Wolf. Corporal Wolf was gunned down early in the morning by a unknown assailant while conducting a routine traffic stop on Interstate 95 between Baltimore and Washington.

I cannot begin to express the grief that our community feels for the loss of Corporal Wolf, nor can I adequately recount his distinguished record. During his career he was recognized many times for his exceptional dedication to law enforcement. He was nominated for the Governor's Commendation for Law Enforcement in 1977 and for State Trooper of the Year in 1978. Just this past year Corporal Wolf was responsible for capturing two dangerous suspects in an abduction case after a high-speed chase, and saved the life of an Ellicott City man who had fractured his skull in a local park.

His dedication was an inspiration to all law enforcement officers; his loss is tragedy for us all. I know my colleagues will join me in offering condolences to the family and friends of Cpl. Theodore Wolf, and I hope they know that they are not alone during this difficult time.

HUSSEIN THREATENS USE OF POISONOUS GAS

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, 50 years ago Adolf Hitler threatened to use poison gas to kill millions of children, women, and men, and the world did not believe him. But he did just that.

Today, the dictator of Iraq, Saddam Hussein, is doing the same thing. He is publicly threatening to kill millions of innocent children, women, and men, and the world does not believe it. He might well do what he has threatened.

This dictator's record is clear. He used poison gas on his own Kurdish children. Newsweek showed colored photographs of children's and women's bodies piled high, killed with Saddam Hussein's poison gas.

□ 1230

The Department of State has called his outrageous statement inflammatory, irresponsible, and outrageous, and I agree. I would like to see the other Arab States denounce this bloodthirsty dictator. I would like to see our European allies and Japan do so, and I would like to see economic sanctions applied to this outlaw dictator.

Mr. Speaker, today I am introducing a resolution to this effect, and I ask my colleagues to join me in sponsoring it.

THE IRAQI THREAT AGAINST ISRAEL

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I did not know my good friend, the gentleman from California, Mr. TOM LANTOS, was going to speak on the same subject this morning that I intended to address myself. I have today's front page of one of our Washington newspapers talking about this Iraqi leader's threat to destroy half of the little State of Israel.

He talks about killing with poison gas, which is a war crime and has been since 1925. With poison gas, he would kill a 1½ to 2 million people. He comes right out and says my country has been lying to the world for 3 or 4 years.

I watched Ted Koppel's fascinating hour-long report on the revolution in Romania, and it appears that the same Communist are in control of the whole apparatus of the secret secretariat, and that all the people who died in that revolution may have shed their blood in vain.

Friday's paper talks about a concentration camp in Bulgaria that existed for 25 years under the leader that has only recently been deposed. To save ammunition, they bludgeoned those prisoners that they had not worked to death. They bludgeoned them to death, put their bodies in bags, and fed those bodies to pigs. This is a dangerous world we live in.

Mr. Speaker, I want to say to the gentleman from California that I want to get on his resolution, but I would also beg all my colleagues in the House to stop this euphoria and this talk of a peace dividend and chopping our defense budget to pieces. A strategic defense can put a shield over Israel, if not this year, sometime in the future, to save 2 million innocent women and children from a mad dog like this Hussein in Iraq.

PROPOSED SANCTIONS AGAINST CERTAIN SUPPLIERS TO IRAQ

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, yes, the President of Iraq yesterday threatened to use chemical weapons to wipe out half of Israel's population, half of all the men, women, and children in Israel.

What a cowardly, sadistic, and mind boggling threat that it. The worst part of it is that President Hussein may have the ability to carry it out, and he has been aided and abetted by many Western companies which sold him the goods to build these poison factories. Too many companies here, in Asia, and in Europe feel free to traffic in deadly weapons to outlaw nations, and the time is long overdue for our country to say that we will not allow any foreign companies to trade in America if they are going to sell these kinds of deadly poison weapons to Iraq. The time has come to tell our American companies that they can have no contracts with the Government if they are to sell Iraq the kind of poison gas they have.

Saddam Hussein is a bully. Like all bullies, unless confronted, he will not back down. It is up to the whole world not to stand by and look the other way but to call this man what he is and stop their complicity with his animalistic outrage.

A SLOWER APPROACH TO BASE CLOSING

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, today the House has before it the supplemental appropriations bill, which spares the military construction funds which are aimed at bases that are on the preliminary closure list of the Secretary of Defense. I also understand that the Appropriations Committee—and I salute them for doing this—has also withstood the pressure to cut back on funds in the category of operations and maintenance.

I happen to have a naval ordnance station, located in my district, on that list.

I realize that we have a changing world environment in which there will necessarily be cuts in military spending and closures here and abroad in our military bases, but those closures ought to come after, first of all, a national defense policy review, as well as the installation of a rational, coherent objective process for yielding those bases.

I do not think we have that process now, Mr. Speaker. I, therefore, salute the committee on having taken a very hard road, but the right road, and not to cut that money off before the list is made final following some due process of law.

LEGISLATION PENDING TO PROVIDE FINANCIAL ASSISTANCE FOR AFFORDABLE HOUSING

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, I rise today in support of H.R. 4073.

I often say to people that we in Congress can enact the laws and regulations but that we must have the ideas. In the case of H.R. 4073 the idea has come from a union in my district in Massachusetts.

In December 1988, Local 26, the Hotel and Restaurant Workers Union of Boston, became the first union in the Nation to win an employer contributed housing benefit. What this bill will do is merely allow housing to be part of labor-management talks, and allow for the establishment and administration of a trust fund to provide financial assistance for employee housing. In a country where affordable housing has become something of an oxymoron this bill provides the kind of innovative and sensitive thinking that is required to address this very serious deficiency.

The entire membership of local 26, under the leadership of their president, Domenic Bozzotto, should be saluted for all of their fine efforts that will benefit not just their members but people all across the country for whom affordable housing or homeownership had become the impossible dream.

I would also like to thank my friend BILL CLAY, who introduced the measure and guided it through the Education and Labor Subcommittee, on Labor-Management Relations. His leadership was certainly crucial. In the same way, I would like to acknowledge

the fine work of the ranking minority member of that subcommittee, MARGE ROUKEMA. Mrs. ROUKEMA, had some genuine concerns about the measure, but once those concerns were addressed, she threw her support behind the bill and was extremely helpful in letting us discuss this today on the floor.

The lack of affordable housing is acute in my district and in the Commonwealth of Massachusetts. In fact, the entire Massachusetts delegation has recognized the need and is in support of this bill. This is by no means, though, only a regional concern. The crunch is being felt from coast to coast and the status quo will simply not meet the needs. H.R. 4073 provides a new model that can be applied in any city in any State in our country. I urge my colleagues to encourage this kind of a fresh approach to a very serious problem and vote in favor of H.R. 4073.

FORT DOUGLAS

(Mr. OWENS of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OWENS of Utah. Mr. Speaker, since the time Fort Douglas was slated for closure by the Commission on Base Realignments and Closures, the entire Utah delegation has groped for a formula which preserves both the spirit of the base closures legislation and the interests of the greater Salt Lake community.

Today I rise to introduce a bill which strikes an equitable balance. It is a product of community consensus which will transfer 55 acres from the fort to the University of Utah, and at the same time, achieve savings for the Federal Government.

I would like to commend my colleagues from Utah for helping to forge a bipartisan solution to this problem of special concern in my district. In particular, I thank the senior Senator from Utah, JAKE GARN, for his outstanding leadership.

This bill conveys all but 64 acres of Fort Douglas to the only logical recipient, the University of Utah. The 96th U.S. Arcom will continue to conduct its Reserve activities with adequate land, the historical integrity of the fort will be scrupulously maintained, and the university will gain an exciting opportunity to create a residential campus and extend the research park.

In exchange for the land, the university will relinquish its legal option to 4,198 acres, the value of which is conservatively estimated at over $12.6 million. This is a good deal for Utah and a great deal for the Federal Government. I strongly urge your support.

IN RECOGNITION OF EARTHTECH 90

(Mrs. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOGGS. Mr. Speaker, I am pleased to salute the Earthtech 90 effort which has given us this opportunity to explore promising new technologies, no matter how large or small, which support economic development in an environmentally sensitive manner.

Mr. Speaker, in central Louisiana, 20 homeowners building upon an idea formulated by NASA scientists during extended space flights, undertook a unique project following the failure of their conventional septic tanks and drain fields. The project involves constructed wetlands, scaled down to fit the needs of individual homes.

These so-called wetlands consist of a three-compartment septic tank followed by a 210-square foot exposed rock filter covered with wetland vegetation such as cattails, canna and calla lilies, bulrushes, and elephant ears. To the casual observer, the installation looks like a flower bed bordered by attractive wood timbers.

There are no unpleasant odors, and discharges from the systems meet secondary treatment standards and generally go directly into a drainage canal.

Projects such as this demonstrate that it is possible to respond to today's needs in ways which minimize harm to the environment.

Again I salute Earthtech 90 for giving us the opportunity to expose them.

□ 1240

DO THE RIGHT THING

(Mr. FLAKE asked and was given permission to address the House for 1 minute.)

Mr. FLAKE. Mr. Speaker, we must not allow the tax increases in the administration's 1991 budget to continue to be masqueraded behind "no new taxes" rhetoric. The truth must be known, that the new taxes are, in fact, being hidden behind user fees, excise taxes, and, once again, the burden is borne by State and local government, as well as those who represent the lower segments of this society. Most of the State and local governments are already overburdened, and increasingly we find regression as it relates to trying to move from the bottom those persons who are at the bottom of the socioeconomic level.

Furthermore, Mr. Speaker, the administration's great revenue raiser has just been found by CRS to be yet another charade, as a study reveals that a cut in the capital gains rate, a traditional break for the rich, will lose $11.4 billion over the next 4 years rather than raise $12.5 billion by the administration.

I call upon the administration to do the right thing for the poor of America, as well as for the rich.

NOT THE RIGHT THING

(Mr. BLAZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLAZ. Mr. Speaker, in just a few minutes the supplemental appropriations bill is going to be considered, and I am here to make a point on behalf of the Territory of Guam.

Mr. Speaker, there is a proposal there under the category "outside the United States" to reduce military construction in the American Territory of Guam. Eighty-six percent of military construction of the Air Force is being taken out of Guam.

Mr. Speaker, it is not the right thing to do, and, my colleagues, we talk about fallback positions. We talk about the problems with the Philippines. We talk about the continuing problems with Japan now with Okinawa and in Korea. The President, the Speaker of this House, the Secretary of Defense, all the service secretaries, speak of Guam. There is always Guam.

Now, Mr. Speaker, we are talking about taking away all the things that we need to prepare Guam, and I say to my colleagues, "Please give it a thought. Give it a thought because, by removing that, you're essentially destroying the construction industry of Guam, and then you're going to come back and say that we're going to move in again."

Mr. Speaker, Guam deserves better. If we are taking the money to give it to Mrs. Chamorro, Violeta Chamorro is one person. My people on Guam, 120,000 of us, believe it or not, are also called Chamorros. Give the 120,000 Chamorros on Guam at least the same consideration given the one Chamorro in Nicaragua.

NORFOLK NAVAL SHIPYARD HONORED AGAIN FOR EXCELLENCE

(Mr. PICKETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKETT. Mr. Speaker, later this month, the Norfolk Naval Shipyard will receive the first U.S. Senate Productivity Award for Continuing Improvement.

This award is given for an organization's commitment to continuous improvement and is the highest recognition that the U.S. Senate Productivity Award Board can give. The shipyard's

commanding officer, Capt. Skip McGinley, and the 12,000 dedicated men and women who work there each day are justly proud of this achievement. These men and women have given the extra effort not only to improve performance but to continue to improve. They have kept costs low and productivity high. They have adopted the principles of total quality management. And they have made their shipyard one of the most efficient anywhere.

It is not surprising, then, that this is the second time in 6 years that the Norfolk Naval Shipyard has received a U.S. Senate Productivity Award and the second time that it has been the very first Federal activity to be so honored. This shipyard has also been recognized by being awarded the Director's Award for Quality from the Office of Management and Budget, and the Commander in Chief's Award for Installation Excellence.

Mr. Speaker, I salute the fine work force and management at the Norfolk Naval Shipyard and urge them to continue to set the pace for industrial efficiency, not only in our own country, but throughout the world.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2015, PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1989

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 101-442) on the resolution (H. Res. 372) providing for the consideration of the bill (H.R. 2015) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1236, PRICE FIXING PREVENTION ACT OF 1989

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 101-443) on the resolution (H. Res. 373) providing for the consideration of the bill (H.R. 1236) to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF H.R. 4404, DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS FOR DISASTER ASSISTANCE, FOOD STAMPS, UNEMPLOYMENT COMPENSATION ADMINISTRATION, AND OTHER URGENT NEEDS, AND TRANSFERS, AND REDUCING FUNDS BUDGETED FOR MILITARY SPENDING ACT OF 1990

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 369 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 369

Resolved, That all points of order for failure to comply with the provisions of sections 302(f), 303(a)(5) and 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344, as amended by Public Law 99-177) and with clause 2(l)(6) of rule XI and clause 7 of rule XXI are hereby waived against consideration of the bill (H.R. 4404) making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990 and for other purposes. During consideration of the bill, all points of order against provisions in the bill for failure to comply with the provisions of clauses 2 and 6 of rule XXI are hereby waived.

The SPEAKER pro tempore (Mr. MONTGOMERY). The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 369 waives points of order against specified provisions of H.R. 4404, the dire emergency supplemental appropriations bill for fiscal year 1990. This rule does not provide for the bill's consideration since general appropriations bills are privileged under rules of the House. The rule also does not contain any provisions relating to time for general debate. Customarily, general debate will be limited by a unanimous-consent request by the floor manager when the bill is considered.

House Resolution 369 waives sections 302(f), 303(a)(5), and 311(a) of the Congressional Budget Act against consideration of this bill. Section 302(f), would prohibit the consideration of any legislation whose adoption would cause appropriation subcommittees' budget authority, entitlement authority, or credit authority ceilings to be exceeded.

Section 303(a)(5) would prohibit the consideration of any legislation that provides new credit authority in a given year prior to the adoption of a budget resolution for that year. Section 311(a) of the Congressional Budget Act prohibits the consideration of any legislation that would cause the budget resolutions's budget authority or outlay ceilings to be exceeded or revenue floor to be breached.

Mr. Speaker, this rule also waives clause 2(L)6 of rule XI and clause 7 of rule XXI. Clause 2(L)6 of rule XI prohibits the consideration of legislation unless the report and legislation have been available to House Members for 3 calendar days. Clause 7 of rule XXI requires the relevant printed hearings and report on legislation to be available to Members for 3 days prior to the consideration of a general appropriation bill.

Finally, Mr. Speaker, House Resolution 369 waives clauses 2 and 6 of rule XXI. Clause 2 prohibits the inclusion of unauthorized appropriations or legislative provisions in general appropriations bills and restricts the offering of limitation amendments to such bills. Clause 6 prohibits reappropriations in a general appropriation bill.

Mr. Speaker, as its name suggests, House Resolution 4404 provides money for programs that are in dire need of supplemental appropriations. As most of my colleagues are aware, this bill contains funding for Panama and Nicaragua. The bill also provides supplemental funding for several domestic programs including food stamps, unemployment, and veterans programs. This aid is truly needed, and in several instances will prevent the closure of offices that administer programs designed to help U.S. citizens in distress.

Altogether, H.R. 4404 provides for $2.4 billion in supplemental budget authority which is partially offset by defense recissions of $1.8 billion.

Mr. Speaker, I urge my colleagues to adopt House Resolution 369 and the underlying bill.

□ 1250

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, I would like to commend the chairman and the ranking Republican member of the Appropriations Committee, the gentleman from Misissipppi [Mr. WHITTEN] and the gentleman from Massachusetts [Mr. CONTE] for their strong leadership on a very difficult bill. Without restraint in the Appropriations Committee, this bill can easily become a Christmas tree.

The provisions of this rule have been ably explained by the gentleman from South Carolina [Mr. DERRICK]. I will not repeat that explanation.

However, I will note that this rule provides only waivers of points of order. It does not change the normal amending process in the Committee of

the Whole. Amendments may be offered under the 5 minute rule as long as they comply with the rules of the House. However, in this case many amendments will be precluded because the House has already spent beyond the outlay ceiling in the budget resolution, and therefore any amendment providing new outlays would be a violation of the Budget Act. Also there is a standing rule of the House which prohibits legislation on appropriations; so the number of amendments that may actually be offered is not likely to be many.

Mr. Speaker, there is money in this bill for disaster assistance, food stamps, the Unemployment Compensation Administration, Panama and Nicaragua, among other things. The amounts are reasonable under the circumstances.

I support this rule so that the House may proceed to consider this dire emergency supplemental appropriation, and it is necessary that the bill be passed.

Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, to begin, I would simply invite the committee's attention to the fact that this is, I believe, the fourth time in the last 5 legislative days that we have waived major provisions of the Budget Act. We are keeping our nearly perfect record of flaunting the Budget Act.

However, in this case, it is fair to say that we do not pass dire supplementals without this kind of a rule. I am not going to complain about, or necessarily ask for a vote on, this rule. If we decide that we need the supplemental, we obviously need a rule like this or we cannot bring it to the floor.

I would also invite the attention of the Members to the fact that while the Budget Act is waived in particulars that protect the items that are in the bill, the Rules Committee has wisely proposed this year to make this bill open to amendment. However, because it has not wavied the Budget Act with respect to the amendments, I would serve notice that almost any amendment that affects the money in this bill is likely to be subject to a point of order, which I am likely to raise.

With respect to the supplemental itself, I will have a statement later.

Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the distinguished gentleman from Ohio [Mr. TRAFICANT].

(Mr. TRAFICANT asked and was given permission to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, I understand how we do business. We appropriate money, then we talk about how well we do it and we come back and ask for more money. I think we all understand that by now. I think the process stinks and if we do not change it, this country is going to go bankrupt, but we all understand that and I am not going to be accused of being a demagog today, like I usually am.

I am upset with the foreign aid money in this bill. We have already come up with $14.6 billion. We have Americans literally sleeping on steel grates. The Census people are out trying to find them with flashlights at night. We have kids graduating who cannot read. One State legislature passed a law that before you can graduate, you have to be able to read at fifth grade level. Think about that.

Congress has cut revenue sharing by $3 billion. Man, we are going bankrupt. Where are we going to get this $3 billion to return to the cities of America taxpayers' hard-earned money that they paid Uncle Sam so that Uncle Sam can return the favor in kind, and do something for America?

But no, $3 billion. You want to break the bank, TRAFICANT?

So we have urban development action grants to try to help areas like mine that are economically depressed, trying to make a piece of the rock a reality. There is no piece of the rock today. UDAG has been thrown out. We are telling the American people, especially our young people, "You don't need a house. Go pitch a tent on government land."

What about water lines? What about sewers? What about bridges? What about education? What about housing for America? What about America going bankrupt?

We are paying our neighbors' rent bill while they are foreclosing on us, and not many people are listening to me. I understand that, but I predict the day will come in this country when America is going to get so upset with this place that they are going to vote everybody out, including me, and we probably all should be.

We should not be appropriating more money today for people overseas with the sad state of affairs in our own country.

Now, I have a series of amendments. Our good colleague, the gentleman from West Virginia [Mr. RAHALL] has an amendment to strike it all, and I am going to support that, and if his amendment does not prevail and I do not know what manipulative parliamentary chicanery will be employed today, but when it is foreign aid it certainly will, and I must say to one of the great chairman of the House, the gentleman from Wisconsin [Mr. OBEY], I wish he was on the side of trade, fair trade and UDAG and revenue sharing, and he is to a degree, and he is.

Mr. OBEY. Mr. Speaker, if the gentleman will yield, I am glad he corrected the record.

Mr. TRAFICANT. Yes. I do not mean that as an insult, I say to the chairman. I understand the gentleman is just doing his job and he is doing it well, and today we would like to beat the gentleman with his good job and we would like to cut foreign aid.

I will have a series of four amendments—three amendments. One would be a 10-percent cut, a 5-percent cut, and a 3-percent cut. I do not know what may pass, but God, let somebody here take a look at our own country, take a look at the drain on our dollars.

In closing, I am saddened to see where the gentleman form Minnesota [Mr. FRENZEL] will retire. He has been a great Member.

If they have taken any comments I have made, I say to the gentleman from Minnesota and the gentleman from Wisconsin [Mr. OBEY], I say to the gentleman from Wisconsin that if he has taken any of my comments to be in the negative, I would apologize. The gentleman has done a very fine job and he has put together a fine program of helping people in conjunction with America's policies; but I am saying today that Congress should reduce the amount of appropriations. I do not think we are going to strike it, but let us cut it.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the gentleman from Ohio [Mr. HALL].

Mr. HALL of Ohio. Mr. Speaker, I want to thank my friend and colleague from the Rules Committee for yielding me some time.

I want to address my question to the gentleman from Wisconsin [Mr. OBEY] and first make a very brief statement.

First off, I want to say thank you to the Appropriations Committee, and specifically the gentleman from Mississippi [Mr. WHITTEN] and the gentleman from Wisconsin [Mr. OBEY] for their commitment to world hunger and the tremendous things they have done over the years to help, especially the children of the world. These are the ones who are dying at the rate of about 35,000 a day.

I also want to thank the committee that in this particular appropriation there is additional money to the tune of about $25 million for our refugees overseas.

I want specifically to ask the gentleman from Wisconsin [Mr. OBEY] a question about another matter relative to the Foreign Operations Committee, concerning specifically the health of children in both Panama and Nicaragua.

The health services in Panama under Noriega, it is my understanding, have deteriorated by at least 15 percent in the last 3 years. In Nicaragua,

the Pan American Health Organization estimates that 500,000 children are malnourished today.

I was disappointed, therefore, by the administration's request for assistance to these two countries. The administration request contains no money at all for children in Panama, and only $10 million for Nicaraguan children. As chairman of the Select Committee on Hunger, I believe that more attention must be paid to the immediate needs of children and mothers in both these countries. They have suffered long enough. Therefore, I believe that at least $20 million should go to meet the needs of Panamanian children, and no less than $30 million for Nicaraguan children. I would remark that these allocations, if made, would still leave $670 million for other purposes in these countries.

□ 1300

Mr. Speaker, I would ask the gentleman from Wisconsin [Mr. OBEY] if it is his view that the administration should allocate such amounts to help rebuild primary health care systems and meet the urgent needs of children and mothers in these countries out of the $720 million for Panama and Nicaragua contained in this bill and if he would use his many, many legislative talents to make this possible?

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. HALL of Ohio. I am happy to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I would simply say that I agree with the general thrust of the gentleman's remarks. I find it regrettable, for instance, that the administration's regular appropriation request for this coming year provides a reduction in programs for children such as UNICEF, but provides an increase of $300 million in military assistance. I think that is backward given the realities and imperatives in the world.

Mr. HALL of Ohio. I take it from the gentleman's remarks that he will be watching this supplemental as it moves its way through the legislative process?

Mr. OBEY. If the gentleman will yield further, we will do everything we can to try to see to it that we take care of basic human needs, not just some of the macroitems which are habitually focused on.

Mr. HALL of Ohio. I thank the gentleman.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and that I may include extraneous and tabular material on H.R. 4404, the bill about to be considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS FOR DISASTER ASSISTANCE, FOOD STAMPS, UNEMPLOYMENT COMPENSATION ADMINISTRATION, AND OTHER URGENT NEEDS, AND TRANSFERS, AND REDUCING FUNDS BUDGETED FOR MILITARY SPENDING ACT OF 1990

Mr. WHITTEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4404) making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Massachusetts [Mr. CONTE] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. WHITTEN].

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from North Dakota [Mr. DORGAN] as chairman of the Committee of the Whole, and requests the gentleman from South Carolina [Mr. DERRICK] to assume the chair temporarily.

□ 1303

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for consideration of the bill, H.R. 4404, with Mr. DERRICK (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the bill was considered as having been read the first time.

The CHAIRMAN pro tempore. Under the unanimous-consent agreement, the gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, at the direction of the Committee on Appropriations, we bring you the bill H.R. 4404, making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes.

Mr. Chairman, in this bill we followed the course we used in handling the damages occurring from the San Francisco earthquake. That terrible tragedy occurred on October 16, 1989 and we prepared an all inclusive bill, on behalf of the California delegation, authorizing and appropriating which the President signed into law on October 26, 1989, 10 days later. We did this to avoid months of hearings by committees of jurisdiction. We conferred with each subcommittee on amounts.

We face the same situation here, for the title of the bill truly presents the situation we face and on which we ask your support.

I am glad to say we had the support of our Committee on Appropriations to produce a bill which met our immediate needs but held off many worthwhile amendments so as not to jeopardize the early enactment of H.R. 4404, the bill now before you. We need similar restraint in the House and in the Senate.

The bill includes: $111,000,000 for disaster assistance for damage done principally in the Southeast since January; a general provision that permits funds apportioned for the fourth quarter to be available for obligation in the third quarter; $96,000,000 for State Unemployment Insurance Administration; $50,000,000 for low-income home energy assistance; $50,000,000 for veterans medical care; $190,000,000 for mandatory veterans compensation and pensions; $510,000,000 for mandatory food stamps of which $135,000,000 is to be reserved until needed; Funds for Panama and Nicaragua, urgently requested by the President; Overturns deferrals which the executive branch had no authority to establish; and reduces funds budgeted for military spending—more than enough to offset new discretionary budget authority.

DISASTER RELIEF

The bill includes $111,000,000 related to recent disasters in the Southeast. Since the first of the year, the States of Alabama, Florida, Georgia, Mississippi, and Tennessee have been devastated by torrential rains and widespread flooding. The bill includes $20,000,000 for flood control and coastal emergencies, $31,000,000 for emergency watershed protection, $10,000,000 for the emergency conservation program, and $50,000,000 for the disaster relief program.

DISASTROUS EFFECTS OF SEQUESTRATION

As a direct result of the unanticipated inclusion of sequestration directed by the fiscal year 1990 conference on reconciliation legislation, many agencies are required to make staff reductions and to close offices that were not contemplated during the orderly appropriations process. To prevent this for State unemployment offices, we have recommended $96,000,000 in the bill. To make sure this and other programs are not forced to close, we have the following language:

Of the funds available for any account by any appropriations act for fiscal year 1990, the amount apportioned to the fourth quarter shall also be available for obligation in the third quarter of fiscal year 1990 where necessary.

This provision gives agencies a longer time to develop alternative savings proposals or to develop supplemental appropriations requests. It is important that essential services such as food inspection, air traffic safety, law enforcement efforts, and the like not be unnecessarily curtailed.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

The committee has provided an additional $96,000,000 from the unemployment trust fund for fiscal year 1990, making a revised total for the account of $2,657,666,000. This account finances the administrative costs of the State employment security agencies in all the States. The amount provided will meet the emergency situation created by a funding shortfall of $96,000,000 in the Unemployment Insurance Program administered by the States.

VETERANS PROGRAMS

The 1991 request for medical care estimates a staffing level of 194,638—approximately 2,000 above the level that can currently be supported in 1990. To bridge employment levels between 1990 and 1991, a supplemental appropriation of $50,000,000 for medical care in fiscal year 1990 is recommended. This will permit the VA to increase employment to the 194,638 level by the end of the fiscal year. More importantly, it assures that a greater number of veterans will receive quality medical treatment—both on an inpatient and outpatient basis.

An increase of $190,000,000 for mandatory veterans compensation and pensions is recommended for an increased caseload and cost of benefits payments based on information provided by the Department of Veterans Affairs.

The bill includes a supplemental appropriation of $150,000,000 for the loan guaranty revolving fund. This is the amount currently estimated to be required to permit payment of claims in fiscal year 1990.

LOW-INCOME HOME ENERGY ASSISTANCE

The bill includes $50,000,000 for the Low-Income Home Energy Assistance Program. The bill calls for the Secretary of Health and Human Services to obligate these funds on the basis of relative need to those States and other entitites which promptly supplement their applications under the act for the current fiscal year demonstrating both a substantial need for and the capacity to expend the additional funds.

FIREFIGHTING

The bill includes $333,000,000 to reimburse accounts from which firefighting funds were borrowed as well as $99,800,000 to provide the Department of the Interior the same level in fiscal 1990 that was available in fiscal year 1989 for fire suppession, emergency rehabilitation and presuppression.

OPERATION AND LOW-INCOME HOUSING PROJECTS

The bill includes $72,000,000 for public housing operating subsidies to provide the increase in utility costs this winter. The funds are transferred from annual contributions for assisted housing from unobligated balances available for the balances available for the section 8 moderate rehabilitation program.

FOREIGN OPERATIONS

The bill includes a total of $870,000,000. For assistance to Panama, $420,000,000; Nicaragua, $300,000,000; sub-Saharan Africa, $30,000,000; the Caribbean, $20,000,000; migration and refugee assistance, $75,000,000; and emergency refugee and migration assistance, $25,000,000. The bill also provides, effective October 1, 1990, $400,000,000 in housing guarantee loan credits for Israel to assist Eastern European refugees resettling in Israel.

The committee has made funds available as requested and directs that it be kept informed of proposed expenditures prior to allocation.

FOOD STAMPS

The bill includes $510,000,000 for the mandatory food stamps program. The President requested "such sums as may be necessary" for this program. Rather than providing a blank check, we recommend the level estimated by the Department of Agriculture with $135,000,000 of that amount to be held in reserve to be used only to the extent it is required to meet program requirements.

All these items have resulted in this bill which deserves the title "dire emergency supplemental appropriations for disaster assistance, food stamps, unempolyment compensation administration, and other urgent needs, and transfers, and reducing funds bugeted for military spending for the fiscal year ending September 30, 1990, and for other purposes."

We have had the cooperation of the Subcommittee on Defense, of which I am a long-time member, starting with Navy, then Air Force and Defense when it was created, in reducing funds budgeted for military spending. The reductions made more than offset the discretionary budget authority provided in the bill.

With the changes which have taken place in the Union of Soviet Socialist Republics, including Russia, quite definitely a reduction and consolidation of our military is not only justified but required. We need to rely more and more on the National Guard and Reserves where the men and women contribute to the economy during the week and by and large train on the weekends. This is not only in order but is made necessary by the state of the national economy.

Thus we call for a retention of the guard units funds for which the Defense Department announced it was making deferrals in fiscal year 1990 or proposing reductions in fiscal year 1991 and beyond.

As stated in the most recent issue of the National Journal:

As the cold war winds down, U.S. troop levels are about to plunge. In the next five years hundreds of thousands of soldiers, sailors and fliers will be pushed out of the military. For those who remain, peace time duties won't be easy.

To meet this real need for the returning service men and women, my colleagues, once again we need to act now. We need to restore revenue sharing, which did so much for all our Nation for 14 years, benefiting over 39,000 cities, communities, and counties for those years. The best money we ever spent for concrete improvements selected at the local level was voted to be restored by the legislative committee of the House of Representatives 21 to 8 and our Appropriations Committee by a vote of 29 to 15. Yet it was allowed to die. After all the total cost of this program was less than one-fourth that which we spent on foreign aid.

We need to restore this program which increases our real wealth, for the only support of our paper money is our Nation itself.

Mr. Chairman, we have pending before the Appropriations Committee, H.R. 2540 which would restore this vital program.

In addition, the bill overturns deferrals which the executive branch had

no authority to establish and reduces funds budgeted for military spending—more than enough to offset new discretionary budget authority.

The leadership of each of our 13 subcommittees support and have approved this measure in line with the title.

ACTION IN PANAMA

There may be argument as to our past actions regarding Panama. What has happened, has happened. However we may feel about past events, our country needs our help now.

Mr. Chairman, I have handled defense matters since 1943 and was on the intelligence group before there was an Intelligence Committee. In some of the lesser developed areas of the world, I am of the opinion there is little difference between the ins and the outs. Indeed, as often as not, the outs will campaign against the United States rather than against the incumbent.

Occurrences to date make it obvious to me personally that we need to review the treaty that provides for transfer of the canal to Panama December 31, 1999.

I realize that under our Constitution the treaty and its modification is up to the Senate. This treaty should be modified, and unless it is we will really face a serious problem when that transfer occurs.

I hope all will realize we must support our Nation at this time and pass this bill without further amendment.

□ 1310

Mr. Chairman, we have a good bill. I wish to thank my colleagues on the Appropriations Committee. Each item in this bill has had the approval of the subcommittee chairman and the ranking Republican on that subcommittee, so it is a bill approved across the board.

May I repeat again, we did a wonderful job in connection with the earthquake in California. In 10 days we had a disaster assistance bill on the President's desk and he signed it. We need to do the same thing on these urgent emergency items that we have here.

On these things that look to the future, such as the Panama Canal Treaty, it is time we got our minds on it and did something now. I repeat again, that is up to the Senate, it was before and it is now, but it is something that we had better think about.

Mr. Chairman, I hope, in addition to the support of the Committee on Appropriations, which we already have, that we will also have the support of the House without further amendments.

Mr. Chairman, I reserve the balance of my time.

Mr. CONTE. Mr Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 4404, providing supplemental appropriations for 1990.

Today we ask your support for a commitment to build democracy in Central America—$720 million for Panama and Nicaragua. Our hopes were granted in these countries beyond expectation, and at considerable cost in Panama. Now comes the time to follow through.

Today we respond to the President's request to move quickly, by Easter. I wish we could have passed it last Thursday. But if we pass it today, as I hope we will, its fate will be tied to the Senate. At least the House will have done its part.

Today, we further define what it means to be a world power in the post cold war era—a power that supports democracy; that favors democracy; that rewards democracy; that protects democracy. I believe that support of democracy in our New World is the best investment in world peace we can make today. Democracy will not work unless there is a sound underlying economy. The economies are the critical cornerstones of these new democracies. The Sandanista slogan was "todo será mejor"—everything will be better. Now is our chance to make sure that things do get better, so peace and democracy can prevail.

The Senate majority leader announced yesterday he did not want to fully fund these requests until the President submitted an overall plan for foreign aid. The response has been piecemeal, he said. Have I been missing something?

To quote Vaclav Havel, the President of Czechoslovakia, just months ago a prisoner, "the human face of the world is changing so rapidly that none of the familiar political speedometers are adequate." So now we are supposed to stop dead in our tracks, stop responding, and come up with an overall plan?

Yes, let's come up with a plan, but first, let's meet the challenge of the most remarkable and significant changes in the world since World War II.

Mr. Chairman, the bill we bring before the House, as the chairman said, is a good one. In discretionary budget authority, it saves money. There is $1.1 billion in new discretionary spending, $870 million for foreign aid, and $248 million in domestic dire emergency programs. That is more than offset by rescissions in the Department of Defense totaling $1.79 billion. Do the arithmetic. That is a saving of $672 million in Federal spending that will accrue over time.

□ 1320

Furthermore, even though the President said if he had to, he would take a bill without offsets, we come very close to making the discretionary spending, the part we control, budget neutral. I wish we could have made it totally budget neutral.

The President sent up a list of deferrals that the General Accounting Office ruled illegal. So we had to start from scratch. It took 2 weeks of exemplary work by Congressman MURTHA and Congressman JOE MCDADE and other members of the Subcommittee on Defense and the Administration to come up with $1.8 billion in rescissions that were acceptable. That yields $585 million in outlay savings, $585 million more in outlay savings than the President was willing to accept. It comes within $163 million of being budget neutral.

The centerpiece of this bill is the $870 million, the same amount requested by the President, for foreign aid: $420 million for Panama; $300 million for Nicaragua; $100 million for refugees; $20 million for the Caribbean, including Haiti; $30 million to Africa, replacing the money borrowed for the first Panama aid bill passed last month.

There are also four major additions to take care of domestic dire emergencies that have received a great deal of congressional concern.

First is $96 million for the State unemployment insurance operations. There is a shortfall of $124 million in this account, $24 million due to sequester. Small offices are closing in the States. Services are not being provided. It seems like the committee received 200 letters from Members, and hundreds more from outside groups.

There is $50 million for low-income energy. This winter saw some of the worst price gouging on heating oil and propane that has taken place in history. The cost of heating oil skyrocketed 60 percent and more in a matter of days, and came down slowly. Some States are just out of money, just when utilities start shutting off power to those who have not paid their bills.

There is $25 million in this bill to pay for energy and petroleum in Nicaragua. The least we can do is provide additional heating assistance for the poor here at home. James Buster Douglas came to Capitol Hill last week to fight for a program that kept him warm as a kid. This money is needed.

There is $50 million for VA medical care, very important, and $111 million for floods in the South.

Finally, there is $1.3 billion in entitlement funding: $510 million requested by the administration for food stamps; $340 million for veterans programs that the administration unofficially requested. We did not have to put it in here, but it is mandatory, and we have to provide it sometime. If we did not put it in here, there would just have to be another supplemental later on.

There is also $433 million for firefighting costs that have been incurred or are expected to be incurred this year. This causes the administration some heartburn. It causes others some heartburn. I am hoping there is an accommodation that can be worked out here. Maybe we can put out the fire.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Illinois [Mr. YATES].

Mr. YATES. I thank the gentleman for yielding.

Mr. Chairman, on the question of paying our bills for firefighting. I understand the gentleman is going to offer an amendment which strikes the phrase "to remain available until expended."

Mr. CONTE. The gentleman is correct.

Mr. YATES. We have no objection to that. I want to assure the gentleman, as I have assured the chairman of the Committee on the Budget, that all the funds for firefighting for the year 1990, and to some extent preceding years, none of it will be used for the year 1991, which I think is the basis for the gentleman's amendment.

Mr. CONTE. The gentleman from Illinois is correct, as he usually is. I want to thank him for his cooperation in removing any objection to this bill as it now is written with this amendment from the administration.

Mr. YATES. Mr. Chairman, the bill we are considering today provides $432.8 million for firefighting costs in the Department of Agriculture and the Interior. I would like to assure the gentleman from Massachusetts that these funds are provided for expenses incurred in fiscal year 1990 or before and not for expenses that might occur in fiscal year 1991.

All the firefighting funds in this bill are for expenses incurred in 1990 or before. Specifically, the bill provides $176.8 million for the Department of the Interior to repay funds borrowed from other accounts and to make available funds equal to the amount spent in fiscal year 1989 for firefighting emergencies in recognition of the fact that the dry conditions in the West could lead to substantial fire suppression costs during the balance of this fiscal year. The bill also provides $256 million for the Department of Agriculture to repay fully the amounts borrowed from the Knutsen-Vandenberg [K–V] trust fund for Forest Service firefighting. As the gentleman knows, the K–V trust fund is dedicated to reforestation and related activities.

The money is for bills we owe and which must be paid.

Mr. CONTE. Mr. Chairman, all in all, I urge your support for this bill. It responds to the needs in Central America. It responds to the President's timetable. It responds to a number of other supplemental requests from the administration. It addresses those domestic emergencies that require immediate attention. It provides significant offsets. In my view, as the chairman said, it is a very good-faith effort, and a responsible effort, I might say. Let us do our part to get this bill to the White House by Easter. There is a lot at stake here. The world is watching us.

I might say that BOB MICHEL, the minority leader, received a letter from Jim Baker which I would like to read the last paragraph of, and it says:

I strongly urge that the House of Representatives pass H.R. 4404 with no changes to the international affairs elements so that we can continue to move this bill through the Congress and begin to provide the support and assistance to the new democracies of Panama and Nicaragua. Democratization and demilitarization of Central America must continue."

I hope we will follow suit here and get this bill over to the Senate today.

Mr. Chairman, I reserve the balance of my time.

Mr. WHITTEN. Mr. Chairman, I reserve the balance of my time.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to my dear friend, the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, I rise to comment on the Dire Emergency Supplemental Appropriations Act of 1990. I bring both good news and bad news.

The good news is that this bill comes closer to offsetting new spending than any previous supplemental appropriation bill by providing $1.7 billion in Defense budget authority rescissions to offset $1.1 billion of budget authority increases in other discretionary programs. These large reductions in budget authority this year will produce outlay reductions for several years and facilitate meeting budget targets next year.

In addition, this bill provides funds requested by the President to meet U.S. commitments to newly established democratic governments in Central America. If friendship with the United States is to have meaning then we must support our rhetoric with deeds. I must note that the administration provided full offsets for both budget authority and outlays for these foreign aid funds.

The bad news is that, despite a valiant attempt to offset new spending by cutting other programs, the bill adds $161 million to the deficit by failing to provide full offsets for increases in discretionary outlays. This is like throwing water on a drowning man. We have already exceeded the fiscal year 1990 level for total discretionary outlays by some $2.6 billion before adding this new spending.

Worse yet, the supplemental provides funds which have not been requested and for which no present need is envisioned. Four hundred and thirty-three million dollars are requested for fighting forest fires when the fire season has not even started and a mechanism already exists for providing any needed funds. This is a clear attempt to circumvent fiscal year 1991 budget constraints by loading up in fiscal year 1990. In fiscal year 1990 firefighting funds are scored as mandatory, a result of the 1990 budget summit agreement—a designation I do not agree with. Since these funds are mandatory in fiscal year 1990 they are not subject to the offset required of new spending. By providing the funds in fiscal year 1990, the committee reduces the need to provide funds in fiscal year 1991 when they may be scored as discretionary and require an offset from other programs.

An additional $50 million in unneeded disaster funds is provided to the Federal Emergency Management Agency despite the fact that the FEMA already has a balance of $379 million and projects as unused balance of $130 million from funds already on hand.

The Department of Veterans Affairs gets $50 million in unrequested funds to hire doctors and nurses when the problem is a lack of qualified applicants rather than a lack of funds. The VA did not request the funds and does not think it can spend the funds by the end of the fiscal year. Even the Veterans' Affairs Committee was surprised to find this gift in the supplemental.

The bill also allows agencies to play the standard tricks of transferring funds from slow spending accounts to fast spending accounts. NASA will be allowed to transfer $44 million from slow spending procurement and research accounts to the fast spending management account. This shift not only increases outlays in fiscal year 1990, it also reduces the effect of Gramm-Rudman sequestration and other attempts to control administrative costs.

The Department of Housing and Urban Development has similarly transferred funds that would probably never be spent to accounts where spending will occur rapidly.

The Department of Labor is permitted to use an additional $96 million from the unemployment trust fund to support State administration of unemployment programs without providing a compensating spending offset.

Mr. Chairman, this supplemental shows a recognition that there is a need for budgetary restraint by offsetting new spending by taking funds from existing sources. However, there is still a lot of smoke and mirrors and, lacking the fortuitous world circumstances which have enabled us to achieve the reductions in Defense spending, I doubt that we would have made the small steps that we have in this bill.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Guam [Mr. BLAZ].

□ 1330

Mr. BLAZ. Mr. Chairman, I rise to engage in a brief colloquy with the gentleman from North Carolina [Mr. HEFNER].

Mr. Chairman, as Members know, the bill includes a proposal to remove $32 million of military funding of the Air Force in Guam.

Since I learned about this, I checked with the Air Force, and the Air Force has indicated to me a willingness to come up with a proposal for offsets elsewhere in lieu of Guam. My question to the gentleman, will he be willing to work with me and the Air Force and the Senate, prior to conference, so we could come up with some other alternatives, and save this from coming out of the territory of Guam?

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. BLAZ. Mr. Chairman, I yield to the gentleman from North Carolina.

Mr. HEFNER. Mr. Chairman, we understand the gentleman's concerns, and we would like for him to understand that this was the Department of Defense recommendation. It was not something that the committee initiated. This was a Defense Department initiative, and perhaps when we go to the conference with the Senate we will do everything we can to try to come up with something that is compatible. We certainly do not wish to harm any person's district. We will do everything we can to work with the Senate, something amicable for all concerned.

Mr. BLAZ. Mr. Chairman, I thank the gentleman for his cooperation.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Chairman, I rise to bring to the light of the House the omission from the supplemental appropriations measure of any money for domestic refugee assistance.

Frankly, Mr. Chairman, I am outraged by the failure of HHS and OMB to request supplementals for that purpose. The State Department has requested supplemental moneys for bringing in refugees, Mr. Chairman, but HHS asks not for one nickel to resettle. I think that is unconscionable.

The need is severe. The Federal Government decides to admit refugees, and the Federal Government decides where, initially, to place them, and originally the Federal Government promised to pay back the States for the full cost for the first 36 months of refugee settlement. However, Mr. Chairman, that is a promise that has not been kept. The reimbursement fell first to 31 months, then to 24 months, then to 15 months, and now, Mr. Chairman, it stands at a mere 4 months. This is a situation that is completely untenable, and represents a broken promise to the States.

Mr. Chairman, the money is badly needed. It is needed in California, it is needed in my State of Illinois, it is needed in Florida, it is needed in Massachusetts, in Pennsylvania, Virginia, and Washington—all across this country, and yet no money, not 1 cent has been requested.

I was tempted in full committee and here on the floor to offer an amendment moving certain funds from DOD for this purpose. Very frankly, I could not find an outlay that would have properly transferred, and I suspect that most Members would not have thought that this is an appropriate vehicle for reallocating spending priorities anyway.

However, Mr. Chairman, I want to point out to the membership that at some point we are going to have to much more realistically assess our obligations. If we are going to ask the States to undertake burdens and promise them the money from the Federal Government to help them fulfill those obligations, we are going to have to meet our promise and provide that money to them. I am very hopeful, Mr. Chairman, that the Senate may offer an amendment in this regard, and we get this money put into this bill because it is vitally, vitally needed.

Mr. CONTE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. KOSTMAYER].

Mr. KOSTMAYER. Mr. Chairman, I would like to request the attention of the chairman of the full committee, the gentleman from Mississippi [Mr. WHITTEN], to just ask a question.

Without a waiver being granted by the Senate, can any of these funds be obligated or expended?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. KOSTMAYER. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Without action by the Senate?

Mr. KOSTMAYER. Yes.

Mr. WHITTEN. Not to my knowledge.

Mr. KOSTMAYER. In other words, the provision of law which prohibits the expenditure or obligations of these funds without the passage of an authorization bill has not been waived in the rule granted by the Committee on Rules, but could be offered on the floor of the Senate?

Mr. WHITTEN. My understanding is that this administration backed up on this deferral business, after we voted in the committee to block it. So I do not think that issue is involved at this time, but I do not know of anything the gentleman has to worry about in the House bill.

Mr. KOSTMAYER. I am not concerned about the House. I am concerned about the Senate.

Mr. WHITTEN. I cannot disabuse the mind of the gentleman about the Senate. We cannot control them.

Mr. KOSTMAYER. Can the gentleman from Mississippi tell me what his attitude will be if a Member of the Senate offers language notwithstanding any other provision of law which would allow those funds to be expended and obligated, despite the fact that the authorization has not yet been passed?

Mr. WHITTEN. I have a long record of standing by the House position, and have no intention of changing that practice.

Mr. KOSTMAYER. WIll the gentleman from Mississippi reject that Senate motion in conference?

Mr. WHITTEN. I expect to stick by the House bill as long as we can. We do have a dire emergency, so I would not commit myself. I know of no reason for the gentleman worrying. I will not commit myself in advance to what I have not heard. There are a lot of items, the Senate has had 200 and 300 amendments.

To say in advance that I agree with the gentleman would be committing myself to something I have not seen.

Mr. KOSTMAYER. A final question. If the Senate reports an amendment in disagreement, which would waive the prohibition on the obligation of these funds—if I could complete my question.

Mr. WHITTEN. We do not know what the Senate will do, and I will not commit myself, but by and large I support the House position.

Mr. KOSTMAYER. If that were to happen, it will be necessary for the House to agree to an amendment in disagreement, is that correct?

Mr. WHITTEN. Yes, but May I say again, in confernce with the Senate, I do not make commitment in advance beyond saying I stick with the House position.

Mr. KOSTMAYER. Let me conclude by saying that I think we should pass the authorizing measure before we pass the appropriations bill.

Mr. CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. KOSTMAYER] has expired.

Mr. WHITTEN. Mr. Chairman, I yield 1 additional minute to the gentleman from Pennsylvania [Mr. KOSTMAYER].

Mr. KOSTMAYER. Mr. Chairman, I appreciate the gentleman from Mississippi yielding time to me.

We ought to pass the authorization bill before the appropriations bill. That is the way the House Committee on Rules has written the rule.

What happens, is a Senator always stands up and says: "Nothwithstanding any other provision of law," and the House can go along or not. If that happens, the gentleman from Missis-

sippi, as I understand it, will have to say——

Mr. WHITTEN. If the gentleman will yield, may I say the Senate does not seem to have any rules. They offer anything at any time.

I will not commit myself beyond what I have already said. We have a dire emergency here, and if such a think ties it up for months, which we do not want to do. I agree with the gentleman, and I will do the very best I can to support the House position.

Mr. KOSTMAYER. I hope the gentleman from Mississippi, will resist any effort to waive the prohibition, and I urge the Members of the House to disagree with the Senate amendment at the appropriate time.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Chairman, I would like to enter into a colloquy with the gentleman from Florida [Mr. LEHMAN].

Mr. LEHMAN of Florida. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Florida [Mr. LEHMAN].

Mr. LEHMAN of Florida. Mr. Chairman, I would be more than willing to enter into such a colloquy.

Mr. RICHARDSON. Mr. Chairman, in last year's Transportation appropriation's bill, I requested $1.5 million for design construction of the New Mexico railroad overpass project in Las Vegas, NM. The funding for this project was appropriated and earmarked for preliminary engineering, environmental studies and right-of-way acquisition.

It is my understanding that the finding was placed in this category because the committee was not authorizing or appropriating funds for new construction projects last year. However, the State of New Mexico and the City of Las Vegas have informed me that they cannot access the funds as they were appropriated because they were not earmarked for design and construction.

I would like to suggest that one remedy to this problem could be to move the already appropriated funds from preliminary engineering, environmental studies and right-of-way acquisition and place them under design and construction.

I hope to work with my colleague, the chairman of the Subcommittee on Transportation Appropriations, to arrive at a solution which would address this problem in the next available vehicle; that is the 1991 Transportation appropriations bill.

Mr. LEHMAN of Florida. Mr. Chairman, as my friend and gentleman from New Mexico knows, we have worked together in the past, and I want to assure him we will continue to work together in the future to resolve these highway problems.

Mr. RICHARDSON. Mr. Chairman, I thank the gentleman for participating in this colloquy.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. PANETTA].

□ 1340

Mr. PANETTA. Mr. Speaker, I want to congratulate Chairman WHITTEN and Chairman MURTHA and the rest of the Appropriations Committee for the excellent job that was done on H.R. 4404, the dire emergency supplemental appropriations bill.

The bill includes about $1.1 million in new discretionary budget authority for foreign aid and certain domestic programs. It more than offsets this increase by rescinding about $1.7 million in defense budget authority. Chairman MURTHA, in particular, should be commended for scrubbing the defense budget to try to find the offsets in more than 100 defense accounts. Frankly, this is the sort of precedent that should be followed in all future supplementals. We have provided a "Dear Colleague" to all Members which describes the budget implications of this measure in more detail.

Mr. Chairman, I also want to commend Chairman YATES for his comment with regard to the firefighting funds which I understand deal totally with 1990 and before, which is the area that we wish to have him target those funds toward.

So for all those reasons, Mr. Chairman, we recommend to the membership that this bill does represent, not only an urgent supplemental, but one that is properly offset to cover the cost.

Mrs. KENNELLY. Mr. Chairman, I rise in strong support of the supplemental appropriations bill. There are several important funding provisions contained in this bill, including $720 million for assistance to Nicaragua and Panama—two nations which face great hardships as they struggle to establish economic and political stability—two nations which face great challenges on the road to democracy.

However, individuals in our own Nation also cry out for our help. Contained in this bill is desperately needed domestic funding—funding for the Low-Income Energy Assistance Program, known as LIHEAP.

Mr. Speaker, in New England they say if you don't like the weather, wait a minute and it will change. Sporadic weather fluctuations were certainly characteristic of last winter in my home State of Connecticut. In November it was cold. When we waited a minute, it got colder, and then it got colder again. In fact, in December, all of New England experienced record cold temperatures. Concurrently heating oil prices soared.

Now the weather has warmed, and we have all uttered a sigh of relief. Heating oil prices have come down—the heating oil crisis seems to be over. But for many, deep economic scars linger behind.

The crisis caused many States, particularly those in the Northeast, to deplete their total LIHEAP allocation for the year. This legislation would appropriate in additional $50 million for the LIHEAP Program, in order that these States will be carried safely and warmly into the spring. And this bill will allow the Health and Human Services Department to allocate these funds to only those States that are truly in need.

As a member of the Ways and Means Committee, I am acutely aware of limited resources. But when allocating money to the LIHEAP Program, we are not talking about frivolous spending. We are talking about critical funding to carry millions of low-income Americans through the winter.

I urge my colleagues to join me in supporting this important legislation.

Mr. MONTGOMERY. Mr. Chairman I rise in support of this legislation, and to commend the leadership of the committee, Mr. WHITTEN, Mr. CONTE, Mr. TRAXLER, and Mr. GREEN of New York for the amounts contained in the bill for veterans compensation, pension and health care programs. I'm grateful to all members of the committee. They are letting veterans know that the Congress intends to stand behind the commitment we made to them.

During budget hearings held last month by our Veterans' Affairs Committee, we questioned Department officials closely about the need for a supplemental for the compensation and pension accounts. Department officials admitted to a possible shortfall and indicated they were watching the situation very carefully. It became clear during the hearings that these accounts had been understated in the budget. I am pleased to see that the bill includes funds to take care of the shortfall.

With regard to the supplemental funds for medical care, the Appropriation Committee's report states that the $50 million is intended to help eliminate some of the problems many veterans now face in getting outpatient care on a timely basis. Last year the appropriation bill passed by the House included $11.561 billion for VA medical care. This amount was intended to support a staffing level of 194,720 FTEE. Subsequently, the amount available to the Department for medical care was reduced by $236 million due to sequestration and across-the-board reductions in discretionary programs to fund the drug bill.

So I thank the committee for the $50 million in the bill but I must warn my colleagues, however, that the $50 million will not allow the VA to reopen the nursing home beds it has closed during the past year, nor will it be enough to solve most of the problems veterans are experiencing in getting outpatient care. But it will help and I urge my colleagues to support the bill.

Mr. ANNUNZIO. Mr. Chairman, I enthusiastically join Chairman G.V. (SONNY) MONTGOMERY of the House Veterans' Affairs Committee in his proposal for the panel's budget for this year. The budget recommendation proposed by Mr. MONTGOMERY of Mississippi takes a step toward correcting some of the problems accumulating in the veterans benefit deliver system over the last few years. The budget recommendation will not restore services to levels which veterans deserve and expect, but it makes progress and reverses a longstanding decline in such services.

The recommendations are $729 million in budget authority—meaning the top line the committee can spend—but this is a 2-percent increase over the Bush administration proposal. If the VA Committee proposal is approved, the Veterans' Administration could provide care to about the same number of veterans in the fiscal year ending September 30, 1991, as it provided in fiscal year 1988. The request would just get the VA back to where it was 3 years ago.

Even if enacted into law, it would not cure all the problems veterans face today in trying to get care in many VA hospitals and most outpatient clinics. It is clear that for the remainder of the fiscal year some veterans, unfortunately, will be denied care. Hopefully, this budget will begin to turn things around during the next fiscal year.

As Chairman MONTGOMERY says, this legislation lets veterans know that Congress intends to stand behind the commitment the members made to them. Included in the legislation is $50 million intended to help eliminate some of the problems many veterans now face in getting outpatient care on a timely basis. Last year, the appropriation bill passed by the House included $11½ billion for VA medical care. Subsequently, the amount available to the VA Department for medical care was reduced by $236 million due to administration action and across-the-board reductions in discretionary programs to fund the drug bill.

I thank the Budget Committee for the $50 million in the bill, but along with Chairman MONTGOMERY, I warn that the money will not allow the VA to reopen the nursing home beds it has closed during the past year, nor will it be enough to solve most of the problems veterans are experiencing in getting outpatient care.

Mr. Chairman, I join with Chairman MONTGOMERY in making it clear that the Budget Committee take no action to report the VA panel's reforms unless the savings that are derived are included in the budget as an add on for medical care so that VA will have the additional resources to fund the physician, dentist, and nurse pay legislation which is expected to be acted on in early May. The remaining savings will be necessary to provide outpatient and nursing home care to more veterans.

We must not forget our veterans. Just remember: They were there when we needed them. We should be there when they need us.

Veterans deserve a system which can deliver quality and timely services, something they have been unable to obtain in the last few years because of the drive to reduce the deficit.

Ms. PELOSI. Mr. Chairman, today, through the supplemental appropriations bill for Nicaragua and Panama, we are taking concrete steps to address the problems created, in part, by our actions in several countries in Central America.

United States policy, a trade embargo and the Contra forces we supported over the past decade have contributed to the destruction of the economy in Nicaragua. Our recent invasion of Panama left extensive damage which compounded the serious economic problems there. The funds contained in this legislation are one way to start righting our policy wrongs.

I would like to urge that we also focus our attention on righting the policy wrongs in El Salvador. Our best leverage will not cost the American taxpayer any additional money. Rather, reducing our aid to El Salvador is the best pressure we can apply.

Over the course of the past 10 years, the United States has spent $4 billion in El Salvador and the situation there has progressively worsened. Human rights violations are tragically increasing and no one has yet to be successfully convicted for human rights abuses.

The murder of the six Jesuit priests galvanized the people of the United States. President Cristiani now indicates that Colonel Benavides may simply walk away from the murders. The assassination of the Jesuits has highlighted the serious problems with the Salvadoran justice system.

The tragedy of the murders may, however, have unintended positive consequences. A number of my colleagues who had previously supported military assistance to El Salvador have now indicated their reluctance to support further aid. They, too, are frustrated with the lack of progress in resolving the crisis in El Salvador.

Mr. Chairman, tomorrow, the government of El Salvador and the FMLN are scheduled to meet with United Nations Secretary-General Perez DE Cuellar in Geneva. I believe that the growing discontent in the United States Congress about the status quo in El Salvador is helping to increase the pressure for a negotiated political settlement to the war in El Salvador. Successful negotiations are an integral part of the peace process.

I understand that efforts to address the deepening tragedy in El Salvador in this legislation were set aside at the request of Secretary of State Baker who has expressed interest in working out a bipartisan compromise.

Language has already been drafted to cut military aid and we will have several opportunities in the coming months to debate it on the floor of the House if discussions with the administration fail.

As we work to promote democracy in Central America, we should make sure that El Salvador is not left out of our efforts. Thank you.

Mr. MILLER of California. Mr. Speaker, as we debate this supplemental appropriation bill, I am sure it is gratifying for every taxpayer to know that the spirit of the Dutchy of Grand Fenwick is alive and well, and prospering, thanks for the Congress of the United States.

In case anyone forgets, the Dutchy was the mythical country in "The Mouse That Roared" that declared war on the United States in order to qualify for postwar relief assistance after its intevitable defeat.

The bill we debate today is the funding scheme of the Dutchy of Grand Fenwick come to life.

Having engaged in years of secret financial and intelligence assistance to the Noriega government in Panama, the United States finally invaded Panama and toppled Noriega. Hundreds of Panamanians—mostly civilians—lost their lives, along with nearly 30 United States soldiers. As a result of the Noriega dictatorship and the aftereffects of the invasion, the economy of Panama is severely crippled.

Having played a role in undermining the economy of Panama, this bill would appropriate $420 million to Panama.

For nearly a decade, the United States Government destroyed the economy of Nicaragua through an embargo and a war policy that drained the resources of that impoverished country. Even given the misguided economic policies of the Sandinista government, it is clear that the policies of our own Government effectively ruined the economy of Nicaragua and created great poverty and suffering.

Now that an election has been held and the Sandinista's opponent has been elected, the administration wants to channel hundreds of millions of taxpayer dollars to rebuild the economy we destroyed. H.R. 4404 would appropriate $300 million for Nicaragua, to rebuild the economy we destroyed.

It is also important to note that $30 million of this money would be used to resettle the Contras. Why? Mrs. Chamorro promises the Contras safe haven, our administration wants to finance the economic recovery of Nicaragua. Why are we spending another $30 million on the Contras? Why don't we just spend $30 to give them maps that show how to get from Honduras to Nicaragua?

I cannot support these expenditures at a time when we are being asked to cut back education for children, health care for the elderly, housing for the homeless, antidrug programs, and a host of other urgent domestic needs.

I am sure there are many legitimate needs in Nicaragua, Panama, and Grand Fenwick.

There are urgent needs right here at home, and the time has come to address them.

Mr. DORGAN of North Dakota. Mr. Speaker, I oppose this supplemental appropriations bill because I feel strongly that we make a serious mistake when we give large blocks of cash to countries like Panama.

Sending cash in these foreign aid packages will almost certainly result in waste and graft. We have seen time after time that when we send cash it is squandered, stolen or diverted. This bill has nearly $400 million for Panama without any restrictions. This makes no sense.

Yes, we do have an obligation to some of these countries. Yes we should help Panama, Nicaragua, and others. But let's help by making sure our contribution is used to help people, not to pad someones' Swiss bank account.

We can and should do a better job of crafting assistance to those countries in need of help.

I opposed the Rahall amendment to cut all of the assistance from the bill because I believe that we have a responsibility for some assistance.

But the amounts in the bill are too high, and the lack of restrictions and control over this money force me to vote against this bill.

Mr. WILLIAMS. Mr. Chairman, what do the AFL-CIO, the U.S. Chamber of Commerce, the National Governors' Association, AFSCME, and the National Conference on State Legislatures have in common this year? The answer is that they all support a fiscal year 1990 unemployment insurance supple-

mental. This money comes from the surplus in the administrative account of the FUTA [Federal Unemployment Tax Act] reserves. It covers the $96 million shortfall this year. States are suffering an average loss of 6.7 percent, with Washington's loss at 10.3 percent, Missouri's 6.9 percent, Pennsylvania's 4.6 percent, Michigan's 5.2 percent, Montana's 7.4 percent, Mississippi's 9.2 percent, and California's 9.7 percent. Every State in the United States would be faced with layoffs and workers would be faced with long lines to get their benefits without these funds.

VETERANS COMPENSATION AND MEDICAL CARE

In addition, the bill appropriates $390 million for various veterans programs. Under the measure $190 million is provided for veterans compensation and pensions. These funds are needed since the caseload in January was 5,000 over what the normal caseload is for compensation claims. The bill appropriates $150 million for loan guarantee revolving fund, which has had more home foreclosures and loan repurchases than anticipated.

The measure also contains $50 million for veterans medical care. This money is because of the decline in the number of full time employes at VA facilities. This is intended to increase the number of personnel at veterans medical facilities, particularly in rural States like Montana. Hopefully, our two facilities in Fort Harrison and Miles City will get some of these funds, but they believe $50 million is really a drop in the bucket.

FIREFIGHTING PROGRAMS

The bill appropriates $433 million for firefighting programs in the Interior and Agriculture Departments. A majority of these funds would be used to repay funds from other accounts that have been borrowed to cover the firefighting costs for this year. The administration requested no funds for these programs.

I would like to congratulate Chairman WHITTEN for being responsive to these needs.

Mr. VISCLOSKY. Mr. Chairman, today, the House of Representatives is considering a supplemental appropriation measure to meet the needs of several important programs, both domestic and foreign. Included in the legislation is a provision that earmarks $96 million for State unemployment offices. This appropriation is necessary because of a shortfall in the fiscal year 1990 unemployment insurance fund.

Due to the shortfall, one unemployment insurance office has been closed and two others are now open only 1 day per week in the congressional district I represent. The State of Indiana has closed 17 of the 44 offices statewide and been forced to lay off over 100 trained staff people. Claimants sometimes have to wait in line at those offices that have not closed for an average of 1½ to 2 hours. Needless to say, I am greatly distressed about the hardships and inconvenience these actions have caused for my constituents and all Hoosiers. Indiana would receive $1.4 million to help offset the severity of the cutbacks and personnel caused by the shortfall.

On February 20, I drafted a letter, on behalf of the Indiana delegation, that was sent to the chairman of the Appropriations Committee, to inform the committee of the situation in Indiana and ask for their assistance in addressing this problem. I would like to commend the chairman and members of the Appropriations Subcommittee on Labor, Health and Human Services, and Education as well as the chairman and members of the Appropriations Committee for their fine efforts.

I am aware that Secretary of Labor Dole has voiced her strong opposition to this particular provision and that the Bush administration does not consider the shortfall to be a dire emergency. In closing, I would ask that my colleagues join with me to ensure its approval in the Senate and enactment by the President. These funds are needed to maintain the integrity of every State's unemployment insurance program.

Mr. LENT. Mr. Chairman, as ranking Republican member of the Committee on Energy and Commerce, I rise in support of two items in H.R. 4404 which relate to the jurisdiction of our committee. These two items are the $50 million for low-income home energy assistance and almost $14 million for regulation of generic drugs by the Food and Drug Administration.

As one who represents a district in the Northeast, I can attest to the fact that the cold temperatures in December and early January caused extensive economic hardship. The retail price of home heating oil more than doubled in the span of only a few weeks, hitting $1.50 per gallon in New York.

While we have been blessed with a great deal of warm weather since January, the earlier jump in energy prices and the excess demand caused by the record cold have combined to put a drain on the funds already appropriated for low-income home energy assistance. Thus, it is advisable to appropriate an additional $50 million to supplement the $1.4 billion regular appropriation. The Committee on Appropriations directed that this money be used by States which demonstrate that they need the added funds and have the capacity to spend them, which should include New York.

As to generic drugs, the Subcommittee on Oversight and Investigations on which I serve has uncovered the shocking scandal at the Food and Drug Administration in this area. As of a court hearing last Friday, 10 guilty pleas had been entered in U.S. District Court in Baltimore. These 10 pleas included three FDA employees who took illegal payments from those seeking information and favorable treatment of their generic drug applications. In addition, three generic drug company executives and three generic drug companies have pleaded guilty to making these illegal payments. More criminal charges are expected to be filed within 90 days.

The subcommittee's investigation has found severe problems with the regulation of generic drugs beyond those relating to illegal pay-offs. Our inquiry has shown that some key generic drugs were approved based on fraudulent test samples. Violations of FDA's good manufacturing practices regulations have also been brought to light.

I expect that the Committee on Energy and Commerce will bring generic drug reform legislation to the House floor this year. In fact, I am working with like-minded colleagues on the committee to fashion a bipartisan reform package. In the interim, I support the President's request for $13.9 million in supplemental funds to be used to improve generic drug regulation and inspection of generic drug facilities.

The Nation's consumers and the Federal Treasury are counting on competition from generic drugs to hold down the price of medications. However, quality should not suffer in the name of price competition. From a strictly parochial standpoint, much of the generic drug industry is based in New York and New Jersey. Honest companies are being hurt by the acts of the dishonest elements of the industry. Thus, honest generic drug firms stand to benefit from improved regulation, as funded by this bill, which should increase public confidence in generic drugs generally.

The committee on appropriations elected not to pay for the supplemental FDA funds with a user fee, as was requested by the President. The committee report indicates that the Appropriations Committee believes that this is a matter best left to the Energy and Commerce Committee. I expect that we will, and indeed should, carefully consider such a user fee when we put together a generic drug bill later this year.

Mr. LEVINE of California. Mr. Chairman, I rise today in strong support of H.R. 4404, supplemental appropriations for fiscal year 1990. H.R. 4404 contains needed funds for a variety of domestic and foreign policy programs which Congress and the administration have identified as a priorities.

Mr. Speaker, I want to focus on one aspect of the bill now before us. This legislation provides Israel—at no cost to the United States Government—with $400 million in loan guarantees for housing for newly arrived immigrants. In light of the flood of emigres pouring into Israel from the Soviet Union, this aid is absolutely essential—and long overdue.

Israel is presently experiencing its largest influx of immigration since the years immediately after its founding in 1948. Tens of thousands of Soviet Jews have arrived in Israel in the last 18 months, and many thousands more will likely follow in the forseeable future. Indeed, legitimate fear of persecution in an increasingly unstable U.S.S.R. has prompted Jews who previously never thought to leave to apply for exit visas. The number could ultimately reach 500,000.

The United States bears a large measure of responsibility for this reality, both because we have made the free emigration of Soviet Jews a principal part of our foreign policy for 20 years, and because our Government is limiting the number of Soviet Jews who can enter this country.

It is for these reasons, Mr. Speaker, that it is incumbent upon our Government to do whatever it can to aid in the resettlement of Soviet Jews in Israel. And it is for these reasons that I find the Bush administration position on the housing guarantees so deeply disturbing.

Certainly, I welcome the administration's willingness ultimately to support these guarantees. Yet, that support has come after an extended effort to tie this issue to the issue of settlements in the West Bank and Gaza. This administration fixation has had two consequences: First, it has hurt Israel's efforts to find adequate housing for the flood of

emigres; and, second, it has encouraged the outrageous Arab campaign to obstruct this emigration.

I have previously stated publicly—and will reiterate now—that the administration should instead turn its attention to denouncing this baseless propaganda campaign. For it is reminiscent of the campaign waged 50 years ago by Arab States to restrict Jewish access to then-Palestine, at a time—1939—of clear and unambiguous need.

Mr. Speaker, I want to reassure my colleagues both that the administration concerns on the housing guarantees are groundless and that there is a pressing need for this program.

First, these guarantees simply enable Israel to receive more favorable terms for the huge loans it will take out in order to build approximately 25,000 housing units for the new immigrants. Israel has never defaulted on loans to international creditors, nor has it ever made a late payment. It is therefore unlikely that AID will have to repay the loans taken out.

Second, and tied in to the first, it is precisely because these are loan guarantees that there is no additional cost to the United States Government or taxpayer, unless Israel defaults. As I have indicated, that possibility is remote. Furthermore, the actual money spent on resettlement will come both from Israel itself and the American Jewish community, nowhere else.

Third, existing AID regulations prohibit use of any United States assistance—including loan guarantees—in the West Bank and Gaza. Israel certifies in writing each year that the foreign aid it receives is not used in these territories, and Israel has indicated it will provide the same assurances regarding the loan guarantees.

Fourth, and finally, Prime Minister Shamir and other members of the Israeli Government have publicly stated that it is not the policy of the Government to resettle Soviet Jews in the West Bank and Gaza. The facts bear this out: according to the Jewish agency, only 135 of the more than 18,000 Soviet Jewish immigrants arriving in Israel in 1990 have chosen to settle in the territories.

In conclusion, Mr. Chairman, the facts are clear: Israel requires our assistance in a monumental task which underscores the need for its existence as a refuge for the Jewish people. This Government, and this Congress, have an historic opportunity to help. We must seize the opportunity.

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of the provision in H.R. 4404, the dire emergency supplemental appropriations for fiscal year 1990, that would appropriate $96 million from the unemployment trust fund to cover the current shortfall in the Unemployment Insurance Program administered by the States.

Employers in California will pay an estimated half billion dollars in Federal unemployment taxes in 1990. Most of this money is targeted specifically to pay for the State and Federal administration of unemployment insurance programs. However, the Department of Labor recently notified California that there is a $120 million national shortfall in unemployment insurance funding for the current fiscal year and that California must absorb $23 million of this national shortfall. That puts over 20 percent of the problem on the shoulders of California, while the State's normal share of the national unemployment insurance budget is only about 15 percent.

Without this supplemental appropriation, California would have to cut back on programs including periodic eligibility reviews, overpayment investigations, and other services designed to maximize the benefits of unemployment insurance to both employers and claimants. Considering the taxes paid by employer every year for just these purposes, I urge my colleagues to support the appropriation of $96 million from the unemployment trust fund to cover the national shortfall in unemployment insurance funding.

AMENDMENTS OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc, considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The text of the amendments is as follows:

Amendments offered by Mr. YOUNG of Florida: On page 4 of the bill, after line 19, insert the following:

"RESEARCH, DEVELOPMENT, TEST, AND EVALUATION"

"RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY"

"For an additional amount for 'Research, development, test and evaluation, Navy', $6,000,000 for the Navy Medical Research and Development Command to support the unrelated marrow donor program."

On page 7, line 20 of the bill, strike "$23,598,000" and insert in lieu thereof: "$29,598,000".

The CHAIRMAN. The gentleman from Florida [Mr. YOUNG] is recognized for 5 minutes in support of his amendments.

Mr. MURTHA. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I am happy to yield to my subcommittee chairman.

Mr. MURTHA. Mr. Chairman, I want to commend the gentleman from Florida [Mr. YOUNG] for all the work he has done in this program. We have scrubbed it in addition, we have offset the money, and this is an outstanding job the gentleman has been involved in. We agree to the amendments.

Mr. YOUNG of Florida. I thank my chairman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I want to join the chairman of our subcommittee in commending our colleague, the gentleman from Florida, who spent about 5 years working on this piece of legislation and on this whole problem which can literally save lives. It is not often that we get an opportunity to vote on a clear-cut decision that can save the life of a citizen of this Republic. That is what this amendment is all about, and it comes from the initiative of my friend, the gentleman from Florida. Again, I congratulate the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the ranking member of the committee.

Mr. CONTE. Mr. Chairman, I join my good friend from Florida, Mr. YOUNG, in support of improving the bone marrow registry.

Thousands of people will die this year because of the lack of enough people in the registry to get a match. One woman in my district, Aleene Burt, is battling leukemia and is making a valiant effort to find a bone marrow match.

But, as my colleague knows, it takes over 20,000 people per patient to find a suitable match. The numbers of unrelated people needed for minority groups are even higher. It's a time-consuming, expensive and an often frustrating task.

By strengthening the bone marrow registry to increase its capacity and outreach efforts, we can give people, like Aleene Burt, their best shot in saving their lives.

Mr. YOUNG of Florida. Mr. Chairman, I thank Mr. CONTE for those comments.

Mr. Chairman, 20 years ago, a pediatrician and medical researcher named Dr. Robert A. Good developed a dramatic new procedure to remove the healthy bone marrow from one person and transplant it into the body of a terminally ill person suffering from leukemia and some 60 other blood diseases.

Although this was a major medical breakthrough, it was many years before it became a widely used procedure because it required such precise tissue typing that it was only practical for use when siblings were the donor and patient. Only one in four patients in need of a transplant has a matched family member to donate marrow. For the thousands of others in need of a transplant, there was little or no hope of finding a matched unrelated donor.

It was 5 years ago, after researchers determined that transplants between two unrelated individuals could be just as successful as transplants between siblings, that Congress took action to establish a national registry of volunteers who were willing to have their blood typed and be listed in a computerized system so doctors and hospitals from around our Nation could run a search to find a matched donor for a patient in need of a marrow transplant.

The Appropriations Committee in 1987 approved my amendment to a defense appropriations bill to provide funding to establish and activate this national registry. The registry became operational in December 1987 when the first match between a patient and donor took place. In the 2½ years since then, more

than 300 transplants have taken place and matches are currently occurring at the rate of 25 per month.

Mr. Chairman, in recent weeks and months I have sent to each of our colleagues stacks of information explaining the program and its urgency—in addition I have explained the details of the very successful recruiting program we sponsored in our congressional district to attract donors and sponsors willing to help defray the cost of the typing with the hope that other Members would sponsor similar recruiting programs in their districts.

There are a number of Members who have given critical support to the National Marrow Donor Program and who have been supportive every step of the way as we have provided appropriations for the program through the Department of Defense and National Institutes of Health. The chairman and ranking Republican of our Appropriations Subcommittee on Defense, JOHN MURTHA and JOE MCDADE, deserve special recognition for their support to provide the start-up funding for this program and this supplemental appropriation as do the members of our subcommittee including BOB LIVINGSTON, LES AUCOIN, and NORM DICKS. The chairman and ranking Republican of our Appropriations Subcommittee on Health, BILL NATCHER and SILVIO CONTE, have also been extremely supportive of our efforts to transfer oversight of the registry from the Navy to NIH, where the committee has provided funding for its operation and research programs. Other members of the Appropriations Committee, including VIC FAZIO, ED ROYBAL, and DICK DURBIN, have been of great help. Finally, HENRY WAXMAN, ED MADIGAN, and HOWARD NIELSON have been key players in authorizing the establishment of the National Marrow Program at the National Institutes of Health. Their Energy and Commerce Subcommittee on Health has scheduled hearings for later this month to consider legislation I soon will introduce to provide for a long-term extension of the program.

The support is so great for this program because bone marrow transplantation between matched, unrelated individuals works. It saves the lives of otherwise terminally ill individuals. Now, the only limitation on this miraculous medical procedure is the ability to beat the one in 20,000 odds and find a matched donor. The National Marrow Donor Program was established by the Congress to beat those odds and since becoming operational 2½ years ago has been a tremendous life-saving success.

In addition to facilitating matches between donors and patients, the national registry expedites the process to enhance the patients' chances of survival. Research has shown, that the sooner a bone marrow transplant takes place, the better the chances of survival.

The action we take today in approving this supplemental funding will save lives by adding as many as 60,000 volunteers to the national registry. There are more than 90,000 Americans who have already volunteered to be included in the national registry. Thousands more want to be included but cannot afford the $75 per person fee for the very precise HLA tissue typing required for this program. Our goal is to build a national registry of 250,000 volunteers and more than 1 million worldwide. Only with a registry of this size, can we be reasonably sure of being able to find a matched donor for each of the 9,000 Americans annually who need a bone marrow transplant to survive.

My amendment today provides $6 million to the Navy Medical Research and Development Command for the HLA tissue typing of thousands of volunteers on waiting lists throughout our Nation to be included in the National Bone Marrow Donor Registry. This is the amount the National Institutes of Health and the Navy estimate we need to type those currently on the wating lists.

These funds are provided to the Department of Defense because it was under the leadership of the Navy medical research department that the National Marrow Donor Program was established in 1986. The Navy has one of our Nation's premier typing and bone marrow research facilities and will oversee a two-pronged effort to recruit volunteers for the national registry.

A portion of these funds will be used to support a new program within the Department to HLA type active duty and civilian personnel, their dependents, and others who volunteer to be included in the National Marrow Donor Program. This follows my suggestion to President Bush that he institute a program within the Department of Defense to encourage military personnel and their families to be included in the registry and to type and process those who volunteer. Following my remarks, I am including copies of my letters to the President in this regard.

In conjunction with this urgent effort, the Appropriations Committee has directed that the Navy be authorized to make available through a noncompetitive sole source agreement with the National Marrow Donor Program Foundation funds to support this HLA type effort. The editorials that will follow my remarks, from the St. Petersburg Times and the Washington Post, emphasize the emergency need for these funds. The Appropriations Committee also has informed the Navy that the award of funds to the National Marrow Donor Program Foundation are contingent upon a directive from the committee that the National Marrow Donor Program cooperates with other private bone marrow registries and informs all accessing patients about the existence of the American Bone Marrow Donor Registry and other private registries.

Quite simply, this amendment is about saving lives. With the additional $6 million, which is offset from another Navy research and development account, we will increase the number of typed volunteers in the national registry to better the odds of terminally ill patients being able to find matched unrelated donors.

Mr. Chairman, this is a dramatic life saving procedure. It is today's miracle. The National Marrow Donor Program saves lives every day by matching previously terminally ill patients in need of bone marrow transplants with matched, unrelated donors. In the 2½ years since the first match through the registry, more than 300 patients have been given the living gift of life by a stranger who has been willing to make that gift.

There is also a pressing need to ensure broad ethnic representation in the registry. Research has shown that genetics play a major role in a successful transplant. This research also shows that good matches most often occur when donors and recipients have the same racial background. Black donors best match black patients. The same holds true for Hispanics, Asians, Indians, and other minority groups.

The committee has provided this emergency funding for the Navy to initiate a program to type volunteers of the Armed Forces because the services provide a wide cross section of races and ethnic backgrounds. Funds are also included to enable the Navy to contract with the National Marrow Donor Program Foundation to type volunteers of minority groups and others who are on waiting lists to join the registry but who cannot afford the lab fees for the HLA typing, which average $75 per person.

Because this is a high priority, life-saving health program, the committee has made it clear to the Department that these funds will not be subject to any budgetary limitations within the Department and will not count against any funds made available to this account in the next fiscal year.

Mr. Chairman, the legislation before us is titled a "Dire Emergency Supplemental Appropriations Bill" and the amendment I offer today fullfills a truly dire emergency need—that of saving lives by matching bone marrow donors with patients in need of the living give of life.

[From the St. Petersburg (FL) Times, Mar. 12, 1990]

BEST HOPE FOR BLOOD DISEASE VICTIMS

Partly because she was black, JoAnne Johnson lost a desperate race against time. The 19-year-old college student died of leukemia in Maryland several weeks ago, still waiting for doctors to find a compatible bone-marrow donor who might save her life.

If she hadn't been black, her chances of finding the right donor would have been tough enough—about 1 in 20,000. But because so few blacks are registered as potential donors and time was limited, her chances were virtually nil. Race is a factor because the tissue types that must be matched in donors are inherited, and much likelier to occur within the same family or ethnic group.

Some 9,000 children and adults die each year from leukemia and dozens of other blood diseases, and 16,000 others are stricken annually. To give them a better chance, Congress in 1987 established a national registry to match patients with potential donors.

The registry is already saving lives, but now a push is on to add more donors and meet the urgent need for increased racial and ethnic diversity within the donor pool.

U.S. Rep. C.W. Bill Young, a Republican who represents lower Pinellas County and who led the effort in Congress to establish the National Marrow Donor Program, is helping program officials launch a pilot project to add 5,000 new donors in Pinellas. If the local effort succeeds, it will serve as a national model for attempts elsewhere to increase the current 87,000 registrants to 250,000 in the United States and 1-million worldwide.

Newspapers frequently run stories of desperate, high-profile efforts to save individual patients. JoAnne Johnson had Jesse Jackson and Dionne Warwick appealing for donors. A young Jewish leukemia victim. Allison Atlas, currently has been befriended by actor Dustin Hoffman. One family even decided to have a second child to provide a possible donor for their stricken teen-age daughter.

But individual efforts aren't the answer for most blood disease victims. The centralized, computerized registry of potential donors seems to offer the best hope, and Congress should try harder to find the money needed to expand it. This year's budget for the marrow registry is $12-million, of which $4-million came from Congress. The registry must raise the rest.

Potential donors must be between the ages of 18 and 55 and in good health. Registration simply requires giving a blood sample to be processed in advance. Then, if you're ever asked to donate and agree to, you can do so locally and the bone marrow is transported to the patient. The donor procedure involves only light anesthesia, no surgery, little pain and quick recovery, doctors say.

Part of the registration effort will focus on getting businesses to sponsor employees who volunteer. Businesses should cooperate in any way possible, including direct donations. Another good possibility is to pick up the donor program's $75 cost of processing the blood sample of each employee who registers.

But even if they do nothing else, businesses should cooperate by allowing workers the two or three days off to make actual marrow donations, with no loss of pay if possible. Donors' expenses are paid under the program, but they're not reimbursed for lost wages or child-care costs.

Young's office has mailed information forms to residents of his district, along with a mail-in response form. A coupon is also included here for *Times* readers who wish to join the program. Pinellas residents and businesses should jump at this chance to play a leading role in saving the lives of so many children and adults.

[From the Washington Post, Feb. 23, 1990]

MONEY AND MARROW TRANSPLANTS

More than 9,000 children and young adults die in this country every year of blood diseases that could be cured by marrow transplants. One of them, JoAnne Johnson, a Silver Spring college student who died on Monday, was the object of a community-wide drive to find a donor. That search was focused on the black community—just as another young leukemia patient, Allison Atlas, has concentrated on finding Jewish volunteers—because the likelihood of finding a donor match is far greater in one's own ethnic group. The public outpouring of support for these two families in particular has been remarkable. There are now three times as many black donors listed in the national registry for marrow donors as there were before the Johnsons began their efforts only two months ago. And 14,000 Jewish names have been added, and 14 donors found for other patients because of the work of the Atlas family.

But individual efforts, no matter how heroic or productive, are not the way to address this national need. The federal government has established a national registry of donors, which now contains 75,000 names. If there were 250,000 registered, 80 percent of those in need of donors would be able to find a match. But while there are more than enough volunteers, there is not enough money to test them, a process that costs about $75 each. Creating a registry of sufficient size and diversity would cost about $15 million; keeping it up to date, about $3 million a year.

It is terrible that many people who could be saved by marrow transplants are dying. Presumably no one argues with that. Yet the administration professes to be powerless in the face of budget constraints to find enough money to make the transplant program work. In fact, there is a strong argument based on dollars alone for facilitating marrow transplants. The procedure is not a palliative but a cure. The New England Journal of Medicine published a study only this week demonstrating that unrelated donor transplants are completely successful in 80 percent of all cases. The operation replaces alternative treatment requiring hospitalization, chemotherapy, and blood transfusions over an extended period of time.

The humanitarian argument for a fully funded program is compelling, and the objections based on cost make no sense. If the administration continues to ignore this opportunity, Congress must take the lead and find the money.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 12, 1990.

President GEORGE BUSH,
The White House, 1600 Pennsylvania Avenue NW., Washington, DC.

DEAR MR. PRESIDENT: As you know from our previous letters and discussions, one of the most fulfilling projects I have ever been involved with is the establishment of the National Bone Marrow Donor Program and Registry. It is saving lives every day.

You will recall that I first learned of the need for a national registry in 1986 when our family befriended Brandy Bly, a little 10-year-old girl suffering from leukemia who I introduced to you during one of your visits to Pinellas County. Beverly and I spent many hours reading to and playing with Brandy to give her mother some well deserved breaks from her hospital bedside. Doctors sought to treat Brandy's leukemia with a bone marrow transplant, but were unable to locate a compatible donor. Finally, as a last resort, they removed some of Brandy's own marrow, treated it with high doses of radiation and antibiotics, and reintroduced it into her body. Although this more complex and risky form of bone marrow transplantation worked, Brandy died in 1987 from other complications. But at the time of her death, her little body was finally free of leukemia.

It was during Brandy's treatment that I learned from her doctors how difficult it is to find a compatible, unrelated bone marrow donor. Doctors estimate there is a one in 20,000 chance of finding a donor whose many complex blood antigens perfectly match those of the patient. Prior to the establishment of the registry, finding a donor required hundreds of calls to hospitals and blood banks throughout our nation. The process took months and in most cases was unsuccessful.

The Congress in 1986 for the first time appropriated funds to the Navy to begin the process of establishing a computerized registry of volunteers who were willing to have their bone marrow typed and their names placed on call. As a member of the Defense Appropriations Committee, I worked closely with the Navy to ensure that they had the funding necessary to initiate this project. The Navy and the Department of Defense are to be commended for their leadership in developing this program. We initially approached the National Institutes of Health, requesting that they oversee development of the registry, but officials there were less than enthusiastic, saying the procedure was too experimental. NIH, however, became increasingly interested in this program and last year, at the direction of the House Appropriations Subcommittee on Health on which I also serve, and the House Energy and Commerce Subcommittee on Health, authority to oversee the registry was transferred from the Navy to the National Heart, Lung, and Blood Institute.

With the registry in place, the first match of a donor and recipient in need of an unrelated bone marrow transplant took place in December 1987. Since that time, 300 transplants have taken place utilizing the registry, with a greater than 70 percent success rate. Currently, there are 20 to 25 transplants performed each month. The potential for this program is limited only by the success rate of matching patients and donors. To improve the odds of finding an unrelated donor through the registry, we need to recruit and type more volunteers. Today, we have more than 70,000 volunteers in the registry and our goal is to expand the list to 100,000 by the end of this year. By the middle of this decade we hope to have 250,000 volunteers in the registry with the long-term goal of 1 million.

Our experience with this project has shown that when Americans learn of the registry and the potential for saving lives, they readily volunteer to have their marrow typed and their names placed in the registry. The two greatest limitations on our recruitment effort is getting word throughout the country that we are seeking volunteers, and finding the facilities and resources to type them. We are doing all we can to spread the word about the registry and to raise funds to pay the $75 fee for the sophisticated lab test required to type each volunteer.

In fact, we soon will launch a pilot program in my congressional district to recruit volunteers for the registry and to encourage businesses to become involved in the program by covering or defraying the cost of the lab fees for their employees who volunteer. The lessons we learn from this project will be used to develop a nationwide campaign to recruit potential donors and encourage private sector sponsorship to help defray the cost.

We can do more, though, to add to our registry. One of the greatest untapped sources of potential donors could be the men and women who serve our nation in the armed forces. The Department of Defense has played a major role in making the national registry a reality and has shown an ongoing interest and commitment to the program. In your role as Commander and Chief, I would urge you to give every possible consideration to working with the Secretary of Defense and Secretaries of the Army, Navy, and Air Force, and the Commandants of the Marine Corps and Coast Guard to make our service personnel aware of the program and to provide the facilities and resources to type those who are willing to be a part of the registry.

You have stressed throughout your Presidency that there is no boundary to the greatness we can achieve as a nation with the spirit of volunteerism the American people have shown throughout our great history. The National Marrow Donor Pro-

gram is a way people can give the living gift of life directly to another person here at home and throughout the world. As you know, Barbara has already agreed to be a national spokesman for the program and earlier this month taped a series of public service annnouncements. Your support for our efforts to add to the ranks of potential donors would be greatly appreciated, especially by those individuals and families who have been given hope where little or none existed just a few short years ago.

With best wishes and warmest personal regards, I am

Sincerely,

C.W. BILL YOUNG,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 27, 1990.

President GEORGE BUSH,
The White House, 1600 Pennsylvania Avenue NW., Washington, DC.

DEAR MR. PRESIDENT: This is to followup my letter to you last week regarding ways in which we can increase the awareness of our nation's military personnel about the National Bone Marrow Donor Registry and provide the facilities for those who volunteer to have their blood typed and become a part of the registry.

As we discussed earlier, our men and women who have volunteered to serve in the armed forces are one of our greatest untapped potential sources of those who could join the registry. During a hearing of our Appropriations Subcommittee on Defense today, I discussed with the Senior Noncommissioned Officers of each of the services the exciting life-saving potential of this program and the need to recruit more volunteers to increase the odds of finding a successful match. Each of them was very enthusiastic about the program and on behalf of the men and women of the branch they represent, indicated an eagerness to participate in the program.

Enlisted personnel in America's military are volunteers in the truest sense of the word and their willingness to be a part of this program is symbolic of their spirit and dedication to our nation. Encouraging their participation in The National Bone Marrow Donor Registry would be an important step toward reaching our goal of recruiting 250,000 volunteers from throughout our nation.

Volunteering to give the living gift of life is exciting, especially with the limitless potential of this program. By providing the facilities and resources to type our enlisted personnel, the Department of Defense can further add to the important role it has played in the establishment and continued operation of this national program that saves lives every day.

With best wishes and personnel regards, I am

Very truly yours,

C.W. BILL YOUNG,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, March 20, 1990.

Hon. THOMAS S. FOLEY,
Speaker of the House, H-204, The Capitol, Washington, DC.

DEAR MR. SPEAKER: This is to ask you to join me in an exciting, nationwide effort to save lives by helping to recruit volunteers in your district for the National Bone Marrow Donor Registry.

One of the most rewarding experiences of my whole life has been leading the effort in Congress to establish this national registry—a program that is saving lives every day by bringing together a patient in need of a transplant with a matched donor. Later in this letter, I will tell you how you can be involved in this effort.

Bone marrow transplantation is a relatively new but preferred treatment for leukemia and as many as 60 other blood disorders. When successful, it is a cure. The procedure, however, requires very precise tissue, or "HLA," matching of the donor and recipient. In fact, the typing is so critical that the chances of finding a matched donor are about one in 20,000 and that is why it is so important that we mount a nationwide effort to expand the registry. Donating bone marrow has been called the "living gift of life" because the donor gives marrow (which replenishes itself easily) to a fatally ill patient whose only chance for life is a marrow transplant.

Prior to the establishment of the national registry, doctors treating patients in need of a transplant had to make hundreds of calls to individual blood banks and hospitals in search of a potential donor. In most cases, the search was futile or took so long that the patient, with the fatal illness, was no longer strong enough to undergo a transplant.

Through the goodwill of more than 87,000 individuals who have already volunteered to have their marrow typed, we have established the National Marrow Donor Program. Now, with one request, a doctor can start a computer search and in a matter of hours determine whether there is a matched donor available. Where before there was little chance of survival for these terminally ill patients, there is now hope. The first transplant utilizing the registry took place in December 1987. Since then, there have been more than 300 transplants. Currently, 20-25 transplants are performed in the United States each month. This is only the beginning for this Program which could soon help provide life for as many as 9,000 Americans a year.

In 1986, the Congress appropriated the first funds for the Navy to begin the process of establishing a computerized registry of volunteers who were willing to have their bone marrow typed and their names placed on call. As a member of the Defense Appropriations Committee, I worked closely with the Navy to ensure that they had the funding necessary to initiate this project. Oversight of the program last year was transferred by the Appropriations Subcommittee on Health, on which I also serve, to the National Institutes of Health.

This is a tremendous program whose potential is limited only by the success rate of matching patients and donors. To improve the odds of finding an unrelated donor through the registry, we need to recruit and type more volunteers. Our goal is to expand the list to 100,000 by the end of this year and to 250,000 by the middle of this decade, with a long-term goal of 1 million volunteers worldwide.

Our experience with this project has shown that when Americans learn of the registry and the potential for saving lives, they readily volunteer to have their marrow typed and their names placed in the registry. The two greatest limitations on our recruitment effort is getting word throughout the country that we are seeking volunteers, and finding the facilities and resources to type them. We are doing all we can to spread the word about the registry and to raise funds to pay the $75 fee for the sophisticated lab test required to type each volunteer.

Earlier this month, I launched a pilot program in my district to recruit volunteers for the registry and to encourage businesses to become involved in the program by covering or defraying the cost of the lab fees for their employees who volunteer. The reaction to this project has been unbelievable as thousands have volunteered to be typed and a number of major employers have agreed to cover the cost of the tests for their employees. The attached packet provides you with detailed information about our project, the very positive reaction by our local media, and endorsements of this project from President Bush and Secretary of Health and Human Services Dr. Louis Sullivan.

You can be a part of this nationwide effort to save lives by sponsoring a similar community wide effort in your district. I would be pleased to work with you and share the lessons we learned from our experience in Pinellas County, Florida.

In addition, to show support in Congress for this national effort, I am making arrangements to have all interested members typed to be included in the national registry. As you will note, the only requirement to be a volunteer donor is that you be in good health and between the age of 18 and 61. Prior to last week, the age cutoff was 55. However, during a meeting of the Board of Directors of the National Marrow Donor Program in my district March 9th, the Board, at my request, raised the maximum donor age from 55 to 61.

We would like to schedule a press conference on the Capitol steps to coincide with the typing of members. The time and date will depend on the response of members. If you would like to take part in this press conference and be typed, or if you have questions about the program or sponsoring a donor drive in your district, please let me know or call Harry Glenn of my staff at 5-5961.

With best wishes and warmest personal regards, I am

Sincerely,

C.W. BILL YOUNG,
Member of Congress.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I am happy to yield to my colleague, the gentleman from California, who has been a real ally in this effort.

Mr. FAZIO. Mr. Chairman, first of all, I want to commend my friend, the gentleman from Florida, for his ongoing leadership in this area, and I certainly want to give my support to his amendment. I would indicate also that I look forward to working not only with the gentleman from Florida but with the chairman of our Subcommittee on Health and Human Services, the gentleman from Kentucky [Mr. NATCHER], and the gentleman from Pennsylvania [Mr. MURTHA] in this same consideration of the full appropriations for the next fiscal year, because, as the gentleman knows, this is a significant step forward but it really does not go as far as we need to go to get the 250,000 names in the bone marrow register that will really break through to a lot of people who are cur-

rently not getting any service from this wonderful effort that we have just begun to make.

Mr. Chairman, this amendment will allow us to increase the number of individuals in the National Marrow Donor Program registry.

At this time, there are approximately 100,000 names in the national registry. The goal is to reach 250,000 names.

Several months ago, only 57,000 names were in the registry, which were accumulated over a period of about 3 years. The increased number of potential donors recently added is largely the result of individual families' efforts at recruiting and testing donors, and raising the funds to pay for the testing.

I am sure that all of you have heard of the efforts of the families of Allison Atlas and JoAnne Johnson in testing potential donors. And many of us have individuals in similar need in our own congressional districts.

Unfortunately, individual testing has been necessary because the administration has refused to adequately fund this program. Consequently, many families of individuals in need of unrelated donor transplants have had to go out and raise the funds and recruit the donors themselves.

Further, many ethnic groups are underrepresented in the national registry. The greatest possibility for a member of the ethnic minority to secure a match lies with a person of a similar ethnic background. Thus far, the registry has not had enough ethnically diverse individuals represented and does not have the funds available to further test potential donors.

While the program needs at least $15 million for testing purposes, and I will be introducing legislation for a one-time authorization for that amount, the $6 million called for in this amendment to the supplemental will help ensure that there is broad ethnic representation in the registry immediately.

The $6 million, which will go for the Navy Medical Research and Development Command, will support the unrelated marrow donor program which was initiated by the Navy.

These funds will be used to support the HLA typing of active duty and civilian personnel, their dependents and others who volunteer to be included in the National Marrow Donor Program.

Should these individuals match with someone in need, they represent a good source to follow through with the actual transplantation.

In addition to military testing, a large share of the funding will go directly to the National Donor Marrow Program for the purpose of increasing minority recruitment and testing.

Funding the National Marrow Donor Program registry has become an urgent national need. I urge my colleagues to support this vital amendment which will save lives.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman from California for his comments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Florida [Mr. YOUNG].

The amendments were agreed to.

Mr. THOMAS of Wyoming. Mr. Chairman, I rise in reluctant support of H.R. 4404, the Dire Emergency Supplemental Appropriations for Fiscal 1990.

Supplemental appropriations are necessary to take care of true emergency situations. None of us could have foreseen the tragedy and costs of natural disasters that hit various parts of this country. The drastic changes we have seen in the political systems of Europe and Central America have to be addressed by us in a realistic fashion.

However, supplementals, in and of themselves, are a poor way to run the fiscal policy of this country. We, as an institution, cannot afford to constantly revisit budget issues that should properly be taken care of through the regular budget process. For too long supplementals have been used as a way to skirt budget deadlines and deficit targets.

During the decade of the eighties, Congress and the White House combined to enact 27 supplemental appropriation laws. According to the Congressional Budget Office, and based upon figures provided by the Appropriations Committee, these 27 supplementals resulted in a net increase in budget authority of nearly $99 billion, and a gross increase in budget authority of more than $135 billion.

Having said that, let me explain why I must support this measure.

First, H.R. 4404 would release $96 million from the unemployment trust funds to the States. This is important if the State employment commissions are to keep up the necessary services for those individuals who have lost jobs. In Wyoming, a State that has been hard hit by the downturn in the oil, gas, and mineral industries, State and local officials were forced with the prospects of closing employment service offices in many small communities. This would mean that thousands of individuals who are already without jobs would now be required to travel hundreds of miles to file forms and receive necessary assistance. Ninety-six million dollars will not resolve this problem nationwide, but it will help many State agencies that have been hindered in doing their jobs correctly due to the budget games on the Potomac.

Second, H.R. 4404 contains for the firefighting accounts that have been deleted due to the number of fires we have experienced in the West. Arid conditions that have existed, and persist, in many areas of this country have caused the depletion of these funds much sooner than anyone could have anticipated. As someone who experienced the devastating fires in Yellowstone and its surrounding national forests, I can assure you that the destruction was extensive. I can also assure you that without the help of individuals and agencies from around this country, it could have been worse. This legislation will replenish accounts that were emptied in these efforts and assure that we will have funds available for the 1990 fires which will inevitably occur.

Third, this supplemental does a much better job of offsetting increased spending in some areas with rescissions in others. This is something that Congress has been unwilling, and unable, to do in the past.

The sum of $1.8 billion has been stricken from the Department of Defense budget, including $15 million from the MX rail garrison facility located at F.E. Warren Air Force Base in Cheyenne, and $11 million from the basic MX Program. I am supportive of these—and other—cuts because they take into account the reality of our current spending schedules and priorities but do not represent a change in the stated policy of this country.

H.R. 4404 is not perfect legislation—supplementals never are. But it does address certain specific needs in Wyoming and the Rocky Mountain region. For that reason, I rise in reluctant support of its passage and enactment into law.

Mr. WHITTEN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired for general debate.

The Clerk will read.

The Clerk read as follows:

H.R. 4404

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to provide dire emergency supplemental appropriations for the fiscal year ending September 30, 1990, and for other purposes, namely:

TITLE I—DISASTER ASSISTANCE

DEPARTMENT OF DEFENSE—CIVIL
DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

For additional expenses to meet the present emergency needs for "Flood control and coastal emergencies", $20,000,000, to remain available until expended.

DEPARTMENT OF AGRICULTURE

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

For additional expenses to meet the present emergency needs of the Soil Conservation Service, Emergency Watershed Protection Program, $31,000,000, to remain available until expended.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

EMERGENCY CONSERVATION PROGRAM

For additional expenses to meet the present emergency needs of the Agricultural Stabilization and Conservation Service, Emergency Conservation Program, $10,000,000, to remain available until expended.

FEDERAL EMERGENCY MANAGEMENT AGENCY

DISASTER RELIEF

For additional expenses in carrying out the functions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), $50,000,000 to remain available until expended.

GENERAL PROVISION

Of the funds made available for any account by any appropriations Act for fiscal year 1990, the amount apportioned to the fourth quarter shall also be available for obligation in the third quarter of fiscal year 1990 where necessary.

TITLE II—SUPPLEMENTAL APPROPRIATIONS

CHAPTER I

DEPARTMENT OF JUSTICE AND THE JUDICIARY DEPARTMENT OF JUSTICE

GENERAL PROVISION

The pilot debt collection project authorized by Public Law 99-578 is extended through September 30, 1992.

THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $63,000.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $28,003,000.

UNITED STATES SENTENCING COMMISSION

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $700,000, to remain available until expended.

ADMINISTRATIVE PROVISION

Section 605 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990 (Public Law 101-162) is amended by adding the following provision at the end thereof: ": *Provided further*, That fees made available to the Federal Trade Commission and the Antitrust Division herein shall remain available until expended".

CHAPTER II

DEPARTMENT OF DEFENSE—MILITARY

AMENDMENTS OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc, considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The text of the amendments is as follows:

Amendments offered by Mr. YOUNG of Florida: On page 4 of the bill, after line 19, insert the following:

"RESEARCH, DEVELOPMENT, TEST, AND EVALUATION"

"RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY"

"For an additional amount for 'Research, development, test and evaluation, Navy', $6,000,000 for the Navy Medical Research and Development Command to support the unrelated marrow donor program."

On page 7, line 20 of the bill, strike "$23,598,000" and insert in lieu thereof: "$29,598,000".

The CHAIRMAN. The gentleman from Florida [Mr. YOUNG] is recognized for 5 minutes in support of his amendments.

Mr. MURTHA. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I am happy to yield to my subcommittee chairman.

Mr. MURTHA. Mr. Chairman, I want to commend the gentleman from Florida [Mr. YOUNG] for all the work he has done in this program. We have scrubbed it in addition, we have offset the money, and this is an outstanding job the gentleman has been involved in. We agree to the amendments.

Mr. YOUNG of Florida. I thank my chairman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I want to join the chairman of our subcommittee in commending our colleague, the gentleman from Florida, who spent about 5 years working on this piece of legislation and on this whole problem which can literally save lives. It is not often that we get an opportunity to vote on a clear-cut decision that can save the life of a citizen of this Republic. That is what this amendment is all about, and it comes from the initiative of my friend, the gentleman from Florida. Again, I congratulate the gentleman.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the ranking member of the committee.

Mr. CONTE. Mr. Chairman, I join my good friend from Florida, Mr. YOUNG, in support of improving the bone marrow registry.

Thousands of people will die this year because of the lack of enough people in the registry to get a match. One woman in my district, Aleene Burt, is battling leukemia and is making a valiant effort to find a bone marrow match.

But, as my colleague knows, it takes over 20,000 people per patient to find a suitable match. The numbers of unrelated people needed for minority groups are even higher. It's a time-consuming, expensive and an often frustrating task.

By strengthening the bone marrow registry to increase its capacity and outreach efforts, we can give people, like Aleene Burt, their best shot in saving their lives.

Mr. Chairman, 20 years ago, a pediatrician and medical researcher named Dr. Robert A. Good developed a dramatic new procedure to remove the healthy bone marrow from one person and transplant it into the body of a terminally ill person suffering from leukemia and some 60 other blood diseases.

Although this was a major medical breakthrough, it was many years before it became a widely used procedure because it required such precise tissue typing that it was only practical for use when siblings were the donor and patient. Only one in four patients in need of a transplant has a matched family member to donate marrow. For the thousands of others in need of a transplant, there was little or no hope of finding a matched unrelated donor.

It was 5 years ago, after researchers determined that transplants between two unrelated individuals could be just as successful as transplants between siblings, that Congress took action to establish a national registry of volunteers who were willing to have their blood typed and be listed in a computerized system so doctors and hospitals from around our Nation could run a search to find a matched donor for a patient in need of a marrow transplant.

The Appropriations Committee in 1987 approved my amendment to a defense appropriations bill to provide funding to establish and activate this national registry. The registry became operational in December 1987 when the first match between a patient and donor took place. In the 2½ years since then, more than 300 transplants have taken place and matches are currently occurring at the rate of 25 per month.

Mr. Speaker, in recent weeks and months I have sent to each of our colleagues stacks of information explaining the program and its urgency—in addition I have explained the details of the very successful recruiting program we sponsored in our congressional district to attract donors and sponsors willing to help defray the cost of the typing with the hope that other Members would sponsor similar recruiting programs in their districts.

There are a number of Members who have given critical support to the National Marrow Donor Program and who have been supportive every step of the way as we have provided appropriations for the program through the Department of Defense and National Institutes of Health. The chairman and ranking Republican of our Appropriations Subcommittee on Defense, JOHN MURTHA and JOE MCDADE, deserve special recognition for their support to provide the start-up funding for this program and this supplemental appropriation as do the members of our subcommittee including BOB LIVINGSTON, LES AUCOIN, and NORM DICKS. The chairman and ranking Republican of our Appropriations Subcommittee on Health, BILL NATCHER and SILVIO CONTE, have also been extremely supportive of our efforts to transfer oversight of the registry from the Navy to NIH, where the committee has provided funding for its operation and research programs. Other members of the Appropriations Committee, including VIC FAZIO, ED ROYBAL, and DICK DURBIN, have been of great help. Finally, HENRY WAXMAN, ED MADIGAN, and HOWARD NIELSON have been key players in authorizing the establishment of the National Marrow Program at the National Institutes of Health. Their Energy and Commerce Subcommittee on Health has scheduled hearings for later this month to consider legislation I soon will introduce to provide for a long-term extension of the program.

The support is so great for this program because bone marrow transplantation between matched, unrelated individuals works. It saves the lives of otherwise terminally ill individuals. Now, the only limitation on this miraculous medical procedure is the ability to beat the one in 20,000 odds and find a matched donor. The National Marrow Donor Program was established by the Congress to beat those odds and since becoming operational 2½ years ago has been a tremendous life-saving success.

In addition to facilitating matches between donors and patients, the national registry expedites the process to enhance the patients' chances of survival. Research has shown, that the sooner a bone marrow transplant takes place, the better the chances of survival.

The action we take today in approving this supplemental funding will save lives by adding as many as 60,000 volunteers to the national

registry. There are more than 90,000 Americans who have already volunteered to be included in the national registry. Thousands more want to be included by cannot afford the $75 per person fee for the very precise HLA tissue typing required for this program. Our goal is to build a national registry of 250,000 volunteers and more than 1 million worldwide. Only with a registry of this size, can we be reasonably sure of being able to find a matched donor for each of the 9,000 Americans annually who need a bone marrow transplant to survive.

My amendment today provides $6 million to the Navy Medical Research and Development Commend for the HLA tissue typing of thousands of volunteers on waiting lists throughout our Nation to be included in the National Bone Marrow Donor Registry. This is the amount the National Institutes of Health and the Navy estimate we need to type those currently on the waiting lists.

These funds are provided to the Department of Defense because it was under the leadership of the Navy medical research department that the National Marrow Donor Program was established in 1986. The Navy has one of our Nation's premier typing and bone marrow research facilities and will oversee a two-pronged effort to recruit volunteers for the national registry.

A portion of these funds will be used to support a new program within the Department to HLA type active duty and civilian personnel, their dependents, and others who volunteer to be included in the National Marrow Donor Program. This follows my suggestion to President Bush that he institute a program within the Department of Defense to encourage military personnel and their families to be included in the registry and to type and process those who volunteer. Following my remarks, I am including copies of my letters to the President in this regard.

In conjunction with this urgent effort, the Appropriations Committee has directed that the Navy be authorized to make available through a noncompetitive sole source agreement with the National Marrow Donor Program Foundation funds to support this HLA type effort. The editorials that will follow my remarks, the St. Petersburg Times and the Washington Post, emphasize the emergency need for these funds. The Appropriations Committee also has informed the Navy that the ward of funds to the National Marrow Donor Program Foundation are contingent upon a directive from the committee that the National Marrow Donor Program cooperates with other private bone marrow registries and informs all accessing patients about the existence of the American Bone Marrow Donor Registry and other private registries.

Quite simply, this amendment is about saving lives. With the additional $6 million, which is offset from another Navy research and development account, we will increase the number of typed volunteers in the national registry to better the odds of terminally ill patients being able to find matched unrelated donors.

Mr. Chairman, this is a dramatic life saving procedure. It is today's miracle. The National Marrow Donor Program saves lives every day by matching previously terminally ill patients in need of bone marrow transplants with matched, unrelated donors. In the 2½ years since the first match through the registry, more than 300 patients have been given the living gift of life by a stranger who has been willing to make that gift.

There is also a pressing need to ensure broad ethnic representation in the registry. Research has shown that genetics play a major rile in a successful transplant. This research also shows that good matches most often occur when donors and recipients have the same racial background. Black donors best match black patients. The same holds true for Hispanics, Asians, Indians, and other minority groups.

The committee has provided this emergency funding for the Navy to initiate a program to type volunteers of the Armed Forces because the services provide a wide cross section of races and ethnic backgrounds. Funds are also included to enable the Navy to contract with the National Marrow Donor Program Foundation to type volunteers of minority groups and others who are on waiting lists to join the registry but who cannot afford the lab fees for the HLA typing, which average $75 per person.

Because this is a high priority, life-saving health program, the committee has made it clear to the Department that these funds will not be subject to any budgetary limitations within the Department and will not count against any funds made available to this account in the next fiscal year.

Mr. Speaker, the legislation before us is titled a "Dire Emergency Supplemental Appropriations Bill" and the amendment I offer today fullfills a truly dire emergency need—that of saving lives by matching bone marrow donors with patients in need of the living give of life.

[From the St. Petersburg (FL) Times, Mar. 12, 1990]

BEST HOPE FOR BLOOD DISEASE VICTIMS

Partly because she was black, JoAnne Johnson lost a desperate race against time. The 19-year-old college student died of leukemia in Maryland several weeks ago, still waiting for doctors to find a compatible bone-marrow donor who might save her life.

If she hadn't been black, her chances of finding the right donor would have been tough enough—about 1 in 20,000. But because so few blacks are registered as potential donors and time was limited, her chances were virtually nil. Race is a factor because the tissue types that must be matched in donors are inherited, and much likelier to occur within the same family or ethnic group.

Some 9,000 children and adults die each year from leukemia and dozens of other blood diseases, and 16,000 others are stricken annually. To give them a better chance, Congress in 1987 established a national registry to match patients with potential donors.

The registry is already saving lives, but now a push is on to add more donors and meet the urgent need for increased racial and ethnic diversity within the donor pool.

U.S. Rep. C.W. Bill Young, a Republican who represents lower Pinellas County and who led the effort in Congress to establish the National Marrow Donor Program, is helping program officials launch a pilot project to add 5,000 new donors in Pinellas. If the local effort succeeds, it will serve as a national model for attempts elsewhere to increase the current 87,000 registrants to 250,000 in the United States and 1-million worldwide.

Newspapers frequently run stories of desperate, high-profile efforts to save individual patients. JoAnne Johnson had Jesse Jackson and Dionne Warwick appealing for donors. A young Jewish leukemia victim. Allison Atlas, currently has been befriended by actor Dustin Hoffman. One family even decided to have a second child to provide a possible donor for their stricken teen-age daughter.

But individual efforts aren't the answer for most blood disease victims. The centralized, computerized registry of potential donors seems to offer the best hope, and Congress should try harder to find the money needed to expand it. This year's budget for the marrow registry is $12-million, of which $4-million came from Congress. The registry must raise the rest.

Potential donors must be between the ages of 18 and 55 and in good health. Registration simply requires giving a blood sample to be processed in advance. Then, if you're ever asked to donate and agree to, you can do so locally and the bone marrow is transported to the patient. The donor procedure involves only light anesthesia, no surgery, little pain and quick recovery, doctors say.

Part of the registration effort will focus on getting businesses to sponsor employees who volunteer. Businesses should cooperate in any way possible, including direct donations. Another good possibility is to pick up the donor program's $75 cost of processing the blood sample of each employee who registers.

But even if they do nothing else, businesses should cooperate by allowing workers the two or three days off to make actual marrow donations, with no loss of pay if possible. Donors' expenses are paid under the program, but they're not reimbursed for lost wages or child-care costs.

Young's office has mailed information forms to residents of his district, along with a mail-in response form. A coupon is also included here for *Times* readers who wish to join the program. Pinellas residents and businesses should jump at this chance to play a leading role in saving the lives of so many children and adults.

[From the Washington Post, Feb. 23, 1990]

MONEY AND MARROW TRANSPLANTS

More than 9,000 children and young adults die in this country every year of blood diseases that could be cured by marrow transplants. One of them, JoAnne Johnson, a Silver Spring college student who died on Monday, was the object of a community-wide drive to find a donor. That search was focused on the black community—just as another young leukemia patient, Allison Atlas, has concentrated on finding Jewish volunteers—because the likelihood of finding a donor match is far greater in one's own ethnic group. The public outpouring of support for these two families in particular has been remarkable. There are now three times as many black donors listed in the national registry for marrow donors as there were before the Johnsons began their efforts only two months ago. And 14,000 Jewish names have been added, and 14 donors found for other patients because of the work of the Atlas family.

But individual efforts, no matter how heroic or productive, are not the way to address this national need. The federal government has established a national registry of donors, which now contains 75,000 names. If there were 250,000 registered, 80 percent of those in need of donors would be able to find a match. But while there are more than enough volunteers, there is not enough money to test them, a process that costs about $75 each. Creating a registry of sufficient size and diversity would cost about $15 million; keeping it up to date, about $3 million a year.

It is terrible that many people who could be saved by marrow transplants are dying. Presumably no one argues with that. Yet the administration professes to be powerless in the face of budget constraints to find enough money to make the transplant program work. In fact, there is a strong argument based on dollars alone for facilitating marrow transplants. The procedure is not a palliative but a cure. The New England Journal of Medicine published a study only this week demonstrating that unrelated donor transplants are completely successful in 80 percent of all cases. The operation replaces alternative treatment requiring hospitalization, chemotherapy, and blood transfusions over an extended period of time.

The humanitarian argument for a fully funded program is compelling, and the objections based on cost make no sense. If the administration continues to ignore this opportunity, Congress must take the lead and find the money.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 12, 1990.
President GEORGE BUSH,
The White House, 1600 Pennsylvania Avenue NW., Washington, DC.

DEAR MR. PRESIDENT: As you know from our previous letters and discussions, one of the most fulfilling projects I have ever been involved with is the establishment of the National Bone Marrow Donor Program and Registry. It is saving lives every day.

You will recall that I first learned of the need for a national registry in 1986 when our family befriended Brandy Bly, a little 10-year-old girl suffering from leukemia who I introduced to you during one of your visits to Pinellas County. Beverly and I spent many hours reading to and playing with Brandy to give her mother some well deserved breaks from her hospital bedside. Doctors sought to treat Brandy's leukemia with a bone marrow transplant, but were unable to locate a compatible donor. Finally, as a last resort, they removed some of Brandy's own marrow, treated it with high doses of radiation and antibiotics, and reintroduced it into her body. Although this more complex and risky form of bone marrow transplantation worked, Brandy died in 1987 from other complications. But at the time of her death, her little body was finally free of leukemia.

It was during Brandy's treatment that I learned from her doctors how difficult it is to find a compatible, unrelated bone marrow donor. Doctors estimate there is a one in 20,000 chance of finding a donor whose many complex blood antigens perfectly match those of the patient. Prior to the establishment of the registry, finding a donor required hundreds of calls to hospitals and blood banks throughout our nation. The process took months and in most cases was unsuccessful.

The Congress in 1986 for the first time appropriated funds to the Navy to begin the process of establishing a computerized registry of volunteers who were willing to have their bone marrow typed and their names placed on call. As a member of the Defense Appropriations Committee, I worked closely with the Navy to ensure that they had the funding necessary to initiate this project. The Navy and the Department of Defense are to be commended for their leadership in developing this program. We initially approached the National Institutes of Health, requesting that they oversee development of the registry, but officials there were less than enthusiastic, saying the procedure was too experimental. NIH, however, became increasingly interested in this program and last year, at the direction of the House Appropriations Subcommittee on Health on which I also serve, and the House Energy and Commerce Subcommittee on Health, authority to oversee the registry was transferred from the Navy to the National Heart, Lung, and Blood Institute.

With the registry in place, the first match of a donor and recipient in need of an unrelated bone marrow transplant took place in December 1987. Since that time, 300 transplants have taken place utilizing the registry, with a greater than 70 percent success rate. Currently, there are 20 to 25 transplants performed each month. The potential for this program is limited only by the success rate of matching patients and donors. To improve the odds of finding an unrelated donor through the registry, we need to recruit and type more volunteers. Today, we have more than 70,000 volunteers in the registry and our goal is to expand the list to 100,000 by the end of this year. By the middle of this decade we hope to have 250,000 volunteers in the registry with the long-term goal of 1 million.

Our experience with this project has shown that when Americans learn of the registry and the potential for saving lives, they readily volunteer to have their marrow typed and their names placed in the registry. The two greatest limitations on our recruitment effort is getting word throughout the country that we are seeking volunteers, and finding the facilities and resources to type them. We are doing all we can to spread the word about the registry and to raise funds to pay the $75 fee for the sophisticated lab test required to type each volunteer.

In fact, we soon will launch a pilot program in my congressional district to recruit volunteers for the registry and to encourage businesses to become involved in the program by covering or defraying the cost of the lab fees for their employees who volunteer. The lessons we learn from this project will be used to develop a nationwide campaign to recruit potential donors and encourage private sector sponsorship to help defray the cost.

We can do more, though, to add to our registry. One of the greatest untapped sources of potential donors could be the men and women who serve our nation in the armed forces. The Department of Defense has played a major role in making the national registry a reality and has shown an ongoing interest and commitment to the program. In your role as Commander and Chief, I would urge you to give every possible consideration to working with the Secretary of Defense and Secretaries of the Army, Navy, and Air Force, and the Commandants of the Marine Corps and Coast Guard to make our service personnel aware of the program and to provide the facilities and resources to type those who are willing to be a part of the registry.

You have stressed throughout your Presidency that there is no boundary to the greatness we can achieve as a nation with the spirit of volunteerism the American people have shown throughout our great history. The National Marrow Donor Program is a way people can give the living gift of life directly to another person here at home and throughout the world. As you know, Barbara has already agreed to be a national spokesman for the program and earlier this month taped a series of public service announcements. Your support for our efforts to add to the ranks of potential donors would be greatly appreciated, especially by those individuals and families who have been given hope where little or none existed just a few short years ago.

With best wishes and warmest personal regards, I am

Sincerely,

C.W. BILL YOUNG,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 27, 1990.
President GEORGE BUSH,
The White House, 1600 Pennsylvania Avenue NW., Washington, DC.

DEAR MR. PRESIDENT: This is to followup my letter to you last week regarding ways in which we can increase the awareness of our nation's military personnel about the National Bone Marrow Donor Registry and provide the facilities for those who volunteer to have their blood typed and become a part of the registry.

As we discussed earlier, our men and women who have volunteered to serve in the armed forces are one of our greatest untapped potential sources of those who could join the registry. During a hearing of our Appropriations Subcommittee on Defense today, I discussed with the Senior Noncommissioned Officers of each of the services the exciting life-saving potential of this program and the need to recruit more volunteers to increase the odds of finding a successful match. Each of them was very enthusiastic about the program and on behalf of the men and women of the branch they represent, indicated an eagerness to participate in the program.

Enlisted personnel in America's military are volunteers in the truest sense of the word and their willingness to be a part of this program is symbolic of their spirit and dedication to our nation. Encouraging their participation in The National Bone Marrow Donor Registry would be an important step toward reaching our goal of recruiting 250,000 volunteers from throughout our nation.

Volunteering to give the living gift of life is exciting, especially with the limitless potential of this program. By providing the facilities and resources to type our enlisted personnel, the Department of Defense can further add to the important role it has played in the establishment and continued operation of this national program that saves lives every day.

With best wishes and personnel regards, I am,

Very truly yours,

C.W. BILL YOUNG,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, March 20, 1990.

Hon. THOMAS S. FOLEY,
Speaker of the House, H-204, The Capitol, Washington, DC.

DEAR MR. SPEAKER: This is to ask you to join me in an exciting, nationwide effort to save lives by helping to recruit volunteers in your district for the National Bone Marrow Donor Registry.

One of the most rewarding experiences of my whole life has been leading the effort in Congress to establish this national registry—a program that is saving lives every day by bringing together a patient in need of a transplant with a matched donor. Later in this letter, I will tell you how you can be involved in this effort.

Bone marrow transplantation is a relatively new but preferred treatment for leukemia and as many as 60 other blood disorders. When successful, it is a cure. The procedure, however, requires very precise tissue, or "HLA," matching of the donor and recipient. In fact, the typing is so critical that the chances of finding a matched donor are about one in 20,000 and that is why it is so important that we mount a nationwide effort to expand the registry. Donating bone marrow has been called the "living gift of life" because the donor gives marrow (which replenishes itself easily) to a fatally ill patient whose only chance for life is a marrow transplant.

Prior to the establishment of the national registry, doctors treating patients in need of a transplant had to make hundreds of calls to individual blood banks and hospitals in search of a potential donor. In most cases, the search was futile or took so long that the patient, with the fatal illness, was no longer strong enough to undergo a transplant.

Through the goodwill of more than 87,000 individuals who have already volunteered to have their marrow typed, we have established the National Marrow Donor Program. Now, with one request, a doctor can start a computer search and in a matter of hours determine whether there is a matched donor available. Where before there was little chance of survival for these terminally ill patients, there is now hope. The first transplant utilizing the registry took place in December 1987. Since then, there have been more than 300 transplants. Currently, 20-25 transplants are performed in the United States each month. This is only the beginning for this Program which could soon help provide life for as many as 9,000 Americans a year.

In 1986, the Congress appropriated the first funds for the Navy to begin the process of establishing a computerized registry of volunteers who were willing to have their bone marrow typed and their names placed on call. As a member of the Defense Appropriations Committee, I worked closely with the Navy to ensure that they had the funding necessary to initiate this project. Oversight of the program last year was transferred by the Appropriations Subcommittee on Health, on which I also serve, to the National Institutes of Health.

This is a tremendous program whose potential is limited only by the success rate of matching patients and donors. To improve the odds of finding an unrelated donor through the registry, we need to recruit and type more volunteers. Our goal is to expand the list to 100,000 by the end of this year and to 250,000 by the middle of this decade, with a long-term goal of 1 million volunteers worldwide.

Our experience with this project has shown that when Americans learn of the registry and the potential for saving lives, they readily volunteer to have their marrow typed and their names placed in the registry. The two greatest limitations on our recruitment effort is getting word throughout the country that we are seeking volunteers, and finding the facilities and resources to type them. We are doing all we can to spread the word about the registry and to raise funds to pay the $75 fee for the sophisticated lab test required to type each volunteer.

Earlier this month, I launched a pilot program in my district to recruit volunteers for the registry and to encourage businesses to become involved in the program by covering or defraying the cost of the lab fees for their employees who volunteer. The reaction to this project has been unbelievable as thousands have volunteered to be typed and a number of major employers have agreed to cover the cost of the tests for their employees. The attached packet provides you with detailed information about our project, the very positive reaction by our local media, and endorsements of this project from President Bush and Secretary of Health and Human Services Dr. Louis Sullivan.

You can be a part of this nationwide effort to save lives by sponsoring a similar community wide effort in your district. I would be pleased to work with you and share the lessons we learned from our experience in Pinellas County, Florida.

In addition, to show support in Congress for this national effort, I am making arrangements to have all interested members typed to be included in the national registry. As you will note, the only requirement to be a volunteer donor is that you be in good health and between the age of 18 and 61. Prior to last week, the age cutoff was 55. However, during a meeting of the Board of Directors of the National Marrow Donor Program in my district March 9th, the Board, at my request, raised the maximum donor age from 55 to 61.

We would like to schedule a press conference on the Capitol steps to coincide with the typing of members. The time and date will depend on the response of members. If you would like to take part in this press conference and be typed, or if you have questions about the program or sponsoring a donor drive in your district, please let me know or call Harry Glenn of my staff at 5-5961.

With best wishes and warmest personal regards, I am

Sincerely,

C.W. BILL YOUNG,
Member of Congress.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I am happy to yield to my colleague, the gentleman from California, who has been a real ally in this effort.

Mr. FAZIO. Mr. Chairman, first of all, I want to commend my friend, the gentleman from Florida, for his ongoing leadership in this area, and I certainly want to give my support to his amendment. I would indicate also that I look forward to working not only with the gentleman from Florida but with the chairman of our Subcommittee on Health and Human Services, the gentleman from Kentucky [Mr. NATCHER], and the gentleman from Pennsylvania [Mr. MURTHA] in this same consideration of the full appropriations for the next fiscal year, because, as the gentleman knows, this is a significant step forward but it really does not go as far as we need to go to get the 250,000 names in the bone marrow register that will really break through to a lot of people who are currently not getting any service from this wonderful effort that we have just begun to make.

Mr. Chairman, this amendment will allow us to increase the number of individuals in the National Marrow Donor Program registry.

At this time, there are approximately 100,000 names in the national registry. The goal is to reach 250,000 names.

Several months ago, only 57,000 names were in the registry, which were accumulated over a period of about 3 years. The increased number of potential donors recently added is largely the result of individual families' efforts at recruiting and testing donors, and raising the funds to pay for the testing.

I am sure that all of you have heard of the efforts of the families of Allison Atlas and JoAnne Johnson in testing potential donors. And many of us have individuals in similar need in our own congressional districts.

Unfortunately, individual testing has been necessary because the administration has refused to adequately fund this program. Consequently, many families of individuals in need of unrelated donor transplants have had to go out and raise the funds and recruit the donors themselves.

Further, many ethnic groups are underrepresented in the national registry. The greatest possibility for a member of the ethnic minority to secure a match lies with a person of a similar ethnic background. Thus far, the registry has not had enough ethnically diverse individuals represented and does not have the funds available to further test potential donors.

While the program needs at least $15 million for testing purposes, and I will be introducing legislation for a one-time authorization for that amount, the $6 million called for in this amendment to the supplemental will help ensure that there is broad ethnic representation in the registry immediately.

The $6 million, which will go for the Navy Medical Research and Development Command, will support the unrelated marrow donor program which was initiated by the Navy.

These funds will be used to support the HLA typing of active duty and civilian personnel, their dependents and others who volunteer to be included in the National Marrow Donor Program.

Should these individuals match with someone in need, they represent a good source to follow through with the actual transplantation.

In addition to military testing, a large share of the funding will go directly to the National Donor Marrow Program for the purpose of increasing minority recruitment and testing.

Funding the National Marrow Donor Program registry has become an urgent national need. I urge my colleagues to support this vital amendment which will save lives.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman from California for his comments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Florida [Mr. YOUNG].

The amendments were agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

GENERAL PROVISIONS

(RESCISSIONS)

SEC. 201. Of the funds provided in Department of Defense Appropriations Acts and Military Construction Appropriations Acts, the following funds are hereby rescinded from the following accounts in the specified amounts:

Military Personnel, Air Force, $104,484,000;

Operation and Maintenance, Army, $23,305,000;

Operation and Maintenance, Navy, $38,834,000;

Operation and Maintenance, Marine Corps, $1,582,000;

Operation and Maintenance, Air Force, $19,528,000;

Operation and Maintenance, Defense Agencies, $7,132,000;

Operation and Maintenance, Army Reserve, $896,000;

Operation and Maintenance, Navy Reserve, $209,000;

Operation and Maintenance, Air Force Reserve, $1,190,000;

Operation and Maintenance, Army National Guard, $2,125,000;

Operation and Maintenance, Air National Guard, $2,199,000;

Aircraft procurement, Army, 1990/1992, $28,600,000;

Missile procurement, Army, 1990/1992, $50,700,000;

Procurement of weapons and tracked combat vehicles Army, 1990/1992, $69,400,000;

Procurement of ammunition, Army, 1988/1990, $238,000,0000;

Procurement of ammunition, Army, 1990/1992, $200,0000;

Other procurement, Army, 1988/1990, $23,000,000;

Other procurement, Army, 1989/1991, $30,000,000;

Other procurement, Army, 1990/1992, $68,100,000;

Aircraft procurement, Navy, 1988/1990, $30,000,000;

Aircraft procurement, Navy, 1990/1992, $83,000,000;

Weapons procurement, Navy, 1989/1991, $40,600,000;

Weapons procurement, Navy, 1990/1992, $21,701,000;

Other procurement, Navy, 1988/1990, $16,500,000;

Other procurement, Navy, 1990/1992, $22,378,000;

Procurement, Marine Corps, 1990/1992, $15,200,000;

Aircraft procurement, Air Force, 1990/1992, $138,679,000;

Missile procurement, Air Force, 1989/1991, $25,000,000;

Missile procurement, Air Force, 1990/1992, $110,820,000;

Other procurement, Air Force, 1989/1991, $17,900,000;

Other procurement, Air Force, 1990/1992, $45,805,000;

National Guard and Reserve equipment, Defense, 1990/1992, $25,000,000;

Research, Development, Test and Evaluation, Army, 1989/1990, $5,000,000;

Research, Development, Test and Evaluation, Army, 1990/1991, $35,000,000;

Research, Development, Test and Evaluation, Navy, 1989/1990, $5,000,000;

Research, Development, Test and Evaluation, Navy, 1990/1991, $23,598,000;

Research, Development, Test and Evaluation, Air Force, 1989/1990, $19,900,000;

Research, Development, Test and Evaluation, Air Force, 1990/1991, $237,542,000;

Research, Development, Test and Evaluation, Defense Agencies, 1989/1990, $35,000,000;

Military Construction, Navy, 1989/1993, $10,000,000;

Family Housing, Air Force, 1989/1993, $8,000,000;

Military Construction, Army, 1990/1994, $16,000,000;

Military Construction, Navy, 1990/1994, $10,650,000;

Military Construction, Air Force, 1990/1994, $37,500,000;

Military Construction, Defense Agencies, 1990/1994, $5,810,000;

North Atlantic Treaty Organization Infrastructure, 1990/ 1994, 21,925,000; and

Family Housing, Air Force, 1990/1994, $17,800,000.

(DISAPPROVAL OF DEFERRALS)

SEC. 202. (a) The Congress disapproves the following deferrals relating to the Department of Defense as set forth in the message from the President transmitted to the Congress on February 6, 1990 (H. Doc. 101-149):

Deferral No.	Item	Budget Authority
	Department of Defense, Military:	
D90-10	Aircraft Procurement, Army	16,000,000
D90-11	Procurement of Ammunition, Army	310,000,000
D90-12	Procurement of Ammunition, Army	90,000,000
D90-13	Other Procurement, Army	11,000,000
D90-14	Aircraft Procurement, Navy	200,000,000
D90-15	Weapons Procurement, Navy	13,900,000
D90-16	Shipbuilding and Conversion, Navy	592,398,000
D90-17	Shipbuilding and Conversion, Navy	324,800,000
D90-18	Aircraft Procurement, Air Force	181,700,000
D90-19	Missile Procurement, Air Force	131,000,000
D90-20	Other Procurement, Air Force	70,000,000
D90-21	National Guard and Reserve Equipment, Defense	40,900,000
D90-22	Research, Development, Test and Evaluation, Air Force	100,000,000
D90-23	Research, Development, Test and Evaluation, Defense Agencies	21,000,000
D90-24	Military Construction, Army	3,200,000
D90-25	Military Construction, Navy	16,150,000
D90-26	Military Construction, Army National Guard	18,301,000
D90-27	Military Construction, Air National Guard	36,841,000
D90-28	Military Construction, Army Reserve	16,660,000

(b) The disapproval shall be effectrive upon enactment into law of this Act and the amounts of the proposed deferrals disapproved herein shall be made available for obligation immediately upon enactment into law of this Act.

SEC. 203. (a) The appropriation "Research, Development, Test and Evaluation, Air Force" contained in the Department of Defense Appropriations Act, 1990 (Public Law 101-165) is amended by striking out the proviso following "Small ICBM program:" and ending with "B-1B aircraft:".

(b) Section 890.84 of the Department of Defense Appropriations Act, 1989 (Public Law 100-463) is amended by striking out "$109,895,000" and inserting in lieu thereof "$79,895,000".

(c) Section 8115 of the Department of Defense Appropriations Act, 1988 (Public Law 100-202) is amended by striking out "$90,895,000" and inserting in lieu thereof "$67,895,000".

(d) Section 8127(b) of the Department of Defense Appropriations Act, 1989 (Public Law 100-463) is hereby repealed.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that chapter II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against chapter II?

Are there any amendments to chapter II?

If not, the Clerk will read.

The Clerk read as follows:

CHAPTER III

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS MULTILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

INTERNATIONAL FINANCIAL INSTITUTIONS

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

The United States Governor of the International Bank for Reconstruction and Development may subscribe without fiscal year limitation to the callable capital portion of the United States share of increases in capital stock in an amount not to exceed $1,609,671,408.

AMENDMENTS OFFERED BY MR. RAHALL

Mr. RAHALL. Mr. Chairman, I offer amendments.

Mr. CONTE. Mr. Chairman, I reserve a point of order against the amendments.

The CHAIRMAN. The gentleman from Massachusetts [Mr. CONTE] reserves a point of order against the amendments, and the Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. RAHALL: Page 10, strike lines 11 through 21.

Page 11, strike lines 4 through 11.

Page 11, strike lines 12 through 16.

Page 11, strike lines 18 through 25.

Page 12, strike lines 1 through 21.

Page 12, strike line 23 and all that follows through page 13, line 3.

Page 13, strike lines 4 through 21.

Page 13, strike line 22 and all that follows through page 14, line 2.

Page 14, strike lines 3 through 9.

Page 14, strike lines 10 through 17.

Page 14, strike line 18 and all that follows through page 15, line 16.

Page 15, strike lines 17 through 20.

Page 15, strike line 21 and all that follows through page 16, line 2.

Page 16, strike lines 3 through 8.
Page 16, strike lines 9 through 17.
Page 16, strike lines 18 through 24.

Mr. RAHALL (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. WHITTEN. Mr. Chairman, I reserve a point of order on the gentleman's amendments.

The CHAIRMAN. The gentleman from Mississippi [Mr. WHITTEN] reserves a point of order against the amendments.

The Chair would ask the gentleman from West Virginia, does he intend to offer these amendments en bloc?

Mr. RAHALL. Mr. Chairman, it is the sponsor's intent to ask unanimous consent to consider these amendments en bloc notwithstanding the fact that some of these amendments amend paragraphs that have not yet been read.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

Mr. OBEY. Mr. Chairman, reserving the right to object, I simply wish to ask the gentleman, if no objection is lodged to his request, does he intend solely to proceed to offer that amendment with no other amendments in mind?

Mr. RAHALL. Mr. Chairman, if the gentleman will yield, I would state that the gentleman is correct.

Mr. OBEY. Then, Mr. Chairman, I would have no objection, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia that the amendments be considered en bloc?

There was no objection.

□ 1350

Mr. RAHALL. Mr. Chairman, my amendment simply strikes the foreign-aid portions of this bill.

I object to the bill because, in addition to providing needed funding for domestic programs, it also provides $870 million in foreign aid. I do not believe that we have the resources to continue assisting foreign countries while there are significant needs at home.

There is little question that many nations around the world require economic and development assistance and that any compassionate nation, which has the resources, should assist those nations whenever possible. Over the years, the United States has been such a compassionate nation.

But, Mr. Chairman, we no longer have the resources to assist foreign nations. Our deficit stands at $152.1 billion, our gross Federal debt at $2.8 trillion. Real earnings between 1973 and 1986 have declined 17 percent. Our merchandise trade deficit has risen from $19.3 to $118.5 billion since 1980.

Millions of Americans remain unemployed and millions of Americans are without homes. Millions of others live in substandard housing. We have millions who work, but do not earn adequate wages. We have millions of Americans who can not afford health care. Our youth are being poisoned by illegal drugs flooding into this Nation every day. Our roads and bridges are falling apart.

Yet, the very programs that are meant to address these problems are being cut, and State and local governments are being asked to pay a greater cost-share. EDA, ARC, the EPA construction grants program for water and sewers, UDAG, and CDBG are just a few of the domestic programs which have fallen victim to this budget cutting.

Communism is no longer the enemy; competition is. Let's retool and rebuild America first.

Just last week, the other body deflated an amendment to the Clean Air bill, offered by Senator BYRD, which would have provided approximately $500 million in financial support and job-training benefits for miners who are expected to lose their jobs as a result of the bill's acid rain provisions.

Why is it that we are so willing to make these cuts in domestic programs and deny our own workers the opportunity to prepare themselves for other jobs as a result of legislation that we are going to enact, yet we continue to provide foreign countries aid?

How can we support the rest of the world Mr. Chairman, while we turn our backs on the American people? When is it America's turn Mr. Chairman? When will we call upon those other nations who can afford it, to help those who cannot. When is it America's time? How long Mr. Chairman, must the American people bear the burden of world needs, without providing for this Nation.

I say the time is now, it is America's turn, it is West Virginia's and the rest of America's time. I want to put West Virginia first, I call upon my colleagues to put America first.

I urge my colleagues to support my amendment.

Mr. EDWARDS of Oklahoma, Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I think the gentleman from West Virginia [Mr. RAHALL] got it backwards. This was the supplemental that arose out of a request from the administration to provide emergency assistance for what happened in Panama and Nicaragua, and the rest of it was added on to this bill. This started out as an assistance bill to help emerging democracies and not to have all these other things.

Mr. RAHALL. Mr. Chairman, regardless how the bill started out, what we have here today is a request of $870 million in foreign aid, and it is this gentleman from West Virginia's intent to strike this entire section.

Mr. Chairman, I believe, and certainly we can look at the need around the world to provide economic and development assistance, that we are a compassionate Nation. If we had the resources, fine. Then we should assist these nations wherever possible.

However, Mr. Chairman, I do not think just to go down and throw money into these countries is going to mean that democracy is going to sprout up the next day.

We no longer have the resources in this country to assist foreign nations. Our deficit stands at 152.1 billion; our gross Federal debt at $2.8 trillion; our real earnings between 1983 and 1986 have declined 17 percent. Millions of Americans remain unemployed, and millions of Americans are without homes. Many others live in substandard housing. We have millions who work, but they do not earn adequate wages. We have millions of Americans who cannot afford adequate health care. Our youth are being poisoned by illegal drugs flooding into this Nation. Our roads and bridges are falling apart.

Mr. Chairman, I in no way cast aspersions upon the fine gentleman from Wisconsin [Mr. OBEY], the chairman of the subcommittee, or the full committee chairman. These gentlemen support the vital programs for our people here at home. I thank them for that support, and they are needed programs, but I think it is time that we realize that communism is no longer our enemy around the world. Competition is.

My colleagues, let us rebuild America first. These other countries use our foreign aid to put their No. 1 interests first. Let America put our interest first.

Just last week, Mr. Chairman, the other body defeated an amendment to the clean air bill offered by Senator BYRD which would have provided approximately $500 million in financial support and job training benefits for miners who are expected to lose their jobs as a result of the bill's acid rain provisions. Why is it that we are so willing to make cuts in domestic programs and deny workers the opportunity to prepare themselves for other jobs, but yet we continue to provide foreign countries the tools with which to provide for their best interests and their workers? How can we support the rest of the world, Mr. Chairman, while we turn our back on the American people?

My colleagues, when is it America's turn? When are we going to call upon those other nations, who can afford it, to help those who cannot? When is it America's time?

I say, "The time is now. It is America's turn. Let's look and put America first," and I call upon my colleagues to adopt this amendment which, once again, simply removes chapter three from the bill, deleting entirely, deleting entirely, the foreign aid section of this supplemental appropriations.

Mr. OBEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the easiest thing in the world to do is to stand on this floor and say, "Let's simply eliminate every dollar in this bill for this title." It is a very easy thing to do, and it can be done if we are not serious about the United States of America. However, Mr. Chairman, if my colleagues are serious about the United States of America and our obligations to ourselves, as well as the rest of the world, they simply have to face the fact that we do not live in isolation on this globe. The simple fact is that unless we want to say here today that we are not the leader of the West, unless we want to say here today that we do not have the obligation to clean up messes which we caused, then we simply cannot in good conscience support this amendment.

Mr. Chairman, there is no number in this title which is hard and fast. No one is certain what the specific amount asked by the President for Panama and Nicaragua, for instance, is, the exact amount that ought to be provided. Reasonable people can certainly differ on that.

However, Mr. Chairman, the fact is that the lion's share of the foreign assistance funds in this bill is here for two purposes. They are here because we are in the process of ending a war in Nicaragua which we helped start in the first place, and there are winddown costs associated with the ending of that war. And it is because the Bush administration finally abandoned the unilateral militarism of the previous administration in Nicaragua, and because we worked together, the Congress and the administration, the Republicans and the Democrats alike, on a new policy, that there has been a new election in Nicaragua, and the side supported by the United States won. And we are now simply trying to help restarted that economy.

Mr. Chairman, the same is true in Panama. We simply had in that case a request from the President to provide a small amount of money to reimburse that country for the damage that was inflicted on them by our past policies with respect to Panama—first having an overreliance upon Mr. Noriega by our Government, and then, after we decided that policy was no good, the squeezing of the Panamanian economy to try to get Noriega out of office.

There are certain costs associated with American leadership, and those two expenditures demonstrate those costs. In my judgment, we have very little choice but to approve the requests made by the President.

I would also point out that we have some other obligations. For over 15 years we lectured the Soviet Union saying, "Look, you ought to let Soviet Jews out of the Soviet Union. You ought to let them go." They have now decided to do that. For the United States to say, "Well, now that you've decided to let them go, we're not going to take them," would be the height of irresponsibility.

So, Mr. Chairman, it seems to me that we have no choice but to recognize that unless we think that we can retreat into absolute isolation, we have no choice but to recognize that the bulk of what the President asks for is correct, and we ought to support him in that effort.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I appreciate the gentleman from Wisconsin [Mr. OBEY] yielding to me because he is someone who understands the details of this bill better than any of us on the floor do.

I ask the gentleman from Wisconsin, "Do I understand correctly that all of the money in title II is offset by defense cuts? Is that correct?"

Mr. OBEY. The gentleman from Pennsylvania [Mr. WALKER] is correct.

Mr. WALKER. So, therefore, supporting the amendment of the gentleman from West Virginia [Mr. RAHALL] would in fact be in favor of keeping defense spending which the Defense Department has now indicated is not needed; is that correct?

Mr. OBEY. Mr. Chairman, I do not think I can fairly say that because I do not think the amendment of the gentleman from West Virginia [Mr. RAHALL] would eliminate the defense offset. I would greatly be corrected if that is not the case.

Mr. RAHALL. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from West Virginia.

Mr. RAHALL. Mr. Chairman, the gentleman from Wisconsin [Mr. OBEY] is correct. My amendment would not touch any of the defense offsets.

If I might respond to the gentleman from Pennsylvania [Mr. WALKER] in saying that all the money in this chapter that I seek to delete is not all provided for by defense offsets. If I am not mistaken, there is a $400 million transfer in there that is not provided by defense offsets, but is coming from who knows where.

Mr. WALKER. Mr. Chairman, could the gentleman from Wisconsin [Mr. OBEY] correct the record on that?

Mr. OBEY. Mr. Chairman, I would say that every dollar which is appropriated by this bill, my understanding is that that money is offset by defense reductions.

Mr. WALKER. So then what the gentleman from West Virginia [Mr. RAHALL] is doing under his amendment is cutting the defense spending, but we would not, in fact, replace it with the money going to Nicaragua and Panama and other places in the world that we think are in our security interests.

Mr. Chairman, is that the understanding of the gentleman from Wisconsin?

Mr. OBEY. The gentleman from Pennsylvania [Mr. WALKER] is correct.

□ 1400

Mrs. MEYERS of Kansas. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment and in support of the aid package to Panama and Nicaragua as set forth in this bill.

The United States should support the efforts to establish a free society and a free market in Nicaragua and Panama.

Democracy is sweeping the world, and no more so than in Latin America. When President-elect Chamorro is inaugurated on April 25, for the first time in history all of Central America will be under democratic rule. Ten years ago, virtually all of Latin America suffered under some sort of dictatorship. Nicaragua and Panama are two more in the long list that have managed the transition to democracy over the past decade. Now Cuba remains the only dictatorship in the Western Hemisphere.

The new democracies in Latin America are not perfect. They have had great difficulty in terms of human rights and economic progress. The history of these countries is plagued by military domination and their economies are burdened by debt. But these flaws and imperfections do not give the United States a reason to turn its back on these countries. Indeed, this country needs to help these new democracies over these significant hurdles. The people of Nicaragua and Panama turned out to support democracy; we should make sure these efforts are not in vain.

Unfortunately, the economies of these countries have been devastated by dictatorship and conflict. Nicaragua has a long way to go to rebuild its economy from the shambles left by years of war and a Communist economic system. The economic sanctions imposed on Panama strangled that country's private sector.

This aid package is not intended to keep Panama and Nicaragua on the foreign aid dole ad infinitum. It is intended to jump-start their economies so that private economic growth can occur. This aid package can be beneficial to this country, because strong economies in Central America are an important market for American exports.

Mr. Chairman, I urge my colleagues to support this aid to Panama and Nicaragua.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I regret that the gentleman from Wisconsin [Mr. OBEY] used the phrase, "messes we have caused." I find it difficult to characterize our joining in the struggle for freedom for the people of Panama to free themselves of the tyrant, Noriega, to kick the Colombian Mafia out of their own country as causing a mess.

Mr. OBEY. Mr. Chairman, since the gentleman used my name, will the gentleman yield?

Mr. HYDE. Let me finish my statement, then I will yield, unless the gentleman insist on me yielding now, and I will yield.

Mr. OBEY. Mr. Chairman, I thank the gentleman for yielding to me.

I would simply make the point on my comments with respect to the mess in Panama did not refer to our invasion of Panama. It referred to the ill-advised policy of supporting Mr. Noriega for 10 years, which led to a situation in which that was our only choice. I do believe that was a mess.

Mr. HYDE. Well, if the gentleman includes the Carter administration, then I will forego arguing that at this time, but I think that is a much more complicated situation than the phrase, "messes we have caused" alludes to.

In any event, getting rid of tyranny is not causing a mess. It is called liberation.

In addition, in Nicaragua we did not cause that war. I was one on the floor who voted, along with the gentleman from Wisconsin, for millions of dollars for the Sandinistas in the forlorn and misplaced hope that they would live up to the promises they made to the OAS in 1979 to democratize. We were wrong. They were wrong and Mr. Carter cut aid to the Sandinistas, not the United States, and because some people who lived in Nicaragua wanted to live in freedom, as we do, and decided to create a resistance and we supported them, I do not think we caused the war.

In any event, I think it is useful for us to help the economies of countries whose economies we have damaged because of our embargo and because of our sanctions.

In addition, I would say to the gentleman from West Virginia, by helping them get to their feet economically we make customers of them and we can sell them some exports, so it is not exactly a zero sum game.

I do with all my heart and soul appreciate the great gentleman from West Virginia, but I think in this instance, one of the few times, he is quite wrong.

Mr. Chairman, I yield to my friend, the gentleman from West Virginia, if he wishes to withdraw his amendment, which I doubt.

Mr. RAHALL. Well, Mr. Chairman, I appreciate the comments of the gentleman from Illinois. Certainly this gentleman has a great deal of respect for him.

I will say that it is my desire also to see that we are able to export our products to these new countries, these new democracies, but I think that we ought to first realize that we have to be in a competitive mode. We have to be able to produce those products in a competitive fashion in order for them to be attractive on the world market.

So the purpose of this amendment, and my goal overall, is to see that we in this country make ourselves competitive through job training programs, through rebuilding our infrastructure needs, through making our people feel pride in the product that we produce in this country so that it will be readily accessible for export to our new found friends.

Mr. HYDE. Well, perhaps the gentleman will join me in looking for other areas wherein we may save money, such as funding the arts or things like that, that are less significant, perhaps, than saving democracy in Central America and creating customers out of those lovely people for our products.

I thank the gentleman.

Mr. TRAFICANT. Mr. Chairman, I move to strike the requisite number of words. I support the amendment.

I have heard an awful lot of talk that we want to make customers out of these individuals so listed under our foreign aid accounts. I would like to say that we are making debtors out of the American taxpayers and we keep taking their money more and more and shipping it overseas.

Now, I agree and I can recognize that certainly this amendment will not pass, but I think it is a sad day when we continue to come to the floor and everybody gets up when we talk about foreign aid, we hit everybody who talks against it as being a demagogue.

We talk about all the great things this foreign aid is doing in helping America solve problems in the world. Most of these countries are saying, "Yankee, go home."

I think one of the most interesting things I have ever seen was on a speech I think by one of our colleagues, the gentleman from Massachusetts [Mr. FRANK] who made a statement about how it really works. He made more or less a statement that our government called the Philippines and said, "Listen, we have some money for you. Do you want the money?"

And they said, "Well, we're not sure."

"Well, come on, are you sure you don't want money? We've got it for you."

What we are doing, we are not buying friends. No one wants to listen about Chicago, Cleveland and Los Angeles. I am seeing the type of money coming up for infrastructure in those communities.

What about the people in Pittsburgh and Youngstown and Warren and Cleveland who lost their steel jobs? What about the Americans who are displaced and cannot buy a home? Getting a piece of the rock is importing a boulder from Mt. Fuji around here anymore.

Who is looking after domestic appropriations, supplemental domestic help for the American cities, for our roads, for our bridges, for our students? I think it is high time that we do.

Now, let me say this. I have got people standing miles long for section 8 housing. Where are the housing guarantees for Americans in this bill?

The politics of this bill stink. Congress, for whatever reason, has put on blinders when it comes to this foreign aid account, and every time I hear it, it is only a small fraction of our total budget.

Well, tell me, what was revenue sharing then?

The city of Youngstown relied on policemen and firefighters out of that revenue sharing account that were decimated by a loss of 55,000 jobs, and no one even offered rustproof paint. You get up and mention it, you get the long litany of international diplomacy.

Let me tell you what. This is not international diplomacy. This is stupidity. Congress is going bankrupt. We are presiding over the biggest chapter 11 in world history, right before our eyes, $3.3 trillion, and if you talk about a project for your area, that is pork barrel.

Oh, my God, you want a million dollars for a water tower for a community that does not have water? What do you want to do, TRAFICANT, break the bank? Half a million dollars for a study of infrastructure, water lines rotting, and you want to bust the bank?

Let me tell you, you are busting the bank with appropriations overseas.

I will tell you what. The American people have got to be fed up with this, but the problem is I do not think they hear about it.

I am going to support this total strike, even though there are things in here more than likely that are necessary, but I am going to cast that vote

out of defiance to this body who continue to ship money overseas and then tell us how appropriate it is. They had better not. You know, urinate on their backs, do not tell us it is raining outside.

I oppose this policy, not totally supporting the strike, but I oppose this policy, and I say before we ship money overseas let us take care of our own country first, and we are not doing that. We are not doing enough of it.

□ 1410

When this thing is all over, I will have a couple of amendments, and I would hope that the Members would look at them with favor, and also hope that they look critically at the policy statement and support the gentleman from West Virginia [Mr. RAHALL]. I am going to.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, let us be very clear about the cost of this assistance. There are offsets or deferrals for every dollar of foreign assistance spending in this bill. Nobody, and I will repeat to the gentleman from Ohio, nobody is saying: Let us come to this floor and spend more money for foreign aid. That sounds good back home in Ohio, but it is not what is in this bill. This bill takes money out of the defense budget and transfers it to other purposes to ensure our national security.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I am happy to yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, could not the Congress just as well then, sir, could not they have transferred and taken this money and reinstituted Federal revenue sharing if they had so chosen? Could they or could they not have done that? They chose to put it into foreign aid. Let us clarify the record.

Mr. EDWARDS of Oklahoma. Reclaiming my time, yes, that is precisely what we have chosen to do. The three items requested by the administration in this supplemental, the provisions for Nicaragua, Panama, and refugee assistance, are needed as a result of the fact that the world has changed.

The global landscape has changed. The world is turning away from authoritarian regimes and toward democracy. And we ought not to be neutral about that.

This bill fully funds the administration's request of $300 million for Nicaragua, The Nicaraguan economy is in shambles.

The gentleman, I am sure, is glad the war in Nicaragua is over. I am glad it is over. This money is urgently needed to help the Chamorro government get on its feet, and it is not going to come a moment too soon, because the Nicaraguan planting season is going to be here shortly, and this package includes agricultural assistance for that country.

The bill includes money specifically for repatriation of the Contras. For those of us who fought long and hard for democracy in Nicaragua, the opportunity to finally help build a truly democratic and open society there is one that we cannot miss.

It provides $420 million for Panama to help rebuild the private sector, infrastructure development, pay arrearages. This is a one-time jump start for the Panamanian economy as a price for helping get rid of General Noriega.

This supplemental funds the administration's request for refugees, much of which is for Eastern European and Soviet Jews. It includes $25 million to replenish the emergency refugee fund.

It addresses the positive changes in southern Africa, providing money for democratic institution-building within South Africa. Is that not something that we have all wanted to do?

Let me state to the gentleman that he talks about doing something for the United States; he talks about doing something for national security; he talks about doing something for people in Ohio and in Oklahoma. The way we do it is to solidify democracy around the world and remove the threat from totalitarian governments to your constituents and mine.

I strongly oppose the amendment. I think the gentleman from West Virginia, as a previous speaker said, is a very fine Member of this body. I agree with him most of the time. He just simply is wrong on this one.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I am happy to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would also like to suggest that this House does not have to take any lectures from anybody in terms of our obligation to scrub foreign aid dollars.

The fact is that in the last 5 years, this Congress has cut almost $5 billion from the administration's foreign aid requests. We have had the largest percentage cut in the President's requests made in the foreign aid account in 4 out of the last 5 years. I do not think we have to take any lectures from anybody about our stewardship of the taxpayers' dollars with respect to these programs.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I thank the chairman of the subcommittee, who has done a marvelous job of doing that. He and I have worked together to try to reduce the foreign aid spending, and I would repeat again that there is no increased spending in this bill. That is simply not true.

Mr. SMITH of Florida. Mr. Chairman, I move to strike the last word.

Mr. Chairman, let me say at the outset that I certainly commend the gentleman from Wisconsin for his handling of this whole package, including that portion regarding foreign aid, and to the gentleman from Ohio, who has incessantly but very righteously, and with good cause, come to this well and time after time talked about defending Americans and American jobs and American workers which on many occasions has found me joining him, let me say that it is unfortunate that he wants to cast this particular kind of aid in an antiworker, anti-American mold, because quite honestly it is not right. It is not appropriate.

Let me take us back to 1948. The development of the Marshall plan was something that President Truman was advised not to do. President Truman felt it was absolutely necessary after the war when most of the world was in shambles to guarantee the economy of the United States a place to sell its goods so that American factories could hire workers, buy raw materials, and produce things for export, because we could not afford to buy everything we could produce. There were not that many markets that were available that had money or an economy sufficient to buy our goods, and so the Marshall plan was created against the advice of most of his advisers, against the advice of many in the country.,

A poll taken then showed that only 14 percent of the people, United States citizens, only 14 percent favored doing what he did, and yet by having the courage to do that, by understanding that by investing overseas in various places, we develop markets which ultimately are to the benefit of American workers and American jobs and American technology, we were able to put together from the shambles of Europe and the Soviet Union a whole market that for 40 years served us well.

We did not sell in the Far East; practically nothing. Europe was everything.

We are now turning our attention south of us, the emerging markets, emerging democracies, places where we need to make the economies strong. Why? Because the same reason exists today that existed in 1948. We are losing our markets to the Japanese, and the gentleman knows very well, because he just said so, that our competitiveness has been stunted significantly by the intrusion and capability of the Japanese around the world, and we are losing our markets to the Europeans. EC 1992 is coming, and that is going to promote further problems for the United States. Hopefully it will spur competitiveness. In the short run, it is going to present another bar to markets.

What we are doing is exactly what the gentleman from Ohio wants to do, and that is to try to promote America by promoting American jobs, promoting American technology, promoting American workers to be able to work, and promoting the sales of American goods in countries where their economies now cannot afford to buy that American technology, that American product.

Mr. Chairman, this is an investment. It was an investment in 1948. It has been an investment ever since, and it is an investment now, and while I do not agree much with President Bush, as this gentleman from Ohio well knows, the reality is that for once, at least, he is doing the right thing by taking it out of the defense budget and putting it into the place where that money will be 10 times as productive as it would be in the defense budget under the new circumstances that govern the world and the circumstances we find ourselves in.

We have to be doing more of this, not less. We should not look for ways to waste money, but neither should we shrink from our obligations.

For instance, the new emerging democracies in Eastern Europe, what are we going to do? The shambles of Eastern Europe today resemble the shambles of Western Europe in 1948, and we need to be there first, now, developing our markets now, with aid, with help, making those people not only secure democratically but secure economically so that tomorrow they will want to buy the goods that we make here in the good old U.S.A. and not from Japan.

□ 1440

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from Wisconsin [Mr. OBEY] I am sure remembers several months ago when I stood on the floor and offered a similar kind of amendment. It struck I think $630 million in foreign aid out of a bill, and the gentleman and I had some strong words on that evening in the House when that amendment was before us.

I mention that only because I would say this gentleman from Pennsylvania is perfectly willing to look at the foreign aid budget as one of those items that needs to be understood can be subject to cuts along the way if that is what Members should do. In this particular case though, it does not make much sense to do as some of my colleagues are suggesting.

First of all, as was just pointed out, this money has been offset. In other words, we have done exactly what has been talked about on this House floor for some period of time. We have taken money out of the defense budget and put it over for other uses that we regard as priority uses at this time. That seems to me to be a responsible course of action to take.

If we are going to fund foreign aid spending, we will do it out of the money that we otherwise would have allocated for defense.

But what struck me in the remarks that we have heard so far in defense of this amendment is the idea that somehow we would be helping this country by not putting this foreign aid into practice in places like Panama and Nicaragua.

Let me examine just one of those nations, Panama. I would suggest that during the time the authoritarian regime of Mr. Noriega that the Panama Canal was seriously jeopardized. That is not me speaking, that is a report done for this Congress speaking. We had a report done by the Panama Canal Commission which indicated that Noriega was putting the canal in jeopardy.

One of the main reasons for trying to change the situation in Panama was to assure the integrity of the canal. The integrity of that canal and its ability to operate is in the direct interests of this country. The products that float down the Ohio River, down the Mississippi, and go to the port of New Orleans are then transferred to the west coast and sold by going through the Panama Canal.

The oil that comes from Alaska is brought down through there, refined in New Orleans, and brought up the river to service Ohio and West Virginia and some of the States.

I would suggest the loss of the Panama Canal would be an absolute economic disaster for the Midwest, as it would be an economic disaster for this country. This aid we are attempting to do is to stabilize a country which now finds itself in desperate straits as a result of actions that were taken to end the authoritarian regime of Mr. Noriega, who was jeopardizing that canal. It is in fact an investment in this country for us to invest in the Panama Canal and assure that the canal continues to operate within the context of a friendly government. To not vote for this aid is to suggest we can get along without the Panama Canal.

I think to jeopardize the Panama Canal here on this floor today is absolutely wrong. I would have to say the amendments designed to cut this particular aid are amendments designed to impinge on our ability to operate the Panama Canal, and so therefore would be directly outside the national interests of this country.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I will be happy to yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, No. 1, I opposed Jimmy Carter giving the canal up in the first place.

Mr. WALKER. But that does not do us any good at this point.

Mr. TRAFICANT. Will the gentleman continue to yield?

Mr. WALKER. I will get back to the gentleman. But I would say to the gentleman that that does not do us any good at this point. Jimmy Carter gave away the canal and it is now a reality that it operates within Panama and we have to have a stable Panama for it to operate in.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, I am just speaking overall policy, both Democrat and Republican. No. 1, I think that was a foolish move. American taxpayers paid for it, fought to keep it, gave up their lives.

Second of all, Noriega was captured by freedom fighters. We turned our back on them and they shot them in the head when they liberated Noriega. We did not have to have $1 lost. We have wobbly knees. When those freedom fighters captured Noriega and asked us to shut off those roads, our military, our CIA, did not respond.

So what I am saying to the gentleman is this: We may disagree, but I do not buy that Panama rap and I do not believe we need this money for Panama.

Mr. WALKER. The gentleman from Ohio [Mr. TRAFICANT] is absolutely wrong. Even if the freedom fighters had succeeded in October, the fact is that the economy and the situation in Panama still would have been a shambles. It is not the fact that we went down with our troops and took control of the country. It is the fact that Panama is in shambles and the instability of the country is jeopardizing the canal.

The gentleman is absolutely wrong. The canal is being jeopardized if we do not go ahead and do what we have to. It does not help if the gentleman at some point in the past said he was for the Panama Canal and for what America did. The question is what is one willing to do today to assure the stability of that canal? If you are willing to support the amendment of the gentleman from West Virginia, you are against having the kind of stability that keeps the canal in place.

The CHAIRMAN pro tempore (Mr. OBERSTAR). The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

(At the request of Mr. TRAFICANT and by unanimous consent, Mr. WALKER of Pennsylvania was allowed to proceed for 2 additional minutes.)

Mr. WALKER. I yield to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Chairman, let me say just briefly that our economy and national debt is in shambles. It is

time we focus in on America, because Panama is not going to save our behind when it hits the fan, sir.

Mr. WALKER. The gentleman from Ohio [Mr. TRAFICANT] is absolutely correct, and the gentleman knows I come to the floor and say that a lot. But it also is not helpful to have amendments which pull out the underpinnings of one of the major economic assets this country has, namely the Panama Canal, and that is what the gentleman is wanting to do.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I just want to say to the gentleman from Ohio [Mr. TRAFICANT] about that coup that was attempted down in Panama, there were some Members of Congress, not from my party, who objected to any action by anybody down there that might result in harming Mr. Noriega, and in fact asked the White House to notify Noriega if he was in any danger. And that forestalled any successful operation down there, unfortunately.

Mr. WALKER. Mr. Chairman, I just want to reiterate again that the point here is if you really do sincerely believe the Panama Canal is an important asset for this country, you will support the bill that was brought to us by the committee today.

Mr. CARPER. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, the most divisive single issue that I can recall debating here in this Chamber in the last 7 years was aid to the Contras in Nicaragua. The single most divisive issue I can recall.

The most galling issue that I can recall facing in our Nation in these last 7 years was Manuel Noriega leading a totally corrupt government in Panama from top to bottom, and the United States seemingly powerless to do anything about it.

If 4 months ago any of us in this Chamber had suggested we would be standing here today and deciding how best to help the democratically elected Governments of both Nicaragua and Panama, I do not believe we would have believed that possible.

It has been pointed out by other Members here today that these foreign aid dollars in this supplemental appropriation are not drawn from domestic spending, are not drawn from highway programs, housing programs, or health programs. These dollars are drawn, as they appropriately should be, from reprogrammed defense spending. To the extent that in this new day and age we need to spend less dollars for defense, it makes I think sense to spend some of that money to help stabilize these newly elected democratic governments in Central America.

One of our earlier speakers in this debate has lamented the fact that these foreign aid dollars do little if anything for the constituents of his district or our districts. Let me just say in my district, and I suspect in almost every district represented in this House Chamber, one of the biggest threats to our constituents and their families is drugs, the sale and use of illegal drugs in this country.

Three months ago I had the opportunity to visit Panama, a country where there were not one, or two, but any number of illicit drug laboratories set up in the bush, a country where banks were used as laundromats, almost as personal laundromats by the drug cartels to launder illegal drug moneys. Today, these money launderers are on the run, and we ought to keep them on the run.

Speaking of our national interest, the canal which cuts through Panama represents still a major investment of ours as the gentleman from Pennsylvania [Mr. WALKER] suggested earlier. That canal is now in friendly hands, safe hands, hands willing and able to safeguard what remains a shipping and economic lifeline for our Nation.

When I was in Panama 3 months ago, I saw enough guns to fill this Chamber, guns that had been confiscated including assault weapons, pistols, and rifles. You name it, they had it. The reason why they had it is because Panama had been turned, not just into a drug running operation, a money laundering operation, but also into a gun-running operation that spread instability throughout Central America, an instability that most certainly is not in America's interest.

Then, there is Nicaragua. Prior to 1985, Nicaragua's principal trading partner in the world was the United States of America. We were their chief trading partner. We actually enjoyed a favorable balance of trade with Nicaragua. My guess is within the next 1 or 2 years we will be their principal trading partner once again.

□ 1430

Finally, I believe that aid to Panama and aid to the Government of Nicaragua—to the democratically elected governments of those countries—is in our naked self-interest in this Chamber and in this country. More importantly, it is also the right thing to do.

I urge the defeat of this amendment and support for the proposal of the Appropriations Committee.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, first I want to congratulate the gentleman from Delaware, Mr. TOM CARPER, who just took the well for his well-thought-out and responsible statement. It is not easy to stand here on the floor and fight for foreign aid. The easy thing to do is to cut foreign aid.

I read the debates going back to 1948, when we had the Marshall plan, and then we had the Truman plan, and the Turkey-Greece plan, and that was a bitter debate with some of the same arguments that are used today by my good friend from Youngstown, and my dear, beloved friend from West Virginia. They were the same arguments that were used at that time.

There is no free world, because it costs money. It costs money to promote peace and democracy.

Yes, we spend billions and billions of dollars for war and yet, when we have a much smaller amount here for peace you want to cut them. I cannot believe it. I really cannot believe it. It must be that something happened this morning to my good friend from West Virginia, because I usually agree with him. I do not agree with him here.

The amendment the gentleman offers here today snatches defeat from the jaws of victory. The victory in Panama, as the gentleman from Delaware said so well, the victory in Nicaragua. Not once, not once did I ever vote for a nickel of money for the Contras, and I took a lot of heat from my administration on that. Now through peaceful means we stuff it to Ortega, stuff it to Ortega through the ballot box, and we have democracy, and here are these people now looking for a transfusion. That is what they want. They are lying on their backs down there in Panama and Nicaragua looking for a transfusion. This amount that we have here is a transfusion that is going to keep democracy alive in Panama and Nicaragua.

Do not deny them that transfusion. It would be a big mistake, and I hope the amendment offered here by the gentleman from West Virginia is defeated on a voice vote. Let us get on to the other amendments.

Mr. MURPHY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from West Virginia. We have heard many emotional remarks made about our neighbors in Central and South America. But the basic question we are being asked here today is in addition to the billions of dollars that were appropriated by this Congress just a few months ago for foreign aid, we are now being asked to spend another billion-plus dollars in foreign aid.

We can be told that it is offset, that it is transfers from defense. If it is transfers from defense, why did the very Members who are here arguing for this expenditure today argue just as vociferously and convincingly, I

might add, a few months ago that our national defense needed this billion dollars and, therefore, it was to protect our country that this billion dollars was there? But today we find a way not to transfer it to our neighbors to the south, and to the north, and to the east and to the west.

If they think it is just pennies, it is $1 billion. If they would like to offset or transfer the money, why not take it out of the $20 billion spent last year for foreign aid? Take some from our other neighbors who perhaps do not need it as much as Nicaragua or Panama.

Let us talk about the kind of a transfer instead of transferring it out of our defense for their economic promotion.

We in Pennsylvania, West Virginia, and Ohio know what the Marshall plan brought us: steel mills in Europe, auto plants in Japan. We know what those foreign programs bring us, and that is what it will bring us, textile mills in Central America, electronics plants. That is what this will bring us, not peace and harmony. We do not buy friends, my friends, we earn friends. We do not buy them with dollars.

I say that if we are to transfer this money and it is not needed by the military, why do we not pay a little bit of our debt? We owe $3 trillion to bond holders around the world. Why do we not put that $1 billion toward that debt?

We are talking about a budget now that we cannot reconcile this year to meet Gramm-Rudman targets. Let us throw that $1 billion in and maybe it will help us reconcile it.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield 15 seconds to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. I will just say to the gentleman, if I can say it that quickly, by helping to rebuild the economies of these countries, as happened in Europe, what we do is provide people who have an economy, an ability that allows them to be customers and to buy products from the gentleman's district and from my district. That is what we do.

We also enable ourselves to live and our constituents to live in a more peaceful world.

When I was growing up in Oklahoma City we had bomb shelters across the street in the backyards of my neighbors' houses. My reporters back home like to ask when something like this happens: "Well, what does it mean for Oklahoma?" It means the same thing for Oklahomans as it means for Pennsylvanians. It means a more peaceful, more stable world, and that is for all of us.

Mr. MURPHY. If the gentleman wants to talk about giving them the purchasing dollar, how about the unemployed and the homeless in the United States? Let us do something for them with this $1 billion. Let us give them some purchasing power.

How about the underemployed, the young, the old who have to worry about their cost of living on Social Security? If we want to do things to help improve the economy for America, there is no better place to start than right here at home.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Ohio who has been chomping at the bit.

Mr. TRAFICANT. Mr. Chairman, I would like to say maybe more Members should visit districts like the Pittsburgh area or West Virginia areas or Ohio area, the Rust Belt area, and maybe they will find they might be inclined to try to promulgate a program that might make a few more consumers out of people there who have no health insurance, are out on the street without work, their unemployment has run out, they are not technically listed as unemployed, but for some reasons Members do not discuss it.

As I hear the debate today, so help me God, I am under the impression that the amendments brought by the gentleman from West Virginia are going to endanger our liberty and our Constitution, no less.

I want to identify myself with the gentleman in the well today who has been here for many years fighting for those causes, and I support and identify with his remarks.

Mr. MURPHY. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from West Virginia [Mr. RAHALL].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. RAHALL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 38, noes 379, not voting 16, as follows:

[Roll No. 61]

AYES—38

Alexander	Jontz	Rahall
Applegate	Kanjorski	Roth

Feighan	Neal (NC)	Whittaker
Flippo	Nelson	
Ford (TN)	Schuette	

□ 1500

The Clerk announced the following pair:

On this vote:

Mr. Stump for, with Mr. Nelson of Florida against.

Messrs. WOLPE, HUGHES, and SHARP changed their vote from "aye" to "no."

Messrs. KASTENMEIER, STARK, CONYERS, HALL of Texas, and FIELDS changed their vote from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

□ 1450

Mr. OBERSTAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to raise a question of clarification about the language in the bill dealing with funding for Haiti.

The gentleman from Wisconsin [Mr. OBEY] has responded to a very critical need in Haiti for assistance with language—and I will not go through the specifics of it—which provides $10 million for development assistance for Haiti. I just want to clarify that this language directs AID to reprogram not less than $10 million for other development assistance accounts for Haiti, and that this funding is above and beyond the current level AID is planning to spend for Haiti for this fiscal year; is that correct?

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, the answer is yes.

Mr. OBERSTAR. Mr. Chairman, I would also like to inquire whether it is the chairman's intention that this additional funding not come out of funding for other Caribbean nations.

Mr. OBEY. Well, I do not think there is much money for Caribbean nations out of which it could come.

Mr. OBERSTAR. Mr. Chairman, there is a further point of real concern that I have, and that is the restrictions on the use of funding for Haiti. Current law prohibits United States financial assistance to the Government of Haiti until that government restores its 1987 constitution. That language could have the effect of denying funding for the transitional government of President Pascal-Trouillot because the Haitian Constitution will not be fully restored until they have a democratically elected civilian government in place.

The question is, given the urgency of the situation, with the reality that Haiti is moving toward elections under this interim government, will the transitional government be able to receive assistance under this supplemental appropriation bill?

Mr. OBEY. Mr. Chairman, if the administration can find the money, I would expect so.

Mr. OBERSTAR. It really ought to be the intent of Congress to provide that kind of assistance, and it ought to be the intent and purpose of the administration to reprogram at least that amount of money to get Haiti through this transitional period, or there may be no government and there may be no economy left in Haiti upon which to base another government on democratically held elections.

Mr. Chairman, I appreciate the gentleman responding to the limited circumstances under which we operate. I understand the urgency of the needs, and I urge the administration to respond with the full authorities they may have in order to help Haiti through and into what may be the beginnings of a real democracy under the elections that are now scheduled.

Mr. OBEY. Mr. Chairman, I agree with the gentleman.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman from Wisconsin [Mr. OBEY].

AMENDMENTS OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer amendments. I ask unanimous consent that amendments Nos. 2, 5, 8, 11, 15, 19, 23, 27, and 30 be offered en bloc, and I further state that they represent a 5-percent reduction in appropriation and amounts listed by dollar values to the bill.

The CHAIRMAN. The gentleman from Ohio [Mr. TRAFICANT] asks unanimous consent that amendments Nos. 2, 5, 8, 11, 15, 19, 23, 27, and 30 be offered en bloc.

Is there objection to the request of the gentleman from Ohio?

Mr. CONTE. Mr. Chairman, reserving the right to object, let me state that I do not have a copy of the amendments. How do I know whether it is 10 percent or 5 percent or 3 percent?

Mr. TRAFICANT. The amendments have been delivered to the desk.

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Ohio?

Mr. CONTE. Yes, I yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, the amendments have been listed and given to the desk, and they represent a 5-percent cut in the dollar values listed by that dollar amount in the categories that start with paragraph 1 and proceed through page 10, line 9, and proceed through page 14, line 9. This would be in essence a 5-percent cut to all those dollar amounts listed in the bill.

Mr. CONTE. Mr. Chairman, continuing my reservation of objection, I am asking counsel, and nobody here has the amendment. I am trying to get someone here to tell me whether it is 10 percent, 5 percent, or 3 percent. There are 32 amendments here.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield further?

Mr. CONTE. I yield to my friend, the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, I listed them by number, and the ones listed represent a 5-percent cut by dollar value in the paragraphs of the bill covered from page 10, line 9, through page 14, line 9.

Mr. CONTE. Mr. Chairman, I will just have to take the gentleman's word, because I am not getting any satisfaction.

The CHAIRMAN. Let the Chair restate the request of the gentleman from Ohio [Mr. TRAFICANT]. The gentleman from Ohio has asked unanimous consent to offer en bloc the following amendments that he has placed at the desk: Amendments Nos. 2, 5, 8, 11, 15, 19, 23, 27, and 30.

Is there objection to the request of the gentleman from Ohio?

Mr. EDWARDS of Oklahoma. Mr. Chairman, reserving the right to object, if I may have the attention of the gentleman from Ohio, I would have a hard time explaining to the folks back home that I took a position on amendments Nos. 2, 5, 8, 13, or whatever those numbers are. Can the gentleman tell us what is included in these amendments? Is it an across-the-board cut? Does it include everything in the foreign aid section? Does it make exceptions? If so, what exceptions are made?

We cannot be expected to go along with it, not knowing what is offered.

The CHAIRMAN. The Chair will ask the Clerk to report the amendments at this time.

The Clerk read as follows:

Amendments offered by Mr. TRAFICANT:
Page 10, line 21, strike out "$1,609,671,408" and insert in lieu thereof "$1,529,187,838".
Page 11, line 6, strike out "$75,000,000" and insert in lieu thereof "$71,250,000".
Page 11, line 16, strike out "$25,000,000" and insert in lieu thereof "$23,750,000".
Page 12, line 4, strike out "$500,000,000" and insert in lieu thereof "$480,000,000".

Page 14, line 20, strike out "$25,000,000" and insert in lieu thereof "$23,750,000".

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio that the amendments be considered en bloc?

□ 1510

Mr. EDWARDS of Oklahoma. Mr. Chairman, continuing my reservation of objection, as I understand, the gentleman from Ohio [Mr. TRAFICANT] makes reductions in parts of the bill, including the housing guarantees, but does not make reductions in the money for the eastern Caribbean or for sub-Saharan development assistance.

Is that correct? Am I reading correctly what the gentleman from Ohio is saying?

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Ohio.

Mr. TRAFICANT. No, Mr. Chairman. Amendment No. 30 includes the sub-Saharan appropriation.

Mr. EDWARDS of Oklahoma. Then the gentleman from Ohio [Mr. TRAFICANT] is excluding what, only the eastern Caribbean?

Mr. TRAFICANT. Yes, that Hugo account.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. OBEY. Reserving the right to object, Mr. Chairman, is it my understanding that if the request of the gentleman from Ohio [Mr. TRAFICANT] to have these amendments considered en bloc is accepted, he will then not intend to offer any specific section-by-section amendments?

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, if they are allowed to be offered en bloc and are defeated en bloc, the only other amendment I will bring will be a 3-percent cut in the same categories across the board.

Mr. OBEY. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. TRAFICANT. Mr. Chairman, I have heard some conversations earlier about Nicaragua, and I would like to say this on the record. "Please somebody, take Nicaragua." I think we have talked about Sandinistas enough.

A 5-percent cut, is a very frugal cut to an amount that probably should be cut much more.

I am not going to really take the heat of the House. I understand I am un-American, I am a demagog, I am understanding all that, and I understand that anybody who might vote for this is a phony who just wants to go back to their district and pound the pavement with their great efforts.

Mr. Chairman, let me tell my colleagues that after the first debate I am thoroughly convinced that by voting for the amendment of the gentleman from West Virginia [Mr. RAHALL] that I have literally cast doubts on America's future liberty and freedom. What a dastardly deed, to consider whacking out the foreign aid in this bill. And we all knew it was not going to pass.

So, we are talking about a 5-percent cut, and keep in mind that we keep asking the American taxpayers to bite the bullet every year. They have bitten the bullet so much that we had to legalize armor-piercing bullets so that they would have something a little tougher to digest.

Panama. I know, General Noriega, they had him captured. We did not go in to save him. They lined those liberators up and shot them in the back of the head. It would have cost America nothing to get him, nothing, no lives. We turned our backs. We went in, fine, and I agree with the President under those circumstances.

The bottom line is: My amendment, instead of giving Panama, giving Panama, $420 million, we will make available $399 million. No one has offered Ohio, Pennsylvania, West Virginia that kind of money. We cannot even get an EDA bill out. An Economic Development Administration bill in America is only $220 million, and we cannot get it out.

The Nicaragua account would be taken from $300 million to a pittance, only $285 millon. Now Nicaragua is really going to be hurt.

Israel, for housing guarantees; and I have not seen any housing for my district, from $400 to $380 million. There is still $380 million in this appropriation bill.

Mr. Chairman, it goes on, and on and on.

Now everybody talks about cutting the deficit around here, budget problems. I say, "I'm not going to vote for another cut for kids, students, parents, housing, education, infrastructure, American programs, not one more. You can label me whatever you want."

Mr. Chairman, they call me so many names that I respond to everything, but I am not going to continue to vote for this, and, if we cannot cut this thing 5 percent—and I had a 20 I could have brought, a 10 I could have brought, but I do not want to waste my colleagues' time. And, if I am wasting my colleagues' time with 5 percent, then let me tell them, "We don't need a chaplain, we don't need a Speaker, We need a shrink."

A 5-percent cut.

Mr. Chairman, I know that I cannot reserve my time, but I would like to ask all those who bash on me to give me a couple of seconds to bash at them because I have just been recognizing one fact. I, with a lot of others around here, have a new title. We are called the whipee, and we do not like it, and we are tired of seeing the money going all over except to America.

Mr. Chairman, when I asked for a half a million dollars for a water tower, that was pork barrel, busting the bank. I asked for a study that could provide drinking water in the city of Youngstown which is decimated by the loss of the steel mills that left us toxic waste.

Do my colleagues know what I was told?

"What are you talking about? We do not have money for that."

However, Mr. Chairman, we seem to find money from all those nooks and crannies for everybody all over the world, and I do not like it.

So, if I am a demagog, I am guilty. But I want to vote on the issue. Let us record the vote, and I would like to see somebody in this House send out a notice like we get through the mail saying, "Your Member voted for this. What a dastardly deed it was." I would like to see someone send out this one saying, "Your Member voted for or against this."

Mr. Chairman, I have heard about how we are transferring Peter to pay Paul, how we are being so good about it. We did not transfer this money to help America, in my opinion, one bit.

We had the Marshall plan, we had NATO, foreign assistance plans. We have the chapter 11 plan. They come over here after the war. We let them take pictures. We send them blueprints. Now they have the factories, we have the blueprints, and I am on the floor asking for a 5-percent cut.

Mr. Chairman, I am embarrassed by the cut.

Mr. ROTH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this is an important amendment. I think 5 percent is a good deal of money.

Benjamen Franklin said, "Little holes will sink a big ship."

If the American people were voting here, they would not be voting for this amendment or this bill. Yet, we are told that it is easy to vote against foreign aid. That is rubbish. Take a look at the last vote. It is not easy to vote against foreign aid.

Every law office here in Washington represents some foreign government, and at some point, we have to display some intellectual integrity in this body. We do have to consider the people we represent if we are truly representing the people who voted for us and put their trust and confidence in us.

Mr. Chairman, this bill shows why the American people are fed up with Congress. The real fiscal deficit is running unabated at about $200 billion a year, yet, there are still some in this Chamber who want to keep scattering taxpayers money around the world turning Uncle Sam into Uncle Sap.

Let us just stop for a minute and think about what we are doing. We are about to vote to spend almost $1 billion in what is called the dire supplemental. This bill, however well intended, is spending $870 million out of our hard-working taxpayers' money to give to other countries.

□ 1520

I do not think that is fair to the people we represent. We all know that this bill was rushed through the Appropriations Committee and there is an effort to rush it through this Congress. After all, it is called dire appropriations. Never mind the dire emergency of our own budget deficit which threatens our economic health and mortgages our children's future. Never mind the dire emergency in law and drug enforcement which threatens the safety of our streets and our neighborhoods. Never mind the dire emergency of an educational system which in some places is years behind that of other countries. Our children will face difficult times and international competition. That's when we should focus our attention.

At some point, my friends, we are just going to have to say no, that business as usual is not going to work.

This is really a sham, and I think we all know that it is a sham.

The Congress absolutely must take responsibility and treat the American taxpayers fairly. Part of that responsibility is not to vote to appropriate unauthorized spending.

I hope that my colleagues will join in putting a stop to this practice.

This legislation is the kind of old thinking, the kind of atrophied thinking that will help to bring down a great power. It saddens me.

I want America not only to be a great power in the 20th century, but also in the 21st century.

The conflict we are in today is not a military conflict, but an economic conflict. We are totally unarmed for that conflict. I know it is difficult to vote against foreign aid, but at some time we are just going to have to stand up and say that we represent the United States of America and we represent the future of our country and we have to ensure the future of our country. This type of legislation brings our country to its knees. This type of legislation does not promote the image we want in the world, as a cow to be milked. No, we are a strong horse in America, willing to pull our own load, but not a dairy cow to be milked.

Mr. RAHALL. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment of the gentleman from Ohio. The position he has taken here is a rather moderate position and a responsible position, especially in comparison with the previous attempt and the number of votes that I received as reflected therein.

Mr. Chairman, I think what we have seen here today is the first real debate on the floor of the House about how we should direct the so-called peace dividend. The Appropriations Committee bringing this bill to the floor of the House has proposed that the money to finance the struggling democracies in Nicaragua and Panama come from rescissions in defense spending. That is very noble.

The opponents, those of us who are trying to make cuts or eliminate this foreign aid, will label us as uncaring about our responsibilities as a major world power, uncaring about the struggling democracies in Eastern Europe, uncaring about what is happening on our southern border with a friendly government in Nicaragua. We have been accused as throwing in the towel and not being willing to carry through with our responsibilities in these areas of the world.

Lest those who voted with me on the last amendment be misconstrued, let it be understood that I am not opposed to helping Panama. I am not opposed to helping Nicaragua. I am not opposed to helping many of the areas in which this bill seeks to help in the foreign arena. What I am saying is the peace dividend as proposed in this pending legislation should come home first to America, should come home to America first; be it deficit reduction, be it domestic spending or whatever, and then let us look at using amounts already allocated under our current foreign aid program, the $14 billion or $15 billion a year we already have allocated for foreign aid, much like the minority leader of the other body has proposed, let us look at that account and distribute that among our new friends around the world and help them develop democracies. It will be that account, rather than through the peace dividend account.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I am glad to yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I would just say, since the gentleman has the floor and is making a very rational proposal, perhaps he would like to spell out for the Members exactly where he wants to take the money from.

Mr. RAHALL. Well, I will reclaim my time. I would just say that over the entire foreign aid budget, I believe modest reductions can be made in that program in order to help Panama, in order to help Nicaragua, and in order to help the struggling democracies. I do not think it is necessary to point the finger at any one category. Let us take it across the board from the entire foreign aid program. That would be a proposal I think would be more responsible than what we are seeing in this pending proposal.

Mr. GINGRICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that we have an opportunity this afternoon that is a very legitimate one to talk honestly among ourselves about why we are trying to pass this bill.

It is perfectly reasonable for those who think you can isolate America to vote for this amendment. It is perfectly reasonable for those who think that chaos in Central America will not affect us to vote for this amendment. It is perfectly reasonable for those who do not want to have Panama help us fight the drug dealers to vote for this amendment. It is perfectly reasonable for those who are prepared later on to accept the immigrants who are going to come to the United States when they cannot find any economic prosperity in their own country to vote for this amendment.

But let us not kid ourselves. The President of the United States, focusing on two countries in our own back yard, Panama and Nicaragua, countries with which we have been deeply engaged, is asking for some immediate help. The Democractic leadership of this House has gone out of its way to be responsible.

This is a serious and responsible bill. It is offset against defense spending so nobody has to go home and say they raised the deficit by a dime. It is a serious, responsible, adult effort on a bipartisan basis.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I am happy to yield to the gentleman from Ohio.

Mr. TRAFICANT. Am I interpreting the gentleman and his comments to suggest that a 5-percent cut to this foreign aid supplemental chapter in this bill is tantamount to being an isolationist in this body?

Mr. GINGRICH. Yes.

Mr. TRAFICANT. Can I interpret the gentleman's statement to be just that? Would the gentleman please explain and amplify it for me.

Mr. GINGRICH. Let me claim my time back, and I will be glad to say yes.

I am saying that an amendment which would guarantee that thousands of farmers in Nicaragua would not be able to plant, that we would not be able to help them, is explicitly an amendment that says to those farmers, "Why don't you see if you can join your cousins in the United States?"

I am saying explictly to my friend, the gentleman from Ohio, whom I am sure does not mean to have this happen, that this amendment only makes sense if you think isolationism will work, that if you think the United States is bound economically and bound in terms of police activities and narcotics and bound in terms of freedom to countries, which remember, we are not talking about some distant country across an ocean. We are talking about countries which are 2 and 3 days' drive from the United States. We are talking about countries on the same continent, countries where people can walk north. We are talking about in the case of Panama, a country which is actively helping us fight the drug trade and has been very helpful in the past 3 months in stopping drug dealers and in giving to us bank information to cripple the cocaine dealers from Colombia and Peru; so I am saying to my friend, who I know means well by this, I am saying to the gentleman that the effect of his amendment, which is not trivial, $6 million less for fertilizer, agricultural equipment, and spare parts, things by the way which come from the United States in all probability; $3 million less to help refugees and to demobilize the Contras through international organizations; $4 million less for economic development, including medical equipment and health training in Nicaragua; these are not small things.

I am saying that the gentleman's party's leadership and my party's leadership in a responsible adult way made a serious commitment to help our neighbors, and that to try to disrupt that commitment I think particularly since the money is offset and is not adding to the deficit is I think not a responsible position.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I want to comment on that last point, and that is that we are not talking about a runup pile appropriations bill. I have moved more Bow amendments percentage across-the-board cuts probably than any man in this Chamber, and I will continue to move them. I have never moved them on a dire emergency supplemental where we are supposed to be in an emergency status, nor have I ever moved one against a bill where all of the BA has been offset, and I think that by moving that kind of amendment we make a real mistake in what most of us believe is a serious emergency.

I thank the gentleman for yielding.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from Ohio.

Mr. TRAFICANT. I think about all the fertilizer in this bill could be helping American farmers, rather than Nicaraguan farmers. I think all we have to do is ship over copies of the CONGRESSIONAL RECORD and it will probably make good fertilizer for Nicaragua.

□ 1530

The gentleman is saying that I am an isolationist. Instead of giving $300 million to Nicaragua, we would be giving, and listen to my language, giving $285 million. The gentleman is trying to make it look like an investment.

If that $15 million is isolationism, then we are all the Jolly Green Giant.

I do not buy the gentleman's argument, and I think the American people do not buy that argument either.

The CHAIRMAN pro tempore (Mr. LEVIN of Michigan). The time of the gentleman from Georgia [Mr. GINGRICH] has expired.

(By unanimous consent, Mr. GINGRICH was allowed to proceed for 2 additional minutes.)

Mr. GINGRICH. Reclaiming my time, let me say this in summary to my friend from the Mahoning Valley: The Panamanian Government has been actively helpful to us in fighting drug dealers. They have turned over documents. They have helped us sort out Noriega's relationships. They have cut off the flow of cocaine that was coming through Panama, they have stopped the sale of explosives which may well have been the major source of explosives in Colombia for the drug dealers to use in their civil war.

We have now a choice in the next few minutes. We can vote yes and say to the Panamanian Government trying to be a democracy, trying to stop the flow of narcotics that, "American Congressman do not mind cutting away at you even when you are helpful," or we can vote no. We can join President Bush. We can join the Democratic leadership. We can join the Republican leadership. We can act as mature, responsible citizens who understand that whether it is narcotics or immigration or helping democracy or national defense, to turn our back and capriciously cut without any knowledge of the impact in the region is, in fact, not a mature decision, and so I would urge all of my colleagues on both sides to decisively defeat this amendment and send the word that on a bipartisan basis America will help its friends.

Mr. McHUGH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Georgia.

I, for one, do not question the integrity or the sincerity of the gentleman from Ohio. Moreover, as politicians, we all recognize that the sentiments he and others have expressed do reflect in large measure the sentiments which we hear in our town meetings and in other sessions with our constituents. I do not think what the gentleman is offering or suggesting is out of sync with many of the sentiments of our people back home.

For that reason, the easiest thing in the world is to vote for this amendment which would cut foreign assistance. But I think it is important for us and our constituents to understand that foreign assistance has been cut. If we go back to 1985, we were spending about $20 to $21 billion on foreign aid. Under the leadership of the gentleman from Wisconsin and the gentleman from Oklahoma, our subcommittee and the full Committee on Appropriations has cut foreign assistance from that level back to $14.5 billion. It represents roughly 1½ percent of our entire budget.

We could wipe out foreign assistance entirely and not have any significant impact on our deficit or our economy.

I concede that if the 1½ percent we are spending on foreign assistance is not well spent, if it has no direct connection with American interests, we should not spend one dime of it, and I am sure that all of us here would agree with that, but the question on this amendment and the question on this bill is whether the assistance that we are calling for here, a small amount of assistance, offset entirely by cuts in the defense budget and, therefore, having no impact on our deficit, is this assistance directly related to American interests?

I think it clearly is. Regardless of what one thinks of the policies of the 1980's in Central America, and we have had some very hot debates on that in this Chamber, the fact of the matter is we have an interest in Central America. We have an interest in stability. Our policies have been to become active and interventionist in Central America, and the fact is that imposes upon us some responsibility.

I think the leadership on both sides of the aisle, I think the President in cooperation with the leadership has taken a constructive position.

I think it would be embarrassing if this country and if this Chamber were to cut assistance to Nicaragua and Panama after we have conducted the kinds of policies we have in those countries during the 1980's.

I think that while the gentleman's amendment is certainly well intended, I think it would be an irresponsible thing for us to adopt.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I am happy to yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Chairman, I just want to suggest that over that period of time we have housing and education in America, and there are 37 million people in America with no health insurance. We keep saying we cannot find the money, folks; now look, we have to find it somewhere, and I am just offering a little suggestion on an account that I think can be cut.

Mr. McHUGH. Reclaiming my time, I would say to the gentleman that 98½ percent of our budget is spent on non-foreign assistance accounts.

I agree with the gentleman that we have priorities, more important priorities, in housing and health care, and I join with the gentleman in attempting to deal with those more effectively.

By adopting the gentleman's amendment, however, we are not going to do one thing to advance the interests of health care or housing or the other items he and I both agree are needed in this country.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I am happy to yield to the gentleman from California.

Mr. LEWIS of California. Mr. Chairman, I want to associate myself with the gentleman's remarks.

I think it is very important for both Members of the House and the public, as well, to know that we are really talking about a bill here in terms of our total approach to foreign aid that involves less than 2 percent of our total budget.

The way the rhetoric flows on the floor, we often communicate to people that maybe we are spending 10 or 15 percent of our budget in that area. The fact is a very small percentage of our budget goes to foreign assistance, and that is because of the bipartisan work that has been done by the chairman of our subcommittee, the gentleman from Wisconsin [Mr. OBEY], the work of the gentleman from Oklahoma [Mr. EDWARDS], and the gentleman from Massachusetts [Mr. CONTE].

Indeed, this is a bipartisan approach that says that America has a role to play in the world, indeed, a small piece of our total spending. But we must, if we are going to do more than pay lip service to freedom in the world, be willing to put some of our money where our will as well as our mouth is.

Mr. McHUGH. Reclaiming my time, I thank the gentleman for his comments, and I urge my colleagues to reject the amendment, to enable us to meet our responsibilities in Central America.

We are a large, powerful, influential country. We are seeing changes in Eastern Europe in part because of our leadership. It would be wrong to adopt this amendment.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have heard a lot of flat-headed and flat-Earth speeches on this House floor in 21 years. Today is the 21st anniversary of my being sworn in into this body.

Mr. Chairman, I have to tell the Members that I have heard an awful lot of unconstructive, easy-way, cheap-shot speeches during my time here, but there have been very few days when I have heard as many of them in a row as I did today.

I would like to recite some facts. As the gentleman from New York indicated, in 1985 the foreign aid bill was $18.5 billion. Today it is $14.6 billion.

I do not think we have to apologize to anybody in terms of our having the good sense to very carefully review the budget requests of the last 5 years of Republican Presidents before we have made prudent and very large reductions in the foreign aid account.

This bill happens to take one-third of 1 percent of the amount that we spend on the military budget in any 1 year, it says we are going to take one-third of that 1 percent and move it into foreign-assistance programs instead of military programs.

I am amazed at the number of flat-headed Members in this House who will be all too happy to spend whatever it takes for whatever American-financed war is going on around the world, but would not spend a penny to prevent the necessity to fight those wars in the first place.

I noticed, for instance, that on the last rollcall, three members of my own State delegation voted to eliminate all of the foreign aid funding in this bill. Those same three Members, I would note, voted to provide $100 million in aid to the Contras.

How long is it going to take before we learn that if we want to avoid the necessity to go to war, we need to provide some of the weapons that can encourage the economic development and the political stability that can help this country avoid having to take that next step?

□ 1540

We have financed—not me, because I did not vote for it—but a lot of people who voted for that previous amendment did, have financed an armed effort in Nicaragua for the last 10 years. That has cost money. That has cost lives.

The President is now asking us to recognize that we have an opportunity to pick up the pieces in Nicaragua by providing enough economic assistance to get that economy moving again so that we can try to stabilize that country after a very long 10-year period of turmoil.

The President is asking us to do the same thing with respect to Panama. After a misguided series of actions on the part of administrations for the last 14 years, we are finally in a position where we can try to build a Panamanian society free from the kind of overbearing military control that led us to the necessity to invade that country in the first place. I think that is worth the investment.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. OBEY. No, I will not.

I would suggest that it is an ignorant and a gutless response to our responsibilities to this House when we continually find the easy road and the cheap road every time an issue like this comes up. There are some Members of this House, thank God a small minority, whose motto seems to be, "I will never cast a tough vote; I will also cast the easy one."

I think when you do that, you fundamentally—well, I will not say that. It might edge me nearer the edge of the rules of the House. But I do think that we owe our constituents more.

The CHAIRMAN. The time of the gentleman from Wisconsin [Mr. OBEY] has expired.

(By unanimous consent, Mr. OBEY of Wisconsin was allowed to proceed for 1 additional minute.)

Mr. OBEY. I think we owe our constituents more than to pander to their every doubt, to pander to their every concern about dollars spent abroad.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. OBEY. No, I will not.

Mr. ROTH. You are referring to me in your debate.

Mr. OBEY. I did not refer to anybody by name.

Mr. ROTH. You referred to three of the Representatives from Wisconsin.

Mr. OBEY. There were four. Are you sure you were in that group?

Mr. ROTH. Yes.

Mr. OBEY. Count again.

Mr. ROTH. Yes. I was happy to be in that group of the gentleman from Wisconsin. Will the gentleman yield?

Mr. OBEY. No, I will not.

Mr. Chairman, I am asking for order. I want to complete my statement.

The CHAIRMAN. The gentleman from Wisconsin [Mr. OBEY] has the time.

Mr. OBEY. The fact is the President has asked us to put politics aside, to put the gutlessness aside, and to support something which is in the interests of the United States and every single one of its taxpayers. What you ought to do is turn down this amendment and all others like them and to deliver what we promised we would deliver to the President of the United States.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to address not only some of the comments of the author of this amendment, the gentleman from Ohio [Mr. TRAFICANT], but of some of the people who have spoken in support of it.

We are told that this is an inconsequential amount of money and that it is not really going to make any difference, so why do we not cut it?

A 5-percent cut in the amount that is allocated to the petroleum program for Nicaragua, people who have just fought through a war, a bloody war, bloody on both sides, to secure their independence and their democracy, a 5-percent cut translates into the entire oil consumption of that country for a week.

A 5-percent cut in the amount that is allocated for health services in Nicaragua results in 25,000 children being deprived of oral rehydration treatment, in a country where the mortality rate is 7½ percent.

A 5-percent cut in the money allocated to the private sector would result in 100 fewer American jobs as a result of the cut in United States exports to Nicaragua.

I would say to the gentleman from Ohio [Mr. TRAFICANT] who offered this amendment, this is not a 5-percent cut. The amount of money that was originally asked for for Panama was $500 million. It has already been cut. We did that job. It has been cut from $500 million to $420 million.

Now the gentleman wants to take it down by another $21 million. You do not have your numbers right.

If every Member who got denied by the House the opportunity to get something for his district came to the floor of the House and said, "Therefore, I am going to cut out a program that is for the benefit and welfare of the people of the United States because I did not get something for my district," then the people would have reason to wonder why they sent us here in the first place.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I will not yield. The gentleman has had plenty of time.

I will say to the gentleman from Wisconsin [Mr. OBEY], whom I sometimes find myself in disagreement with, and to the gentleman from Wisconsin [Mr. ROTH], whom I usually find myself in great agreement with, today you have got it backward. Because Mr. OBEY is right, and Mr. ROTH, you are wrong. You are wrong in terms of the effect of what this would do to our security.

Somebody said this bill shows why people are fed up with Congress. No, it does not. This amendment shows why people are fed up with Congress, because we are looking at the little bitty, "Did I get mine yesterday," not what secures the cause of peace and freedom and democracy in the world. We are expected to have vision, foresight. We are expected to take care of the security of the people, not play little petty games to get our names on the front page.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I will yield to the gentleman from Wisconsin, since I mentioned his name.

Mr. ROTH. Mr. Chairman, I have always been told that when people lose an argument they start employing ad hominem arguments. They get personal. I do not know why people are getting personal on the floor. Why not stick to the merits? All we are saying is that we oppose this amendment. Our contention is that the American people are not in favor of the legislation being debated here today. That is why Congress is held in such disrepute today, because we are not following the people's wishes. We mention that the House of Representatives must represent the American people.

Mr. EDWARDS of Oklahoma. Mr. Chairman, let me resume my time. If the gentleman from Wisconsin [Mr. ROTH] knows that the American people are not in favor of supporting the government that is now helping us to wipe out the drug trafficking that was a part of the Noreiga regime, if the gentleman knows that the people of America do not want to provide support to Violeta Chamorro and her government to solidify democracy in a nation that has been under the heel of repression for years, the gentleman knows more than I do and knows more than anybody in this Chamber does.

As I pointed out earlier in addressing the gentleman from Pennsylvania, I remember when we had bomb shelters across the street. I remember when every night you wondered what was going to happen with the threat from the Warsaw Pact. We said if only we could create a spread of democracy and freedom in the world, so that our children could sleep at night peacefully.

Now we have the chance to do it. Let us not play tiddlywink games with it.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from California.

Mr. LEWIS of California. Mr. Chairman, I appreciate the gentleman from Oklahoma [Mr. EDWARDS] yielding, and I hope the rest of my colleagues will appreciate his work as well. Between the gentleman from Wisconsin [Mr. OBEY] and the gentleman from Oklahoma [Mr. EDWARDS], we have been through a very, very tough process here. Our subcommittee went item by item and cut this measure very, very significantly. But the bottom line was would America be willing to give support to freedom and democracy in Nicaragua and in Panama or not?

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. EDWARDS] has expired.

(By unamimous consent, Mr. EDWARDS of Oklahoma was allowed to proceed for 2 additional minutes.)

Mr. LEWIS of California. Mr. Chairman, will the gentleman from Oklahoma [Mr. EDWARDS] continue to yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from California.

Mr. LEWIS of California. Mr. Chairman, I must say that in those subcommittee hearings, time and time again we went through the process of how much money can we afford to give for freedom and democracy in our own hemisphere. The bottom line here is the American voice is being heard. We are going to support those people who fought for freedom in Nicaragua. In Panama we are going to insist that we continue to fight those who traffic drugs to our society, those who want to demagog the issue of foreign aid for the sake of it with no understanding at all of the process we have been through, and let them have it. But today's vote is a vote for democracy in our region, and I hope Members will support it.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I thank the gentleman from California [Mr. LEWIS] for his very good comments. Let me just remind every Member here, there is no money in this bill. It is a transfer. It is an offset. We are not spending more money for foreign aid, and anybody who tells you that this is a vote to appropriate additional money from the taxpayers' pockets is simply deceiving you. That is not true. Every penny in here is offset.

I want to compliment the gentleman from Wisconsin [Mr. OBEY], the chairman of the subcommittee, for the good work he has done on a very important appropriation.

□ 1550

Mr. APPLEGATE. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I am really surprised at the low road that this debate has taken and the personal attacks. When

I see a Member get up here and he refers to gutlessness, and he refers to the ignorance, and the cheapheads and the flatheads and the cheap-shot speeches, I think that is below the dignity of a Member, and particularly a chairman. I think it is wrong.

Why do we not get up and talk about the merits of what it is we are here to discuss? The Member from Ohio gets up, my colleague, and he is only offering a 5-percent reduction. I remember over on the other side over the years when CLARENCE MILLER used to get up and offer a 5-percent and 2-percent cut all the time, and nobody got up and said he was making a cheap shot or anything like that. Members have the right after listening to the debate to either vote yes or to vote no.

I support the gentleman from Ohio and his amendment for a 5-percent cut. I am not sure what it amounts to, $143 million or whatever it is, maybe not a whole lot of money, and I do not think that it is. I do not think that it cuts out a lot of money to the countries that are going to benefit from this bill.

But it sure is a hell of a lot money when it comes back to Americans who need it, back into my district, yes. I will say to the gentleman over here who was talking about, "Yeah, your own particular district," sure, it is my district. Why would I not be up here talking and fighting for my district? I have people in my district who are hurting. I have people in my district who come into my office and they are crying, they have tears coming down their faces because they are out of work, they do not have clothes on their back, they do not have enough to feed their families or to educate. They cannot get into a hospital to take care of the health of their children.

The gentleman says yes, this money is not necessarily going to go to them. Where is it going to go? Why would it not go to them? Why do we not just reappropriate it and bring it back, and give it to them, and put it into the pockets of Americans in this country? They worked hard for it. Why do we insist constantly on sending money out of this country to other countries and to other workers, and yet we are taking the jobs away from our own people? We are taking the jobs away from our own people.

We have a lousy, stinking trade policy in this country. We have a tendency to blame the Japanese, the Koreans, and the Taiwanese and all of these others, and they are laughing at us because we are so dumb. The Congress and the administration, we have a lousy trade policy just because we think that we have to take care of everybody else in the world, all of the workers. Let us take care of America's workers for a change.

We have a Clean Air Act that we are rushing through because the environmentalists or somebody else wants it. We are going to clean the air with no—with no consideration at all for the fact that we are going to knock out thousands of steelworkers, thousands and thousands of coal miners and utility workers. We are going to do all of that, and why are we doing it? Because we want to pacify a certain group in this country. That is why we are doing it. We have got a $500 million study going on for 10 years and it is going to come out in the fall, and it is going to say where the problem is and what effects there have been from all of this so-called dirty air.

But no way. To hell with that study. We do not need the study. We are going to do it now. We are going to knock those guys out of work, and if we could listen to the study we could save it.

All I am saying is use common sense. Let us look out for the American worker. Let us look out for the American community. Let us look out for the homeless.

I do not even think with this amount of money that we have authorized that we could reauthorize the McKinley Act. I am not sure about that, but there seems to be some debate about that, and other programs that are necessary in this country. Why do we not use the money to do those things?

It is America for Americans, and let us stand up and say where we are.

Good. I am not against helping other people in other countries. I want to do that. We are not taking it all away from them. But let us not give away the whole store, and that is the way I view it.

I say support the gentleman from Ohio in his 5-percent amendment because it is a good one, and it is a good one for America and Americans.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, that was a very stirring speech my good friend just made. He says we have to stick to the issues and should not get into personalities.

I remember the gentleman from Ohio who offered the amendment got up and said if we did not adopt his amendment we do not need a Speaker, we do not need a Chaplain, what we need is a head shrinker in here. It takes one to know one.

I do not think anybody is crazy because they are going to vote against this amendment, or for this amendment. The gentleman is right. These things should not come up in the debate. So I will speak on the merits of the issue.

My good friend over here from Wisconsin, and he is my good friend, and always has been, says we have to do more and more for our own people, and one gentleman talked about acid rain and the clean air bill and the effects of all of these things. He gets up and he says oh, we do not do anything for our people. Do Members know what we have done for his people in 10 years? In 10 years we have provided $17.1 billion in dairy subsidies, $17.1 billion. Talk about getting milked.

God bless you. God bless you, I am proud of you.

The gentleman said something about is there a cow to be milked? Is that right—the gentleman said America is not a cow to be milked?

We have been milked, the taxpayers have been milked by $17.1 billion.

The gentleman says this cut of 5 percent is not that much, and really it is not, and he mentioned CLARENCE MILLER. Remember Frank Bow? Remember who used to fight those guys? Me, because I said a cut across the board is wrong, go in with a surgical knife and cut where you think you should cut.

Let me tell Members what this 5-percent cut would do. It would cut $43 million from the total package. Of that, $5 million would come from refugee assistance, $21 million from Panama, which has already been cut. That is on top of the $80 million cut that the committee made on Panama. Nobody talks about that. The committee cut $80 million, I say to the gentleman from Ohio, [Mr. TRAFICANT], out of Panama. They put it in Africa, and they put it in other parts of this bill. So there is a $80 million cut and nobody talks about that, and this is another $21 million on top of that $80 million.

It would cut $15 million from the new Chamorro government in Nicaragua. It would cut $20 million from the Israeli housing guarantee. This amendment would cut $3.75 million for Soviet and Eastern European Jews coming to the United States and to Israel. After working for years and years, when all of us signed letters to the Russian Ambassador, sent them over there to Gromyko and to the others, and now we are going to leave these people stranded. They are opening up the doors there, and they are going to let these people out. With this cut we are talking about more than 1,350 refugees who would not get processed. I do not think Members want to do that, I really do not.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I will yield in a little while because the gentleman is my friend, he is my friend. I am going to yield to him in a little while, but let me finish here what this amendment does.

This is the number, 1,350 refugees that are slated to come to the United States. We make a total cut for Panama of $100 million below what President Bush requested. Instead of the $500 million that was promised as

a jump start for their economy, we reduce that by $100 million. That means a dead battery, Mr. Chairman, instead of a jump start.

We would be endangering that new democratic government that more than 20 American servicemen gave their lives for. What an inauguration present we are giving to Mrs. Chamorro. Congratulations, you just lost $15 million more, you just lost part of your ability to get a crop in the ground this spring so that your small farmers might have some income. Man, will they love that milking cow, that Holstein cow, and they are wonderful cows and give so much milk, great producers, and would those farmers not love to have a couple of those cows in Nicaragua so they can milk them for their kids? They are hungry. They have bellies protruding from malnourishment. It is terrible.

I think this really shows the moral leadership by the United States. Like it or not, we are seen by many around the world as being responsible for economic chaos facing Panama and Nicaragua. Now what are they going to see?

□ 1600

Now that there are, finally, governments in these countries that want to be friends with the United States, we are going to endanger their economic and their political survival by pinching pennies here today.

Billions, again, billions for war but pennies for peace and democracy. That is all.

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Ohio [Mr. TRAFICANT.]

Mr. TRAFICANT. I thank the gentleman for yielding.

Mr. Chairman, I took a couple of shots from the gentleman, and I accept those shots because I get them all the time. But let me tell you something: Your rhetoric does not go with me today. This is a meager cut, sir—$17 billion in dairy support is helping the American people, and it is for America. Let us separate this. Let me say one other thing. There are powerful interests.

Mr. CONTE. I yield no further.

Mr. TRAFICANT. There are——

Mr. CONTE. Mr. Chairman, I yield no further. Mr. Chairman, I want regular order.

The CHAIRMAN. The gentleman from Massachusetts has the time.

Mr. TRAFICANT. It is pretty tough to get it back, is it not?

Mr. CONTE. You bet your life I am tough.

If you do not own a dairy farm you do not get it and your people in Youngstown, OH, which I have helped many times——

Mr. TRAFICANT. But America is——

Mr. CONTE. I have helped them many times.

Mr. TRAFICANT. But we have many programs——

Mr. CONTE. Mr. Chairman——

The CHAIRMAN. The gentleman from Massachusetts [Mr. CONTE] controls the time.

Mr. McHUGH. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from New York [Mr. McHUGH].

McHUGH. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has made many good points. There is one point I would like to emphasize here.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(By unanimous consent Mr. CONTE was allowed to proceed for 2 additional minutes.)

Mr. McHUGH. If I may continue, the point I want to make by way of emphasis is this: The choice the Members are facing on this vote is whether we want to leave the 5 percent in the defense budget or whether we want to spend the 5 percent on economic development in Panama and Nicaragua and for refugees.

That is the issue because if the gentleman's amendment is adopted, the money will not go to the domestic needs that all of us think are important; the money will stay in the defense budget.

If the gentleman's amendment is rejected, the same money, instead of being in the defense budget, will go for economic development in Nicaragua and Panama and for the refugees we have talked about.

I think in those terms it is much more responsible, as the gentleman from Massachusetts has said, for us to reject the amendment and invest in America's interest and stability and economic development in these countries next door.

Mr. CONTE. Mr. Chairman, I urge defeat of the amendment.

The CHAIRMAN. The time of the gentleman form Massachusetts [Mr. CONTE] has expired.

The question is on the amendments offered by the gentleman from Ohio [Mr. TRAFICANT].

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. TRAFICANT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 64, noes 354, not voting 15, as follows:

[Roll No. 62]

NOT VOTING—15

Alexander	Ford (TN)	Nelson
Bustamante	Hawkins	Schuette
Campbell (CO)	Hayes (LA)	Stump
Feighan	Livingston	Whittaker
Flippo	Nagle	Yates

□ 1623

The Clerk announced the following pair:

On this vote:

Mr. Stump for, with Mr. Nelson of Florida against

Mr. PAYNE of Virginia and Mr. PASHAYAN changed their vote from "aye" to "no."

Ms. OAKAR, Mr. ENGLISH, and Mr. STARK changed their vote from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong support of the supplemental appropriations providing urgent assistance to Panama and Nicaragua.

The establishment of democratic Governments in Panama and Nicaragua following the disastrous policies of the predecessor regimes requires our strong encouragement and active support.

With the vital security interests for the United States at stake in region, it is imperative that we provide the technical and financial assistance necessary to see democratic institutions survive and prosper.

If we fail to act in a positive, expeditious manner, we will be jeopardizing the sacrifices of many patriots who have fought so valiantly against tyranny and repression.

In Panama, the United Stakes seeks to help the reestablishment of democratic institutions and the regeneration of private enterprise. The basic structure and economic framework exists in Panama so that with the prompt infusion of well-targeted funding, Panama can get the boost it needs to get its economy back on its feet following the bankrupt policies of the Noriega regime. As Vice President Billy Ford told us last week, this aid package can provide the jump start the Panamanian economy needs that will ensure that Panama will not have to be coming back to the United States for more foreign aid, year after year.

In Nicaragua, we have a totally different story, but one that is just as urgent. For if we fail to act quickly, the hope of democracy, justice, respect for human rights, and the growth of a free market economy will be a short-lived dream. The Sandinistas in their last few weeks in power are doing everything they can to appropriate any remaining assets that they haven't already managed to confiscate or dissipate. When the government of Mrs. Chamorro takes office on April 25, she will have precious few resources to help her revitalize the Nicaraguan economy. She will be faced with immediate needs, and if we don't help now, it won't be possible to recapture the opportunity later.

Mrs. Chamorro called me, as I know she called others, on Tuesday to emphasize the importance of our acting quickly on this vital aid package. I call on my colleagues in the House and I make a special plea to my colleagues in the other body to act decisively and immediately to pass this aid package and get it to the President's desk for his signature.

It is literally a question of life or death: The life of reborn democracy or the death of hope and justice. Either we make a significant and effective investment now or we suffer incalculable losses in the future. There is no time to lose.

Mr. Chairman, I rise in strong support of the urgent assistance for Haiti for fiscal year 1990.

I am concerned that the United States missed opportunities in the past in Haiti to advance the transition toward democracy because we did not apply the resources necessary to reinforce the democratic movement.

Now, it appears there is an opportunity—a very fragile one—to move the democratic process forward, and it is imperative that we show the people of Haiti that there is a benefit in turning from military rule and toward establishing democratic institutions and protecting human rights.

We cannot afford to let any more time lapse without demonstrating United States support for the democratic movement in Haiti and for the efforts of the interim President to hold free and fair elections.

The amount for Haiti in this package is small, but it is a significant indication of United States support for helping the transition to democracy.

I urge my colleagues to give their strong backing for this urgent assistance for Haiti.

AMENDMENTS OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. OBEY. Mr. Chairman, reserving the right to object, will the gentleman assure me that the amendment that is offered, if we allow it to be offered en bloc, would be identical to the previous amendment except that the percentage is changed from 5 percent to 3 percent?

Mr. TRAFICANT. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Ohio.

Mr. TRAFICANT. That is correct. I am asking that the amendments be heard en bloc, reflecting a 3-percent cut in those paragraphs in chapter III, the foreign aid section. My request to consider the amendments en bloc would incorporate amendments Nos. 3, 6, 9, 12, 16, 20, 24, 28, and 31.

Mr. OBEY. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. The amendments will be considered en bloc, and the Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. TRAFICANT:

Page 10, line 21, strike out "$1,609,671,408" and insert in lieu thereof "$1,561,381,266".

Page 11, line 6, strike out "$75,000,000" and insert in lieu thereof "$72,750,000".

Page 11, line 16, strike out "$25,000,000" and insert in lieu thereof "$24,250,000".

Page 11, line 19, strike out "$10,000,000" and insert in lieu thereof "$9,700,000".

Page 12, line 4, strike out "$500,000,000" and insert in lieu thereof "$488,000,000".

Page 12, line 6, strike out "$400,000,000" and insert in lieu thereof "$388,000,000".

Page 12, line 21, strike out "$2,558,000,000" and insert in lieu thereof "$2,546,000,000".

Page 12, line 25, strike out "$420,000,000" and insert in lieu thereof "$407,400,000".

Page 13, line 6, strike out "$300,000,000" and insert in lieu thereof "$291,000,000".

Page 14, line 5, strike out "$15,000,000" and insert in lieu thereof "$14,550,000".

Page 14, line 20, strike out "$25,000,000" and insert in lieu thereof "$24,250,000".

Mr. TRAFICANT (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio? There was no objection.

Mr. TRAFICANT. Mr. Chairman, I heard a lot of name-calling by a couple of Members. This is the second time

they called me names. I never called them names. I think I told you personally about it before, and I will not mention it any more. I do not expect to be called names a third time by anybody in the House.

There was a comment made that it is time to help Nicaragua and Panama. The statement was made that it is time for America to come forward and additionally help Nicaragua and Panama. Evidently I am in a small minority, but I think it is time for Nicaragua and Panama to help themselves. I think it is time that we start focusing our minimum dollars on America.

This is not just a 3-percent cut. This is policy initiative. We have over a $3 trillion debt, and we are exporting manufacturing jobs. A candidate opposing Mr. Reagan in 1980 said his policies would drive us into bankruptcy, making us the leading debtor nation in the world; and that was not Jimmy Carter, by the way, it was George Bush.

You came to the floor to offer an amendment to make a cut, and you are a demagogue because you want to bash the foreign countries. Then you hear the percentage—only $16 billion, less than 1½ percent of the unified Federal budget. Why do we not just take Social Security and all the other trust funds out and tell the truth about what is going on in the first place?

Second of all, someone said we are only taking it from defense, and if we only take it from defense for these foreign aid accounts, it is going to stay in defense. Well, if we have it for foreign aid, why do we not take it out of defense and put it in education or in training for the American people?

I am tired of it. I know that Members are going to get up with very beautiful language, everybody is going to pat them on the back, and then everyone is going to go herding off and vote against this amendment.

Let me tell the Members this: That amount of $3 billion was nothing in this unified budget, and that is in fact what revenue sharing was. This account today could reinstate EDA and double the money for economic development assistance and the Appalachian Commission, No. 1, and, No. 2, it could reinstate and double the Urban Action grants that have been canceled. It could build sewers in your districts, and it could help your kids pay for some school lunches.

□ 1630

Mr. Chairman, let me tell my colleagues what the problem around here is. There are powerful forces, all right, in this country, and the powerful forces are beginning to run American policy, not Congress. I say to my colleagues, you can take off on me with that all you want. I'm prepared to debate that. I'm tired of foreign aid totally, and I understand you can't do anything about it. I sure as hell am trying.

However, Mr. Chairman, my colleagues just keep going ahead.

In addition, Mr. Chairman, I want to tell my colleagues about the mail my constituents get about the missile that JIM TRAFICANT voted against which is going to save the world.

Mr. Chairman, half of those missiles are drunk turkeys which cannot fly straight. Who is cutting them? I ask my colleagues, why don't we cut them and put them into America?

Mr. Chairman, we got a B-1 bomber shot down by pelicans, and we got people living on steel grates.

So, my colleagues are saying, We've got to cut. We've got to be responsible.

Where do you want me to cut? Job training moneys? Funds for unemployed people? Housing money so people in America might get a housing guarantee?

Where do you want to cut it, folks?

So, my colleagues come up and say, well, I'll cut that defense budget. My God, you're un-American, TRAFICANT.

Three hundred billion dollars, one hundred twenty billion for NATO, and let me tell my colleagues what. We are going bankrupt. Let us bring those people back here and spend money in America, put our country in order. And we start with defense, and we start with foreign aid, and, if there is no other place to start, we should start there.

This is a policy statement. My colleagues are going to go ahead and vote no, and I say to them, I got a thick skin, and you can't make me feel low with any vote. I can walk under a closed door with a top hat on and come back tomorrow. What we're doing is wrong in this House. We are not taking care of the American people first. And, if you stand up and talk about it with a trade policy or foreign aid, you get all kinds of names attached to it.

So remember, three strikes, you're out.

Mr. Chairman, I have taken two, and I say to my colleagues, I ain't going to take any more.

Instead of Panama getting $420 million, they would get approximately $408 million. Instead of Israel being guaranteed $400 million, they would be guaranteed $388 million. It is cutting less than a $100 million from this damned turkey.

Mr. Chairman, I want a yes vote on this, and I appreciate the help from people who are sick and tired of seeing their people go without work, cutting their food stamps, and cutting their education and getting a song and dance from every chairman down here.

Mr. OBEY. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Ohio.

Mr. Chairman, the arguments are the same, the authorship is the same, and the result ought to be the same. The only thing that is different is the percentage.

I would urge a no vote on the amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the last word.

Mr. Chairman, there is no need to have further debate on this. I would just remind everybody that the amendment of the gentleman from Ohio [Mr. TRAFICANT] does not transfer money to housing, it does not transfer money to the inner cities, it does not transfer money to the hospitals. All it does is leave it in the defense budget.

Mr. Chairman, it is the same argument as last time, and I urge my colleagues to vote no again.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Ohio [Mr. TRAFICANT].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. TRAFICANT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 72, noes 346, not voting 15, as follows:

□ 1651

The Clerk announced the following pair:

On this vote:

Mr. Stump for, with Mr. Nelson of Florida against.

Mr. HAYES of Illinois changed his vote from "aye" to "no."

So the amendments were rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

For an additional amount for "Migration and Refugee Assistance", $75,000,000, to support emergency refugee admissions and assistance: *Provided*, That not less than $5,000,000 of the funds provided under this heading shall be available for Soviet, Eastern European and other refugees resettling in Israel: *Provided further*, That funds provided under this heading shall remain available until expended.

AMENDMENT OFFERED BY MR. SAVAGE

Mr. SAVAGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAVAGE: Page 11, strike lines 4 through 11.

Mr. SAVAGE. Mr. Chairman, my amendment would delete the section on migration and refugee assistance.

That section provides $75 million for refugee admissions and assistance in the United States and in Israel, principally for refugees from the Soviet Union and Eastern Europe. There is no limit or no ceiling that is on how much should go to Israel. There is a floor; it has to be at least $5 million of that amount, but presumably all could go to Israel, $75 million.

The problem I have with that is that we have already given to Israel more than 20 percent of our foreign aid budget, some $3 billion to a little tiny nation with only 4 million people, and now we are talking about giving possibly another $75 million.

We can just compare that to the fact that for all the 45 sub-Saharan African nations with a population of some 300 million, only $30 million, as compared to $3 billion, and now $75 million more.

I want to just point out that the Haitians who fled oppression and went into Florida were given concentration camps, not a subsidy for their relocation.

Members may have seen the MacNeil/Lehrer Report last night on PBS television, when he pointed out that the Israelis are providing $13,000 per refugee family for the first year of residence, and it does not even require them to seek employment during that time. Yet, they want $75 million more from us.

I tell the Members that I have some unemployed steelworkers in my district who would like to get $13,000 a year while they are not having to seek employment. I tell the Members that we need to start at home, as the prior speaker has said, and I want to say that it seems to me we need to give more attention to America's needs above and over the wants of Israel and that phony argument that, well, if we do not give it to Israel, it will just remain in the defense budget.

I just want to remind the Members that it takes no more votes to take it right back out of that defense budget and give it to some of our senior citizens for long-term medical care or to some of our needy students for post-secondary education, and it takes no more votes to do that than it does to take it out of that defense budget and give it to Israel today.

I say no more money for the wants of Israel while we let the needs of America go. Go back to your districts and ask people in your districts, those who may be unemployed, those who may need some loans, those who suffer from a lack of medical care, and when you tell them that we have no money in our Federal budget for that, but we can give $75 million more to refugees who are already being paid $13,000 a year just to migrate from some nation that is not compelling them to leave, and they are not refugees at all, I say, think about America.

Mr. OBEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I will not take the 5 minutes.

The principal effects of this amendment would be to tell 27,000 Soviet refugees who are scheduled to come into this country that there is no room in the inn after we have asked the Soviet Union for almost 15 years to let them go.

I do not think that anybody in this room believes that is wise policy, and I think we understand the content of the amendment and the authorship.

Mr. Chairman, I would ask for a "no" vote.

Mr. CONTE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I urge a "no" vote on this amendment. This amendment does all the wrong things for all the wrong reasons.

Mr. DREIER of California. Mr. Chairman, nearly all of us in this Chamber have at one time or another signed a letter in support of a Jewish family seeking to join their relatives in the United States. Or perhaps one urging the Soviet Government to allow an elderly person to come to the West for medical care, or to

visit a loved one. I think it would be accurate to say that congressional mail on this one issue overshadowed nearly every other issue during the past decade.

Well, our persistence paid off. The combination of Ronald Reagan's tough policies toward Soviet aggression around the world, continued congressional pressure, and a collapsing economy finally convinced the Soviet leadership that their emigration policies should be relaxed.

Hope, long a rare commodity in the Russian Jewish community, has returned for those oppressed for centuries, first in czarist Russia, and for the past 70 years in Stalinist Russia.

This amendment would send us back to these repressive times. Mr. SAVAGE wants to shut the windows of hope for the Jewish people. He wants to slam the door on their aspirations and dreams. His amendment would eliminate $75 million of refugee assistance to those emigrating from the oppression in Russia.

For years, we have urged the Soviets to open their doors. Now they are doing just that, but by adopting the Savage amendment, we would be denying these refugees the resources they need to start their lives over in a new home. For this reason, I urge my colleagues to reject this amendment.

Keep hope alive.

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Illinois. This amendment would delete the section of this bill that provides $400 million in loan guarantees to the Israeli Government for housing and infrastructure projects for newly arrived immigrants to Israel. I also oppose the gentleman's amendment which would delete the provision of $75 million for refugee admissions and assistance in the United States and in Israel. These amendments are a slap in the face to the hundreds of thousands of Soviet refugees whom we have tried to help emigrate for the past 15 years. I believe that the gentleman misperceives the reality of their situation.

The gentleman from Illinois states that the Israeli Government is not only permitting, but also promoting and encouraging refugee settlement in occupied territory. He states this as one reason he opposes the loans. So far, however, less than 1-percent of the Soviet Jewish immigrants chose to live on the West Bank and they are not being encouraged to go there. The Israeli Government has no program for settling Soviet immigrants on the West Bank. The Jewish agency, which builds new housing for immigrants, has no plans to build any for Soviet immigrants on the West Bank. It even denies its usual first-year living subsidy to immigrants who choose to live on the West Bank.

The gentleman, in arguing on behalf of his amendment, further states that the Soviet refugees are not refugees at all. Soviet emigrants, however, clearly meet the Immigration and Naturalization Services criteria for refugee status; an emigrant must show a "well-founded fear of persecution." Soviet Jews certainly have such a well-founded fear. They have suffered centuries of pogroms and anti-Semitic violence in czarist Russia. In the past 70 years of Soviet rule they have been victims of a campaign of state-sponsored cultural genocide. Jewish religious activity was suppressed, and Jewish religious leaders and activists were beaten and imprisoned. Religious schools were closed and all Jewish political parties banned.

Today, after centuries of repression, discrimination, and harsh crackdowns, Soviet Jews are still being victimized. While up to now there have been no recent pogroms against Jews, the number and severity of anti-Semitic incidents and threats are accelerating at a frightening rate. What once were interpreted as isolated incidents can no longer be viewed as anything but organized intimidation; they are advanced by a highly organized movement with an extensive network of supporters.

For the last 15 years, the United States has recognized the precarious situation of Soviet Jews. We must continue to help them emigrate and begin new, free, safe lives. The two amendments before the House today would move us in precisely the opposite direction, and I urge my colleagues to oppose them.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. SAVAGE].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 2, noes 418, not voting 13, as follows:

1716

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

UNITED STATES EMERGENCY REFUGEE AND MIGRATION ASSISTANCE FUND

For an additional amount for the "United States Emergency Refugee and Migration Assistance Fund", $25,000,000 to remain available until expended.

AGENCY FOR INTERNATIONAL DEVELOPMENT

DEVELOPMENT ASSISTANCE

Not less than $10,000,000, of the funds made available in Public Law 101-167 for the purposes of chapter 1 of part I of the Foreign Assistance Act of 1961, shall be made available for assistance to Haiti: *Provided,* That any of such funds made available for Haiti may be used for any of the purposes of chapter 1 of part I of the Foreign Assistance Act of 1961 and also may be used to finance critical imports.

HOUSING AND OTHER CREDIT GUARANTY PROGRAMS

Notwithstanding provisions of Public Law 101-167, during the fiscal year 1990, total commitments to guarantee loans shall not exceed $500,000,000 of contingent liability for loan principal: *Provided,* That of this amount $400,000,000 in commitments to guarantee loans shall be available on or after October 1, 1990, and shall be available only for the purpose of providing housing and infrastructure in Israel for newly arrived immigrants in that country: *Provided further,* That such guarantees for housing and infrastructure in Israel for newly arrived immigrants shall be made available for loans made during or after fiscal year 1991, notwithstanding the limitation contained in the third sentence of section 222(a) of the Foreign Assistance Act of 1961: *Provided further,* That section 223(j) of the Foreign Assistance Act of 1961 (22 U.S.C. 2183(j)) shall not apply to such commitments to guarantee loans for housing and infrastructure in Israel: *Provided further,* That section 222(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2182) is amended by striking out "$2,158,000,000" and inserting in lieu thereof "2,558,000,000".

AMENDMENT OFFERED BY MR. SAVAGE

Mr. SAVAGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAVAGE: Page 12, delete lines 1 through 21.

Mr. SAVAGE. Mr. Chairman, this amendment deletes the section that provides $400 million in loan guarantees to the Israeli Government for housing and infrastructure projects for newly arrived immigrants to Israel. I object to it for four reasons.

First of all, for those Members who may have viewed the MacNeil/Lehrer Report on PBS TV last night, it showed evidence that the Israeli Government is not only permitting but promoting refugee settlement in occupied Palestinian territory. If they are promoting refugee settlement in occupied Palestinian territory on the one hand and we are going to help the housing program of the Israeli Government, but on the other hand we have seen on television the Israeli troops demolishing homes of Palestinians who are already there, demolishing homes of Palestinians on the one hand, we are being asked to give $400 million in a loan guarantee for housing programs that encourages other houses in the same territory for refugees from Eastern Europe.

□ 1720

The third reason is that in my district I could use some home loan guarantees. I have homeowners who are losing through mortgage foreclosures. If they could get some home loan guarantees, they may keep the homes right in the Second District of Illinois where they already live and are being evicted.

And finally, I could use some section 8 subsidies for apartment dwellers in the second district and that program is being phased out, phased out in the United States because we say we do not have any money, but then providing a $400 million loan guarantee for housing in Israel.

Also, America's bridges are falling down. We need highway repairs.

Again I say let us put the needs of America above the wants of Israel.

Mr. OBEY. My Chairman, I move to strike the last word. Again I think we understand the content and we understand the authorship, and I ask for a "no" vote on the amendment.

Mr. CONTE. Mr. Chairman, I move to strike the penultimate word.

Mr. Chairman, any comment on this amendment would only serve to magnify it. I ask for a "no" vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. SAVAGE].

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. SAVAGE. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is present.

A recorded vote is demanded. Those in favor of taking this vote by recorded vote will rise and remain standing until counted.

An insufficient number has arisen.

Mr. SAVAGE. Mr. Chairman, I made the point of order that a quorum is not present.

The CHAIRMAN. The Chair informs the gentleman from Illinois that a quorum is present.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ECONOMIC SUPPORT FUND

PANAMA

For an additional amount for the "Economic Support Fund", $420,000,000, to remain available until September 30, 1991, which shall be made available only for assistance for Panama: *Provided,* That of this amount up to $15,000,000 may be used for a debt-for-nature swap and for immediate environmental needs.

NICARAGUA

For an additional amount for the "Economic Support Fund", $300,000,000, to remain available until September 30, 1991, which shall be made available only for assistance for Nicaragua: *Provided,* That of this amount $30,000,000 shall be for assistance to support the voluntary demobilization, repatriation and resettlement of members of the Nicaraguan resistance and their families: *Provided further,* That such assistance referred to in the previous proviso shall be provided through the International Commission of Support and Verification (CIAV) established by the Secretary General of the United Nations and the Secretary General of the Organization of American States pursuant to the agreement of the Central American Presidents at Tela, Honduras, on August 7, 1989, unless the President notifies the Committees on Appropriations in accordance with the procedures contained in section 523 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.

ADMINISTRATIVE EXPENSES

Up to $10,000,000, of the funds made available under the headings "Panama" and "Nicaragua" may be used for the purpose of paying administrative expenses incurred by the Agency for International Development in connection with carrying out its functions under such headings.

CARIBBEAN

For an additional amount for the "Economic Support Fund", $15,000,000, to remain available until September 30, 1991, which shall be made available only for assistance for countries in the Caribbean: *Provided,* That not more than fifty percent of the funds made available by this paragraph shall be allocated to any one country.

Mr. SCHUMER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will try to be brief. I was prepared to offer an amendment that would limit aid to Panama for one very simple reason, and that is that up to this point there has been no agreement between the Panamanian Government and the American Government about money laundering. We all know illegal drugs are a plague on this country. We all know there is no profit for the drug dealers if they cannot spend the money, and that is where the money launderers come in.

We also know that Panama and money laundering were, under the Noriega regime, linked. The Panama-

nian banking system under the Bank Secrecy and under the Bank Confidentiality Act and other acts was a haven for the funds from money launderers.

Mr. Chairman, if we simply replace Noriega, with his machete and his army fatigues, with people who may wear suits but are participating in money laundering, we have not accomplished very much.

It is for that reason that our Government has endeavored to come to an agreement with the Panamanian Government. But that agreement is not yet reached.

Unfortunately, if this appropriation bill were to pass without the preceding authorization bill which has not yet passed, that money would be given to the Panamanian Government for the next 2 years, $500 million, unfettered, with no limitation on money laundering.

As much as I think we must help Panama after Operation Just Cause, I think it would be a travesty to hand Panama hundreds of millions of dollars if they continue to launder money, the same money that poisoned our children on our streets when it came to drugs. That is why I had prepared the amendment.

But, after working with the gentleman from Pennsylvania [Mr. KOSTMAYER], talking to the chairman of both of the committees, the gentleman from Florida [Mr. FASCELL], as well as the chairman of the Subcommittee on Appropriations, the gentleman from Wisconsin [Mr. OBEY], I have been assured that the law today is and the law will be henceforth—we will not change it here in this House—that money cannot be spent on this appropriations bill until the authorization bill passes. And the authorization bill at least has passed out of the Committee on Foreign Affairs and it does indeed have some pretty tough language on money laundering.

So I am not going to introduce this amendment, in the hope and the prayer and in the confidences given to me by both people on this side of the aisle as well as those in the administration that we will pass a very tough money laundering proposal in the authorization and that the appropriation will not be spent until the authorization is passed and signed into law.

Mr. KOSTMAYER. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I am happy to yield to the gentleman from Pennsylvania [Mr. KOSTMAYER], whose leadership in this area has been exemplary.

Mr. KOSTMAYER. I thank the gentleman for yielding.

Mr. Chairman, what the gentleman from New York [Mr. SCHUMER] is saying is that giving this money to Panama ought to be contingent on an agreement between Panama and the United States which deals with the issue of money laundering. I think that is a perfectly reasonable proposition.

There is not any reason on Earth we should provide this level of assistance without an agreement, signed, sealed, and delivered by the Panamanians and by the United States that this money laundering problem is going to be dealt with.

The administration has lobbied against this language. Those of us who serve on the authorizing committee have included language in the authorization bill similar to the language offered by the gentleman from New York [Mr. SCHUMER] and will bring that language to the floor, we hope, in a couple of weeks.

I strongly endorse and support what the gentleman from New York has done.

Mr. RUSSO. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. Mr. Chairman, I yield to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. I thank the gentlemen for yielding.

Mr. Chairman, I want to compliment the gentleman on his amendment. It would seem to me if Panama were serious about stopping drug trafficking and money laundering between now and the time that the authorization bill comes to the floor, they would take positive steps to show good faith in wanting to finally rid themselves of this reputation as being a big money laundering operation.

I thank the gentleman for yielding.

Mr. SCHUMER. I thank the gentleman for his point. It is extremely well taken.

Mr. CARPER. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Delaware [Mr. CARPER]. He has been a leader on this issue also.

Mr. CARPER. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from New York makes a very good point. The debate earler contained a statement by the gentleman from Pennsylvania who made an equally good point. That is, we should authorize before we appropriate, and I hope that the kind of concerns that Mr. SCHUMER has raised do not fall by the wayside and we are ultimately able to authorize on this bill to ensure some conditions are set and met before we appropriate the funds.

Mr. SCHUMER. I thank the gentleman from Delaware.

Mr. CHAIRMAN. The time of the gentleman from New York [Mr. SCHUMER] has expired.

Mr. SCHUMER. Mr. Chairman, I think the message ought to be clear that this body should not and will not vote for any more aid to Panama until there is a tough law that prevents Panama from being a haven for money laundering of drug money.

I thank the gentleman from Pennsylvania, Illinois, and Delaware for their help and support.

□ 1730

The CHAIRMAN. The Clerk will read:

The Clerk read as follows:

HURRICANE RELIEF AND RECOVERY ASSISTANCE FOR THE EASTERN CARIBBEAN COUNTRIES

For an additional amount for the "Economic Support Fund", $5,000,000, for countries in the Eastern Caribbean, to remain available until September 30, 1991: *Provided*, That such funds shall be available only for additional hurricane relief, recovery, and rehabilitation assistance for those countries that were victims of Hurricane Hugo.

SUB-SAHARAN AFRICA

For an additional amount for the "Economic Support Fund", $25,000,000, to remain available until September 30, 1991, which shall be made available for assistance for sub-Saharan Africa: *Provided*, That of this amount $10,000,000 shall be for assistance for Namibia, $2,500,000 shall be for assistance for Mozambique, $2,500,000 shall be for assistance for Zambia, and $10,000,000 shall be used to provide assistance, through the National Endowment for Democracy and other groups, to support programs and activities of organizations to encourage negotiations leading to a peaceful transition to a genuine democracy based on universal sufferage within a united South Africa, as follows:

(a) SUPENSION OF VIOLENCE.—An organization which has engaged in armed struggle or other acts of violence shall be eligible for assistance under this section only if that organization is committed to a suspension of violence in the context of negotiations to establish a democratic system of government in South Africa.

(b) PROHIBITION ON USING FUNDS TO SUPPORT VIOLENCE.—In order to receive assistance under this section, an organization must agree that it will not use any of the funds made available to it under this section for the purpose of supporting physical violence by any individual, group, or government.

SUB-SAHARAN AFRICA DEVELOPMENT ASSISTANCE

For an additional amount for "Sub-Saharan Africa, Development Assistance", $5,000,000, to remain available until September 30, 1991.

NOTIFICATION PROCEDURES

Prior to each obligation of funds made available for the "Economic Support Fund" and "Sub-Saharan Africa, Development Assistance" in this Act, the Committees on Appropriations of the House of Representatives and the Senate shall be notified in accordance with section 523 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.

PEACE CORPS

Amounts appropriated under the heading "Peace Corps" by the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167), may be made available for activities of the Peace Corps in Czechoslovakia.

EXPORT ASSISTANCE

EXPORT-IMPORT BANK OF THE UNITED STATES

Notwithstanding the first proviso contained under the heading "Limitation on Program Activity" under "Title IV—Export Assistance" of Public Law 101-167, the medium-term financing program of the Export-Import Bank shall not exceed the gross obligations for the principal amount of direct loans contained under such heading in Public Law 101-167.

TECHNICAL CORRECTION

Effective as of November 21, 1989, the 11th proviso under the heading "Migration and Refugee Assistance" in title II of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167, 103 Stat. 1211) is amended by striking "sixth proviso" and inserting "ninth proviso".

CHAPTER IV

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

FIREFIGHTING

For an additional amount for "Firefighting", $176,800,000, to remain available until expended.

AMENDMENTS OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. CONTE: On page 17, line 8, strike ", to remain available until expended".

And on page 17, line 13, strike ", to remain available until expended".

Mr. CONTE (during the reading): Mr. Chairman, I ask unanimous consent that the amendments en bloc be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Chairman, this amendment would simply limit the availability of funds appropriated for firefighting costs to fiscal year 1990.

The amendment has been agreed to by Chairman YATES, and I want to thank him for accepting this modification and commend him for his leadership in properly and fully funding the costs of Federal firefighting.

I agree with him. We ought to pay our bills on time, and not borrow to the detriment of other important programs.

Mr. Chairman, I hope this amendment will be accepted.

The bill provides $433 million to repay funds borrowed to fight last year's fires and to provide adequate resources for the upcoming season.

The Interior Department is allocated $176.8 million, and for Forest Service is allocated $265 million to repay the K-V fund.

The Budget Committee and CBO scored these funds as mandatory, and it seems to be the committee's intent that the money be spent in this fiscal year.

The administration has raised some concerns about making these funds available beyond fiscal year 1990.

In the statement of administration policy, OMB has requested that a change be made to "ensure that any funds not spent on emergency fire suppression activities in fiscal year 1990 would not be available to fund discretionary programs in fiscal year 1991." As I understand it, this was not the intent of the committee, and my amendment would satisfy the concerns of the administration. OMB would find these provisions acceptable if this amendment were adopted.

The amendment will further clarify the committee's intent that these funds be spent for cost incurred in fiscal year 1990.

Again, the amendment simply makes the firefighting funds available for fiscal year 1990 only, the reason for including them in the first place.

Mr. WHITTEN. Mr. Chairman, I move to strike the last word.

On behalf of the gentleman from Illinois [Mr. YATES], the chairman of the Subcommittee on Interior, I want to say the bill includes $333 million to reimburse accounts from which firefighting funds were borrowed, as well as $99,800,000 to provide the Department of the Interior the same level in fiscal 1990 that was available in fiscal year 1989 for fire suppression, emergency rehabilitation, and presuppression. There is no objection to the amendments offered by the gentleman from Massachusetts.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise too, in strong support of this measure. It is critically important, and I urge my colleagues to support it.

Mr. Chairman, I rise to express my strong support for H.R. 4404, the dire emergency supplemental appropriations for fiscal year 1990. This is a critically important measure, which comes at a critically important time. I commend the gentleman from Mississippi [Mr. WHITTEN] and the ranking minority member, the gentleman from Massachusetts [Mr. CONTE] for his outstanding work to expedite this measure.

This bill appropriates a total of $616 billion in new budget authority and authorizes $155 million in transfer authority. In addition, the bill rescinds $1.8 billion in previously appropriated defense funds to offset newly appropriated funds. This bill accommodates the administration requests for foreign assistance to Nicaragua and Panama, and it provides funding for Veterans Affairs benefits and loan guarantees. The bill provides our National Forest Service with the funding it needs to fight fires throughout our Nation.

Mr. Chairman, this measure also provides $400 million in housing loan guarantees to Soviet refugees who are relocating to Israel, as well as $70 million in general refugee assistance which will do much to ameliorate the financial problems encountered by our growing numbers of refugees throughout the world.

Accordingly Mr. Chairman, I urge the unanimous adoption of this measure.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts [Mr. CONTE].

The amendments were agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

FOREST SERVICE FIREFIGHTING

For an additional amount for "Forest Service Firefighting", $256,000,000, to remain available until expended.

CHAPTER V

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

For an additional amount for "State unemployment insurance and employment service operations", $96,000,000 from the Employment Security Administration account in the Unemployment Trust Fund, which shall be available only to the extent necessary to administer unemployment compensation laws to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic allocation was based.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH CARE FINANCING ADMINISTRATION

PROGRAM MANAGEMENT

All funds collected in fiscal year 1990 in accordance with section 353 of the Public Health Service Act shall be credited to this account, to remain available until expended, for necessary expenses associated with the survey and certification of clinical laboratories.

FAMILY SUPPORT ADMINISTRATION

LOW INCOME HOME ENERGY ASSISTANCE

For an additional amount for "Low income home energy assistance", $50,000,000 to remain available until October 31, 1990: *Provided*, That the Secretary shall obligate these funds on the basis of relative need to those States and other entities which promptly supplement their applications under the Act for the current fiscal year demonstrating both a substantial need for and the capacity to expend the additional funds.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words.

I just want to let my close friend, the gentleman from Kentucky [Mr. NATCHER], know how much I appreciated his help in putting this bill together, and especially to thank from the bottom of my heart, for his hard work in getting the $50 million for low-income home energy assistance. We have worked together for many, many years now. I look forward to working with the gentleman for many, many years in the future.

Mr. WOLPE. Mr. Chairman, I move to strike the last word.

I rise, like the gentleman from Massachusetts, to express my strong support for this appropriations supplemental. I want to draw particular attention to the home energy assistance program. These dollars are critical. Too many people have been forced, in recent years, to make critical choices between food and fuel.

The harsh reality is that low-income energy assistance funds have been significantly reduced over the past several years. Between fiscal year 1985 and fiscal year 1990, LIHEAP funding was cut by over $700 million. Now, President Bush is calling for an additional $343 million in cuts. In Michigan, the fiscal year 1991 outlay has been reduced by 25 percent from fiscal year 1990.

These cuts in low-income home energy assistance have meant extreme hardship to the LIHEAP-eligible population. Only about 30 percent now receive the help they so urgently need. Statistics show that 900,000 households or 2.7 million people were dropped from the program from fiscal year 1987 to fiscal year 1989.

Mr. Chairman, living without utilities is a prescription for disaster and, as gruesome newspaper headlines often remind us, even for death. While the Federal deficit must be reduced, it should not be done at the expense of the elderly and the poor. Our most vulnerable citizens should not be forced to make the difficult choice between food and fuel next winter. That is what this supplemental appropriation is all about, and I urge its passage.

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise simply to extend my thanks to the distinguished gentleman, the chairman of the Subcommittee on Health and Human Services, and the distinguished minority member for dissolving the problem with respect to the unemployment staffing problem in this country. It was a serious problem, and I appreciate and thank all Members concerned with that.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

DEPARTMENT OF EDUCATION

STUDENT FINANCIAL ASSISTANCE

The amount made available for the 1990–91 award year under this heading in the Department of Education Appropriations Act, 1990, for subpart 1 of part A of title IV of the Higher Education Act, as amended, shall be available first to meet any insufficiencies resulting from the payment schedule for Pell Grants published by the Secretary of Education for the 1989-90 award year.

CHAPTER VI

RURAL DEVELOPMENT, AGRICULTURE, AND RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

FOOD AND NUTRITION SERVICE

FOOD STAMP PROGRAM

For an additional amount for necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2011-2027, 2028, 2029), $510,000,000, of which $135,000,000 shall be placed in reserve to be used only to the extent that such amount is required during the current fiscal year to meet program requirements.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

For an additional amount for generic drug activities of the Food and Drug Administration under section 505(j) of the Food, Drug, and Cosmetic Act, $13,900,000.

CHAPTER VII

DEPARTMENTS OF VETERANS AFFAIRS AND HOUSING AND URBAN DEVELOPMENT, AND INDEPENDENT AGENCIES

DEPARTMENT OF VETERANS AFFAIRS

VETERANS BENEFITS ADMINISTRATION

COMPENSATION AND PENSIONS

For an additional amount for "Compensation and pensions", $190,000,000, to remain available until expended.

LOAN GUARANTY REVOLVING FUND

For an additional amount for "Loan guaranty revolving fund", $150,000,000, to remain available until expended.

VETERANS HEALTH SERVICE AND RESEARCH ADMINISTRATION

MEDICAL CARE

For an additional amount for "Medical care", $50,000,000: *Provided,* That, notwithstanding any other provision of law, not less than $7,227,000,000 of the sums appropriated under this heading in fiscal year 1990 shall be available only for expenses in the personnel compensation and benefits object classifications.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

(TRANSFER OF FUNDS)

For an additional amount for "Medical administration and miscellaneous operating expenses", $1,300,000, to be derived by transfer from "Construction, minor projects".

DEPARTMENTAL ADMINISTRATION

GENERAL OPERATING EXPENSES

Of the sum appropriated under this heading for fiscal year 1990, the amount available for expenses of travel is increased by $1,000,000.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

(TRANSFER OF FUNDS)

For an additional amount for "Payments for operation of low-income housing projects", $72,000,000, to remain available until September 30, 1991: *Provided,* That such amount shall be derived by transfer from "Annual contributions for assisted housing", and the amount specified for the section 8 moderate rehabilitation program in the first proviso under that head in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1989 (Public Law 100-404, 102 Stat. 1014) shall be reduced by such amount.

COMMUNITY PLANNING AND DEVELOPMENT

URBAN HOMESTEADING

(TRANSFER OF FUNDS)

For an additional amount for "Urban homesteading", to be derived by transfer from the Urban Development Action Grants account, all unobligated balances available at the end of fiscal year 1989 and, after the transfer of $50,000,000 to the Community Development Grants account pursuant to Pulic Law 101-144, all other amounts deobligated in fiscal year 1990: Provided, That those amounts that are required to fund urban development action grant projects which have received preliminary approval in accordance with regulations promulgated by the Department of Housing and Urban Development shall not be transferred: Provided further, That the amount transferred may be used only for reimbursement to the Federal Housing Administration Fund for losses incurred under the urban homesteading program (12 U.S.C. 1706e): Provided further, That the Secretary of Housing and Urban Development shall withhold from the amount subject to transfer such funds as may be necessary to comply with orders of United States Courts which direct the Secretary to set aside funds for possible future approval of grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301).

INDEPENDENT AGENCIES

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

RESEARCH AND PROGRAM MANAGEMENT

(TRANSFERS OF FUNDS)

For an additional amount for "Research and program management", $32,970,000, of which $18,000,000 shall be derived by transfer from "Research and development' and $14,970,000 shall be derived by transfer from "Space flight, control, and data communications".

TITLE III—GENERAL PROVISIONS

SEC. 301. No part of any appropriations contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 302. The proviso under the heading "Department of the Interior, Bureau of Land Management, Firefighting" in Public Law 101-121 is amended by inserting "full" before the word "repayment" in the proviso, and by inserting at the end thereof "prior to the expenditure of any of such funds for any other purposes".

SEC. 303. In Public Law 101-148, Military Construction Appropriations Act, 1990, the last proviso under "Military Construction, Defense Agencies" is hereby repealed.

SEC. 304. Notwithstanding any other provision of law, all projects contained in the State list included in House Report 101-307, for which funds were appropriated in Public Law 101-148, are hereby authorized for appropriations and for construction or execution.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 24, after line 5, add the following new section:

SEC. 305. None of the funds provided in this Act shall be provided to any nation where it is made known to the President that the nation is providing military or economic assistance to Cuba.

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, this is a rather self-explanatory amendment. It says none of the funds of the act may be used in any nation providing military or economic assistance to Cuba. I think it is an amendment that is going to be readily accepted on both sides.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. Mr. Chairman, I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, in order to save time, I am happy to agree to this.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I thank the gentleman for offering the amendment. It is a good amendment, and I am very pleased to support it.

Mr. WALKER. Mr. Chairman, I thank the gentlemen for their support on it. This is an amendment that is mainly preventive in nature, in hope that in a changing world, we do not have money flowing out of countries toward Cuba, and hopefully this amendment will make that point.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

This Act may be cited as the "Dire Emergency Supplemental Appropriations for Disaster Assistance, Food Stamps, Unemployment Compensation Administration, and Other Urgent Needs, and Transfers, and Reducing Funds Budgeted for Military Spending Act of 1990".

Mr. WHITTEN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having assumed the chair, Mr. DORGAN of North Dakota, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4404) making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill, as amended, do pass.

□ 1740

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MILLER OF OHIO

Mr. MILLER of Ohio. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill.

Mr. MILLER of Ohio. I am, in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MILLER of Ohio moves to recommit the bill, H.R. 4404 to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 362, noes 59, not voting 12, as follows:

[Roll No. 65]

NOT VOTING—12

Bustamante	Ford (TN)	Schuette
Campbell (CO)	Hayes (LA)	Stump
Feighan	Leath (TX)	Whittaker
Flippo	Nelson	Yates

□ 1802

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. Hayes of Louisiana against.

Mr. Bustamante for, with Mr. Stump against.

Mr. KASICH changed his vote from "aye" to "no."

Mr. UDALL changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. NELSON of Florida. Mr. Speaker, had I been present, I would have voted "nay" on rollcall No. 64.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 300

Mr. PACKARD. Mr. Speaker, I ask unanimous consent to withdraw my name from the list of cosponsors of House Joint Resolution 300, a joint resolution proposing an amendment to the Constitution of the United States to provide for 4-year terms for Representatives and to limit the number of consecutive terms Senators and Representatives may serve.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, might I inquire of the distinguished majority leader the program for the balance of the day, tomorrow, next week, et cetera.

Mr. Speaker, I yield to the distinguished gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, I thank the distinguished minority leader for yielding to me.

Today from this point forward we will complete work on the suspensions; however, we will hold the recorded votes off until tomorrow, and we will have those votes first thing.

Then on Wednesday, April 4, we will also have consideration of H.R. 2015, the reauthorization for the Economic Development Administration and Appalachian Regional Commission, with an open rule, 1 hour of debate. Upon completion of that bill and its vote, we will recess for the Easter district work period. My anticipation would be that that could be at a reasonable hour in the afternoon.

On Wednesday, April 18, and Thursday, April 19, which is the week after the week we are out for the spring recess, the House will reconvene and consider H.R. 1236, the Retail Price Maintenance Act, with an open rule, 1 hour of debate, and H.R. 644, the Wild and Scenic Rivers Act, designating the east fork of the Pecos River, with an open rule, 1 hour of debate.

Other legislation may also be scheduled for this period. Members will receive adequate notice before we reconvene.

A schedule for the month of April will be distributed tomorrow.

I can just say to the Members that with the exception of Monday, April 30, we do not contemplate votes on Mondays and Fridays.

Mr. MICHEL. Mr. Speaker, I thank the gentleman.

Might I inquire, tomorrow on the rolling of any rollcalls for the suspensions today will begin at what hour tomorrow?

Mr. GEPHARDT. I believe we start at noon.

Mr. MICHEL. The gentleman made mention of our return after the Easter recess on Wednesday. It is the one measure that would be taken up that day and the other measure on Thursday, or just whatever is convenient for those two days?

Mr. GEPHARDT. We anticipate that on that day we will take up one bill, H.R. 1236, the Retail Price Maintenance Act, and that the other legislation for the week will go on the next day.

We will have a full schedule for the gentleman tomorrow.

Mr. MICHEL. There would be votes expected, obviously, on that Wednesday when we return.

Mr. GEPHARDT. On that Wednesday, that is correct.

Mr. MICHEL. Mr. Speaker, I thank the distinguished leader.

ANNOUNCEMENT OF DEMOCRATIC CAUCUS

(Mr. GEPHARDT asked and was given permission to address the House for 1 minute.)

Mr. GEPHARDT. Mr. Speaker, I just wanted to remind Members on the Democratic side that we will have a Democratic Caucus tomorrow morning at 9 a.m. in the House Chamber for the purpose of ratifying committee assignments at 9 a.m.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I. the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, April 4, 1990.

FEDERAL MARITIME COMMISSION AUTHORIZATION, FISCAL YEAR 1991

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4009) to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes as amended.

The Clerk read as follows:

H.R. 4009

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in fiscal year 1991, $15,894,000 is authorized to be appropriated for the use of the Federal Maritime Commission; except that not to

exceed $2,000 may be expended for official reception and representation expenses.

SEC. 2. Subsection (h) of section 18 of the Shipping Act of 1984 is amended by striking "its establishment" and inserting "all of its members have been duly appointed".

SEC. 3. Section 19 of the Merchant Marine Act, 1920 (46 App. U.S.C. 876) is amended as follows:

(1) by inserting "including intermodal movements, terminal operations, cargo solicitation, forwarding and agency services, non-vessel-operating common carrier operations, and other activities and services integral to transportation systems," between the word "generally," and the word "and" and subsection (1)(b); and

(2) by inserting the following new subsections:

"(5) The Commission may initiate a rule or regulation under subsection (1)(b) of this section either on its own motion or pursuant to a petition. Any person, including a common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, marine terminal operator, or any component of the Government of the United States, may file a petition for relief under subsection (1)(b) of this section.

"(6) In furtherance of the purposes of subsection (1)(b) of this section—

"(a) the Commission may, by order, require any person (including any common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, marine terminal operator, or an officer, receiver, trustee, lessee, agent, or employee thereof) to file with the Commission a report, answers to questions, documentary material, or other information which the Commission considers necessary or appropriate;

"(b) the Commission may require a report or answers to questions to be made under oath;

"(c) the Commission may prescribe the form and the time for response to a report and answers to questions; and

"(d) a person who fails to file a report, answer, documentary material, or other information required by this subsection shall be liable to the United States Government for a civil penalty of not more than $5,000 for each day that the information is not provided.

"(7) In proceedings under subsection (1)(b) of this section—

"(a) the Commission may authorize a party to use depositions, written interrogatories, and discovery procedures that, to the extent practicable, are in conformity with the rules applicable in civil proceedings in the district courts of the United States;

"(b) the Commission may by subpoena compel the attendance of witnesses and the production of books, papers, documents, and other evidence;

"(c) subject to funds being provided by appropriations acts, witnesses are, unless otherwise prohibited by law, entitled to the same fees and mileage as in the courts of the United States;

"(d) for failure to supply information ordered to be produced or compelled by subpoena in proceedings under subsection (1)(b)(7) of this section, the Commission may—

"(i) after notice and an opportunity for hearing, suspend tariffs of a common carrier or that common carrier's right to use the tariffs of conferences of which it is a member, or

"(ii) assess a civil penalty of not more than $5,000 for each day that the information is not provided; and

"(e) when a person violates an order of the Commission or fails to comply with a subpoena, the Commission may seek enforcement by a United States district court having jurisdiction over the parties, and if, after hearing, the court determines that the order was regularly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

"(8) Notwithstanding any other law, the Commission many refuse to disclose to the public a response or other information provided under the terms of this section.

"(9) If the Commission finds that conditions that are unfavorable to shipping under subsection (1)(b) of this section exist, the Commission may—

"(a) limit sailings to and from United States ports or the amount or type of cargo carried;

"(b) suspend, in whole or in part, tariffs filed with the Commission for carriage to or from United States ports, including a common carrier's right to use tariffs of conferences in United States trades of which it is a member for any period the Commission specifies;

"(c) suspend, in whole or in part, an ocean common carrier's right to operate under an agreement filed with the Commission, including agreements authorizing preferential treatment at terminals preferential terminal leases, space chartering, or pooling of cargoes or revenue with other ocean common carriers;

"(d) impose a fee, not to exceed $1,000,000 per voyage; or

"(e) take any other action the Commission finds necessary and appropriate to adjust or meet any condition unfavorable to shipping in the foreign trade of the United States.

"(10) Upon request by the Commission—

"(a) the collector of customs at the part or place of destination in the United States shall refuse the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) to a vessel of a country that is named in a rule or regulation issued by the Commission under subsection (1)(b) of this section, and shall collect any fees imposed by the Commission under subsection (9)(d) of this section; and

"(b) The Secretary of the department in which the Coast Guard is operating shall deny entry for purpose of oceanborne trade, of a vessel of a country that is named in a rule or regulation issued by the Commission place in the United States or the navigable waters of the United States, or shall detain that vessel at the port or place in the United States from which it is about to depart for another port or place in the United States.

"(11) A common carrier that accepts or handles cargo for carriage under a tariff that has been suspend under subsection 7(d) or subsection 9(b) of this section, or after its right to use another tariff has been suspended under those subsections, is subject to a civil penalty of not more than $50,000 for each day that is is found to be operating under a suspended tariff.

"(12) The Commission may consult with, seek the cooperation of, or make recommendations to other appropriate Government agencies prior to taking any action under this section.".

SEC. 4. Notwithstanding sections 12106, 12107, and 12108 of title 46, United States Code and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation with appropriate endorsement for employment in the coastwise, or Great Lakes trades, or the fisheries of the United States for the following vessels:

(1) Arctic Sounder (United States official number 569927),

(2) HMS Bounty (United States official number 960956),

(3) Captain Daryl (United States official number 643920),

(4) Cherokee V (United States official number 570746),

(5) Ernestina (United States official number 136423),

(6) Lady Rose Anne (United States official number 604040),

(7) Mariner III (United States official number 225459),

(8) Salisa M (United States official number 265653), and

(9) Solitaire (United States official number 521894).

The SPEAKER pro tempore (Mr. HARRIS). Is a second demanded?

Mr. LENT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina [Mr. JONES] will be recognized for 20 minutes and the gentleman from New York [Mr. LENT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina [Mr. JONES].

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 4009, as amended, a bill to authorize appropriations for the Federal Maritime Commission for fiscal year 1991, and other purposes. The funds authorized by this bill will enable the Federal Maritime Commission, an independent agency, to carry out its responsibilities to administer and enforce the statutes affecting our waterborne foreign and domestic commerce.

H.R. 4009 authorizes appropriations of $15,894,000 for the Commission for fiscal year 1991. This amount is identical to the administration's budget request. It is an increase of $442,000 over the fiscal year 1990 appropriation of $15,650,000.

The bill extends the date for filing the final report of the Advisory Commission on Conferences in Ocean Shipping. This action is necessary because present law requires the advisory commission to submit its report to the President and the Congress by October 20, 1990. However, not all of the Commission's members have been appointed. H.R. 4009 extends the filing date to 1 year after all the members have been duly appointed.

It strengthens the FMC's authority to address and correct unfair practices in our waterborne foreign commerce. It also authorizes issuance of appropri-

ate coastwise trading and U.S. fisheries documents for nine vessels.

The Merchant Marine Subcommittee held a hearing on the bill on February 22, 1990. It was reported unanimously by the subcommittee on March 21, 1990, with an amendment by Representative LENT and with an amendment which I offered.

My amendment provided that not more than $2,000 of the authorized funds may be expended by the FMC for official reception and representation expenses.

Representative LENT's amendment strengthens the FMC's ability to respond to unfair shipping practices by foreign governments and their agents. Under present law, the Commission is hampered by limited procedural and remedial authority. This modification clarifies the FMC's jurisdiction and broadens its enforcement options.

The full Merchant Marine and Fisheries Committee marked up the bill on March 28, 1990. With one additional amendment, it was unanimously ordered reported.

The amendment added the text of H.R. 4276, which authorized the issuance of appropriate coastwise and U.S. fisheries documents to nine vessels.

Mr. Speaker, this bill has the unanimous support of the members of the Committee on Merchant Marine and Fisheries. The acting chairman of the Federal Maritime Commission testified before the Subcommittee on Merchant Marine in favor of the bill as introduced and has expressed support for the amendments affecting the Commission. The bill deserves the support of this House, and I urge its passage.

□ 1810

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 4009, a bill to authorize appropriations for the Federal Maritime Commission [FMC] for fiscal year 1991, and in doing so, I want to extend my commendation to the distinguished gentleman from North Carolina, the chairman of Committee on Merchant Marine and Fisheries for his leadership in getting this bill to the floor.

This legislation has been carefully considered by the House Merchant Marine and Fisheries Committee. The funding level contained in this bill is $15,894,000—identical to the administration's request. This budget represents a slight increase of $442,000 above the fiscal year 1990 appropriation for the FMC.

The Acting Chairman of the FMC testified before the Merchant Marine Subcommittee endorsing this funding level and indicating that it would enable the Commission to carry out their statutory responsibilities.

Mr. Speaker, this legislation also contains a provision which will broaden the FMC's authority to look at international trade practices used by foreign ship operators that unfairly restrict American vessels. This language is drawn from H.R. 3185, a bill that I introduced earlier in this session to compliment the provisions included in the Foreign Shipping Practices Act of 1988, which the Congress enacted as part of the Omnibus Trade Reform bill.

Specifically, this language would improve the FMC's authority to address and correct conditions unfavorable to shipping in the foreign trade. There are four key elements to this provision.

First, it will clarify the scope of section 19(1)(b) of the Merchant Marine Act, 1920 by indicating that shipping includes intermodal movements and certain land-based activities which are integral to shipping.

Second, it will specify those persons to whom relief under section 19 of the law is available by expressly stating who may file a petition for relief under that section.

Third, it will empower the Commission to use compulsory processes to obtain information concerning unfavorable conditions and, at the discretion of the FMC, it will provide for discovery in proceedings under section 19.

Fourth, it will make available to the Commission a broader range of remedies to correct unfavorable conditions.

The FMC has successfully employed their existing authority under section 19 on a number of occasions against a wide variety of practices of foreign governments and their agents. This legislation is recognition that shipping practices and conditions have changed since section 19 was originally enacted and it will provide the Commission with suitable authorities to enable them to respond to changing conditions. The result will be that section 19 will become a more modern and efficient tool that the FMC can use to address unfair shipping practices in our water-borne foreign commerce.

Mr. Speaker, the other principal provision of H.R. 4009 is a section which provides for congressional authorization for coastwise trading privileges for 9 vessels. The Merchant Marine and Fisheries Committee reviewed each case involving these vessels and determined that it would be appropriate for Congress to grant coastwise privileges to these particular vessels.

Mr. Speaker, I urge our colleagues in the House to support this legislation and to join us in sending this bill to the Senate for their consideration and hopefully expeditious enactment.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LENT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from North Carolina [Mr. JONES] that the House suspend the rules and pass the bill, H.R. 4009, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 4009, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, APRIL 4, 1990

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on tomorrow, Wednesday, April 4, 1990.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ARIZONA WILDLIFE REFUGE WILDERNESS ACT OF 1990

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2571) to provide for the designation of certain National Wildlife Refuge lands as wilderness in the State of Arizona, as amended.

The Clerk read as follows:

H.R. 2571

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Arizona Wildlife Refuge Wilderness Act of 1990".

SEC. 2. WILDERNESS DESIGNATION AND MANAGEMENT.

(a) DESIGNATION.—In furtherance of of the purposes of the Wilderness Act, the following lands are hereby designated as wilderness and therefore as components of the National Wilderness Preservation System:

(1) Certain lands in the Havasu National Wildlife Refuge, Arizona, which comprise approximately 14,606 acres, as generally depicted on a map entitled "Havasu Wilderness" and dated March 13, 1990, and which shall be known as the Havasu Wilderness.

(2) Certain lands in the Imperial National Wildlife Refuge, Arizona, which comprise approximately 9,220 acres, as generally de-

picted on a map entitled "Imperial Refuge Wilderness" and dated March 13, 1990, and which shall be known as the Imperial Refuge Wilderness.

(3) Certain lands in the Kofa National Wildlife Refuge, Arizona, which comprise approximately 511,000 acres, and certain other public lands comprising approximately 5,300 acres which are hereby added to and incorporated within such refuge (and which shall be managed accordingly), all as generally depicted on a map entitled "Kofa Wilderness" and dated March 13, 1990, and which shall be known as the Kofa Wilderness.

(4) Certain lands in the Cabeza Prieta National Wildlife Refuge, Arizona, which comprise approximately 803,418 acres, as generally depicted on a map entitled "Cabeza Prieta Wilderness" and dated March 13, 1990, and which shall be known as the Cabeza Prieta Wilderness.

(b) MANAGEMENT.—Subject to valid existing rights, the wilderness areas designated under this section shall be administered by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") in accordance with the provisions of the Wilderness Act which govern areas designated by that Act as wilderness, except that any reference in such provisions to the effective date of the Wilderness Act (or any similar reference) shall be deemed to be a reference to the date of enactment of this Act.

(c) MAP AND LEGAL DESCRIPTION.—As soon as practicable after enactment of this Act, the Secretary shall file a map and a legal description of each wilderness area designated under this section with the Committee on Interior and Insular Affairs and the Committee on Merchant Marine and Fisheries of the United States House of Representatives and with the Committee on Energy and Natural Resources and the Committee on Environment and Public Works of the United States Senate. Such map and description shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in such legal description and map may be made. Such map and legal description shall be on file and available for public inspection in the Office of the Director, United States Fish and Wildlife Service, United States Department of the Interior.

(d) WATER.—(1) With respect to each wilderness area designated by this Act, Congress hereby reserves a quantity of water sufficient to fulfill the purposes of this Act. The priority date of such reserved rights shall be in the date of enactment of this Act.

(2) The Secretary of the Interior and all other officers of the United States shall take all steps necessary to protect the rights reserved by paragraph (1), including the filing by the Secretary of a claim for the quantification of such rights in any present or future appropriate steam adjudication in the courts of the State of Arizona in which the United States is or may be joined and which is conducted in accordance with the McCarran Amendment, 43 U.S.C. 666.

(3) Nothing in this Act shall be construed as a relinquishment or reduction of any water rights reserved or appropriated by the United States in the State of Arizona on or before the date of enactment of this Act.

(4) The federal water rights reserved by this Act are specific to the wilderness areas located in the State of Arizona designated by this Act. Nothing in this Act related to reserved federal water rights shall be construed as establishing a precedent with regard to any future designations, nor shall it constitute an interpretation of any other Act or any designation made pursuant thereto.".

(3) MILITARY ACTIVITIES.—Nothing in this Act, including the designation as wilderness of lands within the Cabeza Prieta National Wildlife Refuge, shall be construed as—

(1) precluding or otherwise affecting continued low-level overflights by military aircraft over such refuge or the maintenance of existing associated ground instrumentation, in accordance with any applicable interagency agreements in effect on the date of enactment of this Act; or

(2) precluding the Secretary of Defense from entering into new or renewed agreements with the Secretary of the Interior concerning use by military aircraft of airspace over such refuge or the maintenance of existing associated ground instrument, consistent with management of the refuge for the purpose for which such refuge was established and in accordance with laws applicable to the National Wildlife Refuge System.

The SPEAKER pro tempore. Is a second demanded?

Mr. RHODES. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes, and the gentleman from Arizona [Mr. RHODES] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to raise and extend their remarks on H.R. 2571, the bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. VENTO. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona [Mr. UDALL], the chairman of the Committee on Interior and Insular Affairs.

Mr. UDALL. Mr. Speaker, a month ago, the House of Representatives overwhelmingly passed H.R. 2570, the Arizona Desert Wilderness Act. That bill set aside about 1.1 million acres of Bureau of Land Management territory as wilderness. Today, the House considers the other half of the Arizona wilderness package, H.R. 2571, which addresses four wildlife refuges in my State.

This measure matches the administration position and has been reported without opposition from both the Interior and Merchant Marine and Fisheries Committees. It would designate about 1.4 million acres of wilderness on the Havasu, Imperial, Kofa, and Cabeza Prieta refuges in southern and western Arizona.

Wilderness designation will not bring any great changes to the current administration of these refuges. They were studied and positively recommended for wilderness in the administrations of Presidents Nixon and Ford and have been managed as wilderness since that time. Today, we are proposing to formalize the regime that has governed the refuges for at least 15 years.

Some in Arizona have charged that wilderness designation will change the very purposes for which these refuges were established and managed. But there is absolutely no basis for this. The refuges were created for certain wildlife conservation purposes and so they will remain. Wilderness is simply an overlay, prescribing certain terms and conditions for how the land managers and the public are to achieve the refuges' existing purposes.

Kofa, for example, was established largely for the protection and propagation of desert bighorn sheep. In the 15 years of de facto, administrative wilderness management of Kofa, the population of bighorns has continued to grow and now provides stock for sheep transplants to other refuges and habitats throughout the West. The administration has testified that the activities common in the refuges today—for example, donations of time and labor to construct water catchments by organizations such as the Arizona Desert Bighorn Sheep Society—will continue.

In addition, the committee has maintained public access within this 663,000-acre refuge by working with interested groups and individuals in Arizona to design a mutually agreeable road network in Kofa. Kofa has always been interlaced with dirt roads and ways. In 1974, the administration proposed that 275 miles of these roads be left open and 82 miles closed. Last year, the administration amended its proposal to leave 329 miles of roads open and 28 miles closed. At a meeting on January 6, 1990 in Yuma, representatives of sportsmen, conservationists, recreation and wildlife management organizations hammered out an agreement on a network of 326 miles of open roads and 31 miles of closed roads. This agreement is reflected in its entirety in the committee bill.

The 860,000-acre Cabeza Prieta refuge is one of the largest and most magnificent stretches of protected desert lands in America and perhaps the world. The bill, as amended by the Merchant Marine Committee, designates all but about 57,000 acres as wilderness and leaves open the Camino del Diablo and Tule Wells roads for public access.

Because Cabeza Prieta is a part of the larger Barry M. Goldwater Air Force Range, the committee had to consider the continuation of military

training flights over the refuge. The current, acceptable arrangement between the Departments of Defense and Interior is preserved by the bill. The core principle underlying this arrangement is that military overflights, even low-level missions, are allowed to continue, subject to reasonable terms and conditions necessary to protect refuge and wilderness resources.

Upon introduction of this bill, I stated that we would have to consider the possible addition of the Tinajas Altas range to Cabeza Prieta, as was recommended by the President in 1974. There is no question that Tinajas Altas would be an admirable addition to the refuge. Nor is there any question, at least in my mind, that administration of the area to date has been unsatisfactory. However, Congress handed land management authority for the entire Goldwater range to BLM just 4 years ago and the agency has stated its commitment to guarding the delicate and worthy resources of Tinajas Altas and the rest of the range while providing for necessary military activities. I think they deserve the chance to succeed or fail at this task before Congress considers the possibility of adding the area to the refuge.

Mr. Speaker, this legislation is a hallmark in the protection not only of Arizona's natural heritage but also of the beauty and wildlife that is conserved for all Americans. I want to thank my colleagues in the Arizona congressional delegation and on the Merchant Marine and Fisheries Committee for their timely assistance in bringing this bill before the House today.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first of all, let me congratulate the chairman of the full committee, the gentleman from Arizona [Mr. UDALL], for having this particular piece of legislation before the House today.

The House will probably recall that less than a month ago we dealt with another Arizona wilderness bill, and I wish to assure the House that for the foreseeable future I hope this is the extent of Arizona wilderness legislation for the 101st Congress.

This bill deals with about 1.3 million acres which are contained in four wildlife refuges located in the State of Arizona. All four of these areas have been designated for wilderness or recommended for wilderness designation since 1974. All have been managed to protect their wilderness value since that time.

As a result of very lengthy and very serious negotiations among the Arizona congressional delegation and their staffs and the parties interested in wilderness designations in our State, we have come to agreement on this legislation.

I should point out two or three specific points. First of all, in the Kofa National Wildlife Refuge, after, again, lengthy negotiations and discussions with users of the refuge, we have managed to come up with a system of public access, a network of roads and trails within that refuge consisting of some 326 miles that will be open to the public, 51 miles, incidentally, more than was originally recommended in the 1974 recommendations.

Second, I need to deal with the issue of water rights. The water rights language in this bill is precisely the same as the language that was contained in the Arizona desert wilderness bill, the BLM wilderness act, adopted by the House approximately 1 month ago.

The intent of that language is to direct the Secretary to protect the wilderness water rights including the filing by the Secretary of a claim for such rights in the courts of the State of Arizona.

□ 1820

In that forum, along with all other water claims filed in Arizona—a general stream adjudication—the Federal wilderness water right granted in this legislation is to be adjudicated, with a priority date of the date of enactment of this bill.

The language further states these wilderness water rights are not necessarily in addition to any existing water rights the Federal Government may have acquired. The extent of the federal wilderness water right should be determined in the State adjudication and quantification process, along with the claims of all other water right holders.

This language is our solution for Arizona, for these wilderness designations. The bill language states this reserved water rights solution is not intended to be the solution for wilderness reserved water right issues in other states. We fully realize other states, with different water right adjudication processes, may find different solutions to meet their particular needs. These issues should be decided on a State-by-State basis. Generic water rights languages will not work for every State in which water rights are such a crucial issue.

Finally, the Cabeza Prieta National Wildlife Refuge has been used for many years as an overflight area for military training purposes. It is basically a part of the Goldwater Air Force Range, and was originally withdrawn by statute in 1962.

The language in the bill allows continued low-level training overflights by military aircraft and maintenance of associated ground equipment, in accordance with existing, new, or revised memorandum-of-understanding between the Department of Defense and the Department of the Interior.

This is a bill that has been worked on for a long time by the Arizona delegation with the leadership of the gentleman from Arizona [Mr. UDALL]. It has had extensive hearings and negotiations with interested parties in the State, as well as with out-of-State environmental interests. It has our nearly unanimous support in the Arizona delegation, and I urge my colleagues to support the adoption of H.R. 2571.

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 2571 as reported by the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries. Let me thank the members of the Merchant Marine Committee, specifically Chairman JONES and subcommittee Chairman STUDDS for their cooperation on this matter.

Mr. Speaker, this is a bill introduced and championed by our friend and colleague from Arizona, the distinguished chairman of our committee, Chairman UDALL. It is the second part of the overall wilderness legislation for Arizona that the Committee on Interior and Insular Affairs, under his leadership, is bringing before the House this year. This has been over a 15-year struggle to achieve this wilderness designation for these wildlife refuges. The other bill, H.R. 2570, addresses the designation of wilderness on Arizona lands managed by the Bureau of Land Management, and that bill passed the House on February 28 by a vote of 356 to 45.

This bill deals with the designation of wilderness in Arizona on lands managed by the Fish and Wildlife Service as units of the National Wildlife Refuge System. In all, some 1.3 million acres of these lands would be designated as wilderness, including about 5,300 acres which the bill would transfer from BLM management for inclusion in the Kofa Refuge unit.

This wilderness designation is an important step, Mr. Speaker, but it is not a new idea. In fact, what this bill does is generally to adopt Presidential recommendations dating back to 1973 and 1974. Those recommendations were transmitted to the Congress after the review process that the Wilderness Act required for all roadless areas of 5,000 acres or more, and every roadless island, within the National Wildlife Refuge System and other Federal lands. The purposes of this review was to determine the suitability of these areas for inclusion in the National Wilderness Preservation System, and to provide a basis for recommendations to Congress for designation of wilderness areas.

Of course, the management of an area recommended for wilderness has to take that recommendation into account, so that the wilderness values of

a recommended area will be protected until Congress makes a decision with respect to the recommendation.

As a result, Mr. Speaker, a bill such as this one, which essentially adopts Presidential recommendations with respect to wilderness designations, will result in little if any change in the way in which the areas have been managed since the recommendation.

By the way, I ought to note for the information of the House that these recommendations from 1973 and 1974 are not the oldest Presidential wilderness recommendations still pending here in the Congress. Just with respect to the National Wildlife Refuge System, there are at least two recommendations that date back to 1969.

The four refuges within which this bill would designate wilderness areas are Havasu National Wildlife Refuge, Imperial National Wildlife Refuge, Kofa National Wildlife Refuge, and the Cabeza Prieta National Wildlife Refuge. Each of these has very special and unique resources and values, which are discussed at some length in the Interior Committee's report, and each will be a notable and valuable addition to the National Wilderness Preservation System.

The Havasu and Imperial Refuges are located along the Colorado River and include very rugged mountainous areas, where the wilderness areas would be. The Kofa and Cabeza Prieta Refuges are outstanding desert areas that contain a wide diversity of terrain features and wildlife habitat as well as recreational opportunities. Together, the wilderness designations made by this bill will make a very significant contribution to the wilderness system.

Mr. Speaker, when H.R. 2570, the Arizona BLM wilderness bill, was on the floor of the House last month, much of the debate centered on the way that bill addressed the question of water rights associated with the wilderness areas designated by the bill. Members will recall that the House adopted an amendment dealing with that matter that was offered by the gentleman from Arizona [Mr. RHODES], and which Chairman UDALL and I joined in sponsoring. After that action by the House, the Interior Committee adopted a resolution to revise H.R. 2571 so that its water-rights provisions would be the same as those of H.R. 2570 as passed by the House.

Thus, Mr. Speaker, section 2(d) of the bill now before the House is identical to subsection 2(g) of H.R. 2570, the Arizona Desert Wilderness Act of 1990 as passed by the House of Representatives on February 28, 1990, and has the same intent and effect.

It would explicitly reserve, with respect to each of the wilderness areas designated by the bill, a quantity of water sufficient to fulfill the purposes for which those areas are designated, with the priority date of these reserved Federal rights being the date of enactment of the bill.

Paragraph (2) of the subsection would require the Secretary of the Interior and all other officers of the United States to take all necessary steps to protect these reserved rights, including the filing by the Secretary of a claim for such quantification in any appropriate general stream adjudication in Arizona courts to which the United States is made a party under the McCarran amendment and which is conducted in accordance with that provision of existing law.

As I noted when we debated this same language in the context of H.R. 2570, none of this language would have the effect of changing existing law with respect to this matter of the quantification of Federal reserved water rights.

Specifically, the McCarran amendment permits the United States to be joined as a defendant in a general stream adjudication, and under these circumstances, the Federal water right may be quantified as part of the adjudication. However, under existing Federal law the Federal courts share concurrent jurisdiction over Federal water rights, and that concurrent jurisdiction of the Federal courts would not be changed by either this bill or H.R. 2570. Federal officials will thus retain all the options they now have, including going into Federal courts if, for example, the officials conclude that an appropriate State adjudication is not available or that the State process doesn't adequately protect the Federal interest.

Of course, as a practical matter, Mr. Speaker, under existing law and practice water rights such as those reserved by the bill are generally quantified through appropriate proceedings in State courts, even though there is also concurrent jurisdiction in Federal courts, and so quantification of the Federal water rights reserved by this bill and H.R. 2570 will most likely occur in the courts of Arizona through general stream adjudications, except where special circumstances such as the special status of the Colorado River would produce a different result.

Mr. Speaker, as I said before, existing law and practice in this area are working well. They aren't "broken" and don't need "fixing," and both H.R. 2570 and this bill would leave them intact.

Finally, Mr. Speaker, the bill addresses the relationship between the Defense Department and the Fish and Wildlife Service with respect to the Cabeza Prieta Refuge. That refuge is overlain by the Barry Goldwater Air Force Range, which has been withdrawn for military use until the year 2001 by the Military Lands Withdrawal Act of 1986. Overflights and related activities there are governed by an interagency agreement, and after a careful review the Interior Committee concluded that that agreement strikes an acceptable balance between the need of the military for these activities and the need to protect the refuge and its resources and values, including wilderness values. The bill includes language—in section 2(e)—to make it clear that low-level overflights consistent with the restrictions in the existing interagency agreement—or renewals of the agreement—can continue, as can the maintenance of existing ground facilities associated with those flights.

In summary, Mr. Speaker, this is a good and important bill that will give congressional approval for wilderness designations recommended some time ago. It will protect important wilderness and other values, while providing for continued sound management of these areas as part of the National Wildlife Refuge System. The Arizona delegation, and especially Chairman UDALL, can take pride both in this bill and in H.R. 2570, already approved by the House. Together these bills will leave a lasting legacy for the people of Arizona and the Nation. I urge passage of the bill.

Mr. DAVIS. Mr. Speaker, I rise in support of H.R. 2571, the Arizona Wildlife Refuge Wilderness Act of 1990, which provides wilderness designation for four wildlife refuges in Arizona, pursuant to the Wilderness Act of 1964, in order to protect important segments of the fragile and unique desert ecosystems of the Southwest.

The wilderness designations in H.R. 2571 are based on recommendations made by Presidents Nixon and Ford during the mid-1970's pursuant to the wilderness study reviews mandated by the Wilderness Act. The bill was modified by the Interior Committee and the Merchant Marine and Fisheries Committee to incorporate various acreage adjustments requested by the administration.

Mr. Speaker, an area within a national wildlife refuge which is designated as wilderness remains part of the National Wildlife Refuge System, and is subject to the jurisdiction of the Fish and Wildlife Service. A wilderness designation does place certain restrictions on the kinds of management activities and public uses which may take place within a wilderness area. For example, it generally prohibits commercial activities, motorized access and the construction of new roads, structures, and facilities in wilderness areas. However, it does provide limited exemptions for livestock grazing, preexisting motorboat and aircraft use, and some commercial recreation such as guiding or rafting trips.

Public activities such as hiking, camping, or hunting would not be prohibited by a wilderness designation. Moreover, the Fish and Wildlife Service testified at a hearing before the Merchant Marine and Fisheries Committee that it is not concerned that wilderness designations contained in H.R. 2571 would adversely affect their wildlife conservation programs or unduly restrict their wildlife management options. In fact, the Fish and Wildlife

Service has managed most of the acres designed as wilderness under H.R. 2571 as de facto wilderness since the Wilderness Review Study which identified these areas was completed 17 years ago. Under existing wilderness management policy, a wide range of wildlife management activities are, and will continue to be, allowed in the four Arizona wildlife refuges.

A number of hunters were initially concerned that the wilderness designations under H.R. 2571 would greatly limit road access and thus make hunting more difficult or impossible. According to the Fish and Wildlife Service, a compromise was reached in January of this year regarding access roads linking the wilderness units that should satisfy the various user groups, including hunters, without diminishing the wilderness value of these areas.

H.R. 2571 also addresses the issue of adjudication of water rights. The Interior Committee and the Merchant Marine and Fisheries Committee have reached a bipartisan compromise on this issue, and I believe the language we have before us today in H.R. 2571 is noncontroversial and is supported by all parties.

Mr. Speaker, in closing I would like to say that the Arizona Wildlife Refuge Wilderness Act of 1990 as amended is a very good bill, and I ask my colleagues to adopt this measure.

Mr. JONES of North Carolina. Mr. Speaker, today I rise in support of Mr. UDALL's H.R. 2571, the Arizona Wildlife Refuge Wilderness Act, which was jointly referred to the Interior and Insular Affairs Committee and the Merchant Marine and Fisheries Committee.

The Committee on Merchant Marine and Fisheries has jurisdiction over matters affecting the U.S. Fish and Wildlife Service and the National Wildlife Refuge System, so it has a strong interest in all bills proposing to designate wilderness within national wildlife refuges. My committee has jurisdiction over the National Wildlife Refuge System Administration Act, the primary statutory authority governing the management of national wildlife refuges. That act authorizes the use of a very broad array of habitat management and wildlife conservation activities by wildlife refuge managers. The formal designation of wilderness within a wildlife refuge restricts the use of some of these management authorities otherwise available to a refuge manager. A refuge wilderness designation, therefore, implicitly amends the Refuge Administration Act as it is subsequently applied to the new wilderness area. It is for this reason that my committee has a jurisdictional interest in the way a wilderness proposal might affect the future management of a given wildlife refuge.

My committee has carefully reviewed the merits of the wilderness proposals for the four Arizona wildlife refuges covered by H.R. 2571 and strongly supports the designation of wilderness for those refuges. The Fish and Wildlife Service recently testified in front of my committee in favor of H.R. 2571, and indicated that the wilderness designations included in the bill will not adversely affect or unduly restrict wildlife management operations on these four desert wildlife refuges.

Furthermore, H.R. 2571, as amended, incorporates compromises on management issues such as access, Federal water rights, and military activities. These compromises should accommodate the various user groups on these refuges, including hunters, without diminishing the wilderness value of these areas.

In order to accommodate the personal request of my dear friend, MO UDALL, my committee expedited consideration of this bill. I think that Chairman UDALL, subcommittee Chairman VENTO, and the Arizona delegation should be proud of their hard work on an excellent bill. This bill will help protect an important part of the desert heritage of this country.

Mr. KYL. Mr. Speaker, I rise in support of H.R. 2571, the Arizona Wildlife Refuge Wilderness Act.

Just over a month ago, we passed the Arizona Desert Wilderness Act affecting 1.1 million acres of land in the State of Arizona within the jurisdiction of the Bureau of Land Management. This bill builds upon that effort, setting aside four wildlife refuges in the State in the same protective wilderness status.

The four refuges—the Kofa, the Cabeza Prieta, the Imperial, and Havasu National Wildlife Refuges—total 1.3 million acres in southwestern Arizona.

The water rights language in this bill is identical to that which we included in the Arizona BLM wilderness bill. It is designed to ensure that the Federal reserved water rights for these wilderness areas will be quantified in the courts of the State of Arizona.

Mr. Speaker, it is my understanding that the administration supports this bill. I urge my colleagues' support.

Mr. RHODES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 2571, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

FUNDS TO ACQUIRE LAND FOR EMERGENCY SHELTERS UNDER INDIAN ALCOHOL AND SUBSTANCE ABUSE PREVENTION AND TREATMENT ACT OF 1986

Mr. McDERMOTT. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1813) to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters.

The Clerk read as follows:

S. 1813

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (e) of section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 (25 U.S.C. 2433(e)) is amended—

(1) by inserting ", or purchase or lease of land or facilities for," after "renovation of" in paragraph (1),

(2) by striking out "subject to contracting" in paragraph (3) and inserting in lieu thereof "subject to contracting or available for grants", and

(3) by adding at the end thereof the following new paragraphs:

"(4) Funds appropriated under the authority of this subsection may be used by any Indian tribe or tribal organization to purchase or lease any land or facilities if—

"(A) the Secretary of the Interior determines that no Federal land or facilities are reasonably available for emergency shelters or halfway houses described in subsection (a) to serve the needs of that Indian tribe or tribal organization, and

"(B) the Indian tribe or tribal organization enters into an agreement with the Secretary of the Interior that requires the Indian tribe or tribal organization to use the land or facilities for emergency shelters or half-way houses described in subsection (a).

"(5) Nothing in this Act may be construed—

"(A) to limit the authority for contracts with, or grants to, Indian tribes or tribal organizations under the Indian Self-Determination Act for the construction, improvement, renovation, operation, repair, land acquisition, or maintenance of tribal juvenile detention facilities, emergency shelters, or half-way houses, or

"(B) to require a lease of tribal facilities to the United States to qualify for financial assistance for the facilities under this or any other Act.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Washington [Mr. MCDERMOTT] will be recognized for 20 minutes, and the gentleman from Arizona [Mr. RHODES] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Washington [Mr. MCDERMOTT].

GENERAL LEAVE

Mr. McDERMOTT. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to revise and extend their remarks on S. 1813, the Senate bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. McDERMOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a rather simple bill. It amends section 4213 of the Indian Alcohol and Substance Abuse Act of 1986. That section authorizes the appropriation of funds for the construction or renovation of facilities as emergency shelters or halfway houses for Indian youth who are victims of alcohol or substance abuse.

As some of the small tribes of western Washington sought to take advantage of this section, they encountered

a defect in the law which prevented them from developing an emergency shelter for their youth. The tribes had identified an available facility to serve as a shelter and proposed to acquire the land and facility. They were advised, however, that the Bureau of Indian Affairs had no authority to use section 4213 funds to acquire land.

This bill amends section 4213 to provide that such funds can be used to purchase or lease any land or facilities for a shelter or halfway house if the Secretary of the Interior determines that there are not reasonably available Federal facilities and the tribe agrees to use the lands for that purpose.

Mr. Speaker, this bill was jointly referred to the Committees on Interior and Insular Affairs and Energy and Commerce. I am including for the RECORD a letter from Chairman DINGELL noting the jurisdiction of his committee, but concurring in our action on this bill.

Mr. Speaker, enactment of S. 1813 represents no new costs to the United States. It is supported by the administration and I know of no opposition. I urge passage of the bill.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, March 27, 1990.

Hon. MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter outlining your Committee's action on S. 1813, a bill to amend section 4213 of the Indian Alcohol and Substance Abuse Act of 1986, and your desire to take this bill to the House floor expeditiously.

The Committee on Energy and Commerce, which shares jurisdiction over this legislation, is appreciative of the need to enact this provision, and is willing to forego action on the bill in order that it can be brought quickly before the House.

I am appreciative of your cooperation, and request that you make our correspondence on this issue a part of the legislative record.

Sincerely,

JOHN D. DINGELL,
Chairman.

Mr. Speaker, I would like to acknowledge the gentleman from Colorado [Mr. CAMPBELL] for his chairing of the markup.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 1813, a bill to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land or facilities, either by purchase or lease, for emergency treatment shelters.

The 1986 Act currently authorizes the Secretary of the Interior and the Secretary of Health and Human Services: First, to make available local Federal facilities; second, to lease tribally owned or leased facilities; and third, to construct new facilities or renovate existing facilities owned by the tribes on their reservations.

The act does not give either Secretary or the tribal grantees the authority to use the funds provided under the act to acquire land and facilities to carry out the purposes of the act. This oversight should be corrected, and enactment of S. 1813 will do the job.

S. 1813 includes two important prerequisites to meet before Federal funds appropriated under this act may be used to acquire land or facilities. First, the Secretary of the Interior must determine that no existing Federal land or facilities are reasonably available to serve the emergency shelter needs of the tribe or tribal organizations. Second, the tribal grantee must enter into an agreement with the Secretary establishing that the land or facilities to be acquired will in fact be used for emergency shelter or halfway houses in accordance with the purposes of the act.

I urge my colleagues to support passage of S. 1813 as reported by the Committee on Interior and Insular Affairs.

□ 1830

Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I rise in strong support of S. 1813, a bill which will permit funds provided under the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 to be used to acquire land or facilities for emergency shelters and halfway houses, if there are no suitable Federal facilities or land available, in order to serve Indian youth with alcohol or substance abuse problems.

In 1984, our colleague in the House from South Dakota, now that State's junior Senator, and this Member began work on what became the Indian Youth Alcohol and Drug Abuse Prevention and Treatment Act. Our efforts stemmed from a plea to us from Indian leaders in our States and elsewhere, who informed us that the number one health and social problem on the reservation was the abuse of alcohol and illicit substances. In 1986, after much consultation with tribal leaders nationwide, nine hearings across the country, and significant refinements to the bill we had introduced in 1984, our bill passed the House and was folded into the first omnibus alcohol and drug abuse prevention bill.

One of our major concerns was that young people involved with alcohol and drug-related offenses were more often than not detained or cared for in inappropriate facilities. Many youth involved with alcohol and/or drugs need protection—perhaps from their own violent home lives—as well as emergency intervention of the sort that can prevent an escalation of their problems to the point of serious criminal involvement.

However, most reservations do not have emergency shelters or halfway houses for youth, which means that they are often held—even for their own protection—in jail facilities with adult offenders. The passage of this legislation is necessary, for the situation on Indian reservations is unlike nonreservation areas, where States are required by the Juvenile Justice and Prevention Act to maintain separate facilities for adults and juveniles. The principal of keeping juveniles apart from adults is founded on the commonly shared and reasonable conviction that exposure of young people to hardened or experienced criminals can harm them. It was our intent to see that Indian youth had, to the extent possible, the same protections as non-Indian youth. This legislation is necessary to further our original intent.

While this Member would want to be very careful about any effort to purchase or lease land or facilities for emergency shelters or halfway houses for Indian youth, simply because of the serious need to protect prevention and treatment dollars, it is also clear that the assistance offered in such facilities has the potential to minimize the need for more restrictive and long term residential treatment. In addition, well-timed and effective emergency assistance may prevent young people from entering the criminal justice system. For several reasons, therefore, it is crucial to provide alternative shelters and emergency facilities if none actually exist, and I urge my colleagues to support S. 1813.

Mr. RHODES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. McDERMOTT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Washington [Mr. MCDERMOTT] that the House suspend the rules and pass the Senate bill, S. 1813.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 1096, PROVIDING FOR USE AND DISTRIBUTION OF SEMINOLE INDIAN AWARD

Mr. DARDEN. Mr. Speaker, I move to suspend the rules and agree to the conference report on the Senate bill (S. 1096) to provide for the use and distribution of funds awarded the Seminole Indians in dockets 73, 151,

and 73-A of the Indian Claims Commission.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

(For conference report and statement, see proceedings of the House of March 29, 1990.)

The SPEAKER pro tempore. The gentleman from Georgia [Mr. DARDEN] will be recognized for 20 minutes, and the gentleman from Arizona [Mr. RHODES] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Georgia [Mr. DARDEN].

GENERAL LEAVE

Mr. DARDEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the conference report on S. 1096.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. DARDEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring before the House the conference report on S. 1096. S. 1096 authorizes the distribution of funds awarded to the Seminole Indians in judgments against the United States for the wrongful taking of their lands in the State of Florida in 1823 and 1834.

The only significant controversy associated with this legislation was how the award in Indian Claims Commission dockets 73 and 151 was to be divided between the Seminole Nation of Oklahoma, on the one hand, and the three Seminole tribal entities of Florida. This award was for an initial amount, in 1976, of $16,000,000. The fund, with earned income since 1976, now totals nearly $48,000,000. What has prevented this money from being paid to the Indians has been the complete inability of the Indians from the two States to agree upon a division formula.

As passed by the Senate, S. 1096 provided that it would be divided with 75.404 percent going to the Oklahoma tribe and the remainder, 24.596 percent, going to the three Florida tribes. This division is based upon relevant population comparisons and is supported by the administration and past precedents of the Congress in similar situations.

The inability of the tribes to agree stalled the legislation in the House and, as a consequence, a compromise was adopted to advance the legislation in the legislative process. The compromise provided that the Oklahoma tribe would get 73 percent and the Florida Seminole 27 percent.

Upon consideration by the committee of conference, it was felt that there simply was not sufficient reason to deviate from the general rule of division based upon comparative populations as advocated by the administration and as contained in the Senate bill. The conferees decided that these funds are not public funds subject to allocation based upon political compromise, but that they are the private property of the Seminole Indians and should be divided based upon a rational and equitable formula.

As a consequence, the conferees recommend that the House recede from its amendments to the Senate bill and adopt the position of the Senate.

Mr. Speaker, I urge adoption of the conference report.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first let me just note briefly that this is the third bill on the Suspension Calendar that the Committee on Interior and Insular Affairs has brought to the floor here today. The majority has brought in a fresh Member to manage each of these bills while I have stood up here alone fending them off. I presume that they believe that they can wear me down, but I can assure the gentleman from Georgia it takes more than three of them to get to me or through me.

Mr. Speaker, I rise in support of the conference report on S. 1096, a bill to provide for the use and distribution of funds awarded the Seminole Indians by the Indian Claims Commission.

The single issue for resolution at the conference was the appropriate division of the award as between the Florida and Oklahoma Seminole groups. Senate action on this bill divided the award 75.404 percent and 24.596 percent between the Oklahoma and Florida groups, respectively; House action divided the award 73 percent and 27 percent, respectively. For the following reasons, I supported the House conference motion to recede from the House action in favor of the Senate action on S. 1096.

The conference action has a solid factual basis—the judgment award is divided on the basis of extensive and exhaustive research regarding the relative populations of the contending tribal groups.

The conference action supports the most equitable division of the award—the division approved in conference is based on the most accurate census and membership roll records of the tribal groups closest to the time of the wrongful taking; any other division of the award would have substantially diminished the share given to the Florida Seminole groups.

The conference action acknowledges the validity of the statutory process set forth in the Indian Judgment Fund Distribution Act—authorizing the Secretary of the Interior to research and make recommendations to Congress as to the appropriate division and distribution of such awards. All affected beneficiaries to this award were afforded extensive opportunities, both with the Secretary and in the Congress, to debate the appropriate division of the award.

Federal agencies are often accused of being arbitrary with regard to their treatment of the individuals they are responsible for serving. A review of the record of S. 1096 reveals to me that the Secretary of the Interior and his staff have been scrupulously fair and honest in the attention given to the research and reports on the appropriate division of the Seminole Indian judgment fund award. I am pleased that the conference action can be described in a similar manner.

I urge my colleagues to support approval of the conference report on S. 1096.

□ 1840

Mr. Speaker, I reserve the balance of my time.

Mr. DARDEN. Mr. Speaker, I yield 5 minutes to my distinguished colleague, the gentleman from Samoa [Mr. FALEOMAVAEGA].

Mr. FALEOMAVAEGA. Mr. Speaker, I rise in support of S. 1096, a bill providing for the use and distribution of the Indian Claims Commission funds appropriated in 1976 for the Seminole Indians of Florida and Oklahoma.

Mr. Speaker, I was a member of the conference committee appointed on this bill and participated in the deliberations on this bill as a member of the Committee on Interior and Insular Affairs.

Mr. Speaker, I have a keen interest in American Indian affairs, and I am pleased to have been a participant in this decision.

Mr. Speaker, although I voted in favor of the House position of the conference committee, I am now supporting the majority position to recede to the Senate language.

While there is much dispute within the Seminole community as to how these funds should be distributed, and the Seminoles of Florida have some compelling arguments as to why we should look again into the division made by the Indian Claims Commission, the funds have been appropriated for 14 years and during that time they have not helped one Seminole Indian.

Additionally, the distribution recommended by the Indian Claims Commission is not a hasty or arbitrary one. Much work went into determining an appropriate distribution, and this recommendation has been reviewed by the Department of the Interior.

As much as I want to help out the Seminoles from the State of Florida, a time comes when as a Congress we need to stop looking backward and move forward.

While there is dispute as to how the funds should be divided, there is no dispute that the funds need to be distributed.

For these reasons, Mr. Speaker, I urge my colleagues to vote today to accept the Senate position on this bill.

Mr. RHODES. Mr. Speaker, I feel capable of handling Mr. UDALL, Mr. VENTO, Mr. MCDERMOTT, Mr. DARDEN; Mr. FALEOMAVAEGA is too much for me and I yield back the balance of my time.

Mr. SMITH of Florida. Mr. Speaker, I would like to express my disappointment in the conference report on S. 1096. This legislation provides for the distribution and use of funds that were awarded to the Seminole Indian Tribe by the Indian Claims Commission in 1976. I feel it is unfair that the bill allocates 75.404 percent of the funds to the Oklahoma Seminole Nation and only 24.596 percent to the Seminole Tribe of Florida.

The past injustices waged against the Seminole Tribe constitute a dark chapter in our Nation's treatment of American Indians. In 1823, the Federal Government seized Seminole land in Florida and forced the tribe to resettle in Oklahoma. Many died during their long trip to Oklahoma, and many remained in Florida and hid in the Everglades. Clearly, both the Florida and Oklahoma Seminoles incurred great losses, losses too great to ever quantify.

To right this terrible wrong, the Indian Claims Commission awarded the Seminole Indian Tribe $16 million in 1976 for the lands that were seized in 1823. Over the years, this award has grown to nearly $50 million. The Claims Commission, however, failed to make a judgment on the exact division of this award between the descendants of the tribe in Oklahoma and in Florida. During this time, the funds have never been distributed because the Oklahoma and Florida tribes have failed to reach an agreement on an acceptable division.

The Bureau of Indian Affairs recommended that the funds be split 75.404 to 24.596 percent in favor of the Oklahoma Seminoles. This recommendation was based on census data from a date in the early 20th century, a date almost 80 years later than the actual taking of the land. As a result, the BIA's reliance on this irrelevant data makes their recommendation for the distribution of the funds seem arbitrary and unfair.

Another important point of contention is that the Oklahoma Seminoles received over $4 million in treaty payments while the Florida tribe received no similar compensation. In the past, Federal courts have ruled that both emigrant and nonemigrant Indian tribes have an equal right to share in treaty benefits. The Florida Seminoles had a clear right to share in the treaty payments and, since they did not, these payments received by the Oklahoma group should be factored into the division of the judgment funds.

The use of irrelevant population data and the unshared treaty payments led the Florida Seminoles to argue that an adjustment should be made to the 75.404 percent to 24.596 percent BIA recommendation. Just taking the treaty payments into account would increase Florida's share of the judgment funds to 30 percent.

The Interior Committee considered these issues and approved a bill which divided the funds on a 73 to 27 percent basis. Although we did not believe a mere 2 percent adjustment to the BIA recommendation was sufficient, the Florida delegation accepted the Interior Committee's version in the spirit of compromise and in order to avoid a floor fight between the Florida and Oklahoma delegations.

The House conferees clearly had substantive arguments to support a 73 to 27 percent division during their conference on S. 1096 with the Senate. Unfortunately, the House agreed to recede to the Senate position, a 75.404 to 24.596 percent split, before any of the important issues were raised.

The concession on the part of the House conferees to the Senate position neglects the legitimate concerns of the Florida Seminoles. This group approached Congress in the hopes of settling a longstanding dispute in a fair and equitable manner. Instead, the Florida Seminoles have once again been treated unjustly by the Federal Government. Their lands were seized in the 1830's; they were denied a share of the treaty payments in the 1850's and 1860's; and now, in 1990, they have been denied equitable compensation for these past injustices. The Florida Seminoles deserve better treatment from Washington.

Mr. DARDEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Georgia [Mr. DARDEN] that the House suspend the rules and agree to the conference report on the Senate bill, S. 1096.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR PREPARATION OF VOLUME ENTITLED THE "COLUMBUS IN THE CAPITOL"

Mr. BATES. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 275) providing for the preparation of a volume entitled "Columbus in the Capitol," and for other purposes.

The Clerk as follows:

H. CON. RES. 275

Whereas Christopher Columbus was a great and courageous explorer whose voyages of discovery are well known;

Whereas the year 1992 marks the 500th anniversary of the discovery of America by Christopher Columbus in the year 1492; and

Whereas paintings, statues, and other works of art depicting the life and exploits of Christopher Columbus are displayed, both permanently and in special exhibits, in the Capitol and at other locations within the Capitol grounds: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That, as part of the observance of the 500th anniversary of the discovery of America, there shall be prepared a volume describing works of art honoring Christopher Columbus, as displayed, both permanently and in special exhibits, in the Capitol and at other locations within the Capitol grounds. The volume shall—

(1) be entitled "Columbus in the Capitol";

(2) contain descriptions and illustrations of such works of art; and

(3) be prepared under the direction of the Joint Committee on Printing, with the assistance of the Office of the Architect of the Capitol and such other congressional entities as the Joint Committee may require.

SEC. 2. During the year 1992, the Architect of the Capitol shall carry out a program of special exhibits of works of art honoring Christopher Columbus.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California [Mr. BATES] will be recognized for 20 minutes, and the gentlewoman from New Jersey [Mrs. ROUKEMA] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. BATES].

Mr. BATES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Christopher Columbus—or, in Spanish, Cristobal Colon—was a great and courageous explorer whose voyages of discovery are well known. This son of Italy, born in Genoa in the House of the Weaver Domenico Colombo on a day unrecorded for history, went to sea at the age of 14. He discovered America by prophecy rather than by astronomy. "In the carrying out of this enterprise of the Indies," he wrote to King Ferdinand and Queen Isabella in 1502, "Neither reason nor mathematics nor maps were any use to me: fully accomplished were the words of Isaiah."

The year 1992 marks the 500th anniversary of the discovery of America by Christopher Columbus. In his initial voyage, the larger of his three ships, the *Santa Maria*, was about 117 feet long, while the *Nina* and the *Pinta* measured only 50 feet in length. This fleet left the Canary Islands on September 6, 1492. The faith and will power of Columbus guided the expedition for several weeks during which all that was visible was the open sea. Two hours after midnight, on October 12, a sailor saw land from the prow of the *Pinta*—the great discovery was made!

Today, paintings, statues, and other works of art depicting the life and exploits of Christopher Columbus are displayed, both permanently and in special exhibits, in the Capitol and at other locations within the Capitol Grounds. We now resolve in this House of Congress that, as part of the observance of the 500th anniversary of the discovery of America, there shall be prepared a volume describing works of art honoring Christopher Columbus, as displayed both permanently and in special exhibits in this building, the Capitol site, and home of our na-

tional Government. I am pleased to be a sponsor of the resolution commissioning the preparation of this volume, to be entitled "Columbus in the Capitol." Surely, the exhibit and the commemorative catalogue that we authorize today will provide a special opportunity for many Americans to become discoverers of Columbus.

Mr. ANNUNZIO. Mr. Speaker, I rise in support of House Concurrent Resolution 275, which I introduced, to authorize the preparation of a pamphlet that pictures and describes the works of art in the Capitol and the Capitol Grounds honoring Christopher Columbus. I thank the gentleman from California, [Mr. BATES], for his cooperation in reporting the resolution.

The 500th anniversary of the discovery of America is only 2 years away, and our Nation is planning many grand celebrations. Here, in our Capitol Building, are paintings, frescos, busts, and other works of art that reflect our recognition of those remarkable voyages by the Genoese admiral that led to the opening of a whole New World. It is no wonder that the King of Spain conferred upon him the rank of "Admiral of the Ocean Seas."

This resolution calls for the preparation of a publication, and not for its printing. When it has been written and the photographs taken, we will be back with a printing resolution.

Mr. Speaker, I am pleased that so many of my dear friends in the House have joined me in sponsoring this small token in honor of Columbus. I am sure that they will join me in the future as more such events are planned.

I am, for example, exploring the possibility of returning to the Capitol the great statue of Columbus that stood for over a 100 years on the east front. It was removed during the east front reconstruction. Through lack of care, it has fallen into disrepair, but I am informed that it can be restored and returned to a place of honor for the 1992 celebration.

Mr. Speaker, this resolution is but a small part of our program for honoring Christopher Columbus. I urge its passage now so that the pamphlet will be ready for the quincentennial celebration.

GENERAL LEAVE

Mr. BATES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 275, the concurrent resolution presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BATES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mrs. ROUKEMA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 275, a bill which provides for the preparation of a volume entitled "Columbus in the Capitol." The year 1992 marks the 500th anniversary of the discovery of America by Christopher Columbus. In anticipation of this event, the bill directs the Joint Committee on Printing to prepare a volume containing descriptions and illustrations of works of art honoring Christopher Columbus displayed in the Capitol and on the Capitol Grounds. It also directs the Architect of the Capitol to carry out a program of special exhibits of works of art honoring Christopher Columbus in the year 1992. As an original cosponsor of House Concurrent Resolution 275, I want to stress its importance in light of the coming celebrations marking the 500th anniversary of the discovery of America by Christopher Columbus.

There are numerous paintings, statues, and other works of art in permanent and temporary displays in the Capitol and in other locations on the Capitol Grounds which depict the life and exploits of Columbus. It is fitting and appropriate that Congress create a volume of descriptions and Illustrations of these works of art to bring all the various works together in one commemorative volume. This resolution will commission such a volume to honor Christopher Columbus and the artists that produced these works. "Columbus in the Capitol" will serve as a reference for historians and a historic and artistic guide to visitors to our Nation's Capitol.

The volume of works of art created by this resolution will be an important part of the National Christopher Columbus 1992 celebration. It will also be the first permanent and official record of Christopher Columbus artworks in the Capitol, thereby becoming a historic document to be used in future celebrations honoring Christopher Columbus.

I want to thank my distinguished colleague from Illinois, Mr. ANNUNZIO, for his work on the resolution. I also want to thank the members of the Italian-American Foundation for their work on organizing and promoting the festivities for the Christopher Columbus 1992 celebration. This celebration will not only commemorate the achievements of Christopher Columbus, but will celebrate the many contributions that Italian-Americans have made to our culture over the centuries since the discovery of America.

House Concurrent Resolution 275, along with several other pieces of legislation pertaining to the 500th anniversary of the discovery of America by Christopher Columbus, will surely make for a richer and more rewarding celebration in 1992. I fully support this resolution and urge its immediate passage.

□ 1850

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from California [Mr. BATES] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 275.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AMENDING THE LABOR-MANAGEMENT RELATIONS ACT OF 1947 TO PERMIT PARTIES TO BARGAIN TO ESTABLISH TRUST FUNDS FOR EMPLOYEE HOUSING

Mr. CLAY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4073) to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing.

The Clerk read as follows:

H.R. 4073

Be in enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EMPLOYEE HOUSING TRUST FUNDS.

Section 302(c)(7) of the Labor Management Relations Act of 1947 (29 U.S.C. 186(c)(7)) is amended—

(1) by striking out "or" at the end of subparagraph (A); and

(2) by inserting ", or (C) financial assistance for employee housing" after "dependents of employees" in subparagraph (B).

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Missouri [Mr. CLAY] will be recognized for 20 minutes, and the gentlewoman from New Jersey [Mrs. ROUKEMA] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Missouri [Mr. CLAY].

Mr. CLAY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to begin by thanking the Republican members of the Education and Labor Committee and especially the gentlewoman from New Jersey, Mrs. ROUKEMA, for their assistance on this legislation.

Section 302 of the Taft-Hartley Act prohibits payments by employers to representatives of their employees for purposes other than those specified under section 302(c). Because Congress has enacted a general prohibition and set forth only specific exceptions, a labor-management trust providing employee housing assistance otherwise unlawful unless also excepted.

H.R. 4073 amends section 302(c) of the Taft-Hartley Act to permit the establishment of housing trusts. It provides that the establishment of a housing trust shall be a permissible subject

of bargaining rather than a mandatory subject of bargaining. Further, the comprehensive regulatory scheme governing existing section 302(c)(7) plans would be fully applicable to the employee housing assistance trusts created under this bill. H.R. 4073 is identical to S. 1949, a bill that passed the Senate unanimously on November 22, 1989.

Allowable assistance under H.R. 4073 would include, for example, payments to employees for down payments, closing costs, bank fees, mortgage interests buydowns, and initial rental costs such as security deposits and first month's rent. Plans providing these benefits through trusts established pursuant to this measure will be employee welfare benefit plans subject to the requirements of the Employee Retirement Income Security Act of 1974 [ERISA]. H.R. 4073 is not to be construed to extend ERISA jurisdiction to the provision of financial assistance by employers for employee housing such as relocation assistance, temporary housing for special assignments, or migrant labor housing if such assistance is provided solely from the general assets of an employer.

Enactment of this bill will further important public policies.

Today, half a million Americans are homeless and in many areas of the country rising housing costs are placing the ability of workers to own their own homes beyond reach. This legislation promotes a private sector solution to the increasing difficulties workers face in obtaining affordable, decent housing.

Mr. Speaker, I reserve the balance of my time.

Mrs. ROUKEMA. Mr. Speaker, I yield myself such as as I may consume.

Mr. Speaker, I rise in support of passage of H.R. 4073, legislation to amend the Labor Management Relations Act of 1947 to provide for jointly administered trust funds to provide housing assistance to employees.

The other body passed an identical measure, S. 1949, under unanimous consent in the closing hours of the last session of Congress, with the approval of ranking minority member Senator HATCH, and without opposition from the Department of Labor or the White House.

Since the Senate bill passed without hearing or markup, I was concerned that the Taft-Hartley Act would be amended without adequate inquiry into its implications. The Subcommittee on Labor-Management Relations, has recently held hearings on the effectiveness of ERISA enforcement procedures at the Department of Labor. At those hearings, the Department's Inspector General expressed the view that these enforcement procedures were so lax as to precipitate a major crisis in the pension/employee welfare benefit plan area. This raised substantive questions in the absence of hearings on H.R. 4073. In the face of the controversy over ERISA enforcement procedures, I asked the Solicitor of Labor, the Assistant Secretary for Pension and Welfare Benefits, and the Inspector General for legal analyses of this legislation, its enforcement under ERISA, and its interaction with ERISA's fiduciary standards and prohibited transaction rules. At this point, Mr. Speaker, I would ask that the text of their letters to me be included in the RECORD at the conclusion of my statement, by unanimous consent.

The letters I received from DOL informed me that with improved ERISA enforcement, and with this trust fund's purpose to be itself the direct source of housing assistance to employees in the form of rental security deposits, down payment assistance, collateral for mortgage assistance, closing costs and bank fees, the administration of the funds will be well within ERISA's fiduciary standards and prohibited transaction rules. I remain concerned that as the number and value of these trust funds grows, their purposes will eventually be tested against ERISA to provide various other kinds of assistance not envisioned—and not prohibited—by this bill. Nevertheless, I am satisfied that the Department of Labor has no objection, and I support the legislation.

It is important to stress that this new category of trust fund will be a permissive subject of collective bargaining. By amending section 302(c)(7) of the Taft-Hartley Act, H.R. 4073 incorporates the proviso to that section which states clearly that this is a permissive subject of bargaining. Therefore, employers are not required to bargain over, or to establish housing trust funds. Nor can organized labor undertake a lawful strike over an employer's refusal to establish such a fund.

Letters from the Solicitor of Labor and Assistant Secretary of Labor for Pension and Welfare benefits are included in the Committee record on this bill and give sound legislative guidance on how this legislation will interact with the provisions of ERISA.

I would like to commend the chairman of the Labor-Management Relations Subcommittee, Congressman BILL CLAY, for his leadership, and his cooperation in ensuring that the committee report provides sound legislative history for the future as to the parameters of this bill.

Since the Taft-Hartley Act was first passed in 1947, the Congress has periodically created several exceptions to that act's prohibition on payments between employers and labor unions.

H.R. 4073 represents yet another effort to address problems that face employees with mutual cooperation between labor and management, by establishing trust funds to provide housing assistance. As the ranking Republican on the Housing and Community Development Subcommittee, I have long been aware of, and sensitive to, the fact that housing prices are out of the reach of many Americans. For this reason as well, I am sympathetic to the goals of this bill.

Local 26 of the Hotel and Restaurant Workers Union in Boston has earned a real victory today. It is their innovation in creating the first housing trust fund of this kind, which will become a reality with the passage of H.R. 4073, and its eventual signing by the President.

The letters follow:

U.S. DEPARTMENT OF LABOR,
Washington, DC, February 22, 1990.

Hon. MARGE ROUKEMA,
Committee on Education and Labor, House of Representatives, Washington, DC.

DEAR CONGRESSWOMAN ROUKEMA: I have received your February 1 letter regarding the proposed amendment to the Taft-Hartley Act which would permit the creation of ERISA trust funds to provide "housing assistance to employees." I will attempt to respond to your questions in order:

(1) Despite the concerns of the Office of Inspector General (OIG) regarding ERISA enforcement, we have always acknowledged that the vast majority of employee pension and welfare plans are being operated in accordance with the law. We have no reason to believe, at this time, that trusts to provide housing assitance if authorized by Congress, will be any different. However, based upon the OIG's experience with Taft-Hartley pension and welfare trusts (see the response to question 4), it is highly likely that there will be some fraudulent housing assistance trusts and some individuals associated with these trusts who are "bad apples."

As a result, there will be a need for vigilant enforcement by the Department of Labor, (DOL) and in this regard I can only reiterate my testimony before the Labor-Management Relations Subcommittee. DOL's Pension and Welfare Benefits Administration (PWBA) has not adequately enforced the provisions of ERISA, particularly with respect to the criminal remedies which are needed to deter professional thieves and racketeers Further, the OIG believes that if permitted, it can effectively use its resources and expertise to conduct criminal investigations focusing on these types of professional criminals and major frauds. While trusts involving housing assistance may entail particular nuances related to the housing industry, it is probable that most fraud in these trusts will be similar to other types of ERISA pension and welfare plan fraud and will involve kickbacks, bribery, and the skimming of plan assets through exorbitant administrative fees.

If ERISA-covered housing assistance trusts are sanctioned by Congress, the OIG would certainly be prepared to investigate potential criminal activities. This can be done either through our Office of Labor Racketeering (OLR) if there is a organized crime/labor racketeering nexus, or through our Office of Investigations, *if* the jurisidictional restrictions imposed by the March, 1989 Department of Justice opinion are removed or modified.

(2) This question, which involves ERISA's fiduciary standards and prohibited transaction rules, is more appropriately addressed to PWBA, which has much much more expertise in these areas than the Office of Inspector General.

(3) A cap on administrative expenses is certainly an option, as it would provide a standard by which to measure the reasonableness of costs. However, I am not convinced that such a cap would assist in preventing wrongdoing. Professional white-collar thieves can almost always find a way to defraud ERISA trusts and a cap may only result in more front companies, additional layers of administration, and a greater reliance on bookkeeping tricks and deception. Further, as a practical matter, it may be difficult to impose a cap, even on a percentage basis, which would be equitable to all housing assistance trusts, since some trusts necessarily and legitimately have higher administrative costs. Finally, ERISA already imposes an indirect cap on expenses, albeit vague and difficult to enforce, through the "prudent man" and other fiduciary standards.

(4) Pursuant to a telephone conversation with Cathy Johnson from your staff, I have enclosed a representative summary of OLR cases involving the abuse of Taft-Hartley trusts.

(5) My suggestions concerning the interaction of Taft-Hartley and ERISA involved improved criminal enforcement. OIG has encountered several types of Taft-Hartley trusts which are not covered under ERISA and are therefore more difficult to prosecute under federal law.

The Taft-Hartley Act permits employer payments for the establishment and operation of joint labor-management committees designed to improve, among other things, labor-management relationships, job security, and organizational effectiveness. The fund which is established under this provisions is not covered by ERISA.

The Taft-Hartley Act also permits employer payments to provide supplementary pay benefits, and according to Department of Labor advisory opinions, these are also not covered under ERISA. We are specifically aware that ILA locals and employer associations have established "container royalty funds" to provide supplementary pay benefits.

Although these types of trusts are subject to general federal fraud provisions, they are not subject to 18 U.S.C. 664, which prohibits embezzlement and theft from employee benefit plans. One way to address the problem is by adding a new provision to Title 18 to specifically make embezzlement from these funds a federal crime. Another option is to legislatively ensure that these types of trusts are covered under ERISA (thus making them subject to 18 U.S.C. 664).

I hope that these responses are helpful. I would be glad to meet with you at your convenience to discuss our concerns about ERISA enforcement in greater depth.

Sincerely,

RAYMOND MARIA,
Acting Inspector General.

U.S. DEPARTMENT OF LABOR,
Washington, DC, March 6, 1990.

Hon. MARGE ROUKEMA,
Ranking Minority Member, Subcommittee on Labor-Management Relations, Committee on Education and Labor, House of Representatives, Washington, DC.

DEAR CONGRESSWOMAN ROUKEMA: This is in response to your letter of February 1, 1990 requesting my views on various questions raised concerning S. 1949, which would amend section 302(c)(7) of the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing. I hope the following information is of assistance to you.

Question 1. Whether, given the current effort to maximize ERISA enforcement, creating yet another trust is appropriate at this time.

Answer. While it is somewhat unclear as to the specific types of benefits intended to qualify as "financial assistance" for employee housing" benefits, our understanding is that this term is intended to be limited to financial assistance for mortgage collateral, closing costs, down payments, etc., for individuals. If this is the case, the benefits would not be dissimilar to those provided through educational assistance plans which are currently covered by Title I of the Employee Retirement Income Security Act (ERISA). This type of benefit program has not typically been subject to the same degree of risk or abuse identified in other types of employee benefit programs. For this reason, I would not anticipate that extending ERISA coverage to housing trust funds would have any appreciable effect on our ERISA enforcement efforts.

Question 2. Whether a housing trust fund can be administered in accord with ERISA's fiduciary standards and prohibited transaction rules—I am specifically concerned with rules concerning geographical and investment diversity, and those prohibiting selling a trust asset to a party in interest. I am concerned that as housing trusts become a more regular feature of collective bargaining agreements over time, the law be sufficient to prevent the sale of housing outright to employees or to deter any subterfuge designed to evade the law.

Answer. There is nothing in Title I of ERISA that would preclude the administration of a housing trust fund in accordance with ERISA's fiduciary standards and prohibited transaction rules. While the provisions of Part 4 of Title I generally require plan fiduciaries to diversify plan investments so as to minimize the risk of large losses, and specifically prohibit a number of transactions between plans and parties in interest involving plan assets, these provisions generally do not apply to the provision of specific benefits to participants and beneficiaries under an employee benefit plan. It is my understanding that any particular provision of financial assistance for housing pursuant to S. 1949 would be the provision of a benefit and would not necessarily involve a decision as to how to invest the assets of a plan. Accordingly, the fiduciary of a housing trust fund would not need to be concerned about the diversification and prohibited transactions provision with respect to the more provision of benefits under such a fund.

S. 1949 describes the benefits under 302(c)(7) as "financial assistance for employee housing" and, while not entirely free from doubt, it does not appear that such benefits are intended to include a direct sale of property by a housing trust (i.e., plan) to an employee (i.e., party in interest).

Question 3. Whether it would be pertinent for us to consider placing a cap on administrative expenses for all Taft-Hartley trusts, and whether, in your view, such a cap would assist in discouraging wrong-doing.

Answer. The administrative expenses paid by employee benefit plans have long been of interest and concern to the Department. However, I believe that the establishment of any type of cap on such expenses would be a very difficult undertaking given the various types and sizes of plans, as well as the various forms of plan administration which would have to be taken into account in establishing a cap. In addition, I am concerned that any preestablished cap may ultimately be viewed as a "safe harbor" amount, which could lead to an increase in administrative expenses in many instances.

Question 4. Any other suggestions you may have for improving Taft-Hartley interaction with ERISA, such as a statutory exclusive benefit rule, non-discrimination rules or other means to insure that benefits are provided solely to and fairly among employees.

Answer. Under current law, the fiduciaries of an employee benefit plan providing benefits described in section 302(c) of the Labor Management Relations Act of 1974 are subject to the fiduciary responsibility provisions of Title I of ERISA. Among other things, these provisions require that plan fiduciaries discharge their duties solely in the interest of, and exclusively for the purpose of providing benefits to, the participants and beneficiaries under the plan. I believe the standards imposed on fiduciaries under ERISA are sufficient to ensure that benefits are provided solely to and fairly among employees. Accordingly, I am not prepared to recommend any statutory changes to ERISA or the Labor Management Relations Act in this area.

I hope this information is responsive to your inquiries. If I can be of any further assistance to you, please do not hesitate to contact me.

The Office of Management and Budget has advised us that there is no objection to the presentation of this letter to Congress, from the standpoint of the Administration's program.

Sincerely,

DAVID GEORGE BALL.

U.S. DEPARTMENT OF LABOR,
Washington, DC, March 6, 1990.

Hon. MARGE ROUKEMA,
Subcommittee on Labor-Management Relations, Washington, DC.

DEAR CONGRESSWOMAN ROUKEMA. This is in response to your letter of January 23, 1990, requesting my views concerning various questions posed in light of S. 1949, which would amend the Labor-Management Relations Act of 1947 to allow the creation of trust funds to provide financial assistance for employee housing. I apologize for the delay in responding, but the questions you raise are important ones, the answers to which have implications beyond the boundaries of S. 1949. I hope the following responses are helpful to you in your deliberations concerning this bill.

Question 1. Would ERISA's prohibited transaction rules prevent trustees from agreeing that any construction or modification of dwellings owned by the trust be built or improved by organized labor, as opposed to an open bidding process?

Answer 1. While it is somewhat unclear as to the specific types of benefits intended to qualify as "financial assistance" for employee housing benefits, our understanding is that this term is intended to be limited to mortgage collateral, closing costs, down payments, etc. for individuals. In any case, whether the fiduciary decision to imple-

ment any particular plan provision which limits the benefit of financial asisstance to construction or modification of dwellings done by organized labor is prohibited pursuant to ERISA's prohibited transaction rules contained in section 406 will depend on the facts and circumstances of each case. Thus, ERISA's prohibited transaction rules would not necessarily prevent a plan fiduciary from following such a plan provision. For example, if none of the employers who had employees covered by the plan were engaged in the business of construction, and the persons to be benefitted by such a plan provision were not otherwise parties in interest (excluding those persons who are plan participants and parties in interest merely because they are employees of an employer described in ERISA section 3(14)(C)), a fiduciary decision to implement such a plan provision would not violate the provisions of section 406. However, the prohibited transaction provisions of section 406 are not the only provisions of ERISA which outline the duties of fiduciaries with regard to the provision of plan benefits.

Section 404, in relevant part, requires fiduciaries to perform their duties prudently and solely in the interest of, and for the exclusive purpose of providing benefits to, the plan participants and beneficiaries. In the investment context, the Department has stated that in deciding whether and to what extent to invest in a particular investment, a fiduciary must ordinarily consider only factors relating to the interests of plan participants and beneficiaries in their plan benefit. A decision to make an investment may not be influenced by a desire to stimulate a particular industry or generate employment for the participants as employees, unless the investment, when judged solely on the basis of its economic value to the plan, would be equal to superior to alternative investments available to the plan. (See the Department's information letter to Union Labor Life Insurance Company dated July 8, 1988—a copy is enclosed).[1] I believe that a similar analysis is appropriate, for example, when a fiduciary is determining whether to implement a plan provision which limits the plan benefit of financial assistance to construction or modification of dwellings done by organized labor.

Question 2. If diversification of investment is a requirement under ERISA, isn't this incompatible with trust funds being used to purchase or develop housing for sale to employees, if such a project would require a large percentage of trust fund assets? Would trustees also face restrictions on geographic concentrations of investments under ERISA that could ostensibly be at odds with a housing purchase or development scheme?

Answer 2. It is my understanding that any particular provision of financial assistance pursuant to an S. 1949 plan would be the provision of a benefit and would not necessarily involve a decision to invest the assets of the plan. Indeed, the type of trust funds which would be created pursuant to S. 1949 would be ERISA covered welfare plans as defined in section 3(1) only because such funds would be providing a certain benefit described in section 302(c) of the Labor-Management Relations Act of 1947—financial assistance for employee housing.[2] As mentioned above, the fiduciary responsibility provisions of part 4 of Title I of ERISA will apply to the provision of a benefit pursuant to an an ERISA covered plan. Those fiduciary rules will, however, apply somewhat differently in the context of a provision of a benefit as opposed to decisions concerning lthe safeguarding and investment of plan assets. For example, if the plan provided a housing benefit in the form of grants to participants for use as down payments on their homes, the Department would not view these grants as violations of ERISA section 406(a)(1)(D) which prohibits transfers of plan assets to parties in interest including employees of contributing employers. The diversification requirement of part 4 is a requirement concerning the investment of plan assets, and is not applicable to the mere pay out of plan benefits. Nothing in S. 1949 would require plans to provide a housing benefit in the form of a plan investment. Thus, in administering such benefits, a fiduciary would not necessarily be concerned with the diversification requirement relating to the investment of plan assets.

Question 3. It is my understanding, admittedly imperfect, that in order to effectuate a housing purchase or development plan under a 302(c)(7) trust, trustees may have to seek an exemption from the Department of Labor from rules regarding investment and geographical diversity, the prohibition against social investing or clarifications regarding arms-length transactions.

Answer 3. As previously discussed, the provision of the financial assistance benefit contemplated in S. 1949 should not necessarily cause a plan fiduciary to violate the prohibited transaction provisions of ERISA, and, thus, an exemption from such provisions would not appear to be required by the legislation. Also, as previously discussed, the provision of the benefit of financial assistance is not necessarily an investment of plan assets but may be structured solely as a pay out of a benefit. Thus, the investment issues raised would not necessarily be relevant to the payment of this type of benefit. To the extent that a fiduciary of any particular S. 1949 trust fund might need relief from the fiduciary duties described in ERISA sections 403 and 404, the Department does not have the authority to issue exemptions with regard to these statutory provisions. Because it is not apparent that S. 1949 would require widespread administrative exemptions in order to effectuate its purpose, I cannot comment on the efficacy of enacting further legislation in this area.

I hope these answers are responsive to your requests, and I would be happy to provide any further assistance if necessary. The Office of Management and Budget has advised us that there is no objection to the presentation of this letter to Congress, from the standpoint of the Administration's program.

With best regards.

Sincerely,

ROBERT P. DAVIS.

U.S. DEPARTMENT OF LABOR,
Washington, DC, July 8, 1988.

Re Union Labor Life Insurance Company,
Identification Number: F-3353A.

Mr. JAMES S. RAY,
Connerton, Ray & Simon,
Washington, DC.

DEAR MR. RAY: This is in response to your request on behalf of the Union Labor Life Insurance Company (ULLICO) concerning ULLICO's Mortgage Separate Account J (the J Account), a pooled separate account which is designed to invest in mortgages which generally are secured by properties built or improved primarily with union labor. Specifically, your request concerns the application of the fiduciary responsibility provisions of section 404(a)(1) of the Employee Retirement Income Security Act of 1974 (ERISA) to the operation of the J Account in accordance with the structure set forth in your request, and to an employee benefit plan's investment of a portion of its assets in the J Account.

You represent that ULLICO established the J Account in 1977 primarily as a means for plans to invest a portion of their assets in a diversified pool of high quality first mortgages on residential and income-producing properties, earning a return competitive with returns from comparable investments available in the marketplace. ULLICO also designed the J Account incidentally to help support the unionized sector of the building and construction industry. To achieve this incidental goal, ULLICO commits to make mortgages for the J Account which first satisfy rigorous, generally accepted financial standards, and, in addition, which will be secured by properties built or renovated primarily by union labor.[1]

You further represent that the underwriting criteria used by ULLICO for both its general account and the J Account conform to those which are recognized as generally accepted by reasonably competent, professional mortgage lenders. ULLICO solicits and receives loan proposals from a variety of sources, including borrowers and developers, brokers, mortgage bankers, unions and designated correspondents.[2] ULLICO re-

---

[1] Indeed, in one factual context, the Department utilized a similar approach in analyzing a prohibited transaction issue under section 406(a)(1)(D). In an October 23, 1985, advisory opinion to the Electrical Industry of Long Island Annuity Fund (a copy of which is enclosed), the Department stated that in determining whether a fiduciary investment decision which would clearly indirectly benefit some unidentified, as well as undetermined, contributing employers (and, hence, parties in interest) would violate the prohibited transaction provision of section 406(a)(1)(D) precluding the indirect use of plan assets for the benefit of a party in interest, one must examine the facts and circumstances surrounding the plan's investment to determine whether it is made for the purposes of providing such a prohibited benefit. The Department continued by saying that a plan investment which is made subject to a condition which can reasonably be expected to result in a benefit to one or more parties in interest would violate section 406(a)(1)(D) (as well as sections 403 and 404 of the Act) if it involves greater risk or a lesser return to the plan than a comparable transaction that is not subject to such a condition.

[2] Section 3(1) of ERISA defines an "employee welfare benefit plan" as including any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or by an employee organization, or by both, to the extent that such plan, fund, or program was established or is maintained for the purpose of providing for its participants any benefit described in section 302(c) of the Labor Management Relations Act, 1947.

[1] You note that not all mortgage loans from the J Account are secured by properties built by contractors employing only union labor. The J Account has made (and currently carries) a substantial amount of loans secured by projects located in states with "right-to-work" laws, where statutes prohibit enforceable agreements requiring the use of only union tradesmen. However, in such states, ULLICO requires the borrower to agree to use only contractors who are signatory to collective bargaining agreements with unions affiliated with the local AFL-CIO Building Trades Council. Finally, some portions of the projects which the J Account has financed may have been undertaken by non-union companies and workers, where, for example, union tradesmen are not available.

[2] You represent that any transactions between the J Account and a party in interest with respect

ceives such proposals from parties intending to utilize non-union labor as well as parties intending to use only union labor. You have indicated, however, that most of those who apply to ULLICO for loans are aware of ULLICO's union-only condition, and that ULLICO officials may mention this condition to applicants who might not otherwise be aware of it.

Initially, the Mortgage Department of ULLICO originates possible investment opportunities, elicits written mortgage loan applications and submissions, performs the underwriting, negotiates acceptable loan terms and prepares a summary of the proposed mortgage and recommendation for presentation to ULLICO's Mortgage Subcommittee. Next, ULLICO's financial vice president typically reviews the proposal, with particular attention to certain financial factors, such as the financial statements and credit worthiness of the proposed borrower. In a third phase of the process, the Mortgage Subcommittee, a subcommittee of the Finance and Investment Committee of the Board of Directors of ULLICO, reviews the proposal and recommendation, and approves or rejects the loan. Finally, the full Executive Committee ratifies the approval of the Mortgage Subcommittee.

ULLICO considers a broad range of physical, economic, financial and related factors with respect to all loans for its general account and the J Account. Those factors include:

(1) Location of the property which will secure the loan;

(2) Description of the security;

(3) Valuation of the security—loans secured by income-producing property do not exceed a loan to value ratio of 75 percent;

(4) Ability to repay—ULLICO considers a number of factors including the borrower's track record and income and expense projections with respect to the proposed project;

(5) Terms of the loan; and

(6) Diversification—by geography, size of loans, type of properties and type of tenants.

Upon approval of a proposed loan by the Mortgage Subcommittee, ULLICO prepares and issues a commitment letter, setting forth the terms and conditions of the proposed loan. The borrower's signifies acceptance by signing the commitment and paying the commitment fee. The union labor condition is included in the loan commitment. You represent that ULLICO will not commit to or fund a mortgage loan which does not meet its investment criteria, regardless of the requirement to use union labor. The promise of a borrower or developer to use union labor will not cause ULLICO to waive or compromise the requirements which all its investments must satisfy.

Sections 403(c) and 404(a)(1) of ERISA require, among other things, that a fiduciary of a plan act prudently, solely in the interests of the plan's participants and beneficiaries, and for the exclusive purpose of providing benefits to participants and beneficiaries.

It is the position of the Department that, to act prudently, a plan fiduciary must consider, among other factors, the availability, riskiness, and potential return of alternative investments for his plan. Because the mortgage loans which the J Account makes causes it to forego other investment opportunities, such a loan would not be prudent if it provided the investing plans with less return, in comparison to risk, than comparable investments available to the plans, or if it involved a greater risk to the security of plan assets than other investments offering a similar return.

The Department has construed the requirements that a fiduciary act solely in the interest of, and for the exclusive purpose of providing benefits to, participants and beneficiaries as prohibiting a fiduciary from subordinating the interest of participants and beneficiaries in their retirement income to unrelated objectives. Thus, in deciding whether and to what extent to invest in a particular investment, a fiduciary must ordinarily consider only factors relating to the interests of plan participants and beneficiaries in their retirement income. A decision to make an investment may not be influenced by a desire to stimulate the construction industry and generate employment, unless the investment, when judged solely on the basis of its economic value to the plan, would be equal or superior to alternative investments available to the plan.

Thus, it would not be inconsistent with the requirements of sections 403(c) and 404 of ERISA for the J Account to make loans on properties which are constructed or improved with union labor, so long as the J Account's investment process assures that loans made by the J Account will be at prevailing market terms, i.e., that the terms for projects with the union-only condition in fact reflect the terms prevailing in the overall mortgage market. In this regard, we wish to point out that if mortgage loans which satisfy both ERISA's fiduciary standards and the union-only condition are unavailable for investment by the J Account, the prudence and exclusive purpose requirements of sections 403(c) and 404 of ERISA would require that the fiduciaries of the J Account select comparable investment opportunities which are available to the Account.

We trust that this information will be helpful to you.

Sincerely,

ROBERT J. DOYLE,
Acting Director of
Regulations and Interpretations.

DEPARTMENT OF LABOR,
Washington, DC, October 23, 1985.

Re Annuity Fund of the Electrical Industry of Long Island Identification Number: F-2521.

RALPH P. KATZ,
Delson & Gordon, New York, NY.

DEAR MR. KATZ: This is in response to your letter of September 23, 1982, in which you requested clarification regarding the application of the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA) to a proposed investment by the Annuity Fund of the Electrical Industry of Long Island (the Fund). Specifically, you inquired whether a prohibited transaction would occur if the trustees of the Fund made an investment which was part of an overall agreement obligating an insurance company to invest a specified amount of insurance company assets in construction mortgages whithin the geographic jurisdiction of the union whose members are participants in the Fund. The agreement would further require the insurance company to make such investments in construction projects employing only labor represented by unions affiliated with the AFL-CIO. You state that the trustees will make the investment after determining that the investment rate of return is equal to of greater than similar investments bearing similar risks.

Section 406(a)(1)(D) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction which the fiduciary knows or should know constitutes a direct or indirect transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 406(b)(1) and (2) of ERISA further prohibit a fiduciary with respect to a plan from dealing with the assets of a plan in his or her own interest or for his or her own account, or acting in any transaction on behalf of a party or representing a party whose interests are adverse to the interest of the plan or its participants.

Section 3(14) of ERISA defines the term party in interest to include a fiduciary, an employer any of whose employees are covered by the plan and any employees of such employer.

We wish to point out, as we have done in prior correspondence regarding this matter, that ERISA's general standards of fiduciary conduct apply to your proposed investment course of action. Sections 403(c) and 404(a)(1) of ERISA require, among other things, that a fiduciary of a plan act prudently, solely in the interest of the plan's participants and beneficiaries, and for the exclusive purpose of providing benefits to participants and beneficiaries. As you know the Department, on a number of occasions, has expressed its views as to the meaning of these requirements in the context of investment decision-making.

We have stated that, to act prudently, a plan fiduciary must consider, among other factors, the availability, riskiness, and potential return of alternative investments for his plan. Because the investment you propose causes the plan to forego other alternative investment opportunities, such an investment would not be prudent if it provided plan with less return, in comparison to risk, than comparable investments available to the plan, or if it involved a greater risk to the security of plan assets than other investments offering a similar return.

We have construed the requirements that a fiduciary act solely in the interest of, and for the exclusive purpose of providing benefits to, participants and beneficiaries as prohibiting a fiduciary from subordinating the interests of participants and beneficiaries in their retirement income to unrelated objectives. Thus, in deciding whether and to what extent to invest in a particular investment, a fiduciary must ordinarily consider only factors relating to the interests of plan participants and beneficiaries in their retirement income. A decision to make an investment may not be influenced by a desire to stimulate the construction industry and generate employment, unless the investment, when judged solely on the basis of its economic value to the plan, would be equal or superior to alternative investments available to the plan.

Thus, it would not be inconsistent with the requirements of sections 403(c) or 404 of ERISA for plan fiduciaries to select an investment course of action that reflects noneconomic factors, so long as application of such factors follows primary consideration of a broad range of investment opportunities that are, economically, equally advantageous.

---

to a plan investing in the J Account would be exempted from the restrictions of section 406(a) of ERISA by Prohibited Transaction Exemption 78-19 (43 FR 59915, December 22, 1978).

Based on the representations made in your letter, it does not appear that the arrangement you describe would involve a prohibited transaction of the kind described in sections 406(a)(1)(A), (B) or (C) of ERISA (relating to sales, leases or other exchanges of property, loans or other extensions of credit and the furnishing of goods, services or facilities). In addition, it does not appear that the arrangement involves a direct transfer of plan assets to, or use of plan assets by or for the benefit of, a party in interest of the kind described in section 406(a)(1)(D) of the Act. Nonetheless, it is reasonable to infer that the arrangement will result in some benefit to parties in interest with respect to the plan, *i.e.* contributing employers and their employees. Thus, it is necessary to determine whether the arrangement would involve an indirect use of plan assets for the benefit of a party in interest. In the circumstances you describe, where the arrangement would be prohibited, if at all, solely as an indirect use of plan assets for the benefit of a party in interest,* the Department believes that it is appropriate to examine the facts and circumstances surrounding the plan's investment to determine whether it is made for the purposes of providing such a prohibited benefit. Since this is an inherently factual determination, the Department is not prepared to issue an advisory opinion regarding the specific arrangement described in your letter. In our view, however, a plan investment which is made subject to a condition which can reasonably be expected to result in a benefit to one or more parties in interest would violate section 406(a)(1)(D) (as well as sections 403 and 404 of the Act) if it involves greater risk or a lesser return to the plan than a comparable transaction that is not subject to such a condition.

This letter constitutes an advisory opinion under ERISA Proc. 76-1. Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,

ELLIOT I. DANIEL,
Assistant Administrator for Regulations and Interpretations.

Mr. Speaker, I reserve the balance of my time.

Mr. CLAY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, today I rise to express my enthusiastic endorsement and support of H.R. 4073. This bill—which adjusts the Labor-Management Relations Act of 1947 to include housing trust funds on the list of negotiable employee benefits—represents a real victory for American working men and women.

I want to thank Chairman CLAY, Mrs. ROUKEMA, and the Subcommittee on Labor-Management Relations for their hard work and cooperation with the Massachusetts delegation and others on this bill. H.R. 4073 will empower working men and women with a real and workable option for overcoming the severe problem of affordable housing.

For too long we have heard politicians and Government officials lament the lack of affordable housing. Yet, despite all the rhetoric, all the commissions and all the studies, the problem is only getting worse. Middle- and low-income workers are rapidly being priced out of the housing market and there is simply no place else to go.

But, Mr. Speaker, while the experts in Washington were consulting and complaining, a dedicated and resourceful group of Boston workers and their employers decided to stop talking and start acting. In December 1988, local 26 of the Boston Hotel & Restaurant Employees—the largest union in Boston—negotiated a contract with hotel management which included a housing trust fund among its benefits. Both labor and management recognized that through their concerted partnership a viable plan could be arrived at which could help working men and women contend with the prohibitively expensive Boston housing market.

Since then, the 5,000 members of local 26 have worked tirelessly to ensure that all obstacles to their initiative are removed—they have found out the hard way how difficult it is to find and keep affordable housing in Boston. Even though the majority of the union members of local 26 hold down more than one job, 78 percent cannot afford to buy an apartment in Metropolitan Boston and 98 percent cannot afford to buy a house. Many of these workers and their families are paying more than 50 percent of their combined household income to live in substandard and overcrowded housing and many live with the constant threat of eviction or homelessness.

The housing trust fund is a simple, effective means of attacking this problem at no cost to the taxpayer and no strain to local, State, or Federal Government. The Deputy Assistant to the President has endorsed this program. With the help of President Bush and Secretary Kemp, we should replicate this program in every State.

I admire these working men and women of Boston and I thank them for reminding us that real solutions to real problems are out there. While we were talking, they were acting; and they have found a way of turning the dream of home ownership into a reality for themselves and all American workers.

□ 1900

Mr. CLAY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK Mr. Speaker, I thank the gentleman from Missouri for yielding time to me.

Mr. Speaker, I want to say that this is one of those rare occasions when it seems to me that congratulations are due all around—in the first instance, to the Hotel Workers of Boston, which engaged in a very creative idea, and to those with whom they bargained. They are going to make a significant contribution to housing in the greater Boston area, and they have set a model other people might feel free to use.

I want to express my appreciation to the chairman of the subcommittee for his willingness to move this bill so quickly to meet a deadline. I would express my appreciation particularly to my friend, the gentlewoman from New Jersey, with whom I serve on the Housing Subcommittee. Given the legitimate questions she had, I think she behaved in a way that I wish others would emulate. She raised her questions, they were answered, and she responded in a very responsible fashion.

This is a good moment, a time when we have had all kinds of cooperation between labor and management, between the public and private sectors, and between the executive and legislative branches. That is going to help in this situation.

The reason I say this, Mr. Speaker, is that the good news is too often overlooked. If somebody was fighting with somebody here, it would have gotten a lot more attention. If there had been a major issue of dispute between the hotel workers and the employers, or if the ranking minority member had punched the chairman of the committee, or if there had been some other kind of acrimony, we would have made some news. I hope people will pay attention to the fact that a very important issue here has been resolved in a conciliatory way and in a way that is going to further some responsible public objectives.

Mr. CLAY. Mr. Speaker, I have no further requests for time.

Mrs. ROUKEMA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I do want to thank my colleague, the gentleman from Massachusetts [Mr. FRANK], for those kind words. I think he has made a very important point. Often these kinds of cooperation go unrecognized, even now, even though we are engaged in considering landmark legislation here.

Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. GOODLING], the distinguished ranking Republican member of the full committee.

Mr. GOODLING. Mr. Speaker, today we are considering H.R. 4073, legislation that would amend the Labor-Management Relations Act to permit employer contributions to trust funds for the purpose of providing housing assistance to employees and their families.

*This kind of arrangement should be distinguished from a plan investment made subject to a condition which in effect makes the transaction an indirect sale or loan.

I rise not in opposition to the legislation but, rather, to express my concern over the procedural background of the bill and the hope that this process—or, rather, the lack thereof—truly proves to be the exception and not the rule.

H.R. 4073 was passed by the Senate in the closing hours of the last session without any committee consideration, and no hearings on the bill were held before any committee in the House. While no substantive problems with the legislation have surfaced—and certainly efforts were made to garner comments from the public—I remain uneasy over the somewhat cavalier decision to dispense with hearings on the bill. I would, no doubt, be less troubled by this had I not noticed what appears to be a growing effort on the part of the majority to short circuit the legislative review process in general. Perhaps I am overstating things here and I am seeing ghosts where none exist, but I think a few examples will bear me out.

Currently, the Education and Labor Committee is marking up H.R. 3200, a complex initiative which would, among other things, amend the Age Discrimination in Employment Act and reverse the Supreme Court's decision in Public Employees Retirement System of Ohio versus Betts. The subcommittees of jurisdiction had only one hearing on the bill, and, to make matters worse, those subcommittees were discharged, over the objection of the minority, without marking up the bill. Accordingly, we are now at full committee without having the benefit of the learning process which subcommittee consideration is intended to provide. Another bill dealing with amendments to the Age Act, H.R. 1432, the Age Discrimination in Employment Waiver Protection Act, was afforded only one hearing. Similarly, the Americans With Disabilities Act, a major new civil rights initiative, was discharged from the appropriate subcommittees after only two hearings, with no markup, and brought immediately to full committee markup. Unfortunately, this expedited process of review now threatens to reapeat itself with H.R. 4000, the Civil Rights Act of 1990, a major revision of our Nation's employment civil rights laws. H.R. 4000 was never referred to a subcommittee for consideration, and markup at full committee will soon be scheduled. History appears to be repeating itself.

Mr. Speaker, my point is a simple one. Congress has a fairly straightforward process for considering the appropriateness of legislation. Subcommittees are to thoroughly explore whether legislation is needed to address a perceived problem, and then to craft legislation if a need is identified. That process should basically be repeated at the full committee level. This is how good legislation is developed, step by step, and were the process not frequently avoided or subverted I would be embarrassed to describe it here. However, that now appears to be a trend to allow special interest groups to write whatever bill they feel the need and to rush the bill through the committee structure as quickly as possible before any possible opponents have time to coalesce, much less understand the legislation. I sincerely hope that I am wrong on this, but the conclusion is hard to avoid.

Mr. Speaker, passing legislation is a serious business that affects millions of Americans. We in Congress owe the public the time and effort necessary to ensure that the laws we pass are truly the best that can possibly be developed. I fear we are not fulfilling that duty.

Mrs. ROUKEMA. Mr. Speaker, I yield 2 minutes to our distinguished colleague, the gentleman from Texas [Mr. BARTLETT], a member of the committee.

Mr. BARTLETT Mr. Speaker, I rise in very strong support of this legislation and would note that I have supported this legislation from the first time it was raised last year. I did raise two points in commenting on and supporting the legislation.

□ 1910

First, employee benefits should be freely negotiated in the marketplace between the employee and the employer. Those benefits should not be mandated by the Federal Government or any other level of government. This bill at its heart simply permits those negotiated benefits to be negotiated and to occur. The concept of negotiated benefits, instead of mandated benefits, it seems to me could be and should be extended to other areas of noncollective bargaining employee benefits such as an increased emphasis by Congress on cafeteria plans, on pension portability and extension of compensatory time for employees, if that is what they choose. The negotiated benefits are good, not bad. Mandated benefits are bad, not good. This bill is a negotiated benefits, bill, so it is good legislation.

Second, I want to note for my colleagues that I am at the end of a process of preparing legislation to be introduced later this year that would provide for legislatively, a whole set of employee rights, of rights that would be guaranteed to employees as employees as opposed to either management or organized labor representing or employing those employees. It seems to me that this would be the first ingredient. In fact, I had included this piece of legislation in the employee rights legislation that I planned to introduce. If this is passed and signed into law prior to the introduction, then I will be able to declare victory and delete it.

Mr. Speaker, the legislation of employee rights could and should for the 1990's introduce a whole set of additional employee rights, such as a right to seek a ballot vote in a collective-bargaining situation, a right to compensatory time off in lieu of cash overtime, a right to join or to rejoin from a labor union and a variety of other rights, a right to freedom from violence in the workplace and a variety of other rights that ought to be guaranteed by the Federal Government.

Mr. CONTE. Mr. Speaker, I want to express my strong support today for H.R. 4073, a bill which would make housing trust funds an optional subject of collective bargaining.

This is not simply a bill amending labor law for a worthy but theoretical future purpose. It is a piece of legislation which is tremendously important to a lot of people, and if it does not pass this year, some hard work will have been wasted and many people's hopes will be dashed.

The Boston hotel workers last year negotiated a contract which set up a trust fund to help its members find affordable housing. The idea was innovative and important, and they were able to come to an agreement on it with Boston's hotel management. Unfortunately, their idea was almost too innovative—when they had signed the contract, they found that under American labor law, housing was not a legal subject of collective bargaining.

But the hotel workers didn't give up. They built up one of the most impressive campaigns for statewide support I've ever seen—bringing together labor unions, labor law professors, State legislators, and the Massachusetts congressional delegation—and brought to the Congress a bill to make housing trust funds a legal subject of collective bargaining. Their bill passed the Senate unanimously last fall, and it now falls to the House to pass it before their contract's deadline expires on May 31.

I am pleased to join the entire Massachusetts delegation and my friend Congressman CLAY as an original cosponsor of this bill. The bill is a tribute to the hard work, creativity, and persistence of the hotel workers union, and I endorse it with pride. I ask all my colleagues here to support it.

Mrs. ROUKEMA. Mr. Speaker, I yield back the balance of my time.

Mr. FRANK. Mr. Speaker, I yield back the balance of the time of the gentleman from Missouri [Mr. CLAY].

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Missouri [Mr. CLAY] that the House suspend the rules and pass the bill, H.R. 4073.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

A motion to reconsider was laid on the table.

Mr. FRANK. Mr. Speaker, I ask unanimous consent that the Commit-

tee on Education and Labor be discharged from further consideration of the Senate bill (S. 1949) to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing, an identical bill to the bill just passed, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1949

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EMPLOYEE HOUSING TRUST FUNDS.

Section 302(c)(7) of the Labor Management Relations Act of 1947 (29 U.S.C. 186(c)(7)) is amended—

(1) by striking out "or" at the end of subparagraph (A); and

(2) by inserting ", or (C) financial assistance for employee housing" after "dependents of employees" in subparagraph (B).

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 4073) was laid on the table.

GENERAL LEAVE

Mr. FRANK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills just passed, H.R. 4073 and S. 1949.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

HATE CRIME STATISTICS ACT

Mr. SCHUMER. Mr. Speaker, I move to suspend the rules and concur in the Senate amendment to the bill (H.R. 1048) to provide for the acquisition and publication of data about crimes that manifest prejudice based on certain group characteristics.

The Clerk read as follows:

Senate amendment: Strike out all after the enacting clause and insert: That (a) this Act may be cited as the "Hate Crimes Statistics Act".

(b)(1) Under the authority of section 534 of title 28, United States Code, the Attorney General shall acquire data, for the calendar year 1990 and each of the succeeding 4 calendar years, about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, including where appropriate the crimes of murder, non-negligent manslaughter; forcible rape; aggravated assault, simple assault, intimidation; arson; and destruction, damage or vandalism of property.

(2) The Attorney General shall establish guidelines for the collection of such data including the necessary evidence and criteria that must be present for a finding of manifest prejudice and procedures for carrying out the purposes of this section.

(3) Nothing in this section creates a cause of action or a right to bring an action, including an action based on discrimination due to sexual orientation. As used in this section, the term "sexual orientation" means consensual homosexuality or heterosexuality. This subsection does not limit any existing cause of action or right to bring an action, including any action under the Administrative Procedure Act or the All Writs Act.

(4) Data acquired under this section shall be used only for research or statistical purposes and may not contain any information that may reveal the identity of an individual victim of a crime.

(5) The Attorney General shall publish an annual summary of the data acquired under this section.

(c) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section through fiscal year 1994.

SEC. 2. (a) Congress finds that—

(1) the American family life is the foundation of American Society,

(2) Federal policy should encourage the well-being, financial security, and health of the American family,

(3) schools should not de-emphasize the critical value of American family life.

(b) Nothing in this Act shall be construed, nor shall any funds appropriated to carry out the purpose of the Act be used, to promote or encourage homosexuality.

The SPEAKER pro tempore. Is a second demanded?

Mr. GEKAS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. SCHUMER] will be recognized for 20 minutes, and the gentleman from Pennsylvania [Mr. GEKAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, to rectify the deplorable fact that there are currently no reliable nationwide figures on the incidence of hate crimes, the House last June passed H.R. 1048, the Hate Crimes Statistics Act. The vote was 368 to 47.

Hate crimes can and do victimize our neighborhoods, and our neighbors. Just recently, in my own district, a black family's new home in a predominately white neighborhood was firebombed after a series of phone calls warned the previous owner not to sell to blacks. It is indisputable that no one person, or group of people, should be victimized because of who they are perceived to be. Hate crimes cannot be tolerated in our society.

H.R. 1048 provides for the collection and publication of statistics on crimes that manifest prejudice based on race, religion, sexual orientation, or ethnicity. It is a long-awaited piece of legislation that provides us with an opportunity to begin the counterattack against crimes motivated by hatred. This bill is a necessary first step toward combating hate crimes in a systematic and comprehensive manner.

Legislation similar to H.R. 1048 passed the House in both the 99th and 100th Congresses. Each time, however, the bills were left pending before the other body at the time of adjournment. The other body has not acted favorably on H.R. 1048, and by a vote of 92 to 4. We in the 101st Congress, therefore, have the opportunity to bring about the enactment of the Hate Crimes Statistics Act.

The other body made a number of changes in the bill. On balance, those changes do not weaken the bill and I urge my colleagues to agree to the new language.

One change the other body has made is in the crimes for which data will be collected. Some of the crimes included in the House version have been removed, like theft or robbery, and new crimes have been added, such as forcible rape. In addition, the other body has removed language specifically authorizing the Attorney General to expand the categories of hate crimes for which data can be collected.

Modifying the list of crimes to be monitored makes no important change to the substance of the bill. It does not weaken or undermine the purposes of the bill. The groups and organizations who support the House version of the bill have no objections to the changes.

Similarly, we can delete the language regarding the Attorney General's authority to expand the categories of hate crimes for which data will be collected without weakening the bill. This language is hortatory since section 534 of title 28 of the United States Code already gives the Attorney General the necessary authorization. The groups and organizations supporting the House version do not object to this change.

Finally, the other body has added findings on the importance of the American family. I am unaware of any opposition to the new language. The findings reaffirm values that each and every one of us, on both sides of the aisle, hold dear, and I see no reason to oppose adding the new language.

Now is the time for Congress to begin the fight against hate crimes. The crime statistics which will be collected as a result of this legislation will provide our Nation's law enforcement agencies with the data required to develop strategies to combat hate crimes. Support for this legislation is widespread in both Houses and among law enforcement and civil rights

groups actively. The administration strongly endorses the bill.

I urge my colleagues to support the motion.

My colleagues, before reserving the balance of my time, I think several thanks are in order. First, as I mentioned, the gentleman from Pennsylvania [Mr. GEKAS] for his active leadership on this proposal and his generosity in moving the bill forward despite the fact that there was an amendment that he had put in which the House supported, which the Senate did not have in its bill. I would also like to thank the gentleman from Michigan [Mr. CONYERS], the former chairman of this subcommittee, for pushing the legislation during the past few Congresses, and we will be hearing from him in a few minutes. Finally, I would like to thank the gentlewoman from Connecticut [Mrs. KENNELLY] for initiating the campaign for the legislation several years ago.

Mr. Speaker, I reserve the balance of my time.

Mr. GEKAS. Mr. Speaker, I thank the gentleman from New York [Mr. SCHUMER] for the prefatory remarks to the eventual passage of this legislation.

Mr. Speaker, this bill, the steam which is encompassed in this bill, has traveled a tortuous path to this moment, and those of us who have worked around it, and with it and through it are poised now for the final act of final passage.

There is not any community that I know of in the large urban setting at least which has not had incidents of hate crimes and their disastrous consequences for the community, and my communities, the communities in my district are no exception to that rule.

As a matter of act, Mr. Speaker, a very serious one occurred in the last 2 years in which a synagogue was devasted by graffiti and other kinds of vandalism in Harrisburg, the capital city of Pennsylvania.

So, this legislation comes at a time in our societal history where we have reported incidents upon which to base the thrust of this legislation, to gather statistics and, therefore, be in a better position as a larger society to deal with those incidents as unfortunately they may occur in the future.

□ 1920

As was also stated by the chairman of the subcommittee, the gentleman from New York, I had some questions about the overall shall we say atmosphere of the bill, because I felt that the original language as proposed in the original bill back in the 99th Congress when the gentleman from Michigan and I were handling this legislation, the gravamen of the offense surrounded those constitutionally protected classes of people that we had generally understood to be included in race questions and ethnicity questions and religous questions. Later the item of sexual orientation was added in different forms until finally it reached the Senate language which we now have before us.

My only objection, and it was not an objection to the inclusion of that terminology, but rather not to allow that particular kind of language to be raised to the same level of constitutionally protected classes of people as were those included in race and religion, for instance.

So with the concurrence of many who were working to get this bill through, we concocted language that would allow the Attorney General to include in his role of gathering statistics of visible and invisible, but palpable hate crimes, any kind of hate crime victims that the Attorney General might in his wisdom and in his discretion feel would fall within the purview of this legislation. That is why I was happy to see the other side and others who were were working with us accept that kind of proposal on my part.

Then when the battle changed arenas and went over to the Senate, the machinations which occurred over there, which are still a mystery to me, not only in this legislation but in a lot of other matters, convoluted this whole idea in such a way that it left me with more questions to ask of some individual Members of the Senate before I could come to this point.

Unfortunately, I must acknowledge that my efforts, and they were yeoman efforts, believe me, fall on unyielding ears, is the best way I can phrase it, and today although I am frustrated by that, I am confident that the bill in its present form will do what the sponsors want it to do, what we who have worked with it desire it to cover, and the satisfaction that I have that the Attorney General will indeed as the chairman of the subcommittee also opines does have the authority which would be included in the language which I would have included, all of that puts me in a position in which I strongly support the legislation now and hope to see the day before all of us no longer Members of Congress when hate crimes will no longer be a part of the American scene, but until that time we will have done something about it.

Mr. Speaker, I rise in support of H.R. 1048 as amended by the Senate and urge its passage today.

My support for legislation that would require the Attorney General to gather statistics on hate crimes dates from its first consideration by the House during the 99th Congress. I questioned the legislation that passed the House during the 100th Congress because it added hate crimes committed against those who were not in constitutionally protected classes, namely persons who were victimized solely because of their sexual orientation. I felt that if we were going to step outside constitutionally protected classes it was unduly restrictive to limit that move merely to one group and that provision should be made for other groups, such as the elderly against whom crime may in the future become a significant concern. During consideration of this bill in the House during this Congress, I succeeded in offering an amendment noting the Attorney General's discretion to collect data on other appropriate groups.

Although my language contained in the House-passed bill is not reflected in the Senate amendment, I am satisfied that its absence results from the agreement of all that it is not necessary. The Attorney General already has the discretion to acquire data on crime against other appropriate groups under the authority of 28 U.S.C. 534, which is the same section of law we cite in requiring him to acquire data on the groups named in this bill. It is expected that he will exercise this discretion to consider whether the list we give him today should be supplemented as evidence of crimes against various groups may warrant.

I wish also to reiterate that this legislation should not be read as placing any group that is not already there in a constitutionally protected class. It is a statistics gathering bill aimed at determining where law enforcement resources should best be directed and what priority should be assigned to crimes against members of individual groups. The bill creates no new crimes and, as section (b)(3) notes, establishes no causes of actions.

Mr. Speaker, I urge support for H.R. 1048, as amended by the Senate.

Mr. SCHUMER. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan [Mr. CONYERS], a former chairman of the subcommittee and now chairman of the Government Operations Committee.

Mr. CONYERS. Mr. Speaker, what a great day in our legislative history when after three Congresses we have now come together in near unanimous agreement, Republican, Democratic, the executive branch, the House, and the Senate, to take a concerted action on the collection of data, of statistics, of incidents that really mar the whole character of our democratic society, that of the perpetration of racially motivated violence.

I can remember when the gentlewoman from Connecticut [Mrs. KENNELLY] came to me as the chairman of the Criminal Justice Subcommittee and brought this matter to our attention.

I can remember when the gentleman from Massachusetts [Mr. FRANK] brought another portion of this matter to our attention.

I can remember the ranking member of this subcommittee, the gentleman from Pennsylvania [Mr. GEKAS] determining that this was a matter upon which we had no other alternative to move forward.

Yes, there were sticking points, but the fact that this simple measure is so important in the movement of civil

rights that I come to the well very grateful to all of the Members here, the new subcommittee chairman and the distinguished gentleman from Illinois [Mr. SIMON] in the other body, who has now brought us all together.

If we began to list the number of incidents that will now be reported, we would be here until after midnight. It is incredible as we on this committee know about the nature and extent of the incidents that forced us to bring this measure into the Federal Criminal Code.

I am very, very proud of the work that everyone has done on this matter. I think the civil rights movement will recognize this as a civil rights measure, because that is really what it is.

I am pleased to note that the President of the United States has now accepted the legislative decision of both bodies and we will very, very shortly have a signing which I think will be important for people in all parts of the country, even in the areas where this may not be a problem, if there is such a part of the United States.

I am very pleased to have had a role to play in this measure. I thank the gentleman from New York.

Mr. GEKAS. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, I thank my colleague, the gentleman from Pennsylvania [Mr. GEKAS], for yielding me this time.

I rise in opposition to this measure. Let me state initially that if the reach of this bill would be limited to determining and gathering statistical data based on prejudice, or the manifestation of prejudice or hate crimes on race, religion or ethnicity, I would support this legislation.

I think where the mistake is being made in its adoption is for the first time in the memory of this Member of Congress in the history of legislation at the Federal level, we will change and adopt as a matter of public policy sexual orientation on a par with what we have traditionally brought within the protected classes of the 1964 Civil Rights Act, namely, race, religion and ethnicity. That I think is the change in what this would accomplish that I think is not good public policy, because what we are doing really we are saying as a matter of policy in this country in interpreting the 1964 Civil Rights Act that we will equate sexual orientation on the basis of the traditional coverages, race, religion and ethnicity.

I notice also that the Senate changed a word in the bill to which these crimes would relate. When it went out of the House it was threat. The Senate changed it to intimidation. I do not know about you, but when you look at the crimes that we are going to be gathering statistical data on, murder, manslaughter, rape, assault, simple assault, arson, destruction, damage or vandalism of property, and then you add intimidation into it, you really get to a good question.

What and how do you define intimidation? Bear in mind that beauty is in the eye of the beholder. Are we now passing a law at the Federal level whereby we are going to have data based on what is going on in somebody's head independent of action?

1930

The reason I phrased it that way is because all of those other crimes on which we will gather data result in impact on people that an objective person can easily identify and itemize and report, but with intimidation, I question that, quite candidly.

I think very seriously there is a constitutional question on precision that can be identified in legislative enactment with the use of that term and, of course, the court system someday will respond to that in an appropriate case.

I noticed also that the Senate added a provision on section 2, that American family life is the foundation of American society, and I would like to ask the gentleman from New York [Mr. SCHUMER] a question relating to the definition of this term "American family life."

Does the term "American family life" as used in section 2 include homosexual relationships?

Mr. SCHUMER. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to the gentleman from New York.

Mr. SCHUMER. Mr. Speaker, I think if the gentleman reads the language, it does not comment one way or the other on that position. It was added in the Senate, and he ought to ask those in the other body who brought it what they intended, but just to simply read it, I do not think it talks about that. It does not address that issue.

Mr. DANNEMEYER. Would the gentleman say it included it?

Mr. SCHUMER. I would say it does not address that issue is what I had answered the gentleman.

Mr. DANNEMEYER. Maybe the gentleman would look on page 3, lines 3 through 5, which says:

> Nothing in this act shall be construed nor shall any funds appropriated to carry out the purpose of the act be used to promote or encourage homosexuality.

So would the gentleman not say that that language would seem to indicate that the term "American family life" did not include homosexual relationships? Would the gentleman not say that?

Mr. SCHUMER. I would say the gentleman is coming to his own conclusion, but one that might not be reached by lots of other people who read the same language.

Mr. DANNEMEYER. Since the gentleman, as I understand it, is a proponent of this legislation, if he has an opinion, I would be interested in his.

Mr. SCHUMER. I told the gentleman that I think the legislation, the clauses in section 2, that he mentions, do not address the question that he is asking, so it is neutral on it.

Mr. DANNEMEYER. Then I would ask a question about the term "intimidation."

Mr. SCHUMER. If the gentleman wishes to know, he has not.

Mr. DANNEMEYER. No; I was just getting to that. In the first section of the bill on line 10, it uses the term "intimidation." Does the term "intimidation" as used in section 1 include verbal assaults?

Mr. SCHUMER. No; it does not. The term "intimidation" conforms to the UCR, the crime reports, Universal Crime Reports.

Mr. DANNEMEYER. It does not include the term "verbal assaults" then?

Mr. SCHUMER. That is correct.

Mr. DANNEMEYER. I thank my colleague for his response to those questions.

Mr. Speaker, let me say just in concluding that it is important, I think, for our society to gather statistical data on hate crimes based on prejudice, because we, as a society, are struggling to divest any of us of crimes that fit into that category, but I think we should also recognize that one of the major struggles that will encompass the States and the Federal Government of the 1990's is whether or not this country will equate homosexuality on a par with the heterosexual lifestyle.

Believe me, whether we like to accept it or not, there are persons outside of this Chamber who are crowing; namely, in the homosexual community, that when this legislation includes sexual orientation the homosexual community of America has made a major victory, because they now have something in the law which they have sought diligently for the last 20 years whereby they will equate homosexuality on a par with the traditional coverage of the 1964 Civil Rights Act; namely, race, religion, and ethnicity. It is for these reasons that I oppose this legislation.

Mr. SCHUMER. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. FRANK], a distinguished member of the subcommittee who has played a very active and constructive role in making sure that this legislation becomes law.

Mr. FRANK. Mr. Speaker, I want to thank the chairman of the subcommittee and the ranking minority member.

Once again, we have an excellent example of the legislative process at its

best. The chairman of the subcommittee took over and worked to get this bill into very good shape. I want to particularly acknowledge the generosity of the ranking minority member.

Like him, the workings of the other body sometimes puzzle me, and I do not understand why his perfectly reasonable amendment was not acceptable to them. I do not understand why the prospect of having to deal with his amendment threw them into an even greater dither than sometimes is over there.

But the fact is that for reasons beyond our control the amendment of the gentleman from Pennsylvania, which was a reasonable amendment, raised all kinds of procedural problems over there.

I just wanted to acknowledge the gentleman's generosity in receding. I think he made his point, and many of us will continue and join with him to try to make that point, if it requires letters to the Attorney General, or if other cases come up where we think the Attorney General ought to use that authority, and I think many of us would be glad to join with him. I wanted to acknowledge the willingness of the gentleman from Pennsylvania to help us advance this legislation.

I know a wide range of people in the religious and ethnic and other communities are grateful to him, and I want to add to that.

Mr. SCHUMER. Mr. Speaker, I yield 2 minutes to the gentlewoman from Connecticut [Mrs. KENNELLY], who really helped initiate the whole campaign for this legislation several years ago, and it must be a wonderful evening for her to see this legislation finally come to pass.

Mrs. KENNELLY. Mr. Speaker, I rise in strong support of adopting the Senate amendments to the Hate Crime Statistics Act. They say that when you wait for something for a long time, the end of waiting is always the hardest. That's how I feel about the Hate Crime Statistics Act.

I first introduced a hate crimes bill, almost identical to this one, on February 4, 1984 in response to a series of incidents with religious overtones in my district. Six years later, after passing the House three times, and now the Senate, this bill is finally on the brink of becoming law.

And in those 6 years, crimes which manifest hate because of one's ethnicity, religion, or sexual preference have upset all too many communities throughout these United States.

Experts say they think that threats and other hate crimes against minority groups are increasing. This law will let us know the facts. One need only read the newspaper to notice that there are more reports of assaults against homosexuals. Statistics collected by the Anti-Defamation League of B'nai B'rith indicate that over 1,400 anti-semitic incidents occurred in 1989! And yet last year we boast: our 90 arrests in such crimes were three times those for 1988.

Identifying and classifying crimes of hatred are first, yet critical steps in helping law enforcement officers uncover trends to combat these crimes. These crimes not only defame property and injure individuals, but they diminish the whole community in which they exist.

I urge my colleagues to join me in supporting this bill.

Mr. BROOKS. Mr. Speaker, I rise in support of the motion. Last June this body passed H.R. 1048 by a vote of 368 to 47. The other body has now acted, approving the bill by an equally huge margin—92 to 4.

The legislation calls for the collection and publication of statistics about crimes that manifest prejudice based on race, religion, sexual orientation, or ethnicity. The crimes for which this data will be collected include murder, forcible rape, aggravated assault, and arson. By giving data with which to assess the scope and patterns of crimes, motivated by hatred, this bill will enable law enforcement agencies to combat hate crimes in a more systematic and comprehensive manner than is currently possible.

The other body made a number of changes in the bill that we passed. Those changes, however, do not weaken or significantly alter the bill. The Department of Justice must still collect and publish data on hate crimes.

There is widespread support for the legislation. A partial listing of those who endorse the legislation includes 30 attorneys general, the National Institute Against Prejudice and Violence, the Anti-Defamation League of B'nai B'rith, the Arab-American Anti-Discrimination Committee, various church and religious organizations, the American Bar Association, and the ACLU. Joining these groups is the administration. The President and Attorney General Thornburgh have on several occasions expressed their personal support for the legislation.

Mr. Speaker, I urge my colleagues to support the motion so the measure can be sent to the White House and signed into law.

Mr. MINETA. Mr. Speaker, I rise in support of H.R. 1048, the Hate Crimes Statistics Act.

Mr. Speaker, it is truly tragic when acts of racially motivated violence, vandalism, and sometimes murder become common occurrences. It is tragic, and a national disgrace. And yes, Mr. Speaker, there has been a significant and unsettling increase in the number of crimes committed with a disturbing, recurring motive, one American's hatred for another.

Nearly every day, I hear of a different tragedy motivated by hate, and the victims of this violence are not only those who are on the wrong end of a clenched fist, tire iron, or gun. As long as this violence continues, we are all victims.

The greatness of our Nation comes from our diversity and the blood and sweat of immigrants from every corner of the globe. When one of our citizens commits a vicious crime against another because of ethnic, cultural, racial, or other differences, the most basic tenets of this Nation's principles are threatened.

Mr. Speaker, we must fight these crimes, and we must do so first by learning their depth and scope.

The Hate Crimes Statistics Act establishes a system to collect data on all incidences of criminal acts that manifest prejudice based on race, religion, sexual preference, ethnicity, and others. This information is vital if we are to educate the public about hate crimes and begin to combat the dangers they epitomize.

Mr. Speaker, for too long too many Americans have endured senseless, hate-inspired violence. This legislation is the first step to understanding the extent of this poison within our society, and then forming a strategy to end the crimes which rise from this hatred.

In a nation founded on freedom and the concept of equal rights for all, this should be one of our highest priorities.

I urge my colleagues to join me in supporting this vital legislation.

Mr. BRENNAN. Mr. Speaker, I strongly urge my colleagues to join me in support of the Hate Crimes Statistics Act. This legislation will bring much needed attention to the heinous violence and criminal activity which is directed at specific racial and religious groups in our society.

This week's Time magazine cover story on America's multiracial society is testament to our Nation's growing melting pot. Bigotry cannot, and will not, be accepted in this Nation of growing cultural diversity.

Regretfully, some segments of our society are continuing to be singled out as the object of violence and criminal activity simply because of their race, religion, ethnicity, or sexual orientation. It is imperative that we determine where and why these types of crimes are occurring. Because the Hate Crimes Statistics Act will provide for the collection of data regarding crimes of hate and prejudice, it will allow us to eliminate this discrimination by targeting our resources against it.

In a broader sense, this measure will allow us to protect the freedoms, that define this great Nation. I strongly urge my colleagues to join me in support of the Hate Crimes Statistics Act.

Mr. GEKAS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SCHUMER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. (Mr. HARRIS). The question is on the motion offered by the gentleman from New York [Mr. SCHUMER] that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 1048.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

EXPRESSING SENSE OF CONGRESS THAT THE PRESIDENT DESIGNATE A SPECIAL ENVOY TO NEGOTIATE RELEASE OF AMERICANS HELD HOSTAGE IN LEBANON.

Mr. HAMILTON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 271) expressing the sense of the Congress that the President should designate a special envoy to negotiate the release of Americans held hostage in Lebanon, and for other purposes, as amended.

The Clerk read as follows:

H. CON. RES. 271

Whereas United States citizens Terry Anderson, Thomas P. Sutherland, Frank Herbert Reed, Joseph James Cicippio, Edward Austin Tracy, Alann Bradford Steen, Jesse Jonathan Turner, Robert Bruce Polhill, and Lieutenant Colonel William R. Higgins (presumed murdered but not confirmed) were taken hostage in Lebanon and have not been released;

Whereas many other foreign citizens are being held hostage in Lebanon;

Whereas many of these hostages have not seen their families for more than 3 years;

Whereas the hostages' captivity is an affront to their most basic human rights;

Whereas there was a ceremony in Lafayette Square in Washington, District of Columbia, on March 16, 1990, commemorating the 5th anniversary of Terry Anderson's captivity in Beirut; and

Whereas despite the best efforts of the executive branch under current arrangements, these hostages remain in captivity: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That (a) the Congress hereby renews its appeals to those holding the hostages in Lebanon to free them out of compassion for their plight.

(b) the Congress embraces the cause of those who on March 16, 1990, commemorated the 5th anniversary of the captivity of Terry Anderson.

(c) The Congress expresses its deepest sympathy for the families of the hostages in Lebanon.

(d) The Congress—

(1) encourages international efforts to secure the freedom of the hostages in Lebanon, and

(2) urges all countries with direct or indirect influence over the kidnappers (including Iran and Syria), and those supporting the kidnappers, to press for the immediate, safe, and unconditional release of the hostages.

(e) It is the sense of the Congress that the President should accelerate efforts to secure the immediate and unconditional release of the hostages in Lebanon—

(1) through increased efforts by personnel of the Department of State and other United States diplomatic officials, and

(2) by urging multinational organizations, such as the European Community and the United Nations, to exercise their influence to help secure the hostages' release.

SEC. 2. The Clerk of the House of Representatives shall transmit a copy of this concurrent resolution to the President.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Indiana [Mr. HAMILTON] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Indiana [Mr. HAMILTON].

□ 1940

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 271 as amended. This resolution represents the sense of the Congress that the President should make the release of Americans held hostage in Lebanon a high priority and should accelerate efforts to obtain their release.

This resolution is the result of the outstanding efforts of our colleague, LOUISE SLAUGHTER of the State of New York, and I commend her for her leadership on this matter. The amended resolution before Members today is the product of discussions between the several Members of Congress, the Committee on Foreign Affairs and the Department of State.

The administration has no objections to this resolution, and I commend my colleagues for their efforts to work to revise portions of the original resolution to meet the concerns of the State Department and thereby expedite consideration of this important statement on a sensitive, but crucial, foreign policy issue. In the last 5 years, a few foreign policy issues have caused more frustration, more concern, and more anguish for Americans than the continued captivity of the nine American hostages in Lebanon.

Mr. Speaker, this resolution: Calls for renewed effort to obtain the release of the hostages; and expresses the deepest sympathy for the families of the hostages.

This resolution also specifically: encourages international effort to secure the release of all the hostages; urges all countries with direct or indirect influence over the kidnapers, including Iran and Syria, to press for the immediate, safe, and unconditional release of the hostages; calls for increased State Department efforts; and urges multilateral organizations, including the European Community and the United Nations, to exercise their influence to help secure the hostages' release.

Mr. Speaker, this is an important statement on an important issue at a time when there is considerable public talk about the hostages and some new diplomatic efforts appear to be underway. The resolution is non-controversial and I urge its adoption.

Mr. Speaker, I am pleased to yield such time as she may consume to the principal sponsor of this resolution, the gentlewoman from New York [Ms. SLAUGHTER].

Ms. SLAUGHTER of New York. Mr. Speaker, I thank the gentleman from Indiana [Mr. HAMILTON] for yielding. I want to thank the gentleman from California [Mr. DYMALLY] for holding the hearing on this resolution, and to the gentleman from Indiana [Mr. HAMILTON], the gentleman from Florida, [Mr. FASCELL], and to the gentleman from Michigan [Mr. BROOMFIELD] for their help in getting this through. I was pleased that the committee voted unanimously to support this resolution. I am grateful for that support.

Mr. Speaker, 4 weeks ago we were very excited with notions that perhaps the hostages might soon be freed. This is not the first time that our hopes have been lifted, only to be dashed.

My constituent Terry Anderson has been held now for 5 years. It is hard for us to realize as we live our lives day by day for 5 years a human being has been held hostage, away from his family and away from all those who love him.

The 4 years that I have been in Congress, I have stood on the floor of this House on the occasions of the anniversary of his snatching off the street in Beirut and on the times of his birthday to remind my colleagues that Terry Anderson still languishes in prison.

Just yesterday in his hometown of Batavia, NY, as I walked down the street I noticed the yellow ribbons hanging from the lampposts and the trees and the places of business, looking bedraggled in the rain, just the same little reminder that Terry is still there and that we want him back.

Every year church services are held where we have prayer, not only that Terry will be coming home soon, but that Terry will be coming home whole.

I think about Peggy Say and the rest of Terry's family who still live back in Batavia. Every time I look at Peggy and recognize the incredible courage she has shown and the absolute tirelessness she has, Peggy Say should be everybody's sister. She never gives up. She lives in hope. She follows every possible lead. She begs everyone she sees for help. She never lets any of us forget that Terry and the others are hostages.

With the exception of Peggy and the press groups and what we do here on this floor, we have not made a statement by Congress that those people matter to us, that we want those hostages home. So I felt it was important that we go on record with a vote in the U.S. House of Representatives that we know that our citizens are being held.

Every day of our lives we should remember that somewhere in a house or a building in South Beirut a hostage of mine sits, chained by one arm to a wall, without knowledge of his family, without knowing that his father and brother have died, without any idea of the life of his little girl, who is now 5, and sits and tries to keep himself sane and hopes that his country will not forget him.

I join in that hope tonight that if we pass this resolution, that the House of Representatives of the United States of America has said very forcefully, "We will not forget. We want you back."

Mr. Speaker, I thank all Members for their support.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I can certainly understand the concern of the gentlelady, the sponsor of the bill, because of her constituent Terry Anderson's captivity.

This is a truly complicated situation and I trust that what we say and resolve today will not create false hopes for an easy and swift resolution of this great problem.

Hostage-taking in the Middle East has now bedeviled three straight administrations. It shows how helpless a major world power can be in the face of determined fanatics.

President Bush deserves our praise for his sensitive and balanced approach to handling the hostage situation. I am confident that he is doing everything possible to resolve this tragic problem.

As longstanding problems are being resolved all around the world and justice is prevailing, all of us are hopeful that a resolution of the hostage situation will be forthcoming. Peace will never come to the Middle East through the barrel of a gun. Violence, terrorism, and hostage taking will not solve the complex and deep-rooted differences that divide the people of that area of the world.

Peace and justice will come through negotiations and a fair resolution of the difficult issues that plague that region. Our Government will continue to try to play a positive and constructive role in bringing stability to the Middle East. Holding innocent Americans and others hostage is a cruel way to address a problem. Justice demands that the hostages be freed from their long captivity.

I urge my colleagues to support this resolution.

Mr. HAMILTON. Mr. Speaker, I yield 4 minutes to the gentleman from American Samoa [Mr. FALEOMAVAEGA].

Mr. FALEOMAVAEGA. Mr. Speaker, I rise today in strong support of House Concurrent Resolution 271, legislation introduced by my esteemed colleague from New York, Congresswoman LOUISE SLAUGHTER. This measure would assist in laying groundwork for a quick and expeditious end to the living nightmare that has constituted life in misery for our fellow citizens held hostage in Lebanon.

As the distinguished Member from New York has for so long, and so eloquently, reminded us: America cannot merely sit back and forget our own citizens that have for years suffered agony in chains of bondage. We in Congress, as well as all of government, have a moral responsibility to do all that we can to ensure that our citizens are brought home safely—now—not at some indefinite point in the future.

Although I can understand the administration's adoption of the policy of nonnegotiation with terrorists and religious extremist elements, over a half-decade has passed, and Terry Anderson still languishes with his seven brothers in captivity. Clearly, this policy has not produced any positive result.

With the spiritual leader of Hezbollah, Sheik Fadlallah, and the administration of Iranian President Rafsanjani, recently advocating that 1990 shall be the last year of hostage captivity and that hostage taking is not in accordance with the principles of Islam, a changing political climate is evident in the Middle East.

Our Government cannot continue to ignore these entreaties for a resumption of dialog with Iran, especially since they are accompanied by the clear statement that American hostages should go free without preconditions.

Mr. Speaker, House Concurrent Resolution 271 sends a forceful message to President Bush. Now is the time for decisive action, utilizing all avenues of diplomacy and international influence, to bring our citizens back home. I cannot more strongly urge our colleagues to support passage of this measure that shows we care—and that we have not forgotten our fellow Americans and our hearts go out for their families and loved ones.

□ 1950

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia [Mr. GINGRICH], our minority whip.

Mr. GINGRICH. Mr. Speaker, I thank the gentleman for yielding time to me. I do not think I will use all the time.

Mr. Speaker, first I want to praise the gentleman from Michigan [Mr. BROOMFIELD] for dramatically improving this resolution from the original draft. I want to come back to that in a minute and ask some questions about the resolution to make sure that in fact it does state accurately the concern that President Bush has already expressed and the concern that I think the State Department officials are expressing.

But I also want to thank the Democratic leadership for bringing this resolution up, because I think the particular week is a very appropriate time to look at the question of terrorism and hostages in the Middle East, and in the context of the recent revelations about Iraq, both the revelations about their effort to smuggle devices that are important in making nuclear weapons, and the revelation about the dictator of Iraq who has threatened to use poison gas, and in effect has been threatening civilian populations with massive casualties or massive deaths, this resolution should remind all of us that there is a barbaric, brutal, terrorist nature in the Middle East, and we should be reminded that it is not just the groups that are in the Bekka Valley, but the Syrian dictatorship which shelters the terrorists and the Libyan and Iranian dictatorships which finance the terrorists, and the Iraqi dictatorship which is now threatening mass terrorism and all share a common hostility to Western values, to the democratic process and to human rights as we understand them. In effect, not only should we be concerned about the current hostages in Lebanon, but we should also recognize that all of us could be held hostage in the next decade by a kind of dictatorial anti-Western attitude in Syria, Iraq, Iran, and in Libya which literally could threaten the major cities of Europe in the near future, and which could ultimately, by early in the next century, threaten the United States.

I think all of us have to recognize two very large issues which come out of this. The first is that we need to work both with the Israelis in developing a tactical missile defense, and in building our own strategic defense in order to stop Iraqi missiles, in order to be able to protect Western Europe and Israel and the United States from the kind of terrorist dictatorships which this resolution reminds us of. In addition, we have an obligation to rebuild the human intelligence capabilities of the United States, intelligence capabilities which are still woefully lacking, and which are particularly important in terms of terrorists.

But I would like to ask two questions just to make sure from the Democratic side that I understand the sense of the resolution. On page 3 where it says:

> It is the sense of the Congress that the President should accelerate efforts to secure the immediate and unconditional release of the hostages.

I am curious, are there any particular steps that are contemplated? My impression is that the President, in fact, is desperately concerned about the hostages and would very much like to see them released as soon as possible and as unconditionally as possible.

I just wondered if our friends had any specific actions they wanted to recommend?

Mr. HAMILTON. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from Indiana.

Mr. HAMILTON. Mr. Speaker, first of all let me say I agree with the observation the gentleman makes that the President is deeply concerned about these hostages. The fact of the matter is that many of us, at least, do not know what the President or others are doing to secure the immediate and unconditional release of the hostages. I am not able to identify for the gentleman tonight specific steps that have been taken.

I do not know that I quarrel with that fact. I do not think I should be able to identify them.

But we do say that we want him to do everything possible here and to accelerate the efforts. I might say that this language has been approved by the administration.

Mr. GINGRICH. Good. I appreciate the gentleman making that point. I just want to say that it is in the spirit of a dramatically improved resolution on a bipartisan basis, and a recognition that the administration is trying, I think, very diligently to achieve walking a very narrow line, doing everything they can for the hostages while at the same time refusing to negotiate with terrorism, recognizing that that would simply increase the potential of future hostage taking.

So I would urge a yes vote in the context of that understanding.

Mr. BROOMFIELD. Mr. Speaker, I yield 8 minutes to the distinguished gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding time to me. Some of my concerns are those that have been expressed already by the minority whip, and I also want to begin by saying that this resolution, insofar as it expresses our concern about our hostages, and insofar as it identifies us with the families and their suffering, is certainly an appropriate resolution to bring to the floor and to have considered.

But I must say that when I read through this resolution I became somewhat concerned about language that I found on page 3 of this resolution. I would like to ask a couple of questions also about it.

It says: "It is the sense of the Congress that the President should accelerate efforts to secure the immediate and unconditional release of the hostages in Lebanon," and then cites a couple of examples below that. If I could ask the gentleman from Indiana, chairman of the committee, please, is there anything in that language that implies in any way criticism of the President or the efforts that he is making?

Mr. HAMILTON. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Indiana.

Mr. HAMILTON. Mr. Speaker, frankly I do not know what efforts the President is making. I think the purpose of the language, so far as I know, is simply to raise the priority of the issue, and urge him to do all that he possibly can do.

I do not read the language as being critical of the President, but simply to say that we want him to accelerate every effort possible, and insofar as I know at this point he is in full accord with that language.

Mr. WALKER. I thank the gentleman for his response.

My concern stems from this: I think we have every reason to believe, based upon what the administration has said, that indeed they are in agreement that this is accelerated and something that should be high priority. As a matter of fact, I think the President said at a couple of points that the highest priority his administration had in terms of their dealings with the Middle East and their foreign policy is to try to work on the hostage issue.

If the gentleman from Indiana and I do not know what they are doing, as he stated just a couple of minutes ago, that is probably appropriate. This is not the kind of diplomacy that is well conducted in public. So therefore, when we begin to urge these kinds of things on the President, it can imply criticism simply because we do not know what is going on, and I just want to make absolutely certain that there was no intent in this resolution to be critical of the President and the efforts that he is making. Do I have the gentleman's assurance?

Mr. HAMILTON. You have my assurance that it was certainly not my intent to be critical of the President with respect to the efforts that he is making.

Mr. WALKER. In the next phrase it says: "through increased efforts by personnel of the State Department and other United States diplomatic officials." That is one way in which we are to accelerate efforts to secure the immediate, unconditional release. Can someone explain to me, either the gentleman or the author of the resolution, what we mean by increased efforts by the personnel of the Department of State in this regard?

Mr. HAMILTON. Mr. Speaker, if the gentleman will yield, I am not able to respond in terms of very specific efforts that we have in mind. I think what we are saying here in effect in the language is that we want everything done that can be done to assure and to gain the release of the hostages.

Mr. WALKER. Should the personnel of the Department of State, for example, be in direct touch, negotiating with terrorist nations as a part of this particular part of the resolution? One of the things that we have said right along the way is that we are unwilling to negotiate with terrorists, as a matter of fact, and one of the things that has been of most concern in the whole Iran/Contra controversy was the issue of dealing directly with terrorist nations. Is there anything in this resolution that can be implied to be telling the personnel of the Department of State and/or the U.S. diplomatic officials to deal directly with terrorist nations on the hostage issue?

Mr. HAMILTON. If the gentleman will yield, I do not think I am the one to try to state administration policy. But my understanding of policy with respect to dealing with the captors of the hostages is that we will not make any concessions in attempting to get them. We have not said I think that we will not talk with them, and I am not sure about the word "negotiate." I do not think we have said that we will not negotiate.

□ 2000

My understanding of policy is that we will not make concessions to nations who hold terrorists or other captors.

To that extent I may have some difference in understanding with the gentleman from Pennsylvania as to what policy may be.

Mr. WALKER. That may be a more accurate reflection, but it is my understanding, for example, that we do have diplomatic talks going on with the PLO and a number of other organizations in that part of the world who are terrorist states. Obviously we have had contacts with a number of nations, including some of those named in the resolution, like Iran and Syria, about these matters.

These are going on. But it says, "Increased efforts by the personnel of the Department of State." And that is what concerns me. If what we are doing is demanding them to go further than what they are now doing in terms of the talking, that does begin to sound like we are talking about negotiating, and in negotiations both sides give away a little. That is exactly our concern here, that we are now informing the administration that it is OK to begin to find little points of negotiating stance with terrorist nations. That would be unacceptable to this gentleman.

Mr. HAMILTON. Perhaps I can help by saying this, that there is no intent in this resolution to urge a change of policy with respect to terrorism in this country. All we are saying is that we want everything done that can be done to get those hostages back. There

is no language of criticism here that is implied. We simply want to assure that every effort is being made to get the hostages back.

Mr. WALKER. And we have no reason to believe that everything that can be done is not being done at the present time and there is nothing in this resolution which indicates that, is that correct?

Mr. HAMILTON. If the gentleman would yield, I simply do not know what is being done. They could be doing everything, they could be doing nothing. I do not know. I am not privy to that information.

Mr. WALKER. I thank the gentleman. That is obviously a problem here, but as we have pointed out before, there is the issue of confidentiality being very important in this whole process, and I got to tell you that this resolution then is a little disturbing when we imply that we do know and that there ought to be things done which are increased efforts.

If the gentleman is saying that that simply means that we endorse the present policy and they are doing everything they can, that is fine, and this resolution goes along with that; I do not have a problem.

If what we are saying is because we do not know, we assume they are not doing everything that should be done and this then becomes mildly critical and we say they ought to go beyond negotiating stances that they have announced in public, then I do think there may be some controversy about that particular language.

Mr. HAMILTON. I do not think there is any language in this resolution that would suggest that we are critical of the policy of the United States with respect to dealing or not dealing with terrorist nations.

The gentleman, I think, goes far beyond the intent of the language, far beyond the explicit words of the resolution when he talks about a possible change in policy being implicit here or explicit. I just do not think that it is involved in the language at all.

Mr. WALKER. That is what I am trying to clarify in all honesty, I tell the gentleman.

Mr. HAMILTON. It is certainly not intended.

Mr. WALKER. If there is no intention here to drive policy in a different direction that we are going——

Mr. HAMILTON. Again, if the gentleman would yield, I can assure the gentleman there is no intent to change policy with respect to terrorism in the language of this resolution.

Mr. WALKER. Well, but incumbent on that is also the question of dealing on hostages, because the hostages are being held by terrorist nations and by terrorist groups. So we are not changing policy on terrorists, and I also want to make certain that we are also not demanding something on hostages that puts the administration, to use the colloquial, between a rock and a hard place.

Mr. HAMILTON. Let me just say we are not trying to put the administration between a rock and a hard place, we are not trying to change policy with respect to terrorists or with respect to hostages.

Mr. WALKER. I thank the gentleman. That is very helpful.

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 271, expressing the sense of the Congress that the President should make the release of Americans held hostage in Lebanon a high priority and should accelerate efforts to this end.

We must not ever forget the plight of the hostages who have been in captivity for so long and who have endured the most inhumane conditions.

The U.S. Government must spare no effort to gain the release of the hostages. However, in so doing we must make it absolutely clear that the U.S. Government won't bend to blackmail. We must impress upon those who are holding the hostages that they will not achieve any political gains by holding these innocent civilians who through their captivity have been denied their most basic human rights.

I strongly support House Concurrent Resolution 271 which urges all countries with direct or indirect influence over the kidnappers, including Iran and Syria, to press for the immediate, safe and unconditional release of the hostages. It is my hope that the efforts of the United States Government, together with the United Nations and other multinational organizations will result in the immediate release of the hostages so that they may be reunited with their loved ones. House Concurrent Resolution 271 serves to place as a high priority on the diplomatic agenda the release of the 8 Americans who are held hostage as well as the other foreign citizens wo are being held hostage in Lebanon. The resolution calls attention to the recent fifth anniversary of the captivity of Terry Anderson.

The loved ones of the hostages have our deepest sympathy. In closing, let me say any and all efforts must be undertaken to end the tragic plight of the hostages. Let's bring them home.

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of House Concurrent Resolution 271 expressing the sense of Congress that the President should make the release of Americans held hostage a high priority and accelerate efforts to this end. I supported this resolution when it was before the Foreign Affairs Committee, upon which I serve, and I urge its speedy adoption here today.

This resolution notes the continued unwarranted captivity of American hostages in Lebanon including Terry Anderson, Thomas Sutherland, Frank Reed, Joseph Cicippio, Edward Tracy, Alann Steen, Jesse Turner, and Robert Polhill. It also embraces the cause of those who held a ceremony here in Washington last month to bring attention to the fifth anniversary of Terry Anderson's captivity in Lebanon.

Unfortunately, the hostage situation is a very complex one. Above all, it is a frustrating one. Like the issue of American servicemen still missing and unaccounted for in Indochina—the POW/MIA issue—we have Americans being held against their will for no legitimate reason, longing families at home waiting for some word about the fate of their loved one, intense but thus far unsuccessful efforts by our Government to resolve this situation satisfactorily, and questions about those missing.

The situation facing our hostages is, indeed, a very tragic one. We know that they have been beaten, terrorized, and treated in a most inhumane manner. I find it extremely hypocritical that these terrorists who claim to "work for God" have abused every moral standard in the Islamic religion they profess to follow. They are not Islamic fundamentalists; they are terrorists. The prophet Mohammed and his cousin Ali, the spiritual leader of the Shiite moslems, preached compassion and understanding. Yet, neither of these basic religious principles have been followed at the least by the terrorists holding our hostages or their deranged Iranian supporters. Theirs is clearly the work of the devil, not God as they claim.

The claims by the terrorists that these Americans are spies are simply outrageous. On the contrary, these Americans were providing important educational and social services to Lebanese. They are teachers, scholars, and journalists. Take the case of Terry Anderson. His captors speak much of their people's suffering. Tony Anderson was there to report that and bring it to the attention of the world, hopefully prompting efforts to right the wrongs. Taking him hostage, therefore, was clearly a disservice to those the terrorists hyocritically claim to serve. The same is true of others, like Frank Reed. Frank ran a school for Lebanese to help Lebanese youngsters learn to read and write. Education and understanding are key ingredients to national reconciliation in Lebanon and improving the standard of living for all—especially the Shiites. Hence, again, the terrorists are hurting their own people in addition to innocent Americans.

This resolution also expresses deepest sympathy to the hostages' families. Waiting for some word—praying for the best, fearing the worst—these families have not given up hope. I hope their prayers will be happily answered soon and that they will not have to wait as long as many of the families of Americans missing in Southeast Asia. There is a very human side to this tragedy. Frank Reed hasn't been around to watch his inquisitive young son Tarik grow up. Terry Anderson hasn't even seen his daughter born after he was taken captive. For the sake of their children, who don't understand politics and are too young and innocent to be responsible for any of the world's problems, these "daddies" should be released immediately.

House Concurrent Resolution 271 renews our appeal to those holding the hostages to free them out of compassion. As I have already noted, holding these innocent hostages is a grave injustice. It seriously harms, not helps the so-called cause of the captors.The humanitarian thing to do, the morally right thing to do, is to release the hostages.

Today's resolution also recognizes the efforts of the President and expresses the

sense of Congress that the President should make the hostages' release a high priority—something he has already done—and accelerate efforts to this end. I warn those who attack the administration that they are treading on very thin ice. I know that President Bush, like President Reagan, would like nothing more than to bring our hostages home safely. I know that he is pursuing every available and appropriate avenue in an effort to achieve this objective. However, like our efforts to gain the fullest possible accounting of Americans missing in Indochina, this is a very frustrating process. In the latter case, the real answers and the real obstacles lie not in Washington, but in Hanoi. In the former case the "stonewalls" are in Beirut, Damascus, and Tehran, not here.

I know many efforts are taken, by necessity, very quietly and discreetly out of public view. Because they aren't on the evening news doesn't mean they aren't happening, as some here claim erroneously. Yet, we are dealing with unreasonable thugs in a hostile land. Because of them our efforts have been frustrated and of only limited success.

I also caution those who demand we give in to the terrorists. To do so jeopardizes every American around the globe and creates the potential for the taking of others as hostages. Furthermore, the Iran-Contra affair, about which some of my colleagues have used to attack President Reagan, was part of an effort, some claim, to trade arms for hostages. Whether it was or wasn't, it is plain to me that this is not the way to go—though it is key to note that a hostage was released at the time of these dealings. It is very easy to criticize the administration. It is a lot harder to formulate new approaches and efforts that the administration has not already tried—particularly when the captors are not responsive. I strongly support President Bush's efforts in this humanitarian cause and I believe this resolution gives him reinforcement from Congress.

In Southeast Asia we talk about both POW's—prisoners—and MIA's—those missing and unaccounted for. The same, unfortunately, is also true for Lebanon. While this resolution before us today focuses on the prisoners, we must not forget about the two prisoners who are now missing and possibly murdered, namely William Buckley and Col. William Higgins. I know the President hasn't. The terrorists claimed to have "executed" both men. But, no remains have been repatriated or even acknowledged. The longing families of these men also wait for answers and human decency dictates that these answers come soon. Unfortunately, I'm not so sure just how "human" these terrorists are.

Our unity in supporting the President's efforts to secure the release of all our hostages and our steadfastness in keeping this humanitarian issue a high priority sends the signal to the hostages' captors and others around the world—like the terrorists' supporters in Tehran—that we have not forgotten nor will we. This resolution is part of that signal and I urge its expeditious adoption.

Mr. GILMAN. Mr. Speaker, I rise to express my strong support for House Concurrent Resolution 271, expressing the sense of the Congress that the President should make the release of Americans held hostage a high priority and accelerate efforts to this end. I want to commend the gentlelady from New York [Ms. SLAUGHTER] for her outstanding work on this important measure.

This bill notes that the continued captivity of our American hostages in Lebanon is unacceptable. This measure demonstrates clearly and unequivocally that the U.S. Congress grieves with the hostage families. Terry Anderson, Lt. Col. William R. Higgins, who is presumed murdered but unconfirmed, Thomas Sutherland, Frank Reed, Joseph Cicippio, Edward Tracy, Alann Steen, Jesse Turner, and Robert Polhill must be released. The intransigence of Syria and Iran on this issue is painfully apparent to those of us who closely follow developments in the Middle East.

Mr. Speaker, our President has done an outstanding job in keeping this issue on the front burner. This measure renews our appeal to those holding our hostages, to release them out of compassion. Accordingly, I urge all of our colleagues to support this resolution.

Ms. SNOWE. Mr. Speaker, I rise in support of this resolution.

Three weeks ago marked the fifth year anniversary of the capture of longest held American hostage in Lebanon, Associated Press reporter Terry Anderson. Mr. Anderson is joined in his plight by 7 other Americans and 10 other western hostages from 6 different countries.

This resolution highlights the humanitarian tragedy of this troubling anniversary. It expresses Congress' deep sympathy for the families of the hostages, and calls for accelerated diplomatic efforts to obtain their immediate and unconditional release.

During committee markup, a modest change was made in this resolution introduced by the gentlelady from New York [Ms. SLAUGHTER]. The resolution was modified to remove the suggestion that the President should consider appointing a special envoy to negotiate with those holding western hostages in Lebanon.

We made this change to refrain from taking any action that could be perceived as undermining the extraordinary efforts already being made by the President and others both within and outside of the administration. Now is not the time to give even the appearance of a political division on this issue that could be exploited by the hostage holders or that would give the impression that the United States would make a profitable target for future abductions or terrorist acts. I understand that with this change, the State Department and administration now supports this resolution.

During the past few weeks, heightened attention has been given to the plight of the hostages. In this short period, conflicting statements and rumors have surfaced. In Lebanon, Syria, and Iran, a variety of sources have suggested that some breakthrough on the hostages was imminent. As many sources, however, have strongly denied any such possibility.

This demonstrates one of the great frustrations of this issue. Time and again over the past few years such reports have surfaced leading to heightened expectations. We all hope that there is some substance to these rumors, that 1990 will indeed prove to be, as some have suggested, the year of the hostages' release.

Mr. Speaker, I urge adoption of the resolution.

Mr. BROOMFIELD. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HAMILTON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. HARRIS). The question is on the motion offered by the gentleman from Indiana [Mr. HAMILTON] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 271, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title was amended so as to read:

Concurrent resolution expressing the sense of the Congress that the President should make the release of Americans held hostage in Lebanon a high priority and should accelerate efforts to this end.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 271, the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

IN SUPPORT OF LITHUANIAN INDEPENDENCE

Mr. HAMILTON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 289) in support of Lithuanian independence.

The Clerk read as follows:

H. CON. RES. 289

Whereas the historic nation of Lithuania has been an integral part of European civilization for centuries;

Whereas the people of Lithuania established a free and democratic nation-state on February 16, 1918;

Whereas the United States Government recognized the independent Government of Lithuania on July 27, 1922;

Whereas the United States Government has never recognized Lithuania's incorporation into the Soviet Union on August 3, 1940;

Whereas throughout a 50-year history, every administration since President Franklin Roosevelt's has offered unwavering support for the people of Lithuania in their heroic efforts to obtain self-determination.

Whereas the people of Lithuania have made significant strides over the last 2 years in rebuilding an independent society and are building new institutions and adopting democratic practices;

Whereas the new President of the legislature of Lithuania appealed for diplomatic

recognition by democratic nations on March 17, 1990;

Whereas the people of Lithuania gave a clear mandate for the restoration of independence to their new legislators in the multiparty elections on February 24, 1990;

Whereas the new legislature of Lithuania has demonstrated great courage in exercising the mandate for democracy and self-determination given to them in those multiparty elections;

Whereas those same legislators declared the restoration of an independent Republic of Lithuania on March 11, 1990;

Whereas recent democratic development in Lithuania represent the fruition of the shared democratic goals and aspirations of the people of Lithuania, which have been long supported by the people of the United States;

Whereas the new Government of Lithuania will have to gain control over Lithuania's borders and economy, and it will therefore need effective political support in its negotiations with the Government of the Union of Soviet Socialist Republics if it is to be successful in those negotiations;

Whereas a major threat to the new Government of Lithuania is the growing economic pressures being imposed by the Soviet Union;

Whereas the Government of Lithuania will need to seek credits and markets in the West to maintain the Lithuania economy;

Whereas the Soviet Government has not yet recognized the action of the Lithuanian Parliament in declaring Lithuania independent;

Whereas the Soviet Government has undertaken action, including staging military maneuvers and ordering Soviet military units to assert more active and visible control over Lithuanian installations, in an apparent attempt to intimidate the Lithuanian Parliament and people; and

Whereas more recently, Soviet President Gorbachev has ordered citizens of Lithuania to hand over any weapons they hold to Soviet authorities within 7 days and has ordered tighter controls on the ability of foreigners to visit Lithuania: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring),

That the Congress—

(1) congratulates the people of Lithuania on the recent successful multiparty elections in Lithuania;

(2) wishes the new Government of Lithuania well in its decision to carry out the will of the Lithuanian people, expressed in the recent elections, to restore the independence of Lithuania;

(3) congratulates the new Supereme Council of the Republic of Lithuania and welcomes its efforts to expand democratic institutions and practices in Eastern Europe;

(4) urges the Government of the Union of Soviet Socialist Republics to recognize and respect the aspirations of the people of Lithuania by entering into immediate, constructive negotiations with the new Government of Lithuania on an equal basis;

(5) urges the Government of the Union of Soviet Socialist Republics, in the spirit of peaceful cooperation and friendship between our 2 countries, to refrain from acts of political, military, and economic intimidation that would impede the progress of negotiations with Lithuania or diminish Lithuania's long-term economic viability;

(6) considers that the use of force by the Soviet Union to suppress the democratic aspirations of the people of Lithuania and their desire for national sovereignty would be a gross violation of Lithuanian human rights and political freedom and a serious and tragic setback in United States-Soviet relations;

(7) believes the Soviet Union has no right to use force against Lithuanians peacefully exercising their democratic rights, and President Gorbachev and other Soviet leaders should clearly understand that the use of force against the Lithuanian people would have severe repercussions for United States-Soviet relations;

(8) supports the President's strong commitment to the doctrine of nonrecognition of the forced incorporation of territory, such as occurrred in the Baltic States in 1940, and urges the President to reaffirm his commitment to an independent and democratic Lithuania and to seek ways to actively demonstrate that commitment;

(9) urges the President to plan for and take those steps, at the earliest possible time, that would normalize diplomatic relations between the United States and the new Government of Lithuania; and

(10) urges the President to seek effective political support among our allies for Lithuanian self-determination.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Indiana [Mr. HAMILTON] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Indiana [Mr. HAMILTON].

Mr. HAMILTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 289, a resolution in support of the right of the Lithuanian people to independence. This resolution addresses an important foreign policy issue confronting the world; at this time and an issue which can have serious implications for United States-Soviet relations.

I want to commend the gentleman from the State of Illinois [Mr. DURBIN] and the gentleman from the State of Michigan [Mr. BROOMFIELD], the ranking Republican on the Committee on Foreign Affairs, for their outstanding leadership on this issue. This amended resolution is the product of their efforts, as well as considerable discussion with other Members and the Department of State.

The amended resolution before us takes into account most, but not all, of the concerns raised by the Department of State. As I understand their position, the State Department cannot support the resolution before us, but the Department prefers the amended resolution before us to other resolutions on this subject.

Mr. Speaker, there have been some encouraging signs in Lithuania over the last few days: the Lithuanians have indicated a willingness to step back from immediate confrontation and to tone down the rhetoric. Lithuania's President has said that he wants to avoid precipitous action and that he can agree to a referendum. It is hoped that the Soviets can match this restraint. Tensions remain high in Lithuania and in the Baltic States and further restraint on both sides is something that must be encouraged. Confrontation would be counterproductive and the situation could easily get out of hand.

Soviet Foreign Minister Shevardnadze arrived in Washington today for important meetings with U.S. officials. I suspect that the subject of Lithuania will be high on the agenda of our talks with the Soviets. It is, therefore, both important and appropriate for the House of Representatives to speak on this issue.

As we discuss and vote for this resolution, we must recognize the tough dilemma this resolution presents. On the one hand, we want to help Lithuania secure its independence, sooner rather than later, and we do not want to take a weak approach or appear to be sanctioning repressive Soviet actions. On the other hand, we do not want to encourage Lithuania to take actions which will invite or provoke a military crackdown, or lead to Soviet moves which would kill or undermine the reform process in the Soviet Union. This dilemma should not silence us or prevent a debate, but it should be a reminder of the critical nature of the problem.

Mr. Speaker, the central message of this resolution is threefold. First, the resolution speaks out against the use of force. Second, the resolution urges negotiations between the newly elected government of Lithuania and the Soviet Government in Moscow as the only practical way of resolving differences between Vilnius and Moscow.

Third, the thrust of the resolution sets an important marker for United States-Soviet relations. We must make it clear to the Soviets that their government cannot do certain things without paying a price.

There are some people who, with good reason, feel that this resolution should not be addressed, suggesting that it raises a sensitive internal Soviet issue at a difficult time when debate here can only add fuel to the fires of nationalist sentiment sweeping large portions of the Soviet Union and can only be detrimental to United States-Soviet ties.

I share some of those concerns, but I also take the view that the Soviets must understand the depth of feeling on this issue in the United States and the fact that a peaceful, negotiated

resolution of the problems in Lithuania will be essential to further steps in the process of improving United States-Soviet relations.

In 1990, we are on the brink of achieving an historic agreement with the Soviets in a number of areas, including conventional and strategic arms control. The Soviets must surely realize that how they handle the issue in Lithuania will affect the extent and quality of our relations. We want United States-Soviet relations to improve and we want to achieve historic breakthroughs in all areas of United States-Soviet relations, but a confrontation must be avoided in Lithuania to keep our ties on the current track.

Mr. Speaker, I urge adoption of the resolution.

Mr. Speaker, I reserve the balance of my time.

□ 2010

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to thank the Chairman of the Europe and Middle East Subcommittee, the gentleman from Florida [Mr. FASCELL] and the gentleman from Illinois [Mr. DURBIN] for their work in bringing this resolution to the floor.

This great House has an opportunity today to show the world that America is not afraid to project its ideals.

A short while ago, a small, brave country did what a young, courageous America did more than 200 years ago. The tiny Republic of Lithuania proclaimed its independence from a great military power.

This resolution urges the normalization of relations with the democratically elected government of Lithuania as soon as possible.

This language may seem ambiguous, and in fact it is. I would have preferred some tougher language. I'd prefer that we state in bold, clear language that we recognize not only the independence of Lithuania, but the legitimacy of its government, as well.

But the most important thing is not the different phrases that we may or may not use, but that this body go on record right now to show the government of Lithuania some degree of support.

And it sends a message to the Soviet Union. It says that Congress is in no mood to tolerate Soviet aggression against the people of Lithuania.

This is a good opportunity for Gorbachev to show that he takes his own reforms seriously. What we've heard for the last 5 years is a Gorbachev who talks about peace and glasnost and perestroika and democracy.

What we have seen so far in Lithuania is a Gorbachev who issues ultimatums, seizes schools, storms hospitals, evicts diplomats and reporters, and intimidates the people and the Parliament with Soviet tanks.

Glasnost and perestroika hang in the balance.

This resolution will also send a message to those around the world who love freedom and are not afraid to fight for it. It says that America has not lost sight of the principles that made it strong.

This is a good time to recall our own Declaration of Independence. Many of the great reform movements around the world in the last 200 years have based their goals on the ideals contained in America's Declaration.

The most relevant phrase in that document for the situation today says that governments derive their just powers from the consent of the governed.

That is a principle that has been violated in the Republic of Lithuania for the last 50 years.

Today would be a good time to show the world that America still places the same faith in self-determination that it did 200 years ago.

I urge my colleagues to support this resolution.

Mr. HAMILTON. Mr. Speaker, I yield 2 minutes to the distinguished gentlewoman from Connecticut [Mrs. KENNELLY].

Mrs. KENNELLY. Mr. Speaker, I believe that no matter what happens tomorrow, next week, next month, I think all Members know that Lithuania will become an independent nation again. As history is our teacher, there is no doubt that events have gone so far and have reached a point that Lithuania cannot return to the past. It has been fighting for its identity for the last 50 years. That fight should now be over.

It is very clear that Mr. Gorbachev really meant what he was talking about when he said glasnost and perestroika, but if he continues to mean what he said, then he cannot have it both ways. He cannot allow Czechoslovakia, a Romania, a Hungary, an East Germany, and then say "No," to the republics. Nineteen Ninety will be remembered as the year where a Lithuania can return to the habits of the heart, Lithuanians can once more say from their hearts, "We will be free."

That is why tonight this resolution is so important, and so important that nations who know freedom, who take it for granted, who literally have it day in and day out, reach their hands to Lithuania and be very clear to Mr. Gorbachev that this small nation that has fought for its identity for 50 years, the time has come—Lithuania must be independent again.

Mr. BROOMFIELD. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Iowa [Mr. LEACH], the ranking member on the Subcommittee on Asian and Pacific Affairs of the Committee on Foreign Affairs.

Mr. LEACH of Iowa. Mr. Speaker, I rise first to support the President's restraint, and second to support the initiative before Members. The two, in my judgment, are not in contradiction.

Thomas Paine, in this polemic "The Rights of Man" in words later paraphrased by Barry Goldwater, once noted that: "Moderation in temper is always a virtue; moderation in principle is always a vice." It is key that Soviet leadership and Russian people understand that the restraint of the President, his decision not to return to confront is designed to underscore that Lithuania is an issue of indigenous self-determination, not foreign-inspired insurrection, and that a courageous people is not going to be used as a pawn in an East-West conflict.

However, in case there is any question where America stands, this Congress, this administration, the American people, are four squarely on the side of self-determination. We hold as a self-evident truth that Lithuania was never legally incorporated into the Soviet Union. A dirty deal made 50 years ago between two dirty men—Hitler and Stalin—should not be honored by civilized people, within or without the Soviet Union.

There are times in the affairs of states when moral stands must be taken. This issue presents such a circumstance. It is no accident that 10 American administrations, commencing with Franklin Roosevelt and including George Bush, acknowledged the independence of all the Baltic States.

While at first blush it might be argued that the Lithuanian struggles pits two threads in American history—the imperative of self-determination implicit in the Revolutionary War and the imperative of union—an undivided house—implicit in the Civil War in contradestination, it must be pointed out that the Civil War analogy is flawed because all of our States (only one seceding of which—Texas—was a former country) entered the union voluntarily. The analogy is also flawed because the purpose of the Civil War was to end slavery, to advance human freedom, rather than restrict individual rights and aspirations.

Unlike the United States, Lithuania is showing the world that the Soviet Union is a collection of nation states, a boiling, rather than a melting pot. As Members of Congress understand, article 72 of the Soviet constitution gives all 16 Soviet republics the explicit right of secession. Unfortunately, no enabling legislation has ever been adopted. Such legislation is reportedly under consideration today in Moscow, but lest there is doubt if it is designed as a catch-22, an approach which recognizes a right but then stifles its implementation, it will be impossible for the United States to respect a Soviet

constitutional process, thus impossible for the United States to take any stand except one directly confrontational of Moscow and directly supportive of the Lithuanian Government.

Finally, as a reminder to free people everywhere who want to support the changes under way in the Soviet Union, the tanks flexing their armor today, the troops stationed today in what last week was an independent newspaper office, the visas withdrawn this week from foreign journalists, the diplomats recently ousted from Lithuanian soil, stand as a cheering reminder that the Tiananmen Square mentality is tragically alive and well in Soviet occupied Lithuania, as well as China.

In salute to the courage of President Landsbergis and the Lithuanian people, we in Congress can do no less than to stand up for our revolutionary individual rights heritage, and point out how repressive and antirevolutionary Soviet Marxism is.

□ 2020

Mr. Speaker, it is the democracy of Thomas Jefferson and Thomas Paine, not Mikhail Gorbachev, that Congress must reflect upon today. The Lithuanian people deserve our support, because with courage and fortitude they so unmistakably embody our principles.

Mr. HAMILTON. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. DURBIN], the chief sponsor of the resolution.

Mr. DURBIN. Mr. Speaker, let me first express my gratitude to the chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL], the cosponsor of this resolution, the gentleman from Michigan [Mr. BROOMFIELD], and, of course, the gentleman from Indiana [Mr. HAMILTON], chairman of the subcommittee. Without their assistance in bringing this issue to the floor in a timely fashion, we might not have been able to address the issue at this moment. I thank them for their cooperation in crafting the resolution and bringing it to the floor.

Mr. Speaker, whether the United States is losing its position as the dominant economic force in the world, few would dispute the fact that we continue to show leadership in the world as a voice for democracy. The revolutionaries of Eastern Europe quote our Founding Fathers to rally their people, they parade with banners written in English to link their message with America, and they visit this very Chamber to validate their leadership in the world community of free nations.

The role of the United States as inspiration and guardian of democratic values and human rights is not always an easy one. Today our leadership is being tested in the case of Lithuania.

For 50 years the U.S. foreign policy under Democratic and Republican Presidents alike has been consistent. We have refused to recognize the forced annexation of Lithuania and the Baltic nations into the Soviet Union. We rejected the secret agreement between Hilter and Stalin which destroyed the independence of Lithuania, and we stood our ground for half a century for Lithuania's sovereign rights.

That policy and that message were not lost on the people of Lithuania, and on February 24, after years of planning and hope, the people of Lithuania went to the polls in a free and open election and voted by a margin of 80 percent to declare their independence. Make no mistake, the Lithuanians knew the momentous task they faced, but they also knew, or thought they knew, where their democratic ally of 50 years, the United States, would be. Today, only 3 short weeks after their declaration of independence, the people of Lithuania have endured brutal intimidation by Moscow.

Mr. Gorbachev promised a peaceful resolution of Lithuania's future, with no use of military force, but his actions betray his words. As we meet today, America's diplomats have been expelled from Lithuania, and foreign journalists have been forced to leave. Soviet tanks and armored vehicles rumble through the streets of Vilnius. Soldiers occupy Government buildings and newspapers. Young Lithuanians are forcibly rounded up and punished for their refusal to serve in the Soviet Army.

While Mr. Gorbachev applies the pressure to bring this tiny Baltic nation to its knees, Lithuania waits for word that the United States has not abandoned its foreign policy in the Baltic or the dreams of the Lithuania people.

The United States today, as it has for 50 years, holds the lifeline to Lithuania. If we loosen our grip and it slips away, the dream of freedom in Lithuania may be lost for another 50 years.

Today Mr. Shevardnadze arrived in Washington for meetings with the Secretary of State. When he arrived at this airport, he was asked immediately about the situation in Lithuania. He said, and I quote from the Soviet press story:

> You must understand the importance of that question for the Soviet Union and the Soviet people. Our main weapon in resolving any issue . . . is dialog, honest dialog.

I would say to Mr. Shevardnadze that in Lithuania dialog, honest dialog, is possible without tanks, without military planes, without troops, and without pressure. I would say "Dialog Mr. Shevardnadze, honest dialog, is possible with foreign diplomats and foreign reporters standing by." Lithuania has been standing ready for this dialog for 3 weeks, today the fourth delegation of Lithuanians traveled to Moscow in an attempt to open this dialog. The burden is now on the Soviet Union to join Lithuania at the table.

Let us hope that the events of the last few hours indicate that things are on the improving curve, as we hope and will it, in the country of Lithuania. But if the darkest days should come and if that wall of silence should fall around Lithuania, let them hear the words of this resolution from this Congress in the greatest democracy in the world; let them hear that we still stand with Lithuania if it is the last word they hear before the Iron Curtain descends on Lithuania.

Mr. Speaker, from around the world, our hopes and our prayers are for peace and freedom in Lithuania, in the Soviet Union, and around the world.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Washington [Mr. MILLER], member of the Committee on Foreign Affairs and one of the last Congressmen to visit Lithuania following the multiparty elections just recently.

Mr. MILLER of Washington. Mr. Speaker, I thank my distinguished colleague, the gentleman from Michigan, for yielding me this time.

Mr. Speaker, this is an awesome occasion, not just for the people in Lithuania but for the people of the United States, and it is time to reflect back 50 years to when Hitler and Stalin entered into that infamous pact to divide up Eastern Europe.

It was pursuant to that pact that Lithuania was occupied by Soviet troops, who came and occupied an independent Lithuania, an independent Latvia, and an independent Estonia. That pact is today recognized by the Soviet Union as being illegal.

Then, after Lithuania had been occupied by the Nazis and then again by Soviet forces, we entered into what in this country we refer to as the cold war. But what was the major cause of that cold war? It was the occupation of independent nations in Eastern Europe by Soviet troops and the refusal of the Soviets to withdraw their armed forces.

Many nations in Eastern Europe suffered that fate. Now Lithuania wants to reclaim its freedom and independence, just as Poland and Czechoslovakia and Hungary have reclaimed theirs.

My distinguished colleague, the gentleman from Indiana, says that we call for restraint in this resolution by both sides, and certainly we do want restraint by both sides. But after all, when we look at restraint, it is not the Lithuanians who are sending troops and tanks into the Soviet Union, it is not the Lithuanians who are kicking diplomats and journalists out of the

Soviet Union, and it is not the Lithuanians who are breaking into hospitals in Moscow. No, it is the Soviet Union that has been violating restraint.

The Lithuanians are a brave people. Those of us who visited Lithuania in our congressional delegation know how brave and steady and heroic they are. This is the time in the United States and in this Congress to base our foreign policy on what I think are two very good themes: First, consistency with our principles longheld, the principles of human rights and self-determination and independence that we believe in, and, second, to be consistent and steady with the foreign policy that we have pursued in previous years. For 50 years we have pursued a policy of not recognizing the Soviet occupation of Lithuania, and for 50 years the policy of all administrations, as embraced in the platforms of both political parties, has been to welcome an independent Lithuania.

Mr. Speaker, I agree with my colleague, the gentleman from Michigan, that this resolution could be stronger. But it does indeed express our feelings for the people of Lithuania. It does put us on record as supporting recognition at the earliest possible time, and it does put us on record as advising the Soviets that if they use force to settle this dispute, there will be, and I quote, "severe repercussions" in the relations between our two countries.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. Cox].

Mr. COX. Mr. Speaker, not long ago President Vaclav Havel of Czechoslovakia delivered an inspirational address to a joint meeting of this Congress about democracy and the human spirit. That image of a dissident playwright turned president is one of the most stirring proofs that democracy is winning in Eastern Europe.

□ 2030

And yet, Mr. Speaker, the new President of Lithuania makes this former playwright, Vaclav Havel, look like a career politician. Dr. Vytautus Landsbergis is a professor of music. He teaches piano at the conservatory of music at Vilnius. He is soft-spoken and mild-mannered and, like the other leaders of the Sajudis independence movement, he is an intellectual. This is the unlikely general that is leading the fight against the Red Army in Lithuania.

Mr. Speaker, before he became the President of Lithuania, Dr. Landsbergis and I met in my Washington office. We sat down and wrote out the first version of this resolution to support Lithuanian independence. By the time I departed Washington as one of Speaker FOLEY's four-member delegation to the Lithuanian elections, we had gathered over 80 cosponsors. Today, 6 weeks after the Lithuanians swept the Moscow Communists out of office in their elections and 3 weeks after their new parliament declared, reaffirmed, its independence, the Soviet Union is cracking down with violence.

Mr. Speaker, our resolution today congratulates the Lithuanian people on their multiparty elections. It calls on the Soviet Union to respect their independence and to give up its forceable occupation of Lithuania which America has never recognized over half a century. It condemns the use of force which Gorbachev promised he would not use, but which the tanks, and the soldiers and the paratroops show he is, in fact, already using to intimidate the Lithuanian people.

Today our resolution is supported by the leadership of both parties. It answers the call of Landsbergis and the free people of Lithuania for American recognition and support. With this resolution we proudly state America's solidarity with the peaceful Lithuanian revolution.

The message to the Soviet Union from the U.S. Congress should be clear. Give up your unholy empire, and let your colonies go. Stop intimidating as the czars, and the Stalins, and the Khrushchevs and the Brezhnevs. Live in peace with the independent, democratic nations on your borders who offer no threat to you.

Mr. Speaker, Lithuania will be free, and with this resolution the United States can make it clear we intend to stand shoulder to shoulder with the free people of Lithuania.

Mr. Speaker, I am proud to urge my colleagues to vote in favor of this resolution in support of Lithuanian independence.

Mr. BROOMFIELD. Mr. Speaker, I failed to indicate that there are three other Members that were with the gentleman from Washington [Mr. MILLER] on that trip to Lithuania: the gentleman from Illinois [Mr. DURBIN], the gentleman from California [Mr. Cox], and the gentleman from Texas [Mr. SARPALIUS]. Those three should be included, too, and the fact that they were all together.
